Subject	Engineer Trainee Electronics

Section : **Section I Question on Subject Discipline**

Q.1 What is the approximate input impedance of a Darlington transistor pair?

Ans
✗ A. Very low
✗ B. Equal to that of a single transistor
✓ C. Very high
✗ D. Depends on the output impedance

Question ID : **44100988861**
Option 1 ID : **441009353440**
Option 2 ID : **441009353441**
Option 3 ID : **441009353439**
Option 4 ID : **441009353442**
Status : **Not Answered**
Chosen Option : **--**

Q.2 What is the 1's complement of the binary number 1011?

Ans
✓ A. 0100
✗ B. 0011
✗ C. 0101
✗ D. 1010

Question ID : **441009119010**
Option 1 ID : **441009473159**
Option 2 ID : **441009473162**
Option 3 ID : **441009473161**
Option 4 ID : **441009473160**
Status : **Answered**
Chosen Option : **A**

Q.3 What is the ROC for a right-sided sequence x[n], where x[n] = 0 for n < N?

Ans
- ✔ A. |z| > R
- ✘ B. The entire z-plane
- ✘ C. The unit circle |z| = 1
- ✘ D. |z| < R

Question ID : **44100972586**
Option 1 ID : **441009288658**
Option 2 ID : **441009288659**
Option 3 ID : **441009288660**
Option 4 ID : **441009288657**
Status : **Answered**
Chosen Option : **B**

Q.4 The ROC of a two-sided sequence (which extends both in positive and negative time directions) is:

Ans
- ✘ A. $|z| < R_2$
- ✔ B. $R_1 < |z| < R_2$
- ✘ C. $|z| > R_1$
- ✘ D. the entire z-plane

Question ID : **44100972604**
Option 1 ID : **441009288722**
Option 2 ID : **441009288723**
Option 3 ID : **441009288721**
Option 4 ID : **441009288724**
Status : **Answered**
Chosen Option : **B**

Q.5 For a given matrix $A=\begin{bmatrix}4 & 1 & -1\\ 2 & 5 & -2\\ 1 & 1 & 2\end{bmatrix}$, which of the following statements :

Ans

✗ A. $\begin{bmatrix}1\\1\\1\end{bmatrix}$ is an eigen vectors of A corresponding to an eigen value $\lambda=5$

✗ B. $\begin{bmatrix}1\\1\\2\end{bmatrix}$ is an eigen vectors of A corresponding to an eigen value $\lambda=5$

✗ C. $\begin{bmatrix}1\\0\\-1\end{bmatrix}$ is an eigen vectors of A corresponding to an eigen value $\lambda=3$

✓ D. $\begin{bmatrix}1\\0\\1\end{bmatrix}$ & $\begin{bmatrix}0\\1\\1\end{bmatrix}$ are two linearly independent eigen vectors of A corresponding to an eigen value $\lambda=3$

Question ID : **44100989779**
Option 1 ID : **441009357287**
Option 2 ID : **441009357288**
Option 3 ID : **441009357285**
Option 4 ID : **441009357286**
Status : **Not Answered**
Chosen Option : **--**

Q.6 The complement of the expression A + B is:

Ans

✗ A. A . B

✗ B. A' + B

✓ C. A' . B'

✗ D. A' + B'

Question ID : **441009118745**
Option 1 ID : **441009472108**
Option 2 ID : **441009472109**
Option 3 ID : **441009472106**
Option 4 ID : **441009472107**
Status : **Answered**
Chosen Option : **C**

Q.7 If X(z) is the Z-Transform of x[n], then the Z-Transform of x[n − k] is:

Ans
✗ A. $X(z)/z^{-k}$
✓ B. $X(z)z^{-k}$
✗ C. $X(z)-z^{-k}$
✗ D. $X(z)+z^{-k}$

Question ID : **44100972390**
Option 1 ID : **441009287908**
Option 2 ID : **441009287905**
Option 3 ID : **441009287907**
Option 4 ID : **441009287906**
Status : **Answered**
Chosen Option : **B**

Q.8 How do you identify an essential prime implicant from the K-map?

Ans
✗ A. By covering the largest number of cells with one group
✗ B. By finding groups that cover cells with a '0' value
✓ C. By identifying groups that cover cells with '1's that are not covered by any other group
✗ D. By finding the group with the smallest number of cells

Question ID : **441009118776**
Option 1 ID : **441009472225**
Option 2 ID : **441009472223**
Option 3 ID : **441009472224**
Option 4 ID : **441009472222**
Status : **Answered**
Chosen Option : **C**

Q.9 The total charge Q, within a region of space with volume V and volume charge density ρ is given by _____.

Ans
✗ A. $Q=\rho\cdot\sqrt{v}$
✓ B. $Q=\rho\cdot v$
✗ C. $Q=\rho\cdot v^2$
✗ D. $Q=\rho/v$

Question ID : **44100929170**
Option 1 ID : **441009116153**
Option 2 ID : **441009116150**
Option 3 ID : **441009116152**
Option 4 ID : **441009116151**
Status : **Not Answered**
Chosen Option : **--**

Q.10 In a basic MOSFET current mirror, why must both transistors be identical and have the same V_{DS}?

Ans
✔ A. To ensure matching drain currents
✘ B. To prevent short circuits
✘ C. To reduce frequency distortion
✘ D. To achieve equal power dissipation

Question ID : **44100986776**
Option 1 ID : **441009344908**
Option 2 ID : **441009344909**
Option 3 ID : **441009344910**
Option 4 ID : **441009344907**
Status : **Answered**
Chosen Option : **B**

Q.11 The quarter-wave transformer is often used in microwave engineering because it _____.

Ans
✘ A. decreases the size of the system
✔ B. minimises reflection by matching the impedance of different components
✘ C. blocks high-frequency signals
✘ D. increases the bandwidth of the transmission line

Question ID : **44100928650**
Option 1 ID : **441009114133**
Option 2 ID : **441009114131**
Option 3 ID : **441009114132**
Option 4 ID : **441009114134**
Status : **Not Answered**
Chosen Option : **--**

Q.12 Which of the following statements are correct?

S1: Inductors in parallel can be combined just like resistors in parallel.
S2: The total capacitance of two 4-mF capacitors connected in parallel is 8 mF.
S3: Resistance is an example of an active element.

Ans
✘ A. S1, S2 and S3
✘ B. Only S1 and S3
✘ C. Only S2 and S3
✔ D. Only S1 and S2

Question ID : **44100953152**
Option 1 ID : **441009211683**
Option 2 ID : **441009211682**
Option 3 ID : **441009211681**
Option 4 ID : **441009211680**
Status : **Answered**
Chosen Option : **D**

Q.13 In the conversion of a JK flip-flop to a D flip-flop, which of the following configurations is correct for the J and K inputs?

Ans
✔ A. Connect J to D and K to the inverse of D to make the output follow the input.
✘ B. The J input should be connected to the Q output and the K input to the Q' output.
✘ C. Connect the J and K inputs to a logic high and the clock signal to the flip-flop.
✘ D. The J and K inputs should both be connected to the clock signal.

Question ID : **441009119087**
Option 1 ID : **441009473464**
Option 2 ID : **441009473465**
Option 3 ID : **441009473463**
Option 4 ID : **441009473466**
Status : **Not Answered**
Chosen Option : **--**

Q.14 What is the decimal equivalent of the two's complement binary number 11111011 in an 8-bit system?

Ans
✘ A. −4
✘ B. −3
✔ C. −5
✘ D. −2

Question ID : **441009119022**
Option 1 ID : **441009473204**
Option 2 ID : **441009473205**
Option 3 ID : **441009473203**
Option 4 ID : **441009473206**
Status : **Answered**
Chosen Option : **C**

Q.15 Which of the following is true for a first-order stationary random process X(t)?

Ans
✔ A. The mean and variance of X(t) must both be constant over time.
✘ B. The mean of X(t) must be constant, but the autocorrelation function is a function of time.
✘ C. The mean and variance of X(t) can vary with time, but the autocorrelation function is constant.
✘ D. The mean of X(t) is constant, but the variance of X(t) can vary with time.

Question ID : **441009130705**
Option 1 ID : **441009519355**
Option 2 ID : **441009519356**
Option 3 ID : **441009519353**
Option 4 ID : **441009519354**
Status : **Answered**
Chosen Option : **B**

Q.16 For the TM mode in a rectangular waveguide, the electric field is _____.

