**Read the following passage and answer the questions :**

The stock-taking done at the first national convention on Consumer Protection served to highlight the areas that called for special attention to sustain the momentum of the movement as genuine forum for safeguarding the people's interests. Spreading awareness about the rights of the consumers and the relief open to them in case they did not get their money's worth of goods and services has rightly been identified as the first priority.

While this may not be a difficult task in urban areas, where the movement is concentrated at present, taking it to the vast rural hinterland calls for a multi-media approach in which radio and television have a crucial role to play. The involvement of the 500-odd consumer organizations in the country in publicising the concept of fair trade practices and the remedies available against their violation will prove rewarding, if the message is conveyed through village bodies. Government efforts remain confined at best to setting up the infrastructure after the formal launch of the movement with the enactment of the Consumer Protection Act. The mounting backlog of cases in consumer courts, points to the need for toning up the district level redressal machinery.

Mental training in sports is an essential aspect that often goes unnoticed compared to physical training. Athletes face tremendous pressure during competition and their mental resilience can significantly influence their performance. Mental training involves visualization, concentration and relaxation techniques that helps athletes to enhance their focus, manage stress and maintain a positive mindset. By incorporating mental training in their regular routine, athlete can improve their confidence and develop stronger mental abilities which are crucial for achieving peak performance. Visualization is one of the most effective mental training technique. Athlete mentally rehearse their performance, envisioning themselves executing the skills flawlessly. This practice not only prepares them for the actual competition but also helps in reducing anxiety. Concentration technique such as mindfulness, Tratak (yoga) enables athletes to stay present and focused, minimizing distractions that can hinder the performance. Additionally relaxation strategies, including progressive relaxation, deep breathing and meditation, helps athletes to manage stress and recover mentally after intense training session or competition. Mental Training is a vital component of athletes overall preparation. By prioritizing mental resilience alongside physical training, athletes can unlock their full potential and achieve their ultimate goal in sports.
