

RRB PO Pre 2022 (21st August) Shift-Wise Previous Year Paper Mock 05

Q1. If S sits at the extreme left end, then how many persons are sitting in the row?

Study the following information carefully and answer the questions given below:

Uncertain number of persons is sitting in a row facing north. Q sits fifth to the right of V. Three persons sit between V and A. S sits fifth to the left of A. Only one person sits between V and D. X sits third to the right of D. Only three persons sit between X and C. Q is third from the right end. Only six persons sit between P and T. P is an immediate neighbour of X. S is not the immediate neighbor of D.

(a) 11

(b) 17

(c) 13

(d) 14

(e) 12

Ans.(b)

Q2. If B sits exactly between T and S then what is the position of B with respect to A?

Study the following information carefully and answer the questions given below:

Uncertain number of persons is sitting in a row facing north. Q sits fifth to the right of V. Three persons sit between V and A. S sits fifth to the left of A. Only one person sits between V and D. X sits third to the right of D. Only three persons sit between X and C. Q is third from the right end. Only six persons sit between P and T. P is an immediate neighbour of X. S is not the immediate neighbor of D.

(a) Third to the left

(b) Third to the right

(c) Second to the left

(d) Fourth to the right

(e) None of these

Ans.(a)

Q3. How many persons sit between S and the one who sits immediate left of X?

Study the following information carefully and answer the questions given below:

Uncertain number of persons is sitting in a row facing north. Q sits fifth to the right of V. Three persons sit between V and A. S sits fifth to the left of A. Only one person sits between V and D. X sits third to the right of D. Only three persons sit between X and C. Q is third from the right end. Only six persons sit between P and T. P is an immediate neighbour of X. S is not the immediate neighbor of D.

(a) Nine

(b) Seven

(c) Eight

(d) Ten

(e) None of these

Ans.(c)

Q4. If R sits third to the left of S, then how many persons are sitting between R and D?

Study the following information carefully and answer the questions given below:

Uncertain number of persons is sitting in a row facing north. Q sits fifth to the right of V. Three persons sit between V and A. S sits fifth to the left of A. Only one person sits between V and D. X sits third to the right of D. Only three persons sit between X and C. Q is third from the right end. Only six persons sit between P and T. P is an immediate neighbour of X. S is not the immediate neighbor of D.

- (a) Twelve
- (b) Ten
- (c) Fifteen
- (d) Nine
- (e) None of these

Ans.(d)

Q5. Who among the following sits fifth to the right of A?

Study the following information carefully and answer the questions given below:

Uncertain number of persons is sitting in a row facing north. Q sits fifth to the right of V. Three persons sit between V and A. S sits fifth to the left of A. Only one person sits between V and D. X sits third to the right of D. Only three persons sit between X and C. Q is third from the right end. Only six persons sit between P and T. P is an immediate neighbour of X. S is not the immediate neighbor of D.

- (a) S
- (b) P
- (c) R
- (d) X
- (e) Q

Ans.(d)

Q6.

Statements:

$F = E \leq B, A < D > B > C$

Conclusions:

I. $E > A$

II. $A \geq F$

In these questions relationship between different elements is shown in the statements. These statements are followed by conclusions. You have to find out which of the conclusions follow or not from the given statements.

- (a) Only I is true
- (b) Only II is true
- (c) Either I or II is true
- (d) Both I and II are true
- (e) Neither I nor II is true

Ans.(c)

Q7.

Statements:

$$X > Y \geq Z = M > A \geq B$$

Conclusions:

I. $B < Y$

II. $Y > A$

In these questions relationship between different elements is shown in the statements. These statements are followed by conclusions. You have to find out which of the conclusions follow or not from the given statements.

- (a) Only I is true
- (b) Only II is true
- (c) Either I or II is true
- (d) Both I and II are true
- (e) Neither I nor II is true

Ans.(d)

Q8.

Statements:

$$P < Q > R = Z \leq X = T$$

Conclusions:

I. $T > Z$

II. $Z = T$

In these questions relationship between different elements is shown in the statements. These statements are followed by conclusions. You have to find out which of the conclusions follow or not from the given statements.

- (a) Only I is true
- (b) Only II is true
- (c) Either I or II is true
- (d) Both I and II are true
- (e) Neither I nor II is true

Ans.(c)

Q9. Statements:

Some prime are consonant.

All consonant are cup.

No cup is a cap.

Conclusions:

I. Some consonant being cap is a possibility.

II. All cup being prime is a possibility.

In each question below are given two/three statements followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I follows.
- (b) If only conclusion II follows.
- (c) If either conclusion I or II follows.
- (d) If neither conclusion I nor II follows,
- (e) If both conclusions I and II follow.

Ans.(b)

Q10. Statements:

Some prime are consonant.

All consonant are cups.

No cup is a cap.

Conclusions:

I. No cap is consonant.

II. Some prime are not caps.

In each question below are given two/three statements followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I follows.
- (b) If only conclusion II follows.
- (c) If either conclusion I or II follows.
- (d) If neither conclusion I nor II follows,
- (e) If both conclusions I and II follow.

