TEST CODE: PPJECI SIV

Question Paper

Civil Engineering, General Awareness, Reasoning and English

Time Allowed: 2 Hrs.

Question Booklet No.

2201151

Max. Marks : 100

DO NOT OPEN THE PAPER SEAL OF THE BOOKLET UNTIL YOU ARE TOLD TO DO SO

INSTRUCTIONS FOR CANDIDATE

1. This Question-Booklet contains 100 Questions on the following:-

Section	Subject	Q. No.	Total Ques.
Part-I	Civil Engineering	1-60	60
Part-II	General Awareness, Reasoning and English	61-100	40
	Total Questions	3.71	100

- 2. There are 16 pages in this Booklet out of which Page No. 1 is for instructions to the candidates. Page Nos. 15 and 16 are meant for Rough Work and page nos. from 2 to 14 contain question of all parts. After opening of the Booklet and before you start answering the questions you must check up this booklet and ensure that it contains all the pages (1·16) and see that no page is missing or repeated. If you find any defect in this booklet, you must get it replaced immediately from the Invigilator within first 10 minutes of start of the Examination.
- 3. You must write you Roll Number in the space provided on the top left had side of Page No. 1 of this Question-
- 4. You will be supplied a one page OMR Answer Sheet separately by the Invigilator. You must complete all the details at appropriate places in the OMR Answer sheet carefully, before you actually start answering the questions.
- 5. The instructions as given on the OMR Answer sheet, must be read carefully by the candidate and action in filling up the desired information in the columns writing a statement and marking the answer to the questions by Pen on Side I and Side -II of the OMR Answer-Sheet should be taken accordingly.
- All questions are compulsory. Each question carries one mark. There is negative marking: 1/4 mark will be deducted for each wrong answer.
- You are required to mark you answers only on the OMR Answer Sheet which has been provided to you separately with BLACK BALL POINT PEN ONLY.
- 8. Use of Books, Notes and copying and receiving/giving assistance is not allowed. Further, use of calculator-separate or with watch, Tablets any type of mobile phones, Books, slide rules, foot rules, note books or written notes is also prohibited during the examination. Any candidate who is found either copying or receiving, giving assistance on using unfair means will be disqualified and his/her candidature will accordingly be cancelled.
- 9. The question booklet and OMR Answer Sheet supplied to the candidate must be returned intact to the room invigilator on completion of examination before you leave examination hall. Any candidate trying to tamper, take them away or found in unauthorized possession of booklet or OMR Answer sheet, is liable for cancellation of candidature or any legal action against him/her.

	<u>Civil</u>	Engin	ineering
Q1) a) c)	Areinforced cement concrete homogeneous material composite material	beam b) d)	m is considered to be made of: heterogeneous material Isotropic material
- Q 2)	A piezometer tube is used only	v for n	mooduming's
a)	moderate pressure	b)	low pressure
a) c)	high pressure	ď)	vacuum pressure
Q 3)	survey is -	s take	ken into consideration if the limit of
a)	less than 250 km ²		b) more than 250 km ²
c)	less than 100 km ²	* * .	d) more than $100 \mathrm{km}^2$
Q4)	Granite is an example of:		
a)	aqueousrocks		b) metamorphic rocks
a) c)	igneous rocks		d) sedimentary rocks
Q5)	The relation between duty (D) and Base Period (B) in days:) in he	hectares / cumec, Delta (Δ) in meters
a)	$\Delta = (8.64 \mathbf{B})/\mathbf{D}$		b) $\Delta = (864 \mathrm{B})/\mathrm{D}$
c)	$\Delta = (86.4 \mathbf{B}) / \mathbf{D}$		d) $\Delta = (8640 \text{B})/D$
			2 2 (0040 B)// B
Q6)	The open wells are also known	as:-	
a)	shallow wells	. 45	b) deep wells
c)	dugwells		d) both (a) & (c)
		x * 2,	a both (a) & (c)
Q7)	The headquarter of Indian Roa	ads Co	Congress is at :-
a)	Mumbai	LUB OC	b) New Delhi
c)	Chennai	181 E Q	d) Hyderabad
			w ilyderabad
Q8)	A type of bond in a brick ma alternate headers and stretche	sonry ers, is	ry in which each course consist of scalled:
a)	English bond	N N	L) Tall 111
c)	Header bond		b) Flemish bond
U)	TICAGET DUILU		d) Stretcher bond