Ans

✗ A. completely transverse to the direction of propagation

✗ B. completely longitudinal to the direction of propagation

✓ C. a combination of transverse and longitudinal components

✗ D. only in the direction of propagation

Question ID : **44100929047**
Option 1 ID : **441009115658**
Option 2 ID : **441009115659**
Option 3 ID : **441009115660**
Option 4 ID : **441009115661**
Status : **Not Answered**
Chosen Option : **--**

Q.17 In a single input, balanced output differential amplifier, what happens when the input signal increases?

Ans

✗ A. Both output voltages decrease together

✗ B. Both output voltages increase together

✓ C. One output voltage increases while the other decreases

✗ D. The amplifier enters saturation mode

Question ID : **44100986760**
Option 1 ID : **441009344811**
Option 2 ID : **441009344810**
Option 3 ID : **441009344809**
Option 4 ID : **441009344812**
Status : **Answered**
Chosen Option : **D**

Q.18 A capacitance value is measured in _____.

Ans

✗ A. henries

✗ B. ohms

✓ C. farads

✗ D. coulombs

Question ID : **44100953108**
Option 1 ID : **441009211510**
Option 2 ID : **441009211511**
Option 3 ID : **441009211508**
Option 4 ID : **441009211509**
Status : **Answered**
Chosen Option : **C**

Q.19 For a stationary random process X(t), if the power spectral density $S_X(f)$ is given by $S_X(f) = 1/(1+f^2)$, what is the total power of the process?

Ans
✔ A. π
✗ B. 2
✗ C. 1
✗ D. ∞

Question ID : **441009130722**
Option 1 ID : **441009519424**
Option 2 ID : **441009519422**
Option 3 ID : **441009519421**
Option 4 ID : **441009519423**
Status : **Answered**
Chosen Option : **A**

Q.20 Which of the following statements are correct for the power factor in an AC circuit?

S1: For a purely resistive load, power factor is zero.
S2: Leading power factor implies a capacitive load.
S3: Lagging power factor implies an inductive load.

Ans
✗ A. S1, S2 and S3
✔ B. Only S2 and S3
✗ C. Only S1 and S3
✗ D. Only S1 and S2

Question ID : **44100952871**
Option 1 ID : **441009210565**
Option 2 ID : **441009210564**
Option 3 ID : **441009210567**
Option 4 ID : **441009210566**
Status : **Answered**
Chosen Option : **B**

Q.21 In a dual input, balanced output differential amplifier, what is the main advantage of using a balanced output?

Ans
✔ A. It improves common-mode noise rejection.
✗ B. It eliminates the need for a biasing circuit.
✗ C. It reduces the voltage gain.
✗ D. It increases the input capacitance.

Question ID : **44100986758**
Option 1 ID : **441009344801**
Option 2 ID : **441009344804**
Option 3 ID : **441009344803**
Option 4 ID : **441009344802**
Status : **Answered**
Chosen Option : **A**

Q.22 For a P-type semi-conductor, the _____ impurity fermi level is near the _____.

Ans
✗ A. donor; conduction band
✗ B. donor; valence band
✓ C. acceptor; valence band
✗ D. acceptor; conduction band

Question ID : **44100930034**
Option 1 ID : **441009119583**
Option 2 ID : **441009119584**
Option 3 ID : **441009119582**
Option 4 ID : **441009119581**
Status : **Answered**
Chosen Option : **C**

Q.23 If the system matrix 'A' in the state-space representation is modified by multiplying it by a scalar positive constant, what happens to the system's controllability?

Ans
✗ A. Controllability may be affected
✗ B. Controllability becomes negative
✓ C. Controllability remains unchanged
✗ D. Controllability becomes zero

Question ID : **44100950567**
Option 1 ID : **441009201476**
Option 2 ID : **441009201478**
Option 3 ID : **441009201477**
Option 4 ID : **441009201475**
Status : **Answered**
Chosen Option : **C**

Q.24 What is the ROC for a two-sided sequence?

Ans
✗ A. Outside the unit circle
✓ B. Between two poles
✗ C. The entire z-plane
✗ D. Inside the innermost pole

Question ID : **44100970797**
Option 1 ID : **441009281798**
Option 2 ID : **441009281797**
Option 3 ID : **441009281795**
Option 4 ID : **441009281796**
Status : **Answered**
Chosen Option : **B**

Q.25 Which of the following statements is/are correct?

S1: An ideal independent current source provides a specified current that is completely independent of other circuit elements.
S2: Internal resistance of the ideal current source is infinite.
S3: Internal resistance of the ideal voltage source is infinite.

Ans
✔ A. Only S1 and S2
✘ B. S1, S2 and S3
✘ C. Only S3
✘ D. Only S1 and S3

Question ID : **44100952857**
Option 1 ID : **441009210509**
Option 2 ID : **441009210511**
Option 3 ID : **441009210508**
Option 4 ID : **441009210510**
Status : **Marked For Review**
Chosen Option : **A**

Q.26 If X(z) is the Z-transform of x[n], then the Z-transform of the time-scaled signal x[an], where *a* is a positive integer, is given by:

Ans
✘ A. $aX(z)$
✘ B. $X(az)$
✘ C. $X(z)/a$
✔ D. $X(z^a)$

Question ID : **44100972903**
Option 1 ID : **441009289938**
Option 2 ID : **441009289939**
Option 3 ID : **441009289937**
Option 4 ID : **441009289936**
Status : **Marked For Review**
Chosen Option : **D**

Q.27 In an astable multivibrator using an op-amp, how is the oscillation frequency primarily determined?

Ans
✘ A. By the type of op-amp used
✔ B. By the values of resistors and a capacitor in the feedback loop
✘ C. By the temperature coefficient of the circuit
✘ D. By the supply voltage magnitude

Question ID : **44100988884**
Option 1 ID : **441009353533**
Option 2 ID : **441009353531**
Option 3 ID : **441009353534**
Option 4 ID : **441009353532**
Status : **Answered**
Chosen Option : **A**

Q.28 In a series RLC circuit, if R = 10 Ω, inductance and capacitance with equal magnitude of inductive and capacitive impedance are connected across an AC supply of 200 V rms. The current in the circuit is _____.

Ans
✗ A. 0 A
✗ B. 28.2 A
✓ C. 20 A
✗ D. 10 A

Question ID : **44100952916**
Option 1 ID : **441009210745**
Option 2 ID : **441009210747**
Option 3 ID : **441009210744**
Option 4 ID : **441009210746**
Status : **Not Answered**
Chosen Option : **--**

Q.29 A voltage tripler circuit using diodes and capacitors provides an output voltage approximately equal to:

Ans
✗ A. twice the input voltage
✗ B. half of the input voltage
✗ C. the input voltage
✓ D. three times the peak input voltage

Question ID : **44100988828**
Option 1 ID : **441009353308**
Option 2 ID : **441009353310**
Option 3 ID : **441009353309**
Option 4 ID : **441009353307**
Status : **Answered**
Chosen Option : **D**

Q.30 Which of the following is a primary characteristic of CMOS logic?

Ans
✓ A. Low power consumption
✗ B. Slow switching speeds
✗ C. High noise immunity
✗ D. High power consumption

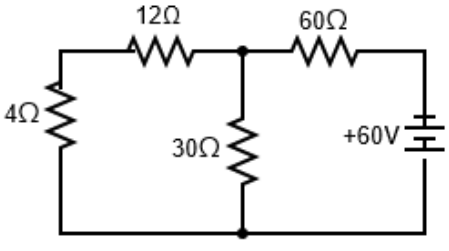
Question ID : **441009118917**
Option 1 ID : **441009472794**
Option 2 ID : **441009472796**
Option 3 ID : **441009472795**
Option 4 ID : **441009472793**
Status : **Answered**
Chosen Option : **A**

Q.31 A closed loop control system has a variable gain, that when changed, alters the damping ratio of the closed loop system. If the gain is increased and the peak overshoot decreases, what can be said about the damping ratio?

Ans
✗ A. The damping ratio is not related to the gain.
✓ B. The damping ratio increases.
✗ C. The damping ratio remains constant.
✗ D. The damping ratio decreases.

Question ID : **44100950919**
Option 1 ID : **441009202857**
Option 2 ID : **441009202855**
Option 3 ID : **441009202856**
Option 4 ID : **441009202854**
Status : **Answered**
Chosen Option : **B**

Q.32 The Thevenin equivalent resistance seen by a 4 Ω resistor in the circuit is _____.



