TEST BOOKLET SERIES

TEST BOOKLET M.O. (GW) 2017

[Maximum Marks : 100

All questions carry equal marks.

INSTRUCTIONS

- Immediately after the commencement of the examination, you should check that test booklet does not have any unprinted or torn or missing pages or items, etc. If so, get it replaced by a complete test booklet.
- Encode clearly the test booklet series A, B, C or D as the case may be in the appropriate place in the answer sheet.
- Write your Roll Number only in the box provided alongside.
 Do not write anything else on the Test Booklet.
- This Test Booklet contains 100 items (questions). Each item comprises four responses (answers). Choose only one response for each item which you consider the best.
- 5. After the candidate has read each item in the Test Booklet and decided which of the given responses is correct or the best, he has to mark the circle containing the letter of the selected response by blackening it completely with Black or Blue ball pen. In the following example, response "C" is so marked :

- 6. Do the encoding carefully as given in the illustrations. While encoding your particulars or marking the answers on answer sheet, you should blacken the circle corresponding to the choice in full and no part of the circle should be left unfilled. After the response has been marked in the ANSWER SHEET, to erasing/fluid is allowed.
- 7. You have to mark all your responses ONLY on the ANSWER SHEET separately given according to 'INSTRUCTIONS FOR CANDIDATES' already supplied to you. Responses marked on the Test Booklet or in any paper other than the answer sheet shall not be examined.
- All items carry equal marks. Attempt all items. Your total marks will depend only on the number of correct responses marked by you in the Answer Sheet. There will be no negative marking.
- 9. Before you proceed to mark responses in the Answer Sheet fill in the particulars in the front portion of the Answer Sheet as per the instructions sent to you.
- If a candidate give more than one answer, it will be treated as a wrong answer even if one of the given answers happens to be correct.
- 11. After you have completed the test, hand over the Answer Sheet only, to the Invigilator.

Sarcoidosis is associated with : 32.

> Bilateral hilar lymphadenopathy (A)

Non-caseating granulomas (B)

Erythema nodosum (C)

All of the above (D)

All are true for Broca's aphasia, except : 33.

> Lesion is in inferior frontal gyrus (A)

Also called as motor aphasia (B)

Comprehension is retained (C)

Speech output and fluency are intact (D) MO(GW) 2017-A 10

- 34. Which of the following is a class 1 indication for implantation of pacemaker in acquired AV block ?
 - (A) Asymptomatic bradycardia
 - (B) Non-essential drug therapy that produces symptomatic bradycardia
 - (C) Neuromuscular diseases like Myotonic dystrophy
 - (D) Asystole < 3 seconds

35. JVP finding(s) in cardiac tamponade is/are : '

- (A) Prominent x descent
- (B) Prominent y descent
- (C) Absent a wave
- (D) Both (A) and (B)
- 36. Which is true for Irritable Bowel Syndrome (IBS) ?
 - (A) It is a structural disorder of the gastrointestinal tract
 - (B) Abdominal pain usually improves after defection
 - (C) Associated with marked weight loss on most occasions

(D) Tegaserod is used in the diarrhea-predominant form of IBS MO(GW)2017—A 11

- 37. Hemolytic uremic syndrome is characterized by all, except :
 - (A) Commonly preceded by E. coli O157 diarrhea
 - (B) Triad of thrombocytopenia, renal failure and neurological symptoms
 - (C) Peripheral smear shows helmet cells/schistocytes
 - (D) Microangiopathic hemolytic anemia is seen
- 38. Which of the following has HDL cholesterol-raising properties ?
 - (A) Statins
 - (B) Fibrates
 - (C) Ezetimibe
 - (D) Nicotinic acid
- 39. According to JNC 8 recommendations, for a 45-year old diabetic without kidney

disease, the goal is to keep blood pressure (systolic/diastolic in mmHg) below :

(A) 130/80
(B) 130/90
(C) 140/90
(D) 150/90

MO(GW)2017-A

- 40. Anti-GBM antibodies that attack both pulmonary capillaries and glomerulus are seen in :
 - (A) Goodpasture syndrome
 - (B) Auto-immune nephritis
 - (C) Rapidly Progressive Glomerulonephritis (RPGN)
 - (D) Post-streptococcal glomerulonephritis -
- 41. Which of the following is *false* regarding pseudotumor cerebri (benign) intracranial hypertension) ?
 - (A) Commonly seen in obese ladies
 - (B) May be associated with hypervitaminosis A and use of outdated tetracyclines
 - (C) Papilledema is always absent
 - (D) Treatment options include weight loss and acetazolamide
- 42. Heyde syndrome refers to the association of aortic stenosis with :
 - (A) Renal failure
 - (B) Alzheimer's dementia
 - (C) Gastrointestinal bleeding
 - (D) Pulmonary fibrosis

MO(GW)2017-A

- 43. Conjugated hyperbilirubinemia with darkly stained (black) liver is seen in :
 - (A) Rotor syndrome
 - (B) Crigler-Najjar syndrome
 - (C) Gilbert syndrome
 - (D) Dubin-Johnson syndrome
- 44. Wire-loop lesions in SLE/lupus nephritis are seen in :
 - (A) Class 1 (minimal mesangial) lupus nephritis
 - (B) Class 2 (mesangial proliferation) lupus nephritis
 - (C) Class 3 (focal nephritis) lupus nephritis
 - (D) Class 4 (diffuse form) lupus nephritis
- 45. Which antibody is specific for drug-induced lupus ?
 - (A) anti-CCP antibody (B) anti-histone antibody
 - (C) lupus anticoagulant (D) anti-ds DNA antibody
- 46. What is the most common clinical presentation of patients with sickle-cell trait ?
 - (A) Dactylitis (B) Recurrent pneumonias
 - (C) Autosplenectomy (D)
- MO(GW)2017-A

None of these

- 47. Progressive brain inflammation cuased by persistent infection with measles virus and seen years after initial infection is called as :
 - (A) Progressive Multifocal LeukoEncephalopathy (PMLE)
 - (B) Spongiform Encephalopathy
 - (C) Subacute Sclerosing PanEncephalitis (SSPE)
 - (D) Creutzfeldt-Jakob disease
- 48. Which of the following options correctly reflects the set of changes seen in anemia of chronic disease ?

| | Size of RBCs | Serum Iron | TIBC | Ferritin |
|-----|--------------|------------|--------|-----------|
| | A R S | Levels | * 81 V | Levels |
| (A) | Normocytic | Low | Low | High |
| (B) | Microcytic | High | Low | High |
| (C) | Microcytic | Low | High | Low |
| (D) | Microcytic | Low | Low | Normal to |
| | | × | 19 A. | High |

49. MDR-TB (Mutli Drug Resistant TB) is defined as resistance to :

| | (A) | INH | (isoniazid) | | (B) | Rifampicin | ťő., | |
|----|--------|-------|----------------|----|-----|--------------|------|--------|
