APTITUDE

The Constitution of India under Part IV (Articles 36-51) lays down Directive Principles of State Policy, which though are not justiciable, are fundamental in the governance of the country. These lay down the duty of the state to strive for the welfare of the people by securing and protecting a social order in which justice-social, economic and political shall form in all institutions of national life. The framers of the Constitution borrowed this idea from the Irish Constitution. Articles 38, 39, 39 A, 41, 42, 43, 43A are Socialist Principles. Articles 40, 43, 43B, 46 and 47 are Gandhian Principles. Articles 44, 45, 48, 49, 50 and 51 are liberal-intellectual principles. The 42nd, 44th and 86th amendments of the constitution have amended the DPSP from time to time.

From which constitution has the feature of Directive Principles adopted by the framers of the Indian Constitution?

308219	British
308220	American
308221	Irish
308222	German

The Constitution of India under Part IV (Articles 36-51) lays down Directive Principles of State Policy, which though are not justiciable, are fundamental in the governance of the country. These lay down the duty of the state to strive for the welfare of the people by securing and protecting a social order in which justice-social, economic and political shall form in all institutions of national life. The framers of the Constitution borrowed this idea from the Irish Constitution. Articles 38, 39, 39 A, 41, 42, 43, 43A are Socialist Principles. The 42nd, 44th and 86th amendments of the constitution have amended the DPSP from time to time.

Choose the correct answer from the given options and fill in the blank.

Village Panchayats are part of _____ principles as per the Indian Constitution.

308227	Liberal
308228	Socialist
308229	intellectual
308230	Gandhian

201981

LEGAL
APTITUDE

The Constitution of India under Part IV (Articles 36-51) lays down Directive Principles of State Policy, which though are not justiciable, are fundamental in the governance of the country. These lay down the duty of the state to strive for the welfare of the people by securing and protecting a social order in which justice-social, economic and political shall form in all institutions of national life. The framers of the Constitution borrowed this idea from the Irish Constitution. Articles 38, 39, 39 A, 41, 42, 43, 43A are Socialist Principles. Articles 40, 43, 43B, 46 and 47 are Gandhian Principles. Articles 44, 45, 48, 49, 50 and 51 are liberal-intellectual principles. The 42nd, 44th and 86th amendments of the constitution have amended the DPSP from time to time.

Choose the correct answer from the options given below and fill in the blank.

Article 44 of the Liberal - intellectual principles sheds light on _____ perspective.

308231	Free legal aid
308232	Fundamental duties
308233	Amendments to the constitution.
308234	Uniform civil code

Correct Option: 308234

Candidate Response: 308234

201982

LEGAL
APTITUDE

Choose the correct option:

Statement: A person is caught driving a motor vehicle without a valid driving license.

Cause: Driving without a license is prohibited under the Motor Vehicles Act, 1988.

Effect: The person may be penalized with a fine or imprisonment.

308235	The cause is true, but the effect is false
308236	The cause is false, but the effect is true
308237	Both the cause and effect are true, and the cause is the correct reason for the effect
308238	Both the cause and effect are true, but the cause is not the correct reason for the effect.

Legal Principle

1. The media cannot usurp the jurisdiction of the courts, which alone have the constitutional authority to decide the guilt/innocence of a person or decide on the content, quality, or width of any right available to any citizen/accused/suspect.
2. Media cannot be given the right to speculate on the outcomes of ongoing investigations, court proceedings, or criminal trials.

Facts

Naman Arora was a well-known prime-time journalist for a media outlet. Suraj, Dileep's brother-in-law, pleaded against Naman, stating that the media outlets subjected Dileep to media trials while reporting on a murder plot case and a sexual assault case. Suraj alleged that the media channel is publishing fabricated allegations against the accused and their associates in the said cases.

As a result, he requested an injunction to prevent the media from covering the court proceedings. According to the petitioner, the top police officers investigating the case were leaking out materials allegedly collected during the investigation, including those from the in-camera trials. Despite the orders of the Magistrate Court and Session Court concerning the publication of details about court proceedings, Reporter TV, as well as the other media portals, had been reporting these details.

Choose the best option as per the legal principle given above :

308239	This clearly interferes with the administration of justice, besides causing prejudice to the petitioner.
308240	Naman Arora is liable as he defamed the celebrity without having any jurisdiction.
308241	Naman Arora is not liable because he has not passed any judgment; merely pointing out a possible outcome is his duty as a news anchor.
308242	Naman Arora is liable as he leaked information that was supposed to be kept confidential.

