**Note:**

1. The Notification of “The Uttar Pradesh Direct Recruitment to Junior Level Posts (Discontinuation of interview) Rules 2017” Notification Miscellaneous No. 4/2017/1/1/2017-Ka-2 Dated 31 August 2017, the earlier provisions/guidelines in respect of recruitment of group ‘B’ (Non Gazetted), group ‘C’ and group ‘D’ are superseded by this rule 2017 and recommended to adopt these Rules for recruitment of group ‘B’ (Non Gazetted), group ‘C’ and group ‘D’ posts of the Institute.
2. Skill test will be carried out by the Examination section, SGPGIMS, Lucknow. Candidates equal to three times the number of posts advertised in each category will be shortlisted after the Common Recruitment Test (CRT) to appear for the Skill Test/ Technical Examination in Stenography/ Typing Test etc. In case of a tie at the last place, all applicants who tie at the last place will be called for the Skill Test/ Technical Examination. This list will be declared in order of Roll No./ in alphabetical order (NOT in order of merit). In such cases, however, the Skill Test/ Technical Examination will be only qualifying in nature and such marks (of the Skill Test/ Technical Examination) shall not be counted in the overall selection procedure i.e. the final selection will be made on the basis of the marks obtained in the CRT only by the candidates who qualify the Skill Test/ Technical Examination. It may, therefore, so happen that a candidate who stands high in the merit list of the CRT may not be selected finally because he/she fails to qualify the Skill Test/ Technical Examination. For this reason, the final merit list of the CRT will be declared after the qualifying Skill Test/ Technical Examination only. It needs to be noted that the Skill Test/ Technical Examination which is qualifying in nature has to be held after the written examination because of logistic reasons, considering a large number of applications.

## Score Normalization

### About Normalization

Normalization means adjusting values measured on different scales to a notionally common scale

**Need for Normalization in Exam:-** Exam pertaining for a particular post/course could be spread across multiple shifts which will have different question paper for each shift. The normalization is to be done by considering the difficulty level of each set, since the questions may be different in different sets and difficulty level of a particular set may be different from other sets.

Hence the normalization of scores need to be carried out for all the candidates who had written the exam, across shifts for the same post/course.

### **Normalization Method:**

The following has to be calculated for every shift for all the candidates who have written the exam for the same post:

a. Average score for each Shift  $X_{av}$  = total marks scored by candidates in a shift divided by no. of candidates in the shift.

b. Standard Deviation of score for each Shift. Standard Deviation is a measure that is used to quantify the amount of variation of a set of data values:

N = Number of candidates

X = Raw score of candidates

L = Total Raw score for all candidates in a shift

$X_{av}$  = Average which is total marks divided by no. of candidates.

x = Raw Score of Candidate - Simple Average ( $X - X_{av}$ ) Standard Deviation (S) =  $(\sum x^2)/N$

### **Normalization Formula**

**Normalized Score for each candidate ( $X_n$ ) =  $X_n = (S_2 / S_1) * (X - X_{av}) + Y_{av}$**

S2	Is the SD of the shift with the Highest Average Score taken as Base for normalization (Criteria for choosing the base for normalization is generally taken as the shift with 'Highest Average' of raw scores)
S1	Standard Deviation for the corresponding shift (to be scaled to S2)
X	Raw score of a candidate
$X_{av}$	Simple average of the Shift
$Y_{av}$	Average corresponding to shift with highest Average (taken as Base for normalization)

Criteria for choosing the base for normalization is generally taken as the shift with 'Highest Average' of raw scores. Only exception is made if this shift (with highest average) has far less number of candidates as compared to other shifts. In that case we take the next shift with 'highest Average' as base for normalization.

70% of the average attendance is the limit. Any value below this should not be considered for the base.