115-

Q9)	
a)	Alkalies b) Lime c) Silica d) Iron-Oxide
	The effective length of a column with one end effectively held in position
Q10	and restrained against rotation and partially restrained against
8 22	rotation but not held in position at the other end is:
a)	0.65L b) $0.8L$ c) $1.5L$ d) L
	The size of step commonly adopted for residential building is: 50 mm x 160 mm b) 300 mm x 130 mm
a)	250 mm x 100 mm
c)	270 mm x 150 mm d) 350 mm x 125 mm
	D. I. Commons the maximum width of a road
Q12	2) According to Indian Roads Congress, the maximum width of a road
	vehicle is: 2.25 m b) 2.35 m c) 2.45 m d) 2.55 m
a)	$2.25 \mathrm{m}$ b) $2.35 \mathrm{m}$ c) $2.45 \mathrm{m}$ d) $2.55 \mathrm{m}$
	lamation is:
	3) The main advantage of providing super-elevation is:
a)	to increase the stability of the fast moving vehicles
b)	to decrease the intensity of stresses on the foundation
c)	only (a) is correct
d)	both (a) and (b) are correct
-	(T) ('11 to alice approximately equal to:
Q1	4) The modulus of elasticity (E) for mild steel is approximately equal to: 10 ls N / mm ² b) 100 kN / mm ²
a)	10 KIN/ IIIII
(c)	$210 \mathrm{kN/mm^2}$ d) $200 \mathrm{kN/mm^2}$
Q1	5) Acolumn that falls due to direct stress, is called
a)	short column b) weak column
c)	long column d) medium column
-	
\wedge Q1	6) Which of the following paint is highly resistant to fire:
a)	Cement paint b) Aspestos paint
c)	Aluminum paint d) Enamel paint
1	Page 3

Q17)	A good building stone is one which d		t absorb more than of its
a) .	weight of water after 24 hrs immers 5% b) 10% c)	The same of the sa	1) 000
a) .	5% b) 10% c)	20 %	d) 30 %
Q18) a)	type of material	ends u b)	pon the:- intensity of traffic
c)	only (b)	d)	both (a) & (b)
Q19) a) b) c) d)	Ariveted joint may fail by: Shearing of rivets tearing of the plate across a row of ri tearing of the plate at an edge any one of these	vets	\$
O20)	When I am an a man and 10	.1	
Q 20)	When 1 cm on a map represents 10 r fraction of the scale is:	n on th	ne ground, the representative
a)	1/10		b) 1/100
c)	1/1000		d) 1/10000
		ose 1	1, 10000
Q21)	The commonly used lime in white wa	ashing	is:-
a)	fatlime		b) hydraulic lime
c)	quick lime		d) lean lime
Q22)	Many Control of Training		
a)	Mean Sea Level for India is:- MSLat Chennai	10	ACCI I D
c) .	MSLat Karachi	p)	MSL at Bombay
٠, .	Modatikaraciii	d)	MSL at Vishakapatnam
Q23)	The presence of	ugos ro	ed colour in water:
a)	iron	b)	calcium carbonate
c)	manganese	d)	sodium fluoride
			20 3.2 4
Q24)	The rail gauge is distance between:	4	
a)	outer faces of rails	b)	running faces of rails
c)	centre to centre of rails	d)	none of these
00:-1			
	Aqueen post truss is commonly used	for spa	ans:-
	upto 3.5 m	b)	from 3.5 m to 5 m
c) .	from 5 m to 8m	d)	from 8 m to 12 m
9	Page 4		# ₃ 22