Correct Option: 308239

Candidate Response: 308242

Legal Principle : All citizens shall have the Right to Freedom of Speech and Expression under Article 19 of the Constitution of India, which is a Fundamental Right with some reasonable restrictions.

Factual Situation : Mr. Sinha, a famous English writer and orator, criticized another novelist, Mr. Rahul stating that: " The novel of Mr. Rahul is irrational and indecent, his mind is impure, he is of a loose character, he should write a decent and good novel."

Decide Can Mr. Sinha be sued for defamation ?

308243	He is liable to be sued for defamation if his statement was not true or was said with a mala fide intention.
308244	He is not liable because he has just expressed his personal views,
308245	He cannot be sued, because both are writers and novelists and both can criticize each other.
308246	He cannot be liable because he has a Fundamental Right to Freedom of Speech and Expression.

Correct Option: 308243

Candidate Response: 308243

01985 LEGAL
APTITUDE

Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement: The law university has made attendance of 75% compulsory for appearing in semester examinations.

Assumption A:Regular attendance improves students' understanding of the subjects.

Assumption B:Students who attend fewer classes cannot perform well in examinations.

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

308247	Only Assumption A is implicit
308248	Only Assumption B is implicit
308249	Neither Assumption A nor Assumption B are implicit
308250	Both Assumption A and Assumption B are implicit

Correct Option: 308247

Candidate Response: 308247

Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement:

The court directed the police to install CCTV cameras in all interrogation rooms.

Assumption A:

Installing CCTV cameras can help prevent custodial violence.

Assumption B:

Police officials have complete trust in the functioning of the CCTV system.

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

308251	Only Assumption A is implicit
308252	Only Assumption B is implicit
308253	Neither Assumption A nor Assumption B are implicit
308254	Both Assumption A and Assumption B are implicit

Correct Option: 308251

Candidate Response: 308251

Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R).

Assertion (A) : The British sovereignty continued to exist in India after August, 15 1947.

Reason (R): The British Sovereignty appointed the last Governor-General of free India

In light of the above statements, choose the *most appropriate* answer from the options given below .

308255	Both (A) and (R) are correct and (R) is the correct explanation of (A).
308256	Both (A) and (R) are correct but (R) is the NOT the correct explanation of (A).
308257	(A) is correct but (R) is incorrect.
308258	(A) is incorrect but (R) is correct.

Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R).

Assertion (A) : Ignorance of law is not an excuse.

Reason (R) : Every person is presumed to know the law of the land.

In light of the above statements, choose the *correct* answer from the options given below.

308259	Both (A) and (R) are true and (R) is the correct explanation of (A).
308260	Both (A) and (R) are true but (R) is NOT the correct explanation of (A).
308261	(A) is true but (R) is false.
308262	(A) is false but (R) is true.

Correct Option: 308259

Candidate Response: 308259

Statement: Despite the Right to Education (RTE) Act, many children remain out of school, indicating poor implementation and awareness.

Courses of Action:

I. The government should launch mass awareness campaigns about RTE and penalize non-compliant schools.

II. Educationally deprived children should be immediately admitted to the nearest government school with free books/uniforms.

Determine whether one or both options follow or not in the given statement and choose the correct option from the options given below:

308263	Only I follows,
308264	Only II follows,
308265	Both I and II follow,
308266	Neither I nor II follows.

Correct Option: 308265

Candidate Response: 308265

Statement:

Several law colleges report a steady rise in plagiarism cases in student research papers and moot memorials.

Courses of Action:

I. Students found guilty of plagiarism should be permanently barred from participating in future academic competitions.

II. Law colleges should introduce mandatory workshops on legal research methodology and citation practices.

III. Colleges should adopt plagiarism detection software and frame proportionate disciplinary guidelines.

IV. Academic publications by law students should be discontinued to avoid plagiarism.

Which of the following is the best course of action?

308267	Only II and III
308268	Only I and II
308269	Only III
308270	Only II, III and IV

Correct Option: 308267

Candidate Response: 308267

Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement: Riya said, "I will call you tomorrow."

Assumption A: Riya's statement is in direct speech.

Assumption B: The indirect form of the sentence is: Riya said that she would call me the next day.

