#### Comprehension:

Read the following passage and answer the questions :

Every now and then some retired civil servants come out with his memoirs, painting a glorious picture of the heights of administrative efficiency reached during his reign. There is often the suggestion that had there not been so much political interference, things would have been even more fantastic. It is not unusual for the self-styled hero to blame not only interfering politicians but also fellow civil servants who were idiots or crooks, for his failures. This attitude of smug satisfaction is, unfortunately developed during the years of service. Self preservation rather than service is encouraged by our whole system of rules and procedures.

The remedy has to be drastic and quickly effective. The over-protection now granted to civil servants must end. Today to remove an erring civil servant is just not possible. And the only thing that the highest authority in the Government, both in the state and at the centre, can do is to transfer an official from one job to another.

The rules for taking disciplinary action are so complicated that, in the end, the defaulting civil servant gets away, and gets his full emoluments even for the period of the disciplinary proceedings, thus making it a paid holiday for him.

The result is that the administration has become rule-oriented and not result oriented. Action is possible against the official who takes some interest in his work, but no action is ever taken against a person who does not deliver the goods. If the country is to adopt a result oriented approach, it is necessary to link job performance with job retention.

#### Comprehension:

Read the following passage and answer the questions :

'Modernity is a risk culture. I do not mean by this that social life is inherently more risky than it used to be; for most people that is not the case. Rather, the concept of risk becomes fundamental to the way both lay actors and technical specialists organize the social world. Modernity reduces the overall riskiness of certain areas and modes of life, yet at the same time introduces new risk parameters largely or completely unknown to previous eras... Modernity is a runaway engine of enormous power which, collectively as human beings, we can drive to some extent but which also threatens to rush out of our control and which could rend itself asunder. The juggernaut crushes those who resist it, and while it sometimes seems to have a steady path, there are times when it veers away erratically in directions we cannot foresee. The ride is by no means wholly unpleasant or unrewarding; it can often be exhilarating and charged with hopeful anticipation. But, so long as the institutions of modernity endure, we shall never be able to control completely either the path or the pace of the journey. In turn, we shall never able to feel entirely secure, because the terrain across which it runs is fraught with risks of high consequence'.

'Modernity is a risk culture. I do not mean by this that social life is inherently more risky than it used to be; for most people that is not the case. Rather, the concept of risk becomes fundamental to the way both lay actors and technical specialists organize the social world. Modernity reduces the overall riskiness of certain areas and modes of life, yet at the same time introduces new risk parameters largely or completely unknown to previous eras... Modernity is a runaway engine of enormous power which, collectively as human beings, we can drive to some extent but which also threatens to rush out of our control and which could rend itself asunder. The juggernaut crushes those who resist it, and while it sometimes seems to have a steady path, there are times when it veers away erratically in directions we cannot foresee. The ride is by no means wholly unpleasant or unrewarding; it can often be exhilarating and charged with hopeful anticipation. But, so long as the institutions of modernity endure, we shall never be able to control completely either the path or the pace of the journey. In turn, we shall never able to feel entirely secure, because the terrain across which it runs is fraught with risks of high consequence'.

### Comprehension:

Read the following passage and answer the questions :

"One day in 1867, a farm-hand from the village of Lapcourt . . . obtained a few caresses from a little girl, just as he had done before and seen done by the village urchins around him . . . So he was pointed out by the girl's family to the mayor of the village, reported by the mayor to the gendarmes, led by the gendarmes to the judge, who indicted him and turned him over first to a doctor, then to two other experts who not only wrote their report but also had it published. What is the significant thing about this story? The pettiness of it all; the fact that this everyday occurrence in the life of village sexuality, these inconsequential bucolic pleasures, could become, from a certain time, the object not only of a collective intolerance but of a judicial action, a medical intervention, a careful clinical examination, and an entire theoretical elaboration. The thing to note is that they went so far as to measure the brainpan, study facial bone structure, and inspect for possible signs of degenerescence the anatomy of this personage who up to that moment had been an integral part of village life; that they made him talk; that they questioned him concerning his thoughts, inclinations, habits, sensations, and opinions. And then, acquitting him of any crime, they decided finally to make him into a pure object of medicine and knowledge – an object to be shut away till the end of his life in the hospital at Maréville, but also one to be made known to the world of learning through a detailed analysis."