Ans.(e)

Q11. Statements: All number is digits.

No digit is a numeric.

Conclusions:

I. Some number is not numeric.

II. No number is a numeric.

In each question below are given two/three statements followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I follows.
- (b) If only conclusion II follows.
- (c) If either conclusion I or II follows.
- (d) If neither conclusion I nor II follows,
- (e) If both conclusions I and II follow.

Ans.(e)

Q12. Who among the following person sits third to the right of C?

Study the following information to answer the given questions:

Twelve persons are sitting in two parallel rows containing six persons in each row in such a way that there is an equal distance between adjacent persons. In the first row- A, B, C, D, E and F are seated and all of them are facing south. In the second row- P, Q, R, S, T and V are seated and all of them are facing north. Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.

D sits third to the right of B. Either D or B sits at an extreme end of the line. The one who faces B sits second to right of T. Two people sit between Q and V. Neither Q nor V sits at an extreme end of the line. The immediate neighbour of Q faces the person who sits third to left of A. R sits second to the left of P. C and E are immediate neighbours of each other. E does not face the immediate neighbour of S.

- (a) B
- (b) D
- (c) F
- (d) A
- (e) None of these

Ans.(c)

Q13. How many persons sit between V and S?

Study the following information to answer the given questions:

Twelve persons are sitting in two parallel rows containing six persons in each row in such a way that there is an equal distance between adjacent persons. In the first row- A, B, C, D, E and F are seated and all of them are facing south. In the second row- P, Q, R, S, T and V are seated and all of them are facing north. Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.

D sits third to the right of B. Either D or B sits at an extreme end of the line. The one who faces B sits second to right of T. Two people sit between Q and V. Neither Q nor V sits at an extreme end of the line. The immediate neighbour of Q faces the person who sits third to left of A. R sits second to the left of P. C and E are immediate neighbours of each other. E does not face the immediate neighbour of S.

- (a) One
- (b) Three
- (c) Two
- (d) More than three
- (e) None

Ans.(b)

Q14. The number of persons sits between A and E is same as the number of persons sits between ____ and ____.

Study the following information to answer the given questions:

Twelve persons are sitting in two parallel rows containing six persons in each row in such a way that there is an equal distance between adjacent persons. In the first row- A, B, C, D, E and F are seated and all of them are facing south. In the second row- P, Q, R, S, T and V are seated and all of them are facing

north. Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.

D sits third to the right of B. Either D or B sits at an extreme end of the line. The one who faces B sits second to right of T. Two people sit between Q and V. Neither Q nor V sits at an extreme end of the line. The immediate neighbour of Q faces the person who sits third to left of A. R sits second to the left of P. C and E are immediate neighbours of each other. E does not face the immediate neighbour of S.

- (a) Q, T
- (b) R, V
- (c) D, C
- (d) P, S
- (e) None of these

Ans.(d)

Q15. Who among the following sits second to the right of P?

Study the following information to answer the given questions:

Twelve persons are sitting in two parallel rows containing six persons in each row in such a way that there is an equal distance between adjacent persons. In the first row- A, B, C, D, E and F are seated and all of them are facing south. In the second row- P, Q, R, S, T and V are seated and all of them are facing north. Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.

D sits third to the right of B. Either D or B sits at an extreme end of the line. The one who faces B sits second to right of T. Two people sit between Q and V. Neither Q nor V sits at an extreme end of the line. The immediate neighbour of Q faces the person who sits third to left of A. R sits second to the left of P. C and E are immediate neighbours of each other. E does not face the immediate neighbour of S.

- (a) V
- (b) S
- (c) Q
- (d) T
- (e) None of these

Ans.(c)

Q16. Who among the following sits opposite to V?

Study the following information to answer the given questions:

Twelve persons are sitting in two parallel rows containing six persons in each row in such a way that there is an equal distance between adjacent persons. In the first row- A, B, C, D, E and F are seated and all of them are facing south. In the second row- P, Q, R, S, T and V are seated and all of them are facing north. Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.

D sits third to the right of B. Either D or B sits at an extreme end of the line. The one who faces B sits second to right of T. Two people sit between Q and V. Neither Q nor V sits at an extreme end of the line. The immediate neighbour of Q faces the person who sits third to left of A. R sits second to the left of P. C and E are immediate neighbours of each other. E does not face the immediate neighbour of S.

- (a) E

- (b) C
- (c) D
- (d) F
- (e) None of these

Ans.(d)

Q17. Which of the following points are in a straight line?

Study the following information carefully and answer the given questions.

Point D is 14 m towards the West of Point A. Point B is 4 m towards the South of point D. Point F is 9 m towards the South of point D. Point E is 7 m towards the East of point B. Point C is 4 m towards the North of point E. Point G is 4 m towards the South of point A.

- (a) D, E, A
- (b) E, G, C
- (c) D, B, G
- (d) E, G, B
- (e) F, B, C

Ans.(d)

Q18. Point A is in which direction with respect to Point C?