Determine whether one or both assumptions are implicit or not in the given statement and choose the correct option from the options given below:

308575	Only Assumption A is implicit
308576	Only Assumption B is implicit
308577	Neither Assumption A nor Assumption B are implicit
308578	Both Assumption A and Assumption B are implicit

Correct Option: 308578

Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R).

Assertion (A): When reporting a universal truth in indirect speech, the tense of the reported clause does not change.

Reason (R): Universal truths are considered timeless facts and therefore remain in simple present tense even if the reporting verb is in the past tense.

In light of the above statements, choose the *correct* answer from the options given below.

308579	Both (A) and (R) are true and (R) is the correct reason of (A).
308580	Both (A) and (R) are true but (R) is NOT the correct reason of (A).
308581	(A) is true but (R) is false.
308582	(A) is false but (R) is true.

In recent years, cities around the world have been facing serious environmental challenges. Rapid urbanization has increased the demand for transportation, housing, and energy. As a result, air pollution, traffic congestion, and waste management problems have become more common in many metropolitan areas. One solution that many governments are exploring is the development of sustainable cities. A sustainable city is designed to reduce environmental damage while improving the quality of life for its residents. This can include promoting public transportation, building energy-efficient homes, increasing green spaces, and encouraging recycling. Public transportation plays a crucial role in reducing the number of private vehicles on the road. When people use buses, trains, or metro systems instead of cars, fuel consumption decreases and air pollution is reduced. In addition, modern cities are increasingly investing in cycling lanes and pedestrian-friendly infrastructure to encourage healthier and more environmentally friendly modes of travel. Another important aspect of sustainability is efficient energy use. Many cities are adopting renewable energy sources such as solar and wind power. Smart technologies are also being used to monitor energy consumption and reduce waste. For example, smart streetlights automatically adjust brightness depending on the amount of natural light available.

However, creating sustainable cities requires cooperation between governments, businesses, and citizens. While policies and infrastructure are important, individual behavior also plays a major role. Simple actions such as using public transport, conserving electricity, and reducing waste can collectively make a significant difference.

According to the passage, rapid urbanization has led to...

308631	Decrease in population
308632	Reduced transportation demand
308633	Environmental and infrastructure challenges
308634	Complete elimination of pollution

Correct Option: 308633

Candidate Response: 308633

in recent years, cities around the world have been facing serious environmental challenges. Rapid urbanization has increased the demand for transportation, housing, and energy. As a result, air pollution, traffic congestion, and waste management problems have become more common in many metropolitan areas. One solution that many governments are exploring is the development of sustainable cities. A sustainable city is designed to reduce environmental damage while improving the quality of life for its residents. This can include promoting public transportation, building energy-efficient homes, increasing green spaces, and encouraging recycling. Public transportation plays a crucial role in reducing the number of private vehicles on the road. When people use buses, trains, or metro systems instead of cars, fuel consumption decreases and air pollution is reduced. In addition, modern cities are increasingly investing in cycling lanes and pedestrian-friendly infrastructure to encourage healthier and more environmentally friendly modes of travel. Another important aspect of sustainability is efficient energy use. Many cities are adopting renewable energy sources such as solar and wind power. Smart technologies are also being used to monitor energy consumption and reduce waste. For example, smart streetlights automatically adjust brightness depending on the amount of natural light available.

However, creating sustainable cities requires cooperation between governments, businesses, and citizens. While policies and infrastructure are important, individual behavior also plays a major role. Simple actions such as using public transport, conserving electricity, and reducing waste can collectively make a significant difference.

Which of the following helps reduce the number of private vehicles on roads?

308635	Building highways
308636	Public transportation
308637	Increasing fuel prices
308638	Expanding airports

Correct Option: 308636

Candidate Response: 308636

In recent years, cities around the world have been facing serious environmental challenges. Rapid urbanization has increased the demand for transportation, housing, and energy. As a result, air pollution, traffic congestion, and waste management problems have become more common in many metropolitan areas. One solution that many governments are exploring is the development of sustainable cities. A sustainable city is designed to reduce environmental damage while improving the quality of life for its residents. This can include promoting public transportation, building energy-efficient homes, increasing green spaces, and encouraging recycling. Public transportation plays a crucial role in reducing the number of private vehicles on the road. When people use buses, trains, or metro systems instead of cars, fuel consumption decreases and air pollution is reduced. In addition, modern cities are increasingly investing in cycling lanes and pedestrian-friendly infrastructure to encourage healthier and more environmentally friendly modes of travel. Another important aspect of sustainability is efficient energy use. Many cities are adopting renewable energy sources such as solar and wind power. Smart technologies are also being used to monitor energy consumption and reduce waste. For example, smart streetlights automatically adjust brightness depending on the amount of natural light available.

