

NTA UGC NET December 2025 31st Dec to 7th Jan 2026

Application No	
Candidate Name	
Roll No.	
Test Date	02/01/2026
Test Time	3.00 PM - 6.00 PM
Subject	81 Social Medicine and Community Health

Section : General Paper

Comprehension:

Study carefully the table given below and answer the question asked here under.

The following table gives the marks (out of 100) of five students (i.e. A, B, C, D and E) over the years 2021 to 2025.

Year	STUDENTS NAME				
	A	B	C	D	E
2021	75	82	75	84	74
2022	90	93	85	86	79
2023	96	76	65	85	85
2024	92	85	66	81	82
2025	86	82	73	80	83

SubQuestion No : 1

Q1 In terms of the cumulative marks from 2021 to 2025, which of the following students has scored maximum marks ?

- (1) A
- (2) B
- (3) C
- (4) D

Options 1. 1

- 2. 2
- 3. 3
- 4. 4

Question Type : MCQ
Question ID : 432449156
Option 1 ID : 432449601
Option 2 ID : 432449602
Option 3 ID : 432449603
Option 4 ID : 432449604
Status : Answered
Chosen Option : 3

Comprehension:

Read the following passage and answer the questions :

John B. Watson, an animal experimentalist who argued that all human action is merely a conditioned response to external environmental stimuli, first popularized stimulus-response psychology. Watson's theory became known as behaviorism in recognition of its narrow focus on isolated human behaviors. Behaviorists rejected psychology's widely held assumption that higher mental processes (that is, conscious thought or reflection) ordinarily control human action. In contrast to such "mentalist" views, behaviorists argued that the only purpose served by consciousness was to rationalize behaviors after they are triggered by external stimuli. Behaviorists attempted to purge all mentalist terms from their theories and to deal strictly with observable variables - environmental stimuli on the one hand and behaviors on the other. By studying the associations that existed between specific stimuli and specific behaviors, behaviorists hoped to discover previously unknown causes for action. One of the central notions in behaviorism was the idea of conditioning. Behaviorists argued that most human behavior is the result of conditioning by the external environment. We are conditioned to act in certain ways by positive and negative stimuli - we act to gain rewards or avoid punishments.

SubQuestion No : 46

Q46 In the passage, instead of the word 'purge', which of the following words can be used :
(1) atone
(2) acquit
(3) kill
(4) cleanse

Options 1.1

Q60 Given below are two statements : one is labelled as **Assertion (A)** and the other is labelled as **Reason (R)**.

Assertion (A) : A useful way of expressing mortality is in terms of the number of deaths divided by the person-years over which a group is observed.

Reason (R) : Individuals are often observed for different periods of time so the unit used for counting observation time is the person-year instead of number of persons.

In the light of the above statements, choose the **most appropriate answer** from the options given below :

- (1) Both (A) and (R) are correct and (R) is the correct explanation of (A)
- (2) Both (A) and (R) are correct but (R) is not the correct explanation of (A)
- (3) (A) is correct but (R) is not correct
- (4) (A) is not correct but (R) is correct

Options 1.1

The logo for Adda247, featuring the word "Adda" in a bold, black, sans-serif font, followed by "247" in a larger, bold, black, sans-serif font. The "247" is enclosed in a white rectangular box with a black border. A large, stylized, light blue letter "A" is positioned above and to the left of the "Adda" text.

Comprehension:

Read the following passage and answer the questions :

For a district Y, having a population of 15,00,000 data regarding Anti malarial activities during the year 2024 is mentioned. Considering the whole population under surveillance, the number of blood smear (slides) examined were 1,10,000. The number of slides positive for plasmodium vivax were 2,050. The number of slides positive for plasmodium falciparum were 310. During the same year, the confirmed deaths due to Malaria were two (2). Assume that the district had fully functional and easily accessible microscopy services and all testing and diagnosis for Malaria was done using microscopy only.

SubQuestion No : 145

Q145 Which among the following best represents the calculation of Annual Blood Examination Rate (ABER) considering the multiplier as 100 ?

- (1) $\frac{1,10,000}{15,00,000} \times 100$
- (2) $\frac{15,00,000}{1,10,000} \times 100$
- (3) $\frac{2360}{1,10,000} \times 100$
- (4) $\frac{2360}{15,00,000} \times 100$

A large, semi-transparent watermark of the Adda247 logo is centered on the page. The logo consists of a stylized red 'A' above the text 'Adda247' in a bold, red, sans-serif font. The '247' is enclosed in a rectangular box with a drop shadow.

Comprehension:

Read the following passage and answer the questions :

There is a city X in India which had a total mid year population of 2,50,000 in the year 2024. Assuming the reproductive age group to be 15 to 44 years, the total mid year population in the reproductive age group was 1,25,000 in the city X during the year 2024. The table given below shows the details of the population in the reproductive age group. The table depicts the age-group wise mid year population of males, females and total, and the age specific fertility rates in the different age groups given as per 1000 mid year female population of the same age group.

Age group (in class intervals of 10 years)	Mid year Population			Age Specific Fertility Rate (ASFR) per 1000 mid year female population of the age group
	Males (n)	Females (n)	Total (n)	
15-24	27,000	25,000	52,000	100
25-34	22,000	20,000	42,000	80
35-44	16,000	15,000	31,000	60
Total	65,000	60,000	1,25,000	-

SubQuestion No : 146

Q146 Which one among the following best represents the total number of births in the city X during the year 2024, from the data given above ?

- (1) 1250
- (2) 2500
- (3) 5000
- (4) 14400