Study the following information carefully and answer the given questions.

Point D is 14 m towards the West of Point A. Point B is 4 m towards the South of point D. Point F is 9 m towards the South of point D. Point E is 7 m towards the East of point B. Point C is 4 m towards the North of point E. Point G is 4 m towards the South of point A.

- (a) East
- (b) West
- (c) North
- (d) South
- (e) Cannot be determined

Ans.(a)

Q19. If a person walks 5 m towards North from point F and takes a right turn, then which of the following points would he reach first?

Study the following information carefully and answer the given questions.

Point D is 14 m towards the West of Point A. Point B is 4 m towards the South of point D. Point F is 9 m towards the South of point D. Point E is 7 m towards the East of point B. Point C is 4 m towards the North of point E. Point G is 4 m towards the South of point A.

- (a) Point G
- (b) Point D
- (c) Point E
- (d) Point A
- (e) Point C

Ans.(c)

Q20. The position of how many alphabets will remain unchanged if each of the alphabets in the word 'MULTINATIONAL' is arranged in alphabetical order from left to right?

- (a) One
- (b) Three
- (c) Two
- (d) Four
- (e) None

Ans.(a)

Q21. Four of the following five are alike in a certain way so form a group, which of the following does not belong to that group?

- (a) LMR
- (b) DEJ
- (c) TUZ
- (d) KLP
- (e) FGL

Ans.(d)

Q22. How many persons have exam after V?

Study the following information carefully to answer the given questions:

Twelve persons are appearing for an exam on 16th and 27th of the six different months of the same year viz. January, February, April, May, October and November.

R has exam on an odd date. Six persons give exams between R and F. Three persons give exams between H and F. R does not give his exam in February. No one gives exam after M. S and N have exams in the same month but not in the month which has 30 days. S and R have exams on different dates. N does not give exam after H. G gives exam immediately after W and in the month which has 30 days. Only four persons give exam between G and P who has exam after R. T has exam before V and both give exams on the same date. U and R has exam on different dates.

- (a) Three
- (b) Four
- (c) Two
- (d) More than four
- (e) None of these

Ans.(b)

Q23. Which of the following pair of persons have exam in February?

Study the following information carefully to answer the given questions:

Twelve persons are appearing for an exam on 16th and 27th of the six different months of the same year viz. January, February, April, May, October and November.

R has exam on an odd date. Six persons give exams between R and F. Three persons give exams between H and F. R does not give his exam in February. No one gives exam after M. S and N have exams in the same month but not in the month which has 30 days. S and R have exams on different dates. N does not give exam after H. G gives exam immediately after W and in the month which has 30 days. Only four

persons give exam between G and P who has exam after R. T has exam before V and both give exams on the same date. U and R has exam on different dates.

- (a) W, M
- (b) P, M
- (c) H, V
- (d) W, G
- (e) F, T

Ans.(e)

Q24. Four of the following five are alike in a certain way so form a group, who among the following does not belong to that group?

Study the following information carefully to answer the given questions:

Twelve persons are appearing for an exam on 16th and 27th of the six different months of the same year viz. January, February, April, May, October and November.

R has exam on an odd date. Six persons give exams between R and F. Three persons give exams between H and F. R does not give his exam in February. No one gives exam after M. S and N have exams in the same month but not in the month which has 30 days. S and R have exams on different dates. N does not give exam after H. G gives exam immediately after W and in the month which has 30 days. Only four persons give exam between G and P who has exam after R. T has exam before V and both give exams on the same date. U and R has exam on different dates.

- (a) F
- (b) W
- (c) U
- (d) S
- (e) T

Ans.(e)

Q25. Who among the following person appears for exam immediately before N?

Study the following information carefully to answer the given questions:

Twelve persons are appearing for an exam on 16th and 27th of the six different months of the same year viz. January, February, April, May, October and November.

R has exam on an odd date. Six persons give exams between R and F. Three persons give exams between H and F. R does not give his exam in February. No one gives exam after M. S and N have exams in the same month but not in the month which has 30 days. S and R have exams on different dates. N does not give exam after H. G gives exam immediately after W and in the month which has 30 days. Only four persons give exam between G and P who has exam after R. T has exam before V and both give exams on the same date. U and R has exam on different dates.

- (a) P
- (b) U
- (c) V
- (d) S
- (e) None of these

Ans.(d)

Q26. Who among the following has exam on 27th May?

Study the following information carefully to answer the given questions:

Twelve persons are appearing for an exam on 16th and 27th of the six different months of the same year viz. January, February, April, May, October and November.

R has exam on an odd date. Six persons give exams between R and F. Three persons give exams between H and F. R does not give his exam in February. No one gives exam after M. S and N have exams in the same month but not in the month which has 30 days. S and R have exams on different dates. N does not give exam after H. G gives exam immediately after W and in the month which has 30 days. Only four persons give exam between G and P who has exam after R. T has exam before V and both give exams on the same date. U and R has exam on different dates.