However, creating sustainable cities requires cooperation between governments, businesses, and citizens. While policies and infrastructure are important, individual behavior also plays a major role. Simple actions such as using public transport, conserving electricity, and reducing waste can collectively make a significant difference.

Renewable energy mentioned in the passage includes...

308639	Coal and oil
308640	Solar and wind power
308641	Diesel and petrol
308642	Nuclear fuel only

Correct Option: 308640

Candidate Response: 308640

In recent years, cities around the world have been facing serious environmental challenges. Rapid urbanization has increased the demand for transportation, housing, and energy. As a result, air pollution, traffic congestion, and waste management problems have become more common in many metropolitan areas. One solution that many governments are exploring is the development of sustainable cities. A sustainable city is designed to reduce environmental damage while improving the quality of life for its residents. This can include promoting public transportation, building energy-efficient homes, increasing green spaces, and encouraging recycling. Public transportation plays a crucial role in reducing the number of private vehicles on the road. When people use buses, trains, or metro systems instead of cars, fuel consumption decreases and air pollution is reduced. In addition, modern cities are increasingly investing in cycling lanes and pedestrian-friendly infrastructure to encourage healthier and more environmentally friendly modes of travel. Another important aspect of sustainability is efficient energy use. Many cities are adopting renewable energy sources such as solar and wind power. Smart technologies are also being used to monitor energy consumption and reduce waste. For example, smart streetlights automatically adjust brightness depending on the amount of natural light available.

However, creating sustainable cities requires cooperation between governments, businesses, and citizens. While policies and infrastructure are important, individual behavior also plays a major role. Simple actions such as using public transport, conserving electricity, and reducing waste can collectively make a significant difference.

Smart streetlights are an example of...

308643	Renewable transportation
308644	Smart technology reducing energy waste
308645	Traffic control systems
308646	Security systems

Correct Option: 308644

Candidate Response: 308644

In recent years, cities around the world have been facing serious environmental challenges. Rapid urbanization has increased the demand for transportation, housing, and energy. As a result, air pollution, traffic congestion, and waste management problems have become more common in many metropolitan areas. One solution that many governments are exploring is the development of sustainable cities. A sustainable city is designed to reduce environmental damage while improving the quality of life for its residents. This can include promoting public transportation, building energy-efficient homes, increasing green spaces, and encouraging recycling. Public transportation plays a crucial role in reducing the number of private vehicles on the road. When people use buses, trains, or metro systems instead of cars, fuel consumption decreases and air pollution is reduced. In addition, modern cities are increasingly investing in cycling lanes and pedestrian-friendly infrastructure to encourage healthier and more environmentally friendly modes of travel. Another important aspect of sustainability is efficient energy use. Many cities are adopting renewable energy sources such as solar and wind power. Smart technologies are also being used to monitor energy consumption and reduce waste. For example, smart streetlights automatically adjust brightness depending on the amount of natural light available.

However, creating sustainable cities requires cooperation between governments, businesses, and citizens. While policies and infrastructure are important, individual behavior also plays a major role. Simple actions such as using public transport, conserving electricity, and reducing waste can collectively make a significant difference.

According to the passage, who is responsible for building sustainable cities?