Q26) a)	For highly M 15	loaded b)	columns, th M 20	e conc c)	rete m M 25	nix of grade is used:- d) M 30	
Q27) a) c)	The bendin $M/I = \sigma/y$ I/M = y/c	r = E/I	}	v v	b) d)	$I/M = \sigma/y = E/R$ $M/I = \sigma/y = R/E$	
Q28)					is exp	pected to have the highe	est
a) c)	ordinary po rapid harde	ortland		days?	b) d)	high alumina cement portland pozzolana cemen	ıt
Q29)	According t	o the U	Jnwin's forn	nula, tl	ne nom	ninal diameter of rivet is:	
a)	$d = t\sqrt{6}$				b)	d=6√t	
c)	$d = t \sqrt{6.6}$	20 38	¥ ,		$\vec{\mathbf{d}}$	$d = 6.6 \sqrt{t}$	
0)	u	34 (d)		124	•	u-0.0,10	
O30)	High turbic	litur of	water can be	dotor	minad	There is a second of the secon	1
	Jacksons tu			ueter.			
a)					p)	turbidity tube	
c) .	Bayli's turk	olaime	ter	(6)	d)	none of these	
~~~	_		22 1 6				
Q31)						n under normal conditions	in
ν.				-1971		pected to be around:	
$\mathbf{a}$ )	115 litres/c				<b>b</b> )	125 litres/day/person	3
c)	135 litres/	day/p	erson		d)	145 litres/day/person	(3)
	87	10					
Q32)	Porosity is	-					ti-
a)			Volume of so	lide	P.		
<b>b</b> )			Total Volume			* # y * * *	
c)			Volume of so				
$\mathbf{d}$			ume of voids		160		_ 7
u)	Volume of a	II. AOI	ullie or voids	•			
			1 ° 0	1.11			
$\mathbf{Q}$ 33)		sible p	H values for	public		r supplies is in the range:	
a)	4.5 to 6.5	S 8	2.000 2.000		<b>b</b> )	6.6 to 8.5	
<b>c</b> )	8.5 to 10.5				<b>d</b> )	10.5 to 14.5	100
	-222					w	54
Q34)			essure can b	e redu	ced by		
$\mathbf{a}$ )	fastclosing				b)	slow closing valves	×
c)	critically clo	osing t	ime valves	2	<b>d</b> )	none of the above	
		•					
			W	Page 5	620		

	Q35) The angle of inclined plane, at which a the pane is called the:	1-1
	the pane is called the:	body just begins to slide down
	a) Angle of friction	
	C) Angle of plans	Angle of slide
e.	d)	none of the above
	Q36) The size of a standard brick is:	
	a) 180 x 80 x 80 mm	av kart i kan
	c) 195 x 95 x 95 mm b)	$190 \times 90 \times 90 \text{ mm}$
	c) $195 \times 95 \times 95 \text{ mm}$	200 x 90 x 90 mm
	037)·m	
	Q37) The preparation of the surface of stone to stones of required size and shape is known	ohtain plain al
	stones of required size and shape is know	nas :
9	a) Quarrying of stones	nas.
	c) blasting of stones b)	dressing of stones
1	<b>"</b>	seasoning of stones
1	Q38) The moisture content in a well seasoned to	
ı	a) 4% to 6%	timber is:
1	c) 15% to 20%	10 % to 12 %
I	d)	100 %
1	Q39) The main in 1:	
ı	Q39) The main ingredients of Portland cement Lime and silica	are:-
ı	, all a billed	Lime and alumina
ı	c) Silica and alumina d)	Lime and iron
ı	O(0) m	
ı	Q40) The initial setting time for ordinary specifications should not be less than	Portland assess
l	specifications should not be less than:	Tortiand cement as per IS
	L)	20 minut
	c) 60 minutes	30 minutes
ı	a)	90 minutes
	Q41) After storage, the strength of cement:	*   <del>   </del>
2		
•	c) remains some	increases
	d)	may increase or decrease
(	Q42) The slump recommended 6	
	Q42) The slump recommended for mass concrete a) 25 mm to 50 mm	e is about:-
		50 mm to 100 mm
_	c) 100 mm to 125 mm d)	125 mm to 150 mm
r		
	Q43) The ultimate tensile strength of structural 160 N/mm ²	mild stooling about
- 10	a) 160 N/mm ² b)	260 N/2
C,	V/ +20 N/ IDM	260 N/mm ²
	w w	520 N/mm ²
	Page 6	
	(50)	

Q45) The type of bond provided in brick masonry for carrying heavy loads is:  a) Single Flemish bond b) Double Flemish bond c) English bond d) Zigzag bond  Q46) The type of footing which is used to transmit heavy loads through steel columns is:  a) Raft foundation b) Grillage foundation c) Well foundation d) Isolated footing  Q47) The bearing capacity of a water logged soil can be improved by:  a) Compacting the soil b) Draining the soil compacting the soil d) Grouting  Q48) The type of roof suitable in plains where rainfall is meager and temperature is high is:  a) Pitched and sloping roof b) Flat roof  c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is / are used in Civil Engineering works:  a) Approximate Estimate b) Plinth Area Estimate  c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because:  a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented  d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be:  a) True RL b) More than True RL  c) Less than True RL  d) None of the above	Q44) a) c)	The vehicle used in case of oil paints is usually:-  Linseed oil  Varnish  Divide Water  None of the above	