- (a) V
- (b) U
- (c) W
- (d) T
- (e) None of these

Ans.(a)

Q27. Who among the following is daughter-in-law of R?

Study the following information carefully to answer the given questions:

There are seven members in a family P, R, M, K, T, O and S among them only two are married couples. M is the grandson of R and has sibling. K is the daughter of S who is daughter-in-law of P. R has only two children. P is mother of O. T is a female member of the family.

- (a) T
- (b) S
- (c) K
- (d) Cannot be determined
- (e) None of these

Ans.(b)

Q28. How K is related to O?

Study the following information carefully to answer the given questions:

There are seven members in a family P, R, M, K, T, O and S among them only two are married couples. M is the grandson of R and has sibling. K is the daughter of S who is daughter-in-law of P. R has only two children. P is mother of O. T is a female member of the family.

- (a) Niece
- (b) Sister
- (c) Daughter
- (d) Aunt
- (e) None of these

Ans.(c)

Q29. If T is married to N, then how N is related to P?

Study the following information carefully to answer the given questions:

There are seven members in a family P, R, M, K, T, O and S among them only two are married couples. M is the grandson of R and has sibling. K is the daughter of S who is daughter-in-law of P. R has only two children. P is mother of O. T is a female member of the family.

- (a) Nephew
- (b) Son
- (c) Son-in-law
- (d) Father-in-law
- (e) None of these

Ans.(c)

Q30. Who among the following person lives on 5th floor?

Study the following information to answer the given questions:

Eight persons are living on different floors of an eight-storey building. The ground floor is numbered as 1 and the topmost floor is numbered as 8. Four persons live between A and C who lives on an even numbered floor. H lives on an odd numbered floor. Two persons live between A and B. Three persons live between E and D who lives on an odd numbered floor above B's floor. More than four persons live between F and G who lives above F's floor.

- (a) F
- (b) D
- (c) B
- (d) H
- (e) None of these

Ans.(d)

Q31. How many persons live below C's floor?

Study the following information to answer the given questions:

Eight persons are living on different floors of an eight-storey building. The ground floor is numbered as 1 and the topmost floor is numbered as 8. Four persons live between A and C who lives on an even numbered floor. H lives on an odd numbered floor. Two persons live between A and B. Three persons live between E and D who lives on an odd numbered floor above B's floor. More than four persons live between F and G who lives above F's floor.

- (a) Three
- (b) More than three
- (c) Two
- (d) One
- (e) None of these

Ans.(b)

Q32. On which of the following floor does F live?

Study the following information to answer the given questions:

Eight persons are living on different floors of an eight-storey building. The ground floor is numbered as 1 and the topmost floor is numbered as 8. Four persons live between A and C who lives on an even numbered floor. H lives on an odd numbered floor. Two persons live between A and B. Three persons live between E and D who lives on an odd numbered floor above B's floor. More than four persons live between F and G who lives above F's floor.

- (a) 6th floor
- (b) 7th floor
- (c) 2nd floor
- (d) 4th floor
- (e) None of these

Ans.(c)

Q33. The number of persons live between D and H is same as the number of persons live between ____ and ____.

Study the following information to answer the given questions:

Eight persons are living on different floors of an eight-storey building. The ground floor is numbered as 1 and the topmost floor is numbered as 8. Four persons live between A and C who lives on an even numbered floor. H lives on an odd numbered floor. Two persons live between A and B. Three persons live between E and D who lives on an odd numbered floor above B's floor. More than four persons live between F and G who lives above F's floor.

- (a) E, A
- (b) H, A
- (c) D, C
- (d) B, G
- (e) None of these

Ans.(a)

Q34. Which of the following statement is true about G?

Study the following information to answer the given questions:

Eight persons are living on different floors of an eight-storey building. The ground floor is numbered as 1 and the topmost floor is numbered as 8. Four persons live between A and C who lives on an even numbered floor. H lives on an odd numbered floor. Two persons live between A and B. Three persons live between E and D who lives on an odd numbered floor above B's floor. More than four persons live between F and G who lives above F's floor.

- (a) H lives immediately below G's floor
- (b) Not more than four persons live below G's floor
- (c) Only two persons live between G and B
- (d) G lives on an odd numbered floor
- (e) None is true

Ans.(e)

Q35. Which of the following combinations is correct?

Study the following information carefully and answer the given questions:

Eight students E, F, G, H, J, K, L and M are studying in three different universities viz. BHU, JNU and DU. At least two but not more than three students are studying in the same university. Each of them is doing different degrees viz. M.Sc., M.A. and M. Com, at least two but not more than three students are doing same degree.

L is doing M.Sc. H is doing M.A. and studying in JNU with only J. E and F are not studying in DU and doing the same degree but not M.A. G is doing M.Sc. and studying in DU with M who is doing M.A. L and G are not studying in the same university. K is not doing M.Com. J is doing M.Sc.

