- b) Robert Cox
- c) David Holmes
- d) Karl Marx

Ans 4. *A Systems Analysis of Political Life* was written by **David Easton**, a prominent Canadian-born American political scientist.

Published in **1965**, this book is considered a seminal work in the field of political science. It expanded on his earlier ideas and established what is known as **Systems Theory** in politics.

#### Core Concepts of the Book

Easton's work transformed how politics was studied by viewing it as a dynamic "system" rather than just a set of legal institutions. He introduced a flow model that consists of four main components:

- **Inputs:** These consist of **Demands** (what people want from the government) and **Supports** (the loyalty or obedience people give to the system).
- **The Political System (The "Black Box"):** This is the process where the government or authorities process those inputs.
- **Outputs:** These are the actual **Decisions and Actions** (laws, policies, taxes) made by the authorities.
- **Feedback Loop:** This is the response of the people to the outputs, which then creates new demands or supports, starting the cycle over again.

- **Status:** Although many parts of the Government of India Act 1935 (like Provincial Autonomy) were implemented in 1937, the "Federal" portion of the Act—including the Federal Railway Authority—was never fully operationalized due to the outbreak of World War II and opposition from Indian Princely States.

- **Legacy:** This idea formed the philosophical foundation for the modern demand for equal education and rights.

- a) Harold Lasswell
- b) **Max Weber**

c) David Easton

Easton's definition can be broken down into three key parts:

- **Values:** Not just moral values, but anything society finds important—wealth, power, status, or services.
- **Authoritative:** The decisions are made by an authority (like a government) and are considered binding or "must-be-obeyed" by the people.

### Key Context & Student Movements

While Delhi University was the first to react *after* the Emergency was declared, several other universities played critical roles in the lead-up and during the period:

- **Gujarat University (Navnirman Movement):** In late 1973 and early 1974, a student protest here against hostel food fee hikes sparked a massive movement that eventually led to the resignation of the state government. This is considered the "prelude" to the Emergency.
- **Patna University (JP Movement):** Following Gujarat's lead, students at Patna University launched the Bihar Movement in 1974, inviting **Jayaprakash Narayan (JP)** to lead them. This movement directly challenged Indira Gandhi's central government.
- **Jawaharlal Nehru University (JNU):** JNU became a hub of "underground" resistance. On July 8, 1975, the campus saw a major police raid where numerous students were arrested. Student leaders like **D.P. Tripathi** and **Sitaram Yechury** (who famously read out a memorandum to Indira Gandhi herself) emerged from this struggle.

  - **Marxism:** The belief that history is a series of class struggles leading to a classless society.

Mill's time in Parliament was brief but highly influential, as he used the House of Commons as a platform for radical reforms:

Ans 26

c) Post-modernism

### Why is it linked to Post-modernism?

- **The Linguistic Turn:** Post-modernism shifted focus away from material reality (like economics in Marxism) toward how language and signs shape our world. Deconstruction is the primary method used to analyze this.
- **Decentralization:** Post-modernism seeks to "decenter" authority. Deconstruction does this by showing that every text has multiple, often conflicting, meanings, so no single author or authority has the final word.