a) Single Flemish bond c) English bond d) Zigzag bond  Q46) The type of footing which is used to transmit heavy loads through steel columns is:  a) Raft foundation b) Grillage foundation c) Well foundation d) Isolated footing  Q47) The bearing capacity of a water logged soil can be improved by: a) Compacting the soil c) Increasing the depth of foundation d) Grouting  Q48) The type of roof suitable in plains where rainfall is meager and temperature is high is: a) Pitched and sloping roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: True R L b) More than True R L	U,	Varnish d) None of the above	
c) English bond d) Zigzag bond  Q46) The type of footing which is used to transmit heavy loads through steel columns is:  a) Raft foundation b) Grillage foundation c) Well foundation d) Isolated footing  Q47) The bearing capacity of a water logged soil can be improved by: a) Compacting the soil b) Draining the soil c) Increasing the depth of foundation d) Grouting  Q48) The type of roof suitable in plains where rainfall is meager and temperature is high is: a) Pitched and sloping roof b) Flat roof c) Shell roof b) Flat roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: True RL b) More than True RL	Q45)	) The type of bond provided in brick masonry for carrying heavy loa is:-	ds
columns is:  a) Raft foundation b) Grillage foundation c) Well foundation b) Grillage foundation d) Isolated footing  Q47) The bearing capacity of a water logged soil can be improved by: a) Compacting the soil b) Draining the soil c) Increasing the depth of foundation d) Grouting  Q48) The type of roof suitable in plains where rainfall is meager and temperature is high is: a) Pitched and sloping roof b) Flat roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is / are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L		E 1: 11	*
a) Raft foundation b) Grillage foundation c) Well foundation d) Isolated footing  Q47) The bearing capacity of a water logged soil can be improved by: a) Compacting the soil b) Draining the soil d) Grouting  Q48) The type of roof suitable in plains where rainfall is meager and temperature is high is: a) Pitched and sloping roof b) Flat roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is / are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L	Q46)		el
a) Compacting the soil b) Draining the soil c) Increasing the depth of foundation d) Grouting  Q48) The type of roof suitable in plains where rainfall is meager and temperature is high is: a) Pitched and sloping roof b) Flat roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L		Raft foundation b) Grillage foundation	
a) Pitched and sloping roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L	a)	Compacting the soil  b) Draining the soil	
a) Pitched and sloping roof c) Shell roof d) None of the above  Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works: a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L	Q48)	The type of roof suitable in plains where rainfall is meager ar	ıd
c) Shell roof  Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works:  a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because:  a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be:  a) True R L  b) More than True R L	, a)	temperature is high is	3320
Q49) Which of the following type of estimate(s) is/are used in Civil Engineering works:  a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because:  a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be:  a) True R L b) More than True R L			
a) Approximate Estimate b) Plinth Area Estimate c) Detailed Estimate d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because: a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L	Q49)	Which of the following type of estimate(s) is / are used in Civil	
c) Detailed Estimate  d) All of the above  Q50) The principle of 'working from whole to part' is used in surveying because:  a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be:  a) True R L  b) More than True R L		Approximate Estimate b) Plinth Area Estimate	(3)
a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L	<b>c</b> )	T	