- (a) E – M.Sc.
- (b) F – M. Com
- (c) K – M.Sc.
- (d) F – M.Sc.
- (e) None of these

Ans.(b)

Q36. Which among the following pair of persons are doing M.A.?

Study the following information carefully and answer the given questions:

Eight students E, F, G, H, J, K, L and M are studying in three different universities viz. BHU, JNU and DU. At least two but not more than three students are studying in the same university. Each of them is doing different degrees viz. M.Sc., M.A. and M. Com, at least two but not more than three students are doing same degree.

L is doing M.Sc. H is doing M.A. and studying in JNU with only J. E and F are not studying in DU and doing the same degree but not M.A. G is doing M.Sc. and studying in DU with M who is doing M.A. L and G are not studying in the same university. K is not doing M.Com. J is doing M.Sc.

- (a) M, K
- (b) H, K
- (c) Both (a) and (b)
- (d) E, M
- (e) None of these

Ans.(c)

Q37. Who among the following students are studying in BHU?

Study the following information carefully and answer the given questions:

Eight students E, F, G, H, J, K, L and M are studying in three different universities viz. BHU, JNU and DU. At least two but not more than three students are studying in the same university. Each of them is doing different degrees viz. M.Sc., M.A. and M. Com, at least two but not more than three students are doing same degree.

L is doing M.Sc. H is doing M.A. and studying in JNU with only J. E and F are not studying in DU and doing the same degree but not M.A. G is doing M.Sc. and studying in DU with M who is doing M.A. L and G are not studying in the same university. K is not doing M.Com. J is doing M.Sc.

- (a) E, K

- (b) F, K
- (c) K, L
- (d) E, F
- (e) None of these

Ans.(d)

Q38. In which of the following university K is studying?

Study the following information carefully and answer the given questions:

Eight students E, F, G, H, J, K, L and M are studying in three different universities viz. BHU, JNU and DU. At least two but not more than three students are studying in the same university. Each of them is doing different degrees viz. M.Sc., M.A. and M. Com, at least two but not more than three students are doing same degree.

L is doing M.Sc. H is doing M.A. and studying in JNU with only J. E and F are not studying in DU and doing the same degree but not M.A. G is doing M.Sc. and studying in DU with M who is doing M.A. L and G are not studying in the same university. K is not doing M.Com. J is doing M.Sc.

- (a) BHU
- (b) JNU
- (c) DU
- (d) Cannot determined
- (e) None of these

Ans.(c)

Q39. Four of the following five belong to a group in a certain way, find which of the one does not belong to that group?

Study the following information carefully and answer the given questions:

Eight students E, F, G, H, J, K, L and M are studying in three different universities viz. BHU, JNU and DU. At least two but not more than three students are studying in the same university. Each of them is doing different degrees viz. M.Sc., M.A. and M. Com, at least two but not more than three students are doing same degree.

L is doing M.Sc. H is doing M.A. and studying in JNU with only J. E and F are not studying in DU and doing the same degree but not M.A. G is doing M.Sc. and studying in DU with M who is doing M.A. L and G are not studying in the same university. K is not doing M.Com. J is doing M.Sc.

- (a) E – BHU – M.Sc.
- (b) L – BHU – M.Sc.
- (c) F – JNU – M.Com
- (d) K – DU – M.Sc.
- (e) E – JNU – M.Com

Ans.(b)

Q40. Among A, B, C, D and E, each of them has different weights. D's weight is more than only three persons. B's weight is more than E and less than C. C is not lighter than D. A is heavier than B. Who among them is the third heaviest?

- (a) B

- (b) D
(c) E
(d) A
(e) C

Ans.(d)

Directions (41-45): The table given below shows total number of Android mobiles & IOS mobiles available at three different stores P, Q and R and the table shows the percentage of total mobiles (Android mobiles + IOS mobiles) sold by these stores out of total available mobiles. Read the data carefully and answer the questions.

Stores	Android mobiles	IOS mobiles	Percentage of total mobiles (Android mobiles + IOS mobiles) sold
P	400	300	20%
Q	600	400	40%
R	500	400	30%

Q41. The number of 'Android mobiles' sold by store P and store Q is 30% and 40% respectively. Find the total 'IOS mobiles' sold by store P and Q together?

- (a) 180
(b) 140
(c) 160
(d) 200
(e) 240

Ans.(a)

Q42. The average number of mobiles sold by store Q and store R together is how much more or less than total unsold mobiles by store P?

- (a) 175
(b) 195
(c) 165
(d) 145
(e) 225

Ans.(e)

Q43. If the ratio of total 'Android mobiles' to total 'IOS mobiles' sold by stores R and Q is 5 : 4 and 3 : 2 respectively, then find the total number of 'Android mobiles' sold by store R & Q together?

- (a) 450
(b) 420
(c) 350
(d) 390

(e) 320

Ans.(d)

Q44. Total unsold mobiles of store P is what percent (approximate) of the total unsold mobiles of store Q & R together?

(a) 65%

(b) 60%

(c) 40%

(d) 55%

(e) 45%

Ans.(e)

Q45. Find the total number of mobiles sold by all three stores P, Q & R together?

