Section : General Paper

Comprehension:

Study carefully the table given below and answer the question asked here under.
The following table gives the percentage of students belonging to low income group in each of the five colleges A, B, C, D and E, along with the proportion of males and females with and without low income.

| College Name | Percentage of students with low income | Proportion of males and females | |
|--------------|--|---------------------------------|--------------------|
| | | With low income | Without low income |
| | | M : F | M : F |
| A | 35 | 5 : 6 | 6 : 7 |
| B | 25 | 3 : 5 | 4 : 5 |
| C | 24 | 1 : 2 | 2 : 3 |
| D | 19 | 3 : 2 | 4 : 3 |
| E | 15 | 5 : 3 | 3 : 2 |

SubQuestion No : 1

Q.1 Which college has the least number of male students with low income, if we assume that every college has equal number of total students?

1. B
2. C
3. D
4. E

Options 1. 1

2. 2
3. 3
4. 4

Question Type : MCQ

Comprehension:**Read the passage given below and answer questions:**

If unpleasant things happen in our daily life, we immediately pay attention to them but do not notice other pleasant things. We experience these as normal or usual. This shows that compassion and affection are part of human nature.

Compassion or love has different levels; some are more mixed than others with desire or attachment. For example, parents' attitudes toward their children contain a mixture of desire and attachment with compassion. The love and compassion between husband and wife—especially at the beginning of marriage when they don't know the deep nature of each other—are on a superficial level. As soon as the attitude of one partner changes, the attitude of the other becomes opposite to what it was. That kind of love and compassion is more of the nature of attachment. Attachment means some kind of feeling of closeness projected by oneself. In reality, the other side may be very negative, but due to one's own mental attachment and projection, it appears as something nice. Furthermore, attachment causes one to exaggerate a small good quality and make it appear 100 percent beautiful or 100 percent positive. As soon as the mental attitudes change, that picture completely changes. Therefore, that kind of love and compassion is, rather, attachment.

SubQuestion No : 46

Q.46 According to the passage, when one partner is negative but appears as nice and pleasant to the other, it is because of the latter's

1. Prejudice
2. Strong feelings
3. Gender Bias
4. Mental projection

Options

1. 1
2. 2

Comprehension:**Read the passage given below and answer questions:**

If unpleasant things happen in our daily life, we immediately pay attention to them but do not notice other pleasant things. We experience these as normal or usual. This shows that compassion and affection are part of human nature.

Compassion or love has different levels; some are more mixed than others with desire or attachment. For example, parents' attitudes toward their children contain a mixture of desire and attachment with compassion. The love and compassion between husband and wife—especially at the beginning of marriage when they don't know the deep nature of each other—are on a superficial level. As soon as the attitude of one partner changes, the attitude of the other becomes opposite to what it was. That kind of love and compassion is more of the nature of attachment. Attachment means some kind of feeling of closeness projected by oneself. In reality, the other side may be very negative, but due to one's own mental attachment and projection, it appears as something nice. Furthermore, attachment causes one to exaggerate a small good quality and make it appear 100 percent beautiful or 100 percent positive. As soon as the mental attitudes change, that picture completely changes. Therefore, that kind of love and compassion is, rather, attachment.

SubQuestion No : 47

Q.47 In our daily life, according to the passage, the _____ things are always noticed.

1. unpleasant
2. normal
3. pleasant
4. humdrum

Options

1. 1
2. 2

Comprehension:

Read the following paragraph and answer the questions:

By the mid-1960's, once the need for precision in geographical research through increased use of statistical-mathematical techniques had been commonly accepted and the controversy regarding systematic versus regional geography resolved, the euphoria about quantitative "revolution" had greatly receded. The professionals began to look back on the course of revolution and assess the resultant gains and losses for the discipline. In human geography, alongside the rejection of the concept of strict operation of the principle of economic rationality there was a perceptible shift from deductive to inductive mode of explanation. The paper titled "The Decision Process in a Spatial Context"(1964) proved seminal in starting of the movement toward behaviouralism as an "alternative" to the normative approach to theory.

SubQuestion No : 141

Q.141 The 'quantitative revolution' phase models and theories were not based on which one of the following assumptions?

1. Man is a rational (economic) person.
2. 'Space' as an isotropic surface.
3. Focus upon the individual rather than to approach problems at the level of the social group.
4. Man has infinite or perfect knowledge of his space (environment and resources)

Options

1. 1
2. 2
3. 3
4. 4

Option 1 ID : 61198711393

Option 2 ID : 61198711394

Option 3 ID : 61198711395

Option 4 ID : 61198711396

Status : Answered

Chosen Option : 4

The logo consists of a large, stylized, light blue 'A' shape with a white '247' inside the right vertical stroke. Below it, the word 'Adda' is written in a bold, light blue sans-serif font, and '247' is in a bold, light blue sans-serif font inside a white rectangular box with a thin black border.

Comprehension:**Read the following paragraph and answer the questions:**

India is a land of great physiographic diversity. In the northern part the highest and the youngest folded mountains of world, glaciated peaks, deep valleys and gorges are present. In the southern part extends the peninsular plateau with ancient Pre-Cambrian rocks, denuded surfaces, senile topography and relict mountains. The Himalayan mountain ranges in the north and north-east along with the Andaman and Nicobar Islands are tectonic ranges and they are primarily result of plate-tectonics.

SubQuestion No : 149**Q.149** Which one of the following was a part of Gondwanaland?

1. Meghalaya plateau
2. Kashmir Valley
3. Andaman and Nicobar Islands
4. Ladakh

Options 1. 1

2. 2
3. 3
4. 4
