Comprehension:

Read the following paragraph and answer the questions :

Teresa worked as a caregiver for years and when her husband passed away she was completely lost. Fighting grief and housing instability, she turned into a junior assistant cum typist (JA) at a university. She initially felt shame, wondering if she was worth anything. One day, her Supervisor made her as a 'custodian' for people and places. After that she felt noticed and appreciated and so began 18 rewarding years in position.

This is the focal point of mattering - that feeling of being valued and recognition of one's value. It's even more deeper than belonging and is critical to motivation, mental well-being and retention. But currently, many employees feel invisible and undervalued, which leads to disengagement, burnout and low morale. In spite of investments in the workplace, a 'mattering deficit' persists because mattering is constructed through everyday human interactions, not just through policies.

To engage mattering, leaders need to look and listen to their teams, notice difficulties and ask substantive questions. Compassionate acts and follow-ups create trust. Affirming people's strength, narrative and purpose reinforce their distinct value. Sharing impact stories, such as how JACT made spaces joyful, moves the purpose deeper. Individuals also believe that they matter when they see how small efforts relate to larger goals -such as NASA employees connecting their work to landing a man on moon. Essentially, building a culture of mattering means leaders must consistently demonstrate to people they are noticed, heard, valued and required. It's easy to talk about in theory, but not common practice-but revolutionary when it is executed correctly.

SubQuestion No : 141

Q.141

Which of the following statement is NOT supported by the passage ?

- (1) Individuals remain longer in the work environment where they feel mattering.
- (2) Perks alone can ensure emotional connection.
- (3) Seeing and hearing employees can create profound trust.
- (4) Mattering stems from human interactions, rather than policy.

Read the following paragraph and answer the questions :

Teresa worked as a caregiver for years and when her husband passed away she was completely lost. Fighting grief and housing instability, she turned into a junior assistant cum typist (JAT) at a university. She initially felt shame, wondering if she was worth anything. One day, her Supervisor Officer made her as a 'custodian' for people and places. After that she felt noticed and appreciated and so began 18 rewarding years in position.

This is the focal point of mattering - that feeling of being valued and recognition of one's value. It's even more deeper than belonging and is critical to motivation, mental well-being and retention. But currently, many employees feel invisible and undervalued, which leads to disengagement, burnout and low morale. In spite of investments in the workplace, a 'mattering deficit' persists because mattering is constructed through everyday human interactions, not just words or policies.

To engage mattering, leaders need to look and listen to their teams, notice difficulties and ask substantive questions. Compassionate acts and follow-ups create trust. Affirming people's strength, narrative and purpose reinforce their distinct value. Sharing impact stories, such as how JACT made spaces joyful, moves the purpose deeper. Individuals also believe that they matter when they see how small efforts relate to larger goals -such as NASA employees connecting their work to landing a man on moon. Essentially, building a culture of mattering means leaders consistently demonstrate to people they are noticed, heard, valued and required. It's easy to talk about in theory, but not common practice-but revolutionary when it is executed correctly.

Read the following paragraph and answer the questions :

One of numerous executive orders of the President aims to achieve global price parity for prescription drugs sold in the Country X. This move offers hope to many citizen's burdened by high healthcare costs. Enforcing this rule in practice, however, might be challenging because it might entail import-export rules that don't align with existing legislation of Country X. Since to President's previous attempts to lower drug prices during his first term, this move could encounter legal challenges. However, the government can take some action against pharmaceutical companies, commonly referred to as 'Big Pharma', by encouraging less expensive generic drugs and putting an end to unfair practices that delays their release. Perhaps Country X pharmaceutical companies have not yet responded negatively to it possibly because the new order has little effect on their profits.

The majority of Indian pharmaceutical exports to Country X fall into the low profit generic drugs market, which is less vulnerable to President's regulations of Country X. Indian businesses might not receive preferential treatment for their branded medicines as the Country X might prefer to purchase them from developed countries like Germany, UK or France. Additionally, as evidenced by trade negotiation with China, the Country X views pharmaceuticals as a sensitive area and might continue imposing special import duties on them. Generic medications from India are currently free from import duties in the Country X. However it might now insist on the same tariff treatment for its own Pharmaceutical exports to India. Meanwhile, India has established a strong international reputation as a supplier of affordable medications. It can bargain for better conditions by using this image.