Ans
✓ A. 32 Ω
✗ B. 32/9 Ω
✗ C. 36 Ω
✗ D. 102 Ω

Question ID : **44100952847**
Option 1 ID : **441009210468**
Option 2 ID : **441009210469**
Option 3 ID : **441009210470**
Option 4 ID : **441009210471**
Status : **Answered**
Chosen Option : **A**

Q.33 What happens when a discrete-time signal x(n) undergoes time reversal?

Ans
✗ A. Its Z-transform is replaced by −X(z).
✗ B. It loses all its frequency components.
✓ C. Its Z-transform is replaced by $X(1/z)$.
✗ D. Its Z-transform remains unchanged.

Question ID : **44100970781**
Option 1 ID : **441009281733**
Option 2 ID : **441009281734**
Option 3 ID : **441009281732**
Option 4 ID : **441009281731**
Status : **Answered**
Chosen Option : **C**

Q.34 A control system's settling time (T_s) is required to be reduced by half. If the damping ratio (ζ) is kept constant, by what factor must the natural frequency (ω_n) be increased?

Ans
✗ A. 1.5
✓ B. 2
✗ C. 0.5
✗ D. 1

Question ID : **44100950934**
Option 1 ID : **441009202913**
Option 2 ID : **441009202911**
Option 3 ID : **441009202912**
Option 4 ID : **441009202910**
Status : **Answered**
Chosen Option : **C**

Q.35 For an intrinsic semiconductor, the conductivity is function of:

Ans
✗ A. hole mobility only
✗ B. neither electron mobility nor hole mobility
✗ C. electron mobility only
✓ D. both electron mobility and hole mobility

Question ID : **44100930070**
Option 1 ID : **441009119726**
Option 2 ID : **441009119728**
Option 3 ID : **441009119725**
Option 4 ID : **441009119727**
Status : **Answered**
Chosen Option : **D**

Q.36 The complement of the expression A + B is:

Ans
✗ A. A' + B
✗ B. A' + B'
✓ C. A' . B'
✗ D. A . B

Question ID : **441009114481**
Option 1 ID : **441009455381**
Option 2 ID : **441009455379**
Option 3 ID : **441009455378**
Option 4 ID : **441009455380**
Status : **Answered**
Chosen Option : **C**

Q.37 Which of the following is a key characteristic of narrowband frequency modulation (FM) in comparison to wideband FM?

Ans

✗ A. Narrowband FM has a higher bandwidth because it includes more sidebands.

✓ B. In narrowband FM, the frequency deviation Δf is small relative to the modulating frequency f_m, leading to a simpler mathematical model.

✗ C. In narrowband FM, the instantaneous frequency of the modulated signal remains nearly constant.

✗ D. Narrowband FM signals are primarily used for broadcasting due to their larger bandwidth efficiency.

Question ID : **441009117866**
Option 1 ID : **441009468640**
Option 2 ID : **441009468643**
Option 3 ID : **441009468642**
Option 4 ID : **441009468641**
Status : **Answered**
Chosen Option : **A**

Q.38 In a PCM system, if the sampling rate is reduced below the Nyquist rate, what is the result?

Ans

✗ A. Increase in signal bandwidth

✓ B. Introduction of spectral aliasing

✗ C. Reduction in quantisation noise

✗ D. Improved signal clarity

Question ID : **441009126725**
Option 1 ID : **441009503577**
Option 2 ID : **441009503578**
Option 3 ID : **441009503579**
Option 4 ID : **441009503576**
Status : **Marked For Review**
Chosen Option : **C**

Q.39 Let $A=\begin{bmatrix}1 & 2\\ 2 & 4\end{bmatrix}$ be a given matrix. For which of the following matrices $P^{-1}AP=\begin{bmatrix}0 & 0\\ 0 & 5\end{bmatrix}$?

Ans
- ✗ A. $P=\begin{bmatrix}1 & 1\\ 1 & 2\end{bmatrix}$
- ✗ B. $P=\begin{bmatrix}0 & -1\\ 1 & 2\end{bmatrix}$
- ✗ C. $P=\begin{bmatrix}1 & -1\\ -1 & 2\end{bmatrix}$
- ✓ D. $P=\begin{bmatrix}-2 & 1\\ 1 & 2\end{bmatrix}$

Question ID : **44100989825**
Option 1 ID : **441009357466**
Option 2 ID : **441009357468**
Option 3 ID : **441009357467**
Option 4 ID : **441009357469**
Status : **Marked For Review**
Chosen Option : **A**

Q.40 In an N-channel enhancement MOSFET, what must occur for current conduction between the drain and source?

Ans
- ✗ A. The threshold voltage (V_{th}) must be zero.
- ✗ B. The gate-to-source voltage (V_{GS}) must be negative.
- ✗ C. The substrate must be forward biased.
- ✓ D. A conductive channel must form due to induced inversion charges.

Question ID : **44100986775**
Option 1 ID : **441009344904**
Option 2 ID : **441009344903**
Option 3 ID : **441009344906**
Option 4 ID : **441009344905**
Status : **Marked For Review**
Chosen Option : **A**

Q.41 What is the Region of Convergence (ROC) for a right-sided sequence in Z-transform?

Ans
✗ A. It does not exist
✗ B. Along the unit circle
✗ C. Inside the unit circle
✓ D. Outside the outermost pole

Question ID : **44100970790**
Option 1 ID : **441009281770**
Option 2 ID : **441009281769**
Option 3 ID : **441009281767**
Option 4 ID : **441009281768**
Status : **Answered**
Chosen Option : **D**

Q.42 Which of the following statements is/are correct?

S1: A source of internal impedance Z_S delivers maximum power to a load impedance Z_L only if $Z_L = Z^*_S$.
S2: A complex network connected to a load can be replaced with an equivalent impedance in parallel with a current source in Norton's Theorem.

Ans
✗ A. Neither S1 nor S2
✗ B. S1 only
✗ C. S2 only
✓ D. S1 and S2 both

Question ID : **44100953279**
Option 1 ID : **441009212175**
Option 2 ID : **441009212172**
Option 3 ID : **441009212173**
Option 4 ID : **441009212174**
Status : **Marked For Review**
Chosen Option : **D**

Q.43 The resistivity of a p-type semiconductor is _____ proportional to the conductivity and the conductivity of the p-type semiconductor is _____ proportional to the doping concentration.

Ans
✗ A. directly, inversely
✗ B. directly, directly
✓ C. inversely, directly
✗ D. inversely, inversely

Question ID : **44100930051**
Option 1 ID : **441009119651**
Option 2 ID : **441009119652**
Option 3 ID : **441009119649**
Option 4 ID : **441009119650**
Status : **Answered**
Chosen Option : **C**

Q.44 The lower limit of entropy for a discrete random variable is achieved when:

Ans

✗ A. the random variable has a large number of possible outcomes

✗ B. the random variable has equal probabilities for all outcomes

✓ C. the random variable has a deterministic value with probability 1

✗ D. the random variable has maximum variance

Question ID : **441009126790**
Option 1 ID : **441009503836**
Option 2 ID : **441009503837**
Option 3 ID : **441009503838**
Option 4 ID : **441009503839**
Status : **Marked For Review**
Chosen Option : **B**

Q.45 The Z-transform of x[n−k] (delayed signal) is given by:

Ans

✗ A. $X(z-k)$

✓ B. $X(z)z^{-k}$

✗ C. $X(z)z^{k}$

✗ D. $X(kz)$

Question ID : **44100972736**
Option 1 ID : **441009289242**
Option 2 ID : **441009289241**
Option 3 ID : **441009289240**
Option 4 ID : **441009289243**
Status : **Answered**
Chosen Option : **B**

Q.46 Gauss's law, when derived using the divergence theorem, states that the net electric flux Φ coming out of any closed surface is _____.

Ans

✗ A. inversely proportional to the square of the distance

✗ B. equal to the surface charge density

✗ C. independent of the charge distribution

✓ D. directly proportional to the total charge enclosed within the surface

Question ID : **44100929290**
Option 1 ID : **441009116639**
Option 2 ID : **441009116638**
Option 3 ID : **441009116641**
Option 4 ID : **441009116640**
Status : **Marked For Review**
Chosen Option : **D**

Q.47 Identify the correct relation for resistivity of n type semi-conductor.

Ans

✔ A. Resistivity of insulator > resistivity of n-type semiconductor > resistivity of metal

✘ B. Resistivity of insulator > resistivity of metal > resistivity of n-type semiconductor

✘ C. Resistivity of insulator < resistivity of metal < resistivity of n-type semiconductor

✘ D. Resistivity of insulator = resistivity of metal = resistivity of n-type semiconductor

Question ID : **44100930044**
Option 1 ID : **441009119624**
Option 2 ID : **441009119623**
Option 3 ID : **441009119622**
Option 4 ID : **441009119621**
Status : **Marked For Review**
Chosen Option : **A**

Q.48 For an angle modulated signal, which of the following statements is true regarding the bandwidth for large modulation index values ($\beta >> 1$)?