(a) 720

(b) 780

(c) 810

(d) 840

(e) 880

Ans.(c)

Q46. A man has 250 l milk and each time he takes out 25 l of milk and replaced it with same quantity of water. If he repeats this process thrice then find quantity of milk in final solution (in liter).

(a) 162.225

(b) 182.25

(c) 142.25

(d) 122.25

(e) 102.25

Ans.(b)

Q47. Ratio of volume of two spheres is 27 : 64 and radius of larger sphere is 14 cm. If radius of smaller sphere is 7.5 cm less than side of a square, then find the area of that square (in cm^2)?

(a) 225

(b) 484

(c) 625

(d) 324

(e) 361

Ans.(d)

Q48. Adarsh is two years older than Ayush and ratio of present age of Adarsh and Sameer is 13 : 15 and. If ratio between age of Ayush & Sameer after three years is 9 : 11, then find the difference between Adarsh age after five years & Sameer's present age (in year)?

(a) 1

(b) 2

(c) 3

(d) 4

(e) 5

Ans.(a)

Q49. Two cards are drawn randomly from a pack of 52 cards. Then, find the probability of getting at least one 1 red king and 1 black king, if replacement is not allowed.

(a) $\frac{1}{676}$

(b) $\frac{1}{169}$

(c) $\frac{4}{663}$

(d) $\frac{1}{663}$

(e) $\frac{3}{676}$

Ans.(d)

Q50. A shopkeeper gives one article free at purchase of every four article and also allows 10% discount. If he wants to earn 8% profit then find market price is what percent of cost price of each article.

(a) 150%

(b) 50%

(c) 100%

(d) 75%

(e) 20%

Ans.(a)

Q51. Upstream speed of a boat is $62\frac{1}{2}\%$ of downstream speed of that boat and boat takes 1.5 hours more to cover a distance of 65 km in upstream than that in still water. Find speed of stream?

(a) 6 km/hr

(b) 3 km/hr

(c) 5 km/hr

(d) 4 km/hr

(e) 3.5 km/hr

Ans.(b)

Q52. Hemant invest 1800 Rs at rate of 5% and x% per annum in ratio 4 : 5 respectively. At the end of 2 year, he will get total Rs 160 as SI. Find value of x

(a) 4%

(b) 6%

(c) 8%

(d) 4.5%

(e) 3%

Ans.(a)

Q53. A train of length 1.6 km crosses a pole in 3 min. Another train coming from opposite direction with speed of 50 km/h can cross first train in $2\frac{8}{41}$ min. Find length of train which has speed of 50 km/h.

(a) 1.4 km

(b) 1.2 km

(c) 1.8 km

(d) 3 km

(e) 2 km

Ans.(a)

Q54. Manoj's monthly income is Rs. 5000. Due to 10% increase in his income his expenditure is increased by 18% and savings are reduced by 2%. Find his initial expenditure. (In Rs.)

(a) 3480

(b) 3040

(c) 3000

(d) 3140

(e) 3080

Ans.(c)

Q55. The average weight of seven students in a class is 26.5 kg. When a new student joins them, the average weight increases by 2.5 kg. Find the weight of the new student? (in kg)

(a) 46.5

(b) 43.5

(c) 48.5

(d) 39.5

(e) 41.5

Ans.(a)

Q56.

$24.92\% \text{ of } 180.01 + (18.96)^2 = ? \% \text{ of } 1014.89$

Find the approximate value of question marks (?) in following questions?

(a) 30

(b) 60

(c) 50

(d) 40

(e) 70

Ans.(d)

Q57.

$$(29.02)^2 = (?)^2 - (11.89)^2 + 59.98 \% \text{ of } 599$$

Find the approximate value of question marks (?) in following questions?

- (a) 30
- (b) 25
- (c) 28
- (d) 22
- (e) 19

Ans.(b)

Q58.

$$42.03 \times 15.89 - \sqrt{2303.98} = (?)^2 - 0.99$$

Find the approximate value of question marks (?) in following questions?

- (a) 27
- (b) 22
- (c) 24
- (d) 23
- (e) 25

Ans.(e)

Q59.

$$\frac{455.93}{?} = 12.98 \times 1.99^5 - 44.99\% \text{ of } 840.1$$

Find the approximate value of question marks (?) in following questions?

- (a) 15
- (b) 9
- (c) 18
- (d) 21
- (e) 12

Ans.(e)

Q60.

$$\sqrt{821.01} - \sqrt{1368.97} = \sqrt{?} + \sqrt{575}$$

Find the approximate value of question marks (?) in following questions?

- (a) 25
- (b) 36
- (c) 49
- (d) 16
- (e) 9

Ans.(d)

Q61.

$$7.99^3 \times 2.99^4 \div 11.98^2 + ?^2 = 17.03^2$$

Find the approximate value of question marks (?) in following questions?