a) Plotting becomes easy b) Survey work can be completed quickly c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L	<b>Q</b> 50)	because ·-	ıg
c) Accumulation of errors is prevented d) All of the above  Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be: a) True R L b) More than True R L		Plotting becomes easy	172
Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be:  a) True R L  b) More than True R L		Survey work can be completed quickly	100
Q51) If the staff is not held vertical at the levelling station, the reduced level calculated from the observation would be:  a) True R L  b) More than True R L		All of the above	
a) True R L b) More than True R L		Third the above	
a) True R L b) More than True R L		calculated from the observation would be:-	əl
		True RL b) More than True RL	
	C)	Less than True R L d) None of the above	

Q52) The type of surveying which a Tacheometry	
a) Tacheometry	requires least office work is:-
c) Plane table surveying	b) Trigonometrical levelling
rane table surveying	d) Theodolite surveying
( CE2) my	donce sar veying
Q53) The ratio of tensile to compr	essive strength of concrete is:
a) 0.025 b) 0.04	c) 0.1 d) 0.4
	a) 0.4
Q54) Contour or contour lines are joining points of equal progress	11
a) joining points of equal process	the imaginary lines:
a) joining points of equal pression for including points of equal pression for including points of equal pression for the pression of the pres	ure on the ground
d) joining points of equal elevated None of the above	ion on the ground
Trone of the above	
OFF) 1171 . 1	
(955) Which of the following grad	es of concrete would you recommend to
prepare the base for a founda a) M 7.5 b) M 15	tion of a maganine Illi
a) M 7.5 b) M 15	Masonly Wall.
	w M 30
Q56) The nominal maximum	e of concrete aggregate in reinforced
cement concrete is limited to	e of concrete aggregate in reinforced
a) One fourth the minimum (1)	- John Jorge
	kness of member
c) Equal to the minimum thickn d) None of the above	ess of member
tione of the above	
057) 4.1	
A beam is likely to have m	aximum crack width at failure when
designed by:-	distribution at failure when
working Stress Method	Market No.
c) Limit State Method	Total Country of the
	d) None of the above
Q58) Which of the following	
Which of the following	
a) Interior column in the following member	r should have maximum cover:
a) Interior column in a building b) Exterior column in a building	should have maximum cover:
b) Exterior column in a huilding	t av " * t if
c) Exterior column in a building Column partly submarged in	
c) Exterior column in a building Column partly submarged in	
c) Exterior column in a building Column partly submerged in sea	ea water water
c) Exterior column in a building c) Column partly submerged in sea d) Column fully submerged in sea Q59) As compared to field rivets the	ea water water
c) Exterior column in a building c) Column partly submerged in sea d) Column fully submerged in sea Q59) As compared to field rivets the s stronger	ea water water shop rivets are:-
c) Exterior column in a building c) Column partly submerged in sea d) Column fully submerged in sea Q59) As compared to field rivets the s stronger	ea water water shop rivets are:- b) weaker
c) Column partly submerged in sea  Q59) As compared to field rivets the say	ea water water shop rivets are:- b) weaker
c) Exterior column in a building c) Column partly submerged in sea d) Column fully submerged in sea Q59) As compared to field rivets the s stronger	ea water water shop rivets are:- b) weaker

Q60 a) b) c) d)	Cables may be used effectively for which of the following structures:  Chimney Suspended roof Bridge All the above  GENERAL KNOWLEDGE				
Q61	The Cnar Minarisin:				
a)	Jimedabad b Fatehpur Sikri				
c) -	Ahmedanagar d) Hyderabad				
1000	): W/h =				
Q02	Who was the first woman to become the Prime Minister of a country in the world:				
a)	Benazir Bhuto b) Indira Gandhi				
c)	Margaret Thatcher d) Sirimavo Bandaranaike				
Q63					
a)	26 January b) 15 August				
c)	5 th September d) 2 nd October				
Q64	The most ancient musical instrument among the following is:				
a) 1/	Sarod b) Tabla c) Veena d) Sitar				
	o, roena di Bitar				
Q65)	Which of the following is not a classical dance?				
a)	77 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1				
ω,	Kathak b) Kuchipudi c) Garbha d) Odissi