Ans

✘ A. The bandwidth increases as β^2.

✔ B. The bandwidth increases linearly with the modulation index β.

✘ C. The bandwidth increases exponentially with β.

✘ D. The bandwidth approaches a constant value independent of the modulation index β.

Question ID : **441009117849**
Option 1 ID : **441009468577**
Option 2 ID : **441009468576**
Option 3 ID : **441009468579**
Option 4 ID : **441009468578**
Status : **Marked For Review**
Chosen Option : **D**

Q.49 If X(Z) is the Z-Transform of x[n], then the Z-Transform of x[kn] (where k is an integer) is:

Ans

✔ A. $X(Z^k)$

✘ B. X(kZ)

✘ C. kX(Z)

✘ D. X(Z)/k

Question ID : **44100972383**
Option 1 ID : **441009287881**
Option 2 ID : **441009287882**
Option 3 ID : **441009287883**
Option 4 ID : **441009287884**
Status : **Answered**
Chosen Option : **A**

Q.50 An RC series circuit has a resistance of R = 1 kΩ and a capacitance of C = 100 nF. A sinusoidal voltage source, $v(t) = V_m * \cos(\omega t)$, is applied to the circuit.
At what frequency (in Hz) will the magnitude of the voltage across the capacitor be equal to the magnitude of the voltage across the resistor?

Ans
✗ A. 1000 Hz
✗ B. 500 Hz
✓ C. 1592 Hz
✗ D. 2250 Hz

Question ID : **44100948932**
Option 1 ID : **441009195025**
Option 2 ID : **441009195027**
Option 3 ID : **441009195024**
Option 4 ID : **441009195026**
Status : **Marked For Review**
Chosen Option : **A**

Q.51 According to Coulomb's law, the force between two point charges is _____.

Ans
✓ A. directly proportional to the product of the charges and inversely proportional to the square of the distance between them
✗ B. inversely proportional to the distance between them
✗ C. inversely proportional to the product of the charges
✗ D. directly proportional to the charges and distance between them

Question ID : **44100929259**
Option 1 ID : **441009116514**
Option 2 ID : **441009116517**
Option 3 ID : **441009116516**

Chosen Option : **A**

Q.52 What is the problem associated with using SR Flip-Flops in a Synchronous Counter?

Ans
✗ A. The flip-flops do not respond to clock signals.
✗ B. SR flip-flops are too slow for counting applications.
✓ C. SR flip-flops can enter an invalid state if both the Set and Reset inputs are active at the same time.
✗ D. SR flip-flops are not suitable for synchronous operation.

Question ID : **441009119071**
Option 1 ID : **441009473399**
Option 2 ID : **441009473401**
Option 3 ID : **441009473400**

Chosen Option : **C**

Q.53 The cut-off frequency for the dominant mode of a circular waveguide is determined by _____.

Ans
✗ A. the length of the waveguide
✓ B. the radius of the waveguide
✗ C. the wavelength of the signal
✗ D. the power level in the waveguide

Question ID : **44100928663**
Option 1 ID : **441009114181**
Option 2 ID : **441009114179**
Option 3 ID : **441009114180**
Option 4 ID : **441009114182**
Status : **Not Answered**
Chosen Option : **--**

Q.54 Which of the following statements is/are correct for a single port network?

S1: Two terminal devices result in one-port network.
S2: A port is a pair of terminals through which current may enter or leave a network.

Ans
✗ A. Only S2
✗ B. Only S1
✗ C. Neither S1 nor S2
✓ D. Both S1 and S2

Question ID : **44100953354**
Option 1 ID : **441009212409**
Option 2 ID : **441009212408**
Option 3 ID : **441009212411**
Option 4 ID : **441009212410**
Status : **Answered**
Chosen Option : **A**

Q.55 Consider the system defined by:

$$A=\begin{bmatrix}1&0&0\\0&2&0\\0&0&3\end{bmatrix}, B=\begin{bmatrix}1\\0\\1\end{bmatrix}$$

What is the controllability matrix C?

Ans

✗ A. $C=\begin{bmatrix}1&0&1\\0&1&1\\1&2&3\end{bmatrix}$

✗ B. $C=\begin{bmatrix}1&1&1\\0&0&0\\1&3&5\end{bmatrix}$

✗ C. $C=\begin{bmatrix}1&0&1\\0&0&0\\1&2&3\end{bmatrix}$

✓ D. $C=\begin{bmatrix}1&1&1\\0&0&0\\1&3&9\end{bmatrix}$

Question ID : **44100950529**
Option 1 ID : **441009201322**
Option 2 ID : **441009201320**

Q.56 In an SR Flip-Flop, what is the primary issue when both S = 1 and R = 1 at the same time?

Ans

✗ A. The flip-flop can only output a constant logic 1

✓ B. The flip-flop enters an indeterminate state, causing a race condition.

✗ C. The flip-flop resets itself back to zero automatically.

✗ D. The flip-flop enters a stable state of 0.

Question ID : **441009119093**
Option 1 ID : **441009473488**
Option 2 ID : **441009473489**

Q.75 A mass-spring-damper system is modeled by the following differential equation.

$$m\ddot{x}(t) + c\,\dot{x}(t) + k\,x(t) = F(t)$$

where,
m is the mass,
c is the damping coefficient,
k is the spring constant,
F(t) is the external force applied to the system,
x(t) is the displacement of the mass.
The system is subjected to a unit step input F(t) = 1 for t ≥ 0. If the damping ratio ζ = 0.5 and the natural frequency ω_n = 2 rad/s, what is the peak time T_p of the system's response?

Ans

✗ A. $\frac{\pi}{3}$ seconds

✗ B. $\frac{\pi}{4}$ seconds

✓ C. $\frac{\pi}{\sqrt{3}}$ seconds

✗ D. $\frac{\pi}{2}$ seconds

Question ID : **44100948349**

Q.76 Consider a linear time-invariant (LTI) system with transfer function,

$$G(s) = \frac{10}{s^2 + 6s + 10}.$$

The system is analysed for open-loop stability. Which of the following statements is correct regarding the open-loop stability of the system?

Ans

✗ A. The system is stable, but the damping ratio is less than 0.5.

✗ B. The system is marginally stable because the poles are on the imaginary axis.

✓ C. The system is stable because all poles lie in the left half of the s-plane.

✗ D. The system is unstable because one of the poles is at the origin.

Question ID : **44100950156**
Option 1 ID : **441009199870**
Option 2 ID : **441009199869**
Option 3 ID : **441009199867**
Option 4 ID : **441009199868**
Status : **Marked For Review**
Chosen Option : **B**

Q.77 A system is said to be causal if its impulse response satisfies which of the following conditions?

Ans
✗ A. h(t) is an even function
✗ B. $h(t) = 0, \quad \forall t > 0$
✓ C. $h(t) = 0, \quad \forall t < 0$
✗ D. h(t) is symmetric around t = 0

Question ID : **44100972857**
Option 1 ID : **441009289747**
Option 2 ID : **441009289745**
Option 3 ID : **441009289744**
Option 4 ID : **441009289746**
Status : **Answered**
Chosen Option : **C**

Q.78 What is the primary function of a Schmitt trigger in a circuit?

Ans
✓ A. To convert an analog signal into a clean digital signal
✗ B. To store data in digital circuits
✗ C. To amplify weak signals
✗ D. To filter high-frequency noise from a signal

Question ID : **44100988872**
Option 1 ID : **441009353483**
Option 2 ID : **441009353486**
Option 3 ID : **441009353484**
Option 4 ID : **441009353485**
Status : **Marked For Review**
Chosen Option : **D**

Q.79 If A & B are two $n \times n$ invertible matrices, then what is rank (AB)?

Ans
✗ A. 0
✗ B. $\text{rank}(A) + \text{rank}(B)$
✓ C. n
✗ D. $\text{rank}(A) \times \text{rank}(B)$

Question ID : **44100989827**
Option 1 ID : **441009357477**
Option 2 ID : **441009357474**
Option 3 ID : **441009357476**
Option 4 ID : **441009357475**
Status : **Marked For Review**
Chosen Option : **B**

Q.80 The temporal output h(t), corresponding to the unit impulse excitation, of a second order closed-loop control system, characterised by a damping coefficient ζ = 1 (indicating critical damping) and an undamped natural frequency ω_n=6 rad/s, is analytically derived from the canonical representation of the system's transfer function. Find the value of the output h(t).

