Directions (82-86): Read the following passage carefully and answer the questions based on the passage:

A radical vision of mental health care needs to be centered on the ideals of dignity and disability justice. It needs to be based on the principles of equity, inclusion, and diversity, but it also needs to account for the complexities at issue. It means simply being there for the person, again and again, through various sufferings, whether it be relationship suffering, suffering related to the things they need, or suffering related to existential issues. In this vision, care as the task of addressing adverse life circumstances, relationship issues, or existential issues, while at the same time addressing needs related to security, relationship, daily accomplishment, or problem-solving, is a very complicated story.

Q82. According to the passage, what should a radical vision of mental health care prioritize?

- (a) Respect for the values of dignity and disability justice and provision of constant and compassionate care.
- (b) Concerned only with medical intervention, to the point of ignoring the relational-existent aspects.
- (c) Reducing care management to short-term crisis interventions.
- (d) Refraining from dealing with complex needs and only addressing safety-related concerns.
