| | Comprehension: |
| | Read the below given passage carefully and answer the questions that follow. Climate change has become one of the most pressing global issues in the twenty-first century. Rising temperatures, unpredictable weather patterns, and increasing sea levels pose serious threats to both human populations and natural ecosystems. Urban areas are particularly vulnerable due to dense populations and high energy consumption, which contribute to carbon emissions. Governments, scientists, and communities are collaborating to develop sustainable solutions, such as renewable energy, reforestation, and eco-friendly transportation. Individual actions, including reducing waste, conserving water, and adopting sustainable diets, also play a significant role. Educational programmes are raising awareness and encouraging responsible practices among younger generations. Despite these efforts, many challenges remain, including political disagreements, economic constraints, and unequal access to technology and resources. The fight against climate change requires coordinated global action, long-term planning, and the engagement of every sector of society to safeguard the planet for future generations. |
| | SubQuestion No : 21 |
| Q.2 1 | Select the option that best summarises the passage. |
| Ans | <input checked="" type="checkbox"/> A. Climate change is a minor concern, easily resolved without planning. |
| | <input checked="" type="checkbox"/> B. Urban areas are unaffected by environmental issues. |
| | <input checked="" type="checkbox"/> C. Climate change poses threats globally, requiring collective action and sustainable practices. |
| | <input checked="" type="checkbox"/> D. Only individuals can prevent climate change without governmental involvement. |