- (a) 14
- (b) 19
- (c) 1
- (d) 8
- (e) 4

Ans.(c)

Q62. Veer, Aayush and Shivam entered into a business and invested in the ratio of a : 12 : 15 respectively. If time period for which Veer, Aayush and Shivam invested is in the ratio of 12: 10 : b respectively and the profit share of Veer, Aayush and Shivam are same, then find 'a-b'?

- (a) 4
- (b) 3
- (c) 5
- (d) 2
- (e) None of these

Ans.(d)

Q63. Average of four numbers is increased by 1 when a number is replaced by x and average of that four number is decreased by 1 when another number is replaced with x. What is the difference of the both numbers?

- (a) 6
- (b) 8
- (c) 16
- (d) 4
- (e) Cannot be determined

Ans.(b)

Q64. There are three numbers and the ratio of first to second number is 9:10, while the ratio of first to third number is 3:4. If average of all the three numbers is 62, then find difference of second and third number?

- (a) 8
- (b) 10
- (c) 12
- (d) 14
- (e) 16

Ans.(c)

Q65. 400 students took the All-India mock test, 60% of the boys and 80% of the girls cleared the cut off in this mock test. If the total percentage of students cleared the cut off of this mock test is 65%, then find how many girls appeared in this mock test?

- (a) 100
- (b) 120
- (c) 150
- (d) 300
- (e) 125

Ans.(a)

Q66. Find the ratio of age of Neha four years later to that of age of Vivek ten years later?

Read the given information carefully and answer the following questions.

Aayush has two daughters (Sneha and Neha) and two sons (Vivek and Vikash). Present age of Aayush is equal to the sum of present age of both the sons and 125% of the sum of present age of both the daughters. Vikash was 20 years elder to Sneha who was that time 16 years younger to her sister. 10 years ago, ratio of age of Aayush to that of Vivek at that time was 3:1.

- (a) 2 : 1
- (b) 1 : 2
- (c) 1 : 1
- (d) 3 : 2
- (e) 2 : 3

Ans.(c)

Q67. Find the average of present age of all the five members?

Read the given information carefully and answer the following questions.

Aayush has two daughters (Sneha and Neha) and two sons (Vivek and Vikash). Present age of Aayush is equal to the sum of present age of both the sons and 125% of the sum of present age of both the daughters. Vikash was 20 years elder to Sneha who was that time 16 years younger to her sister. 10 years ago, ratio of age of Aayush to that of Vivek at that time was 3:1.

- (a) 39.6 years
- (b) 39.4 years
- (c) 38.8 years
- (d) 38.4 years
- (e) 39.2 years

Ans.(e)

Q68. Find the difference between sum of present age of Vivek and Vikash together and the sum of present age of Sneha and Neha together?

Read the given information carefully and answer the following questions.

Aayush has two daughters (Sneha and Neha) and two sons (Vivek and Vikash). Present age of Aayush is equal to the sum of present age of both the sons and 125% of the sum of present age of both the

daughters. Vikash was 20 years elder to Sneha who was that time 16 years younger to her sister. 10 years ago, ratio of age of Aayush to that of Vivek at that time was 3:1.

- (a) 14 years
- (b) 21 years
- (c) 18 years
- (d) 20 years
- (e) 12 years

Ans.(a)

Q69. Difference between the age of the eldest child and that of the youngest child is what percent of the present age of Neha?

Read the given information carefully and answer the following questions.

Aayush has two daughters (Sneha and Neha) and two sons (Vivek and Vikash). Present age of Aayush is equal to the sum of present age of both the sons and 125% of the sum of present age of both the daughters. Vikash was 20 years elder to Sneha who was that time 16 years younger to her sister. 10 years ago, ratio of age of Aayush to that of Vivek at that time was 3:1.

- (a) $44\frac{4}{9}\%$
- (b) $55\frac{5}{9}\%$
- (c) $57\frac{1}{2}\%$
- (d) $66\frac{2}{3}\%$
- (e) 60%

Ans.(b)

Q70. If ratio of age of Aayush's wife four years ago to that of her eldest child four years ago was 5: 3 then find the difference between age of Aayush and that of his wife 15 years hence?