Ans
✗ A. 6 e^(-6t)
✗ B. 6 e^(-6t) * t
✓ C. 36 e^(−6t) * t
✗ D. 6 e^(-3t) * t

Question ID : **44100950780**
Option 1 ID : **441009202323**
Option 2 ID : **441009202322**
Option 3 ID : **441009202325**
Option 4 ID : **441009202324**
Status : **Answered**
Chosen Option : **C**

Q.81 The maximum entropy for a discrete random variable with n equally likely outcomes is:

Ans
✗ A. 0
✓ B. $\log_2(n)$
✗ C. 1
✗ D. $n\log_2(n)$

Question ID : **441009126780**
Option 1 ID : **441009503799**
Option 2 ID : **441009503796**
Option 3 ID : **441009503798**
Option 4 ID : **441009503797**
Status : **Marked For Review**
Chosen Option : **B**

Q.82 Evaluate the integral $\iint_R e^{x^2+y^2}\,dx\,dy$, where R is the annular region b

Ans
✗ A. $\pi(e^9 - e^2)$
✗ B. $\pi(e^3 - e^2)$
✗ C. $\pi(e^5 - e^4)$
✓ D. $\pi(e^9 - e^4)$

Question ID : **44100975428**
Option 1 ID : **441009299987**
Option 2 ID : **441009299986**
Option 3 ID : **441009299989**

Status : **Answered**
Chosen Option : **B**

Q.84 Germanium is basically a/an _____.

Ans ✓ A. indirect bandgap semiconductor

✗ B. insulator

✗ C. conductor

✗ D. direct bandgap semiconductor

Question ID : **44100930063**
Option 1 ID : **441009119697**
Option 2 ID : **441009119700**
Option 3 ID : **441009119699**
Option 4 ID : **441009119698**
Status : **Answered**
Chosen Option : **D**

Q.85 Which of the following is true about the autocorrelation function (ACF) of a wide-sense stationary (WSS) random process?

Ans ✗ A. The ACF is always zero for a WSS process.

✗ B. The ACF depends on the mean of the process at each point in time.

✗ C. The ACF is time-dependent and varies with the time shift.

✓ D. The ACF depends only on the time difference (lag) and not on the specific time.

Question ID : **441009130679**
Option 1 ID : **441009519252**
Option 2 ID : **441009519251**
Option 3 ID : **441009519250**
Option 4 ID : **441009519249**
Status : **Marked For Review**
Chosen Option : **B**

Q.86 Consider the following transfer function.

$$G(s) = \frac{5s+3}{s^2+6s+8}$$

Using the Final Value Theorem, calculate the final value of the time-domain response for a unit step input u(t).

Ans

✔ A. 0.375

✘ B. 1

✘ C. 0.2

✘ D. 0.5

Question ID : **44100950895**
Option 1 ID : **441009202766**
Option 2 ID : **441009202768**
Option 3 ID : **441009202769**
Option 4 ID : **441009202767**
Status : **Marked For Review**
Chosen Option : **A**

Q.87 Consider a continuous-time linear time-invariant (LTI) system with the following differential equation,

$$\frac{d^2y(t)}{dt^2} + 3\frac{dy(t)}{dt} + 2y(t) = x(t)$$

where y(t) is the output, x(t) is the input, and the system is initially at rest.

What is the zero-state response of the system if the input $x(t) = e^{-t}u(t)$, where u(t) is the unit step function?

Ans

✔ A. $y(t) = -e^{-t} + te^{-t} + e^{-2t}$

✘ B. $y(t) = -e^{t} + te^{t} + e^{2t}$

✘ C. $y(t) = -e^{t} + te^{-t} + e^{-2t}$

✘ D. $y(t) = -e^{-t} + e^{-2t}$

Question ID : **44100950386**
Option 1 ID : **441009200771**
Option 2 ID : **441009200772**
Option 3 ID : **441009200773**

Status : **Marked For Review**
Chosen Option : **D**

Q.88 Which of the following sets of dimensions will minimise the material re
with an open top having a volume of 32 cm^3?

Ans
✗ A. $16cm \times 2cm \times 1cm$
✗ B. $8cm \times 2cm \times 2cm$
✗ C. $8cm \times 4cm \times 1cm$
✓ D. $4cm \times 4cm \times 2cm$

Question ID : **44100975341**
Option 1 ID : **441009299640**
Option 2 ID : **441009299638**
Option 3 ID : **441009299641**
Option 4 ID : **441009299639**
Status : **Not Answered**
Chosen Option : **--**

Q.89 If the current through an RL series circuit having 5 Ω resistor is i(t) = 3 + 4sin (200t + 45°) + 4 sin (300t + 60°) A, the RMS value of this current and the power dissipated in the circuit are _____, respectively.

Ans
✗ A. $\sqrt{41}$ A and 125 W
✗ B. 11 A and 250 W
✓ C. 5A and 125 W
✗ D. $\sqrt{41}$ A and 250 W

Question ID : **44100952901**
Option 1 ID : **441009210687**
Option 2 ID : **441009210686**
Option 3 ID : **441009210684**
Option 4 ID : **441009210685**
Status : **Answered**
Chosen Option : **A**

Q.90 As per the charge continuity equation, the current equation for a semiconductor is directly dependent on _____.

Ans
✗ A. permittivity of silicon di oxide layer
✗ B. fabrication method
✓ C. net charge density
✗ D. material used as case of the semiconductor

Question ID : **44100929995**
Option 1 ID : **441009119427**
Option 2 ID : **441009119424**
Option 3 ID : **441009119426**
Option 4 ID : **441009119425**
Status : **Marked For Review**
Chosen Option : **C**

Q.91 Gauss's law for electrostatics can be expressed, mathematically, as _____.

Ans
✔ A. $\oint E \cdot dA = q/\varepsilon o$

✘ B. $\oint B \cdot dA = 0$

✘ C. $\oint E \cdot dA = 0$

✘ D. $\oint E \cdot dA = \mu o I$

Question ID : **44100929272**
Option 1 ID : **441009116566**
Option 2 ID : **441009116569**
Option 3 ID : **441009116567**
Option 4 ID : **441009116568**
Status : **Marked For Review**
Chosen Option : **C**

Q.92 The total drift current density for a semiconductor is a function of:

Ans
✘ A. charge concentration only

✘ B. charge mobility only

✘ C. applied electric field only

✔ D. all of them i.e. charge mobility, applied electric field, charge concentration

Question ID : **44100930001**
Option 1 ID : **441009119450**
Option 2 ID : **441009119448**
Option 3 ID : **441009119449**
Option 4 ID : **441009119451**
Status : **Answered**
Chosen Option : **D**

Q.93 In a Schmitt trigger comparator, why is hysteresis introduced?

Ans
✘ A. To make the comparator faster

✘ B. To increase the gain of the comparator

✘ C. To improve linearity in signal processing

✔ D. To prevent noise-induced false triggering

Question ID : **44100986777**
Option 1 ID : **441009344911**
Option 2 ID : **441009344914**
Option 3 ID : **441009344912**
Option 4 ID : **441009344913**
Status : **Marked For Review**
Chosen Option : **D**

Q.94 Identify whether the given statements related to intrinsic semiconductor are true or false.
Statement I: The resistivity of the intrinsic semi-conductor varies with respect to temperature.
Statement II: As the mobility of the electron charge carrier increases, the resistivity of the semiconductor decreases.

Ans
✗ A. I-True, II-False
✗ B. I-False, II-False
✗ C. I-False, II-True
✓ D. I-True, II-True

Question ID : **44100930075**
Option 1 ID : **441009119747**
Option 2 ID : **441009119745**
Option 3 ID : **441009119746**
Option 4 ID : **441009119748**
Status : **Marked For Review**
Chosen Option : **D**

Q.95 To effectively reject the image frequency in a superheterodyne receiver, which of the following techniques is commonly used?

Ans
✗ A. Increasing the LO (Local Oscillator) power
✗ B. Using a frequency mixer without any filtering
✗ C. Applying a high-pass filter at the RF stage
✓ D. Using a band-pass filter at the IF stage

Question ID : **441009122966**
Option 1 ID : **441009488773**
Option 2 ID : **441009488776**
Option 3 ID : **441009488775**
Option 4 ID : **441009488774**
Status : **Marked For Review**
Chosen Option : **B**

Q.96 The propagation constant β in a waveguide is _____.

