Introduction to Cinematography

Cinematography refers to the art and technology of motion-picture photography. It involves composition, lighting, camera angles, movement, and visual storytelling.

The 5 Cs of Cinematography

Coined by Joseph V. Mascelli, the "5 Cs" are the essential visual components of cinematography:

5 Cs	Explanation
Camera Angles	The positioning of the camera in relation to the subject (e.g., high angle, low angle, eye-level).
Continuity	Logical coherence between successive shots to maintain narrative flow.
Cutting	The technique of editing shots together to create a sequence.
Close-ups	Framing that tightly frames a person or object to show detail and emotion.
Composition	Arrangement of visual elements within a frame (includes Rule of Thirds, symmetry, depth).

Types of Camera Shots

These are critical for visual narration:

- **Establishing Shot** – Sets the scene.
- **Long Shot / Wide Shot (LS/WS)** – Shows subject in full.
- **Medium Shot (MS)** – From waist up.
- **Close-Up (CU)** – Shows details/emotions.
- **Extreme Close-Up (ECU)** – Very tight framing (e.g., eye).
- **Over-the-Shoulder Shot (OTS)** – Common in dialogues.
- **Point of View (POV)** – Through character's eyes.
- **Tracking Shot / Dolly Shot** – Moving with the subject.
- **Crane Shot** – Aerial movement.
- **Tilt/Pan Shots** – Camera moves up/down or side-to-side.

Camera Angles

Understanding angle impacts storytelling:

- **High Angle** – Subject appears small or weak.
- **Low Angle** – Subject appears powerful.
- **Eye-Level** – Neutral.
- **Bird's Eye View** – Top-down.
- **Worm's Eye View** – Extreme low, looking up.

Lighting Techniques

Lighting sets the tone and mood of a scene:

- **Three-Point Lighting** – Key Light, Fill Light, Back Light.
- **High-Key Lighting** – Bright and even (comedies, sitcoms).
- **Low-Key Lighting** – High contrast, shadows (noir, horror).
- **Natural Lighting** – Sunlight or practical light.
- **Motivated Lighting** – Mimics natural light sources in the scene.

Composition & Framing

- **Rule of Thirds**
- **Balance and Symmetry**
- **Depth of Field (DOF)** – Distance between nearest and farthest in focus.
- **Leading Lines**
- **Foreground, Middle ground, Background**
- **Framing within Frame**

Color and Tone in Cinematography

- **Color Temperature** – Measured in Kelvin (warm/cool tones).
- **Color Grading** – Post-production process to enhance mood.
- **Monochrome / Black & White**
- **Symbolic Use of Colors** – E.g., red for danger, blue for calm.

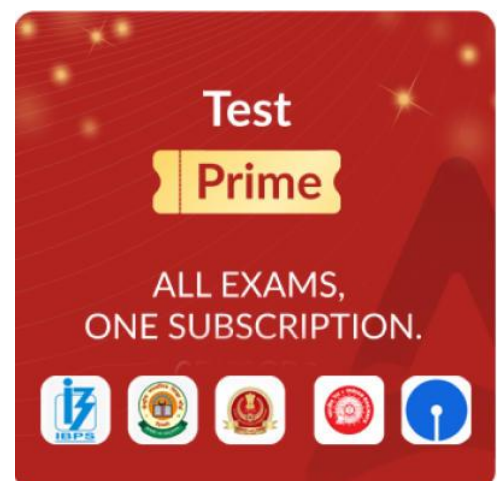

Movement and Motion

Camera movement creates emotion and energy:

- **Zoom** – Magnifies without moving camera.
- **Dolly In/Out** – Physical movement toward/away.
- **Pan/Tilt**
- **Handheld vs. Stabilized**
- **Steadicam**
- **Whip Pan / Swish Pan**

Lenses and Technical Aspects

- **Focal Length (mm)** – Wide-angle, Standard, Telephoto.
- **Aperture (f-stop)** – Controls light and depth of field.
- **Shutter Speed** – Affects motion blur.
- **ISO** – Sensitivity to light.
- **Aspect Ratio** – e.g., 16:9, 4:3, 2.35:1.
- **Frame Rate** – 24 fps (film), 30 fps (TV), slow-motion.

Key Cinematographic Roles

- **Cinematographer / Director of Photography (DoP)** – Head of visual storytelling.
- **Camera Operator** – Manages camera movements.
- **Gaffer** – In charge of lighting.
- **Grip** – Handles rigging and camera support.
- **Focus Puller** – Maintains sharp focus during shots.

Important Cinematography Terms

Term	Definition
Mise-en-scène	All elements within the frame including setting, costume, lighting.
Storyboard	Pre-visual representation of scenes.
Chiaroscuro	High-contrast lighting (light/dark).