308647	Governments only
308648	Citizens only
308649	Businesses only
308650	Governments, businesses, and citizens

Correct Option: 308650

Candidate Response: 308650

Supposing half a dozen or a dozen men were cast ashore from a wreck on an uninhabited island and left to their own resources, one of course, according to his capacity, would be set to one business and one to another; the strongest to dig and to cut wood, and to build huts for the rest: the most dexterous to make shoes out of bark and coats out of skins; the best educated to look for iron or lead in the rocks, and to plan the channels for the irrigation of the fields. But though their labours were thus naturally severed, that small group of shipwrecked men would understand well enough that the speediest progress was to be made by helping each other and not by opposing each other; and they would know that this help could only be properly given so long as they were frank and open in their relations, and the difficulties which each lay under properly explained to the rest. So that any appearance of secrecy or separateness in the actions of any of them would instantly, and justly, be looked upon with suspicion by the rest, as the sign of some selfish or foolish proceeding on the part of the individual. If, for instance, the scientific man were found to have gone out at night, unknown to the rest, to alter the sluices, the others would think and in all probability rightly think, that he wanted to get the best supply of water to his own field; and if the shoemaker refused to show them where the bark grew which he made the sandals of, they would naturally think and in all probability rightly think, that he didn't want them to see how much there was of it and that he meant to ask from them more corn and potatoes in exchange for his sandals than the trouble of making them deserved. And thus, although each man would have a portion of time to himself in which he was allowed to do what he chose without inquiry, so long as he was working in that particular business which he had undertaken for the common benefit, any secrecy on his part would be immediately supposed to mean mischief; and would require to be accounted for or put an end to and this all the more because, whatever the work might be, certainly there would be difficulties about it which, when once they were well explained, might be more or less done away with by the help of the rest; so that assuredly every one of them would advance with his labour not only more happily, but more profitably and quickly, by having no secrets, and by frankly bestowing, and frankly receiving, such help as lay in his way to get or to give.

Why were the shipwrecked men divided into different tasks?

308651	Because they did not trust each other
308652	Because each person has different abilities
308653	Because they wanted to compete
308654	Because the island was too large

Supposing half a dozen or a dozen men were cast ashore from a wreck on an uninhabited island and left to their own resources, one of course, according to his capacity, would be set to one business and one to another; the strongest to dig and to cut wood, and to build huts for the rest: the most dexterous to make shoes out of bark and coats out of skins; the best educated to look for iron or lead in the rocks, and to plan the channels for the irrigation of the fields. But though their labours were thus naturally severed, that small group of shipwrecked men would understand well enough that the speediest progress was to be made by helping each other and not by opposing each other; and they would know that this help could only be properly given so long as they were frank and open in their relations, and the difficulties which each lay under properly explained to the rest. So that any appearance of secrecy or separateness in the actions of any of them would instantly, and justly, be looked upon with suspicion by the rest, as the sign of some selfish or foolish proceeding on the part of the individual. If, for instance, the scientific man were found to have gone out at night, unknown to the rest, to alter the sluices, the others would think and in all probability rightly think, that he wanted to get the best supply of water to his own field; and if the shoemaker refused to show them where the bark grew which he made the sandals of, they would naturally think and in all probability rightly think, that he didn't want them to see how much there was of it and that he meant to ask from them more corn and potatoes in exchange for his sandals than the trouble of making them deserved. And thus, although each man would have a portion of time to himself in which he was allowed to do what he chose without inquiry, so long as he was working in that particular business which he had undertaken for the common benefit, any secrecy on his part would be immediately supposed to mean mischief; and would require to be accounted for or put an end to and this all the more because, whatever the work might be, certainly there would be difficulties about it which, when once they were well explained, might be more or less done away with by the help of the rest; so that assuredly every one of them would advance with his labour not only more happily, but more profitably and quickly, by having no secrets, and by frankly bestowing, and frankly receiving, such help as lay in his way to get or to give.

What principle is emphasized as the key to the group's success?

308655	Individual independence
308656	Competition among workers
308657	Cooperation and openness
308658	Strict leadership

Correct Option: 308657

Candidate Response: 308657

Supposing half a dozen or a dozen men were cast ashore from a wreck on an uninhabited island and left to their own resources, one of course, according to his capacity, would be set to one business and one to another; the strongest to dig and to cut wood, and to build huts for the rest: the most dexterous to make shoes out of bark and coats out of skins; the best educated to look for iron or lead in the rocks, and to plan the channels for the irrigation of the fields. But though their labours were thus naturally severed, that small group of shipwrecked men would understand well enough that the speediest progress was to be made by helping each other and not by opposing each other; and they would know that this help could only be properly given so long as they were frank and open in their relations, and the difficulties which each lay under properly explained to the rest. So that any appearance of secrecy or separateness in the actions of any of them would instantly, and justly, be looked upon with suspicion by the rest, as the sign of some selfish or foolish proceeding on the part of the individual. If, for instance, the scientific man were found to have gone out at night, unknown to the rest, to alter the sluices, the others would think and in all probability rightly think, that he wanted to get the best supply of water to his own field; and if the shoemaker refused to show them where the bark grew which he made the sandals of, they would naturally think and in all probability rightly think, that he didn't want them to see how much there was of it and that he meant to ask from them more corn and potatoes in exchange for his sandals than the trouble of making them deserved. And thus, although each man would have a portion of time to himself in which he was allowed to do what he chose without inquiry, so long as he was working in that particular business which he had undertaken for the common benefit, any secrecy on his part would be immediately supposed to mean mischief; and would require to be accounted for or put an end to and this all the more because, whatever the work might be, certainly there would be difficulties about it which, when once they were well explained, might be more or less done away with by the help of the rest; so that assuredly every one of them would advance with his labour not only more happily, but more profitably and quickly, by having no secrets, and by frankly bestowing, and frankly receiving, such help as lay in his way to get or to give.