Ans
✗ A. the attenuation constant of the wave
✗ B. the speed at which the wave travels through the waveguide
✗ C. the same as the free-space wave number
✓ D. a measure of the phase change per unit length along the waveguide

Question ID : **44100929073**
Option 1 ID : **441009115765**
Option 2 ID : **441009115762**
Option 3 ID : **441009115763**
Option 4 ID : **441009115764**
Status : **Not Answered**
Chosen Option : **--**

Q.97 Which of the following is the correct statement related to Zener diode used as a simple shunt voltage regulator?

Ans
✔ A. The output voltage increases linearly till the time Zener enters the reverse breakdown region for rise in the input voltage and after that the voltage across the Zener becomes constant.

✘ B. The output voltage always increases linearly with rise in input voltage for entire range of operation.

✘ C. The output voltage is always constant for entire range of operation.

✘ D. The output voltage always decreases linearly with rise in input voltage for entire range of operation.

Question ID : **44100929986**
Option 1 ID : **441009119391**
Option 2 ID : **441009119388**
Option 3 ID : **441009119390**
Option 4 ID : **441009119389**
Status : **Not Answered**
Chosen Option : **--**

Q.98 The bandwidth requirement for Frequency Modulation (FM) is approximately:

Ans
✔ A. proportional to the frequency deviation and message bandwidth

✘ B. independent of the message signal's frequency

✘ C. equal to the carrier frequency

✘ D. equal to the baseband frequency

Question ID : **441009122979**
Option 1 ID : **441009488826**
Option 2 ID : **441009488827**
Option 3 ID : **441009488828**
Option 4 ID : **441009488825**
Status : **Marked For Review**
Chosen Option : **A**

Q.99 For a given natural frequency, increasing the damping ratio of a second-order system _____.

Ans
✘ A. decreases the overshoot and the rise time

✘ B. increases the overshoot and the rise time

✔ C. decreases the overshoot but increases the rise time

✘ D. increases the overshoot and decreases the rise time

Question ID : **44100950835**
Option 1 ID : **441009202539**
Option 2 ID : **441009202541**
Option 3 ID : **441009202538**
Option 4 ID : **441009202540**
Status : **Answered**
Chosen Option : **C**

Q.10 For a finite-duration signal, the region of convergence (ROC) of its Z-transform is:
0

Ans
✗ A. only outside the unit circle |z| > 1
✗ B. only inside the unit circle |z| < 1
✓ C. the entire z-plane, except possibly at z = 0 or z = ∞
✗ D. a ring around the unit circle

Question ID : **44100972744**
Option 1 ID : **441009289282**
Option 2 ID : **441009289281**
Option 3 ID : **441009289280**
Option 4 ID : **441009289283**
Status : **Answered**
Chosen Option : **C**

Q.10 For an asynchronous ripple BCD counter, which of the following statements is true?
1

Ans
✗ A. The counter resets after every clock pulse.
✗ B. The counter operates without any delays.
✗ C. All flip-flops are triggered simultaneously.
✓ D. The flip-flops are triggered one after the other.

Question ID : **441009119036**
Option 1 ID : **441009473262**
Option 2 ID : **441009473260**
Option 3 ID : **441009473259**
Option 4 ID : **441009473261**

Chosen Option : **D**

Q.10 For a heavily doped n-type semi-conductor the fermi level is close to:
2

Ans
✓ A. conduction band
✗ B. exactly at the centre of bandgap
✗ C. valence band
✗ D. nowhere as the Fermi level does not exist for doped semi-conductor

Question ID : **44100930020**
Option 1 ID : **441009119525**
Option 2 ID : **441009119527**
Option 3 ID : **441009119526**

Chosen Option : **B**

Q.10 What is the main advantage of using a logarithmic amplifier in signal processing?
6

Ans
✔ A. It compresses a wide range of input signals into a smaller range.
✘ B. It eliminates phase shift in signal transmission.
✘ C. It amplifies high-frequency signals better than a linear amplifier.
✘ D. It provides constant gain regardless of input variations.

Question ID : **44100988880**
Option 1 ID : **441009353515**
Option 2 ID : **441009353518**
Option 3 ID : **441009353516**

Q.114 What is the role of swamping resistors in a differential amplifier?

Ans
✗ A. To provide a direct coupling path for AC signals

✗ B. To increase the power dissipation in the transistors

✓ C. To increase the stability of the gain by reducing dependence on β

✗ D. To increase the output voltage swing

Question ID : **44100986755**
Option 1 ID : **441009344791**
Option 2 ID : **441009344789**
Option 3 ID : **441009344788**
Option 4 ID : **441009344790**
Status : **Not Answered**
Chosen Option : **--**

Q.11 5 For the system formulated in state-space representation format as,
$\dot{x} = Ax + Bu$
where A is the system matrix and B is the input matrix. What does matrix B determine?

Ans
✔ A. How the inputs affect the rate of change of the state variables.
✘ B. The relationship between the state and output variables.
✘ C. The direct feedthrough of the input to the output.
✘ D. The stability of the system.

Question ID : **44100950464**
Option 1 ID : **441009201068**
Option 2 ID : **441009201069**
Option 3 ID : **441009201070**
Option 4 ID : **441009201067**
Status : **Marked For Review**
Chosen Option : **B**

Q.11 6 Which of the following is the integral form of Gauss's law for magnetism?

Ans
✘ A. $\nabla \cdot B = 0$
✘ B. $\oint_s E \cdot dA = \frac{Qenc}{\varepsilon o}$
✘ C. $\nabla * B = \mu oJ$
✔ D. $\oint_S B \cdot dA = 0$

Question ID : **44100929314**
Option 1 ID : **441009116734**
Option 2 ID : **441009116737**
Option 3 ID : **441009116736**
Option 4 ID : **441009116735**
Status : **Answered**
Chosen Option : **A**

Q.11 7 In a circular waveguide, which of the following modes has the lowest cut-off frequency?

Ans
✔ A. TE_{11}
✘ B. TE_{01}
✘ C. TM_{01}
✘ D. TM_{11}

Question ID : **44100928658**
Option 1 ID : **441009114159**
Option 2 ID : **441009114160**
Option 3 ID : **441009114162**
Option 4 ID : **441009114161**
Status : **Not Answered**
Chosen Option : **--**

Q.11 According to Poisson equation for semiconductor, ∇.E is:
8

Ans
✗ A. net charge density + permittivity
✗ B. permittivity / Net charge density
✗ C. permittivity * Net charge density
✓ D. net charge density / permittivity

Question ID : **44100930006**
Option 1 ID : **441009119468**
Option 2 ID : **441009119471**
Option 3 ID : **441009119470**
Option 4 ID : **441009119469**
Status : **Not Answered**
Chosen Option : **--**

Q.11 What type of energy interconversion occurs in oscillators?
9

Ans
✗ A. AC energy is converted into DC energy.
✗ B. Electrical energy is converted into thermal energy.
✗ C. Electrical energy is converted into mechanical energy.
✓ D. DC energy is converted into AC energy.

Question ID : **44100988889**
Option 1 ID : **441009353554**
Option 2 ID : **441009353551**
Option 3 ID : **441009353553**
Option 4 ID : **441009353552**
Status : **Answered**
Chosen Option : **A**

Q.12 In the TE mode of a rectangular waveguide, the magnetic field is:
0

Ans
✗ A. along the direction of propagation
✗ B. transverse to the direction of propagation
✓ C. along the direction as well as transverse to the direction of propagation
✗ D. zero along the direction of propagation

Question ID : **44100928782**
Option 1 ID : **441009114634**
Option 2 ID : **441009114637**
Option 3 ID : **441009114635**
Option 4 ID : **441009114636**
Status : **Not Answered**
Chosen Option : **--**

Section : **Section II Test on Reasoning**

Q.1 Three of the following four letter-cluster pairs are alike in a certain way and thus form a group. Which is the letter-cluster pair that does NOT belong to that group? (Note: The odd one out is not based on the number of consonants/vowels or their positions in the letter-cluster.)

Ans
- ✗ A. ZY – WB
- ✓ B. KS – HW
- ✗ C. TE – QH
- ✗ D. NO – KR

Question ID : **44100919577**
Option 1 ID : **44100978035**
Option 2 ID : **44100978037**
Option 3 ID : **44100978036**
Option 4 ID : **44100978038**
Status : **Answered**
Chosen Option : **B**

Q.2 Rajiv spends 20% of his monthly income on food and 20% of the remaining on rent. If he is left with ₹4,800, what is his monthly income (in ₹)?