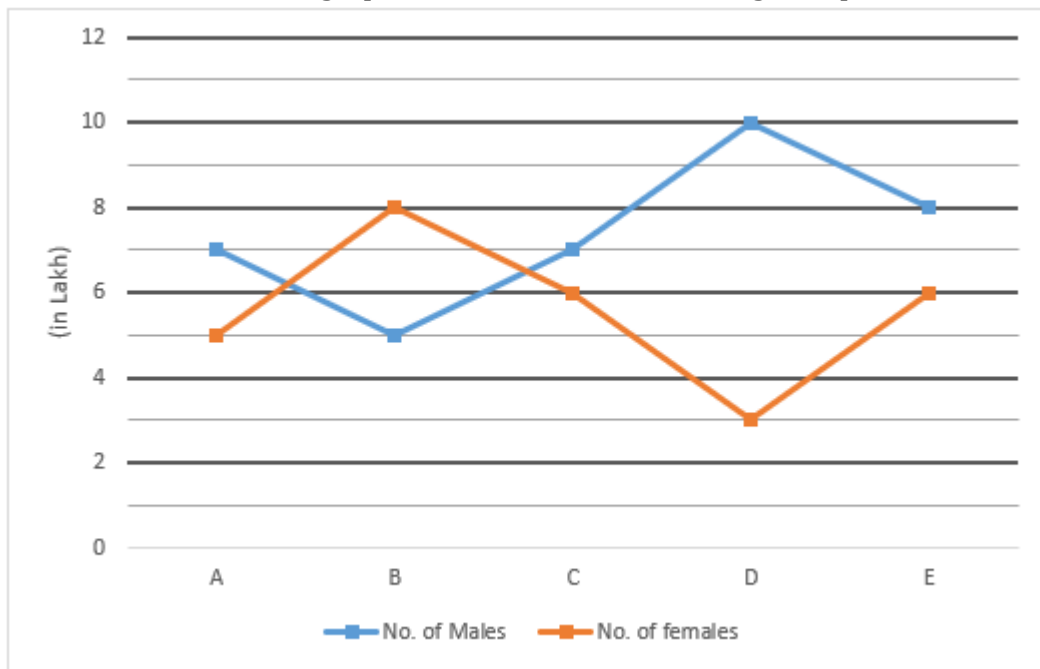

Read the given information carefully and answer the following questions.

Aayush has two daughters (Sneha and Neha) and two sons (Vivek and Vikash). Present age of Aayush is equal to the sum of present age of both the sons and 125% of the sum of present age of both the daughters. Vikash was 20 years elder to Sneha who was that time 16 years younger to her sister. 10 years ago, ratio of age of Aayush to that of Vivek at that time was 3:1.

- (a) 4 years
- (b) 10 years
- (c) 5 years
- (d) 6 years
- (e) 8 years

Ans.(d)

Directions (71-75): - The line graph given below shows the number of males and females in five cities A,B,C,D and E. Read the graph & find the solution of the given questions.

Q71. Which city has the minimum population among the five cities?

- (a) E
- (b) D
- (c) C
- (d) B
- (e) A

Ans.(e)

Q72. If no. of males in city A & B increase by 10% & 20% respectively then what will be the difference in total population of A & B.

- (a) 1 lakh
- (b) 1.1 lakh
- (c) 1.2 lakh
- (d) 1.3 lakh
- (e) 1.4 lakh

Ans.(d)

Q73. Find the ratio of the average no. of males in B, C, D to average no. females in C, D, E ?

- (a) 15 : 23
- (b) 15 : 22
- (c) 22 : 15
- (d) 23 : 15
- (e) None of these

Ans.(c)

Q74. What is % of females (approximate) in total population?

- (a) 35%
- (b) 43%
- (c) 50%
- (d) 30%
- (e) 55%

Ans.(b)

Q75. If the population of D & B increases by 10% & 15% respectively then what will be the ratio of no. of males in D to no. of females in B?

- (a) 7 : 13
- (b) 2 : 1
- (c) 1 : 2
- (d) Can't be determined
- (e) None of these

Ans.(d)

Q76.

I: $2x^2 + 10x + 12 = 0$

II: $y^2 + 10x + 25 = 0$

In each of these questions, two equations (I) and (II) are given. Solve the equations and mark the correct option:

- (a) $x > y$
- (b) $x \geq y$
- (c) $x < y$
- (d) $x \leq y$
- (e) $x = y$ or relation can't be established.

Ans.(a)

Q77.

I. $x^2 - 5x + 6 = 0$

II. $y^2 - 7y + 6 = 0$

In each of these questions, two equations (I) and (II) are given. Solve the equations and mark the correct option:

- (a) $x \leq y$
- (b) $x \geq y$
- (c) $x < y$
- (d) $x > y$
- (e) $x = y$ or relation can't be established.

Q78.

I. $x^2 = 625$

II. $y = \sqrt{625}$

In each of these questions, two equations (I) and (II) are given. Solve the equations and mark the correct option:

(a) $x > y$

(b) $x \geq y$

(c) $x < y$

(d) $x \leq y$

(e) $x = y$ or relation can't be established.

Ans.(d)

Q79.

I. $x^2 + 23x + 130 = 0$

II. $y^2 + 30y + 224 = 0$

In each of these questions, two equations (I) and (II) are given. Solve the equations and mark the correct option:

(a) $x = y$ or relation can't be established.

(b) $x \geq y$

(c) $x < y$

(d) $x \leq y$

(e) $x > y$

Ans.(e)

Q80.

I. $x^2 + 21x + 108 = 0$

II. $y^2 + 24y + 143 = 0$

In each of these questions, two equations (I) and (II) are given. Solve the equations and mark the correct option:

(a) $x = y$ or relation can't be established.

(b) $x \geq y$

(c) $x < y$

(d) $x \leq y$

(e) $x > y$

Ans.(a)