What would the strongest man likely do?

308659	Write reports
308660	Dig, cut wood, and build huts
308661	Make sandals
308662	Plan irrigation systems

Correct Option: 308660

Candidate Response: 308660

Supposing half a dozen or a dozen men were cast ashore from a wreck on an uninhabited island and left to their own resources, one of course, according to his capacity, would be set to one business and one to another; the strongest to dig and to cut wood, and to build huts for the rest: the most dexterous to make shoes out of bark and coats out of skins; the best educated to look for iron or lead in the rocks, and to plan the channels for the irrigation of the fields. But though their labours were thus naturally severed, that small group of shipwrecked men would understand well enough that the speediest progress was to be made by helping each other and not by opposing each other; and they would know that this help could only be properly given so long as they were frank and open in their relations, and the difficulties which each lay under properly explained to the rest. So that any appearance of secrecy or separateness in the actions of any of them would instantly, and justly, be looked upon with suspicion by the rest, as the sign of some selfish or foolish proceeding on the part of the individual. If, for instance, the scientific man were found to have gone out at night, unknown to the rest, to alter the sluices, the others would think and in all probability rightly think, that he wanted to get the best supply of water to his own field; and if the shoemaker refused to show them where the bark grew which he made the sandals of, they would naturally think and in all probability rightly think, that he didn't want them to see how much there was of it and that he meant to ask from them more corn and potatoes in exchange for his sandals than the trouble of making them deserved. What example does the passage give to show selfish behavior?

308663	A man refusing to build huts
308664	A man hiding food from others
308665	The shoemaker hiding where the bark grows
308666	The strongest man refusing to work

Correct Option: 308665

Candidate Response: 308665

Supposing half a dozen or a dozen men were cast ashore from a wreck on an uninhabited island and left to their own resources, one of course, according to his capacity, would be set to one business and one to another; the strongest to dig and to cut wood, and to build huts for the rest: the most dexterous to make shoes out of bark and coats out of skins; the best educated to look for iron or lead in the rocks, and to plan the channels for the irrigation of the fields. But though their labours were thus naturally severed, that small group of shipwrecked men would understand well enough that the speediest progress was to be made by helping each other and not by opposing each other; and they would know that this help could only be properly given so long as they were frank and open in their relations, and the difficulties which each lay under properly explained to the rest. So that any appearance of secrecy or separateness in the actions of any of them would instantly, and justly, be looked upon with suspicion by the rest, as the sign of some selfish or foolish proceeding on the part of the individual. If, for instance, the scientific man were found to have gone out at night, unknown to the rest, to alter the sluices, the others would think and in all probability rightly think, that he wanted to get the best supply of water to his own field; and if the shoemaker refused to show them where the bark grew which he made the sandals of, they would naturally think and in all probability rightly think, that he didn't want them to see how much there was of it and that he meant to ask from them more corn and potatoes in exchange for his sandals than the trouble of making them deserved. And thus, although each man would have a portion of time to himself in which he was allowed to do what he chose without inquiry, so long as he was working in that particular business which he had undertaken for the common benefit, any secrecy on his part would be immediately supposed to mean mischief; and would require to be accounted for or put an end to and this all the more because, whatever the work might be, certainly there would be difficulties about it which, when once they were well explained, might be more or less done away with by the help of the rest; so that assuredly every one of them would advance with his labour not only more happily, but more profitably and quickly, by having no secrets, and by frankly bestowing, and frankly receiving, such help as lay in his way to get or to give.

What principle would help the shipwrecked men make the fastest progress on the island?

308667	Competing with each other
308668	Working secretly
308669	Helping each other openly
308670	Working alone

Correct Option: 308669

Candidate Response: 308669