Ans
- ✗ A. 10,000
- ✓ B. 7,500
- ✗ C. 9,000
- ✗ D. 8,500

Question ID : **44100945101**
Option 1 ID : **441009179613**
Option 2 ID : **441009179616**
Option 3 ID : **441009179614**
Option 4 ID : **441009179615**
Status : **Answered**
Chosen Option : **B**

Q.3 Seven boxes, A, B, C, D, E, F and G, are kept one over the other but not necessarily in the same order. G is kept fifth from the bottom. B is kept fourth from the top. F is kept below D but above G. E is kept above C but below A. How many boxes are kept between E and F?

Ans
- ✓ A. Three
- ✗ B. One
- ✗ C. Four
- ✗ D. Two

Question ID : **44100915592**
Option 1 ID : **44100962257**
Option 2 ID : **44100962259**
Option 3 ID : **44100962258**
Option 4 ID : **44100962260**
Status : **Marked For Review**
Chosen Option : **A**

Q.4 Three of the following four letter-cluster pairs are alike in a certain way and thus form a group. Which is the letter-cluster pair that does NOT belong to that group? (Note: The odd one out is not based on the number of consonants/vowels or their positions in the letter-cluster.)

Ans
✔ A. PB – TY
✘ B. RT – UQ
✘ C. XN – AK
✘ D. LZ – OW

Question ID : **44100919573**
Option 1 ID : **44100978020**
Option 2 ID : **44100978021**
Option 3 ID : **44100978022**
Option 4 ID : **44100978019**
Status : **Answered**
Chosen Option : **A**

Q.5 Aparna invested ₹10,000 in a bank at simple interest for 4 years and received an interest of ₹4,000. What is the annual rate of interest?

Ans
✘ A. 8%
✔ B. 10%
✘ C. 12%
✘ D. 14%

Question ID : **44100944330**
Option 1 ID : **441009176675**
Option 2 ID : **441009176676**
Option 3 ID : **441009176677**
Option 4 ID : **441009176678**
Status : **Answered**
Chosen Option : **B**

Q.6 Seven boxes, A, B, C, D, E, F and G, are kept one over the other but not necessarily in the same order. Only three boxes are kept below B. E is kept fifth from the bottom. Only two boxes are kept between E and A. D is kept immediately below C. F is not kept below G. How many boxes are kept between G and D?

Ans
✘ A. Three
✔ B. Four
✘ C. Two
✘ D. One

Question ID : **44100915595**
Option 1 ID : **44100962269**
Option 2 ID : **44100962270**
Option 3 ID : **44100962272**
Option 4 ID : **44100962271**
Status : **Marked For Review**
Chosen Option : **B**

Q.7 A company sells two types of tea blends: Premium Blend and Standard Blend. The Premium Blend costs ₹480 per kg and the Standard Blend costs ₹250 per kg. A new Custom Blend is created by mixing these two blends in a certain ratio. If the final Custom Blend costs ₹300 per kg, then what is the ratio of Premium Blend to Standard Blend in the mixture?

Ans
✗ A. 18 : 5
✗ B. 17 : 4
✓ C. 5 : 18
✗ D. 4 : 17

Question ID : **44100966818**
Option 1 ID : **441009266072**
Option 2 ID : **441009266070**
Option 3 ID : **441009266071**
Option 4 ID : **441009266069**
Status : **Marked For Review**
Chosen Option : **C**

Q.8 XY is a vertical tower. The end X is on the ground. Z is the middle pc
The portion YZ subtends an angle η at Q. If XQ = 6 XY, then what

Ans
✓ A. $\frac{6}{73}$
✗ B. $\frac{18}{73}$
✗ C. $\frac{6}{71}$
✗ D. $\frac{18}{71}$

Question ID : **44100942844**
Option 1 ID : **441009170857**
Option 2 ID : **441009170858**
Option 3 ID : **441009170855**
Option 4 ID : **441009170856**
Status : **Not Answered**
Chosen Option : **--**

Q.9 Sweety and Sonu invest in a business in the ratio of 14 : 13. If 19% of the total profit is donated and Sweety's share is ₹29,274, then what is the amount (in ₹) of donation?

Ans
✓ A. 13,243
✗ B. 14,233
✗ C. 13,432
✗ D. 12,343

Question ID : **44100951182**
Option 1 ID : **441009203879**
Option 2 ID : **441009203881**
Option 3 ID : **441009203880**
Option 4 ID : **441009203878**
Status : **Not Answered**
Chosen Option : **--**

Q.10 Which of the following letter-clusters should replace # and % so that the pattern and relationship followed between the letter-cluster pair on the left side of :: is the same as that on the right side of ::?
: RKH :: TOK : %

Ans
✗ A. # = ZAT, % = PGE
✓ B. # = PGE, % = VSN
✗ C. # = VSN, % = XWQ
✗ D. # =XWQ, % = ZAT

Question ID : **44100919467**
Option 1 ID : **44100977601**
Option 2 ID : **44100977602**
Option 3 ID : **44100977599**
Option 4 ID : **44100977600**
Status : **Answered**
Chosen Option : **B**

Q.11 Read the given statement(s) and conclusions carefully. Assuming that the information given in the statement(s) is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statement(s).

Statements:
Some pins are trucks.
Some engines are pins.

Conclusions:
(I) All engines are trucks.
(II) Some trucks are engines.

Ans
✗ A. Only conclusion (II) follows.
✓ B. Neither conclusion (I) nor (II) follows.
✗ C. Only conclusion (I) follows.
✗ D. Both conclusions (I) and (II) follow.

Question ID : **44100919608**
Option 1 ID : **44100978160**
Option 2 ID : **44100978161**
Option 3 ID : **44100978159**
Option 4 ID : **44100978162**
Status : **Marked For Review**
Chosen Option : **B**

Q.12 The ratio of length to breadth of a rectangular garden is 7 : 4. If the area, in square metres, of the garden is numerically equal to 16 times the mean proportional between its length and breadth, then what is the perimeter (in metres) of the garden?

Ans

✗ A. $\frac{88\sqrt{7}}{7}$

✗ B. 256

✓ C. $\frac{176\sqrt{7}}{7}$

✗ D. $\frac{8\sqrt{7}}{7}$

Question ID : **44100951174**
Option 1 ID : **441009203847**
Option 2 ID : **441009203849**
Option 3 ID : **441009203848**
Option 4 ID : **441009203846**
Status : **Marked For Review**
Chosen Option : **D**

Q.13 The marks obtained by 70 students in a mathematics examination are grouped into the following frequency distribution.

Marks	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
Frequency	10	5	5	25	10	6	4	2

What is the modal marks of the students (correct up to two decimal places)?

Ans

✗ A. 35.17

✗ B. 33.13

✓ C. 35.71

✗ D. 34.17

Question ID : **44100942900**
Option 1 ID : **441009171081**
Option 2 ID : **441009171079**
Option 3 ID : **441009171082**
Option 4 ID : **441009171080**
Status : **Answered**
Chosen Option : **C**

Q.14 Which of the following letter-clusters should replace # and % so that the pattern and relationship followed between the letter-cluster pair on the left side of :: is the same as that on the right side of ::?

: XOH :: CQM : %

Ans
✗ A. # = RWB, % = SMC
✗ B. # = MUW, % = RWB
✓ C. # = SMC, % = HSR
✗ D. # = HSR, % = MUW

Question ID : **44100919475**
Option 1 ID : **44100977633**
Option 2 ID : **44100977632**
Option 3 ID : **44100977634**
Option 4 ID : **44100977631**
Status : **Not Answered**
Chosen Option : **--**

Q.15 Consider the set S of all positive integers less than 40 that are coprime to 40. How many elements are there in S?

Ans
✗ A. 15
✓ B. 16
✗ C. 14
✗ D. 17

Question ID : **44100964836**
Option 1 ID : **441009258304**
Option 2 ID : **441009258305**
Option 3 ID : **441009258303**
Option 4 ID : **441009258306**
Status : **Marked For Review**
Chosen Option : **D**

Q.16 The average age of six children in a family is 14 years. When the ages of their mother and father are included, the average age of the entire family increases to 25 years. If the father is 10 years older than the mother, what is the mother's age (in years)?

