#### Comprehension:

**Read the following passage carefully and answer the questions:**

Does more education lead to greater democracy? Or are more democratic countries better at educating their citizens? A recent NBER paper compared a group of Kenyan girls in 69 primary schools whose students were randomly selected to receive a scholarship with similar students in schools which received no such financial aid. Previous studies had shown that the scholarship programme led to higher test scores and increased the likelihood that girls enrolled in secondary school.

Overall, it significantly increased the amount of education obtained. For the new study the authors tried to see how the extra schooling had affected the political and social attitudes of the women in question. Findings suggested that education may make people more interested in improving their own lives but they may not necessarily see democracy as the way to do it.

Even in established democracies, more education does not always mean either more active political participation or greater faith in democracy. Poorer and less educated people often vote in larger numbers than their more educated compatriots, who often express disdain for the messiness of democracy yearning for the kind of government that would deal strongly with the corrupt and build highways, railway lines and bridges at a dizzying pace of authoritarian China.

#### SubQuestion No : 46

**Q.46** According to previous study, what led to higher test scores among girl students?

- 1. Remedial classes
- 2. Personalised attention
- 3. Scholarship programme
- 4. Counselling session

Q.117

**Choose the correct sequence of response of immune system**

- A. Synthesizes antibodies which comprises immunoglobulins
- B. Immune system identifies foreign substances in the body
- C. Immunoglobulins specifically designed to bind the antigens
- D. Destroy the antigens

Choose the correct answer from the options given below:

- 1. B, C, D, A
- 2. A, D, C, A
- 3. C, A, B, D
- 4. B, A, C, D

- Options 1. 1  
2. 2  
3. 3  
4. 4

Question Type : MCQ  
Question ID : 93806611524  
Option 1 ID : 93806644877

Q.120

The Cemetery H Culture characteristic features

- A. Elaborate town planning on grid pattern
- B. Motives of peacock, stars and rosette on pottery
- C. Urn burials with disarticulated bones and other grave goods
- D. Stone tablets indicating overseas trade

Choose the correct answer from the options given below:

1. A and B Only
2. B and C Only
3. C and D Only
4. A, B and C Only

Options 1. 1

2. 2
3. 3
4. 4

Q.127 Match the LIST-I with LIST-II

LIST-I (Species concept)		LIST-II (Scholars associated with)	
A.	Biological species concept	I.	Leigh Van Valen
B.	Evolutionary species concept	II.	H. E. H Paterson
C.	Ecological species concept	III.	Ernst Mayr
D.	Recognition species concept	IV.	George Gaylord Simpson

Choose the **correct** answer from the options given below:

1. A-II, B-III, C-IV, D-I
2. A-III, B-IV, C-I, D-II
3. A-I, B-II, C-III, D-IV
4. A-IV, B-I, C-II, D-III

Options 1. 1

2. 2

3. 3

4. 4

Question Type : MCQ

Q.139 Match the LIST-I with LIST-II

LIST-I		LIST-II	
A.	Distance curve	I.	An event in the life cycle that includes rapid increase in stature, development of sex organs, and the development of secondary sexual characteristics
B.	Velocity curve	II.	A rapid increase in stature and other dimensions of the body that occurs during puberty
C.	Adolescent growth spurt	III.	A graph that shows the total height (or other measurement) of an individual on a series of dates
D.	Puberty	IV.	A curve that illustrates the rate of growth over time by plotting the degree of growth per unit of time

Choose the **correct** answer from the options given below:

1. A -IV , B-I , C-III , D-II
2. A-II , B-IV , C-I , D-III
3. A-I , B-III , C-IV , D-II
4. A-III , B-IV , C-II , D-I

Options 1. 1

2. 2
3. 3
4. 4

Status : Answered

Chosen Option : 3

### Comprehension:

The discovery of the AB0 blood group system in 1900 and the proof that these blood types are inherited was an outstanding example of Mendelian inheritance applied to a human character. In 1908, a mathematician and physician, set out the fundamental theorem of population genetics, which explains why a dominant gene does not increase in frequency from generation to generation. Scientists demonstrated that A, B, and 0 blood group characters are due to multiple alleles at one locus. Years later, the combined efforts of researchers led to discovery of the Rh factor and established that hemolytic disease of the newborn owes its origin to immunological maternal–fetal incompatibility. A recent reprint of Davenport’s 1911 book, Heredity in Relation to Eugenics, is accompanied by thoughtful reflections from contemporary geneticists on Davenport’s eugenic concepts and recommendations almost one hundred years later. The stage was set for the demonstration in the 1960s that Rh hemolytic disease of the newborn can be prevented by administration of anti-Rh antibodies to mothers at risk.

### SubQuestion No : 141

Q.141 Who were the discoverers of the fundamental theorem of population genetics?

1. Hardy and Weinberg
2. Haldane and Penrose
3. Harris and Watkins
4. Pauling and Nei

Options 1. 1

2. 2

3. 3

4. 4

In 1908, a mathematician and physician, set out the fundamental theorem of population genetics, which explains why a dominant gene does not increase in frequency from generation to generation. Scientists demonstrated that A, B, and 0 blood group characters are due to multiple alleles at one locus. Years later, the combined efforts of researchers led to discovery of the Rh factor and established that hemolytic disease of the newborn owes its origin to immunological maternal-fetal incompatibility. A recent reprint of Davenport's 1911 book, Heredity in Relation to Eugenics, is accompanied by thoughtful reflections from contemporary geneticists on Davenport's eugenic concepts and recommendations almost one hundred years later. The stage was set for the demonstration in the 1960s that Rh hemolytic disease of the newborn can be prevented by administration of anti-Rh antibodies to mothers at risk.

SubQuestion No : 145

Q.145

Blood group characters are due to multiple alleles at one locus

1. Bernstein in 1924
2. Galton in 1928
3. Fisher in 1935
4. Haldane in 1948

Options 1. 1

2. 2

3. 3

4. 4

Question Type : MCQ

Question ID : 93806611573

Option 1 ID : 93806645069

Option 2 ID : 93806645070

Option 3 ID : 93806645071

Option 4 ID : 93806645072

Status : Answered

Chosen Option : 1

### Comprehension:

Nomothetic research aims to identify laws about human behavior – the Greek word ‘nomos’ means ‘law’. It assumes that it is possible to discover regularities of influence or behavior, allowing experts to predict the likely outcomes of possible actions or innovations. So it looks for general principles, not specific cases. Idiographic research, by contrast, is all about exploring individuality or uniqueness. Idiographic research tends to focus on a single example, which might be a person, an event, a phenomenon, or an organization, and to analyse that example in depth. As a result, idiographic methods are often used in case studies, and are characteristic of ethnographic research. Idiographic studies are likely to adopt an inductive rather than deductive approach, working on the idea that we may discover general principles through a deeper understanding of one or two instances, rather than by looking for common factors. Each type of research has its strengths: identifying common laws or principles has proved valuable in many areas of the social sciences, while studying uniqueness has brought useful insights and has often been the key to opening up new research areas.

SubQuestion No : 146

Q.146

Inductive approach implies moving from:

1. Synchronic to Diachronic
2. Particular to General
3. General to Particular
4. Diachronic to Synchronic

Options 1. 1

2. 2

3. 3

4. 4

### SubQuestion No : 148

Q.148 When a single example like an event and organization is studied in depth, it is called:

1. Critical Ethnography
2. Grounded Theory
3. FGD
4. Case Study

Options 1. 1

2. 2

3. 3

4. 4
