Directions (73-77): Read the following passage carefully and answer the questions based on the passage:

Bertolt Brecht began writing plays in the 1920s, but they didn't gain recognition in the West until the mid-20th century, when people began rejecting Stanislavsky-oriented realism and the presentation of Well-made plays on stage. Epic theatre is based on the theories and practices developed by Brecht in the twenties. 'Epic theatre, German episches Theatre, a mode of instructive theatre showing a number of not so tightly knit scenes that refrained from creating an illusion and frequently broke the plot to talk to the spectators in a direct manner with analysis, argument, or evidence.' It follows the episodic structure and didactic style of Expressionist drama directed by Erwin Piscator. In these plays, Brecht makes use of 'alienation effect' to dissuade the audience from empathizing with characters and focus objectively on the action and argument and draw a conclusion. This theatre also shows Chinese theatre influence, as the actors kept a distance from the characters they impersonated on stage.

Q73. Why did Brecht's plays gain recognition in the West only in the mid-20th century?

- (a) The audiences started to reject the realism of Stanislavsky and the well-made plays and looked for new theatrical forms.
- (b) Brecht changed his style and began writing romantic dramas, which were easier to digest by the public.
- (c) An explanation for this is that his plays were not allowed in Europe until the end of World War II.
- (d) Another reason for this is that he deserted political matters and solely concentrated on entertainment.

Ans.(a)

Q74. What is the defining feature of Epic Theatre according to Brecht's theory?

- (a) A plot that is closely woven together and thus conjures up a strong illusion of reality along with emotional identification
- (b) An emphasis on melodrama and sentimental storytelling in order to evoke empathy
- (c) A series of loosely connected scenes that break the illusion and encourage critical thinking
- (d) The use of improvisation as the only means of communication without any structured narrative

Ans.(c)

Q75. Which theatrical technique did Brecht use to prevent audience empathy and maintain critical distance?

- (a) Alienation effect, keeps the audience critical
- (b) Catharsis, from Greek tragedy
- (c) Stream-of-consciousness, from modernist fiction
- (d) Method acting, by Stanislavsky

Ans.(a)

Q76. What was the factor that contributed to Brecht's concept that performers ought to maintain a certain amount of detachment from their roles?

- (a) The realistic acting approach practiced by Stanislavsky
- (b) The spontaneous methods used in the Italian commedia dell'arte
- (c) The emotional truthfulness in Chekhov's plays
- (d) The significant movements of the Chinese theatre, where players do not completely identify with their character

Ans.(d)

Q77. Which of the following best distinguishes Epic Theatre from traditional realist drama?

- (a) It presents the story in an episodic manner and interacts with the audience directly to provoke their critical thinking
- (b) It seeks to encourage the audience's emotional release by making the illusion of reality more convincing.
- (c) It avoids addressing social issues and primarily explores internal psychological conflicts.
- (d) It emphasizes ornate sets and costumes specifically to heighten the illusion of reality.