Ans
✗ A. 63
✗ B. 60
✓ C. 53
✗ D. 50

Question ID : **44100944255**
Option 1 ID : **441009176467**
Option 2 ID : **441009176468**
Option 3 ID : **441009176469**
Option 4 ID : **441009176470**
Status : **Marked For Review**
Chosen Option : **C**

Q.17 A cylindrical vessel is completely filled with water. When a solid sphere having surface area 452.16 cm^2 is placed into the vessel, how much water (in litres, correct up to three decimal places) will overflow? (Take π = 3.14)

Ans
✔ A. 0.904
✘ B. 0.884
✘ C. 0.914
✘ D. 0.928

Question ID : **44100942851**
Option 1 ID : **441009170884**
Option 2 ID : **441009170883**
Option 3 ID : **441009170885**
Option 4 ID : **441009170886**
Status : **Not Answered**
Chosen Option : **--**

Q.18 Refer to the following letter, number and symbol series and answer the question that follows. Counting to be done from left to right only.

(Left) Z 4 5 E * S @ 6 K C % 7 L & 2 R H & T Y # 3 (Right)

How many such symbols are there which are immediately preceded by a letter and also immediately followed by a number?

Ans
✘ A. One
✘ B. Three
✔ C. Four
✘ D. Two

Question ID : **44100915620**
Option 1 ID : **44100962372**
Option 2 ID : **44100962369**
Option 3 ID : **44100962370**
Option 4 ID : **44100962371**
Status : **Answered**
Chosen Option : **C**

Q.19 A, B, C, D, E, F and G are sitting around a circular table facing the centre. E sits second to the right of F. B sits third to the right of E. D is the immediate neighbour of B and F. C sits to the immediate left of A. How many people sit between G and A when counted from the left of G?

Ans
✔ A. Three
✘ B. Four
✘ C. One
✘ D. Two

Question ID : **44100915574**
Option 1 ID : **44100962187**
Option 2 ID : **44100962185**
Option 3 ID : **44100962186**
Option 4 ID : **44100962188**
Status : **Answered**
Chosen Option : **A**

Q.20 Read the given statement(s) and conclusions carefully. Assuming that the information given in the statement(s) is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statement(s).

Statements:
Some engines are doors.
No trains are doors.

Conclusions:
(I) Some engines are not trains.
(II) No trains are engines.

Ans
✗ A. Both conclusions (I) and (II) follow.
✗ B. Only conclusion (II) follows.
✗ C. Neither conclusion (I) nor (II) follows.
✓ D. Only conclusion (I) follows.

Question ID : **44100919617**
Option 1 ID : **44100978198**
Option 2 ID : **44100978196**
Option 3 ID : **44100978197**
Option 4 ID : **44100978195**

Q.31 Select the number from among the given options that can replace the question mark (?) in the following series.

308 263 221 184 154 ?

Ans
✗ A. 147
✗ B. 124
✗ C. 156
✓ D. 133

Question ID : **44100919693**
Option 1 ID : **44100978499**
Option 2 ID : **44100978502**
Option 3 ID : **44100978500**
Option 4 ID : **44100978501**
Status : **Answered**
Chosen Option : **D**

Q.32 Three pipes L, M and N can fill a cistern in 24, 30 and 40 hours, respectively. If the pipe L is opened all the time while M and N are opened for two hours each alternately starting with M, then how many hours will they take to fill the empty cistern?

Ans
✗ A. $12\frac{1}{2}$
✗ B. $13\frac{1}{2}$
✗ C. 13
✓ D. 14

Question ID : **44100951207**
Option 1 ID : **441009203978**
Option 2 ID : **441009203980**
Option 3 ID : **441009203979**

Q.16 Sentences of a paragraph are given below. While the first and the last sentences (S1 and S6) are in the correct order, the sentences in between are jumbled up. Arrange the sentences in the correct order to form a meaningful and coherent paragraph.

S1. Some kind of ethical approach to life has a strong appeal for me, though it would be difficult for me to justify it logically.
P. The idea is by no means new, but this application of an ethical doctrine to large-scale public activity was certainly novel.
Q. It is full of difficulty, and perhaps ends and means are not really separable and form together one organic whole.
R. I have been attracted by Gandhiji's stress on right means and I think one of his greatest contributions to our public life has been this emphasis.
S. In a world which thinks most exclusively of ends and ignores means the emphasis on means seems odd and remarkable.
S6. How far it has succeeded in India, I cannot say.

Ans
✗ A. RQPS
✓ B. RPQS
✗ C. PQSR
✗ D. PSQR

Question ID : **44100917048**

Status : **Not Answered**
Chosen Option : **--**

Q.17 Sentences of a paragraph are given below. While the first and the last sentences (S1 and S6) are in the correct order, the sentences in between are jumbled up. Arrange the sentences in the correct order to form a meaningful and coherent paragraph.

S1. The threat of war with India reached its highest point the summer after I returned from New York.
P. September was deemed the best month for battle, since the mountain passes of Kashmir might be closed by snow as early as October.
Q. Multinational corporations on both sides of the border ordered senior employees to leave, and travel advisories were issued throughout the nations of the First World, counseling their citizens to defer nonessential trips to our region.
R. So we waited as our September ticked by - little noticed by the media in your county, which was focussed at that time on the first anniversary of the attacks on New York and Washington - and then the days started to shorten, the negotiations began to make progress, and the likelihood of a catastrophe that could have claimed tens of millions of lives recorded.
S. It seemed the weather was the only factor delaying the official commencement of hostilities: First because the heat was too great for an Indian offensive in the desert, then because the monsoon's rains made driving treacherous for Indians tanks in the Punjab.
S6. Of course, humanity's respite was brief: Six months later the invasion of Iraq would be under way.

Ans
✓ A. QSPR
✗ B. QRPS
✗ C. PQSR
✗ D. PSQR

Chosen Option : **--**

Comprehension:

Read the given passage and answer the questions that follow.

There are many new developments in high technology to which some people adapt very quickly, while others are reluctant to give them a try. In the main, it is the younger people who are most receptive to new ideas. The reason being that they are still developing a thinking structure and are keen to learn from new experiences. Older people, on the other hand, have well established mental structures and tend to prefer the familiar, rather than involve themselves in the risk and effort of exploring new territory. Whether you are young or old, the choice is yours. You may apply proactive thinking in your business or personal life. Ask yourself, such questions as, 'How can I improve my product to satisfy future demand and stay ahead of my competitors?' or 'Where am I going and what do I want to achieve?'. In each case, the method is to identify possible trends and ask yourself what you should be doing about it. You may even decide to take control and actually set the new trend. This is what 'Golden Wonder' did when they entered the potato crisp market in the UK hitherto dominated by Smiths. They decided to take their crisps into supermarkets and aimed their sales at housewives and children. This, in turn, led to the introduction of flavoured crisps and other snack foods.

SubQuestion No : 41

Q.41 Select the most appropriate ANTONYM of the given word as used in the given passage.

Hitherto

Ans
✓ A. Thereafter
✗ B. So far
✗ C. Thus
✗ D. Consequently

Comprehension:

Read the given passage and answer the questions that follow.

Marie Curie was one of the most accomplished scientists in history. Together with her husband, Pierre, she discovered radium, an element widely used for treating cancer, and studied uranium and other radioactive substances. Pierre and Marie's amicable collaboration later helped to unlock the secrets of the atom.
Marie was born in 1867 in Warsaw, Poland, where her father was a professor of physics. At an early age, she displayed a brilliant mind and a blithe personality. Her great exuberance for learning prompted her to continue with her studies after high school. She became disgruntled, however, when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a French university, where she earned her master's degree and doctorate in physics.
Marie was fortunate to have studied at the Sorbonne with some of the greatest scientists of her day, one of whom was Pierre Curie. Marie and Pierre were married in 1895 and spent many productive years working together in the physics laboratory. A short time after they discovered radium, Pierre was killed by a horse-drawn wagon in 1906. Marie was stunned by this horrible misfortune and endured heartbreaking anguish. Despondently she recalled their close relationship and the joy that they had shared in scientific research. The fact that she had two young daughters to raise by herself greatly increased her distress.
Curie's feeling of desolation finally began to fade when she was asked to succeed her husband as a physics professor at the Sorbonne. She was the first woman to be given a professorship at the world-famous university. In 1911 she received the Nobel Prize in chemistry for isolating radium. Although Marie Curie eventually suffered a fatal illness from her long exposure to radium, she never became disillusioned about her work. Regardless of the consequences, she had dedicated herself to science and to revealing the mysteries of the physical world.

SubQuestion No : 46

Q.46 Give an appropriate title to the passage.

Ans

✗ A. Warsaw`s Scientific Legacy

✗ B. The Tragic Life of Marie Curie

✗ C. Marie Curie: The Radium Discoverer
