

Norcet Previous Year Paper 05

- Q1.** The tumor of the hyaline cartilage is called:
- (a) Osteochondroma
 - (b) Osteosarcoma
 - (c) Enchondroma
 - (d) Chondrosarcoma
- Q2.** The refractive error caused by the differences in the curvature of the cornea and lens is called:
- (a) Emmetropia
 - (b) Astigmatism
 - (c) Myopia
 - (d) Hypermetropia
- Q3.** Find the correctly spelled word:
- (a) Entrepreneur
 - (b) Eantrepraner
 - (c) Entrepreneur
 - (d) Entreperanar
- Q4.** The type of AV aid, which is a cheap and easy-to-carry aid that is covered with rough khadhi and the cutouts, drawings, and other illustrations are placed is called:
- (a) Flash cards
 - (b) Flannel boards
 - (c) Bulletin boards
 - (d) Exhibits
- Q5.** The following are the data collection techniques used in community assessment, EXCEPT:
- (a) Making appropriate judgments
 - (b) Organization and comparisons of problems
 - (c) Effective communication
 - (d) Investigation and measurements
- Q6.** A clinical entity where the process of abortion has started but has not progressed to a state from which recovery is impossible is:
- (a) Spontaneous abortion
 - (b) Threatened abortion
 - (c) Inevitable abortion
 - (d) Missed abortion
- Q7.** Which among the following can be seen in a partial mole?
- (a) Triploidy
 - (b) Haploidy
 - (c) Polyploidy
 - (d) Diploidy

- Q8.** The serological reaction, which sensitizes bacteria for phagocytosis, is called:
- (a) Co-agglutination
 - (b) Neutralization
 - (c) Opsonization
 - (d) Complement fixation
- Q9.** The following are the causes of separation of a normally situated placenta, EXCEPT:
- (a) Sudden uterine decompression
 - (b) Defective decidua
 - (c) Supine hypotension syndrome
 - (d) Thrombophilias
- Q10.** Failure to deliver the head even after the correct and judicious application of forceps raises suspicion of:
- (a) Cervical dystocia
 - (b) Spastic lower segment
 - (c) Constricting ring
 - (d) Inco-ordinate uterine action
- Q11.** The congenital anomaly of the hand, in which there is persistence of the webbing between adjacent digits of the hands, so that they are attached to each other is called:-
- (a) Polydactyl
 - (b) Monodactyl
 - (c) Syndactyl
 - (d) Reduction deformities
- Q12.** Identify the WRONG statement from the following:
- (a) Health is a state and process of being and becoming integrated
 - (b) Adaptive responses do not contribute to integrity
 - (c) Adaptation level represents life processes at different levels
 - (d) Nursing goals promote adaptation
- Q13.** A clinical feature of a patient with major depression includes:-
- a) Agitation
 - b) Behavioral variation
 - c) Increased appetite
 - d) Panic attack
 - (a) a, b, c
 - (b) b, c, d
 - (c) a, b, d
 - (d) a, c, d
- Q14.** Retaining a dead fetus in the uterus for a few weeks is known as:-
- (a) Complete abortion
 - (b) Incomplete abortion
 - (c) Missed abortion
 - (d) Recurrent absorption

- Q15.** The theory which intends to provide a unifying focus for approaching a wide range of nursing concerns is:-
(a) Roy's theory of nursing
(b) Neuman's theory of nursing
(c) Nightingale's theory of nursing
(d) Scudder theory of nursing
- Q16.** Complete the analogy: Rat: Mammal :: Alligator: ?
(a) Animal
(b) Insect
(c) Reptile
(d) Omnivore
- Q17.** A string of bits used to represent a character is known as a:-
(a) Data
(b) Memory
(c) Byte
(d) Volt
- Q18.** The child at 15 months shows the following language development, EXCEPT:-
(a) Look at adults while communicating
(b) Enjoy listening to simple stories
(c) Follow one-step commands without gesture
(d) Understand 100 to 150 words
- Q19.** The placental abnormality with a thin fibrous ring at the margin of the chorionic plate is called:-
(a) Circumvallate placenta
(b) Placenta membranacea
(c) Placenta marginata
(d) Placenta Spuria
- Q20.** The clinical manifestations of pyelonephritis include:-
(a) Abdominal or suprapubic pain
(b) Costovertebral angle tenderness
(c) Persistent vomiting
(d) Severe dehydration
- Q21.** The following statement is TRUE in reference to endotoxins, EXCEPT:-
(a) They are lipopolysaccharides in nature
(b) They are released from the bacterial surface by natural lysis
(c) They are heat liable proteins
(d) Their toxicity depends on the lipid component
- Q22.** The placental abnormality in which the accessory lobe is developed from the activated villi on the chorionic laeve is:-
(a) Placenta Succenturiata
(b) Placenta Spuria
(c) Placenta extrachorialis
(d) Placenta marginata

- Q23.** Mr. Anand is a mentally ill person and needs to be admitted immediately as per the medical officer in charge. In his case, the following statements are TRUE EXCEPT:-
1. He should be produced before the magistrate within 72 hours
 2. The magistrate should meet Mr. Anand in the hospital and examine him within 72 hours
 3. The magistrate can produce the reception order later in case of emergency
 4. The magistrate is eligible to extend the time period of 72 hours
- (a) a, b, c
(b) b, c, d
(c) a, b, d
(d) a, c, d
- Q24.** Which among the following is an excitatory amino acid receptor antagonist?
- (a) Phencyclidine
(b) Quisqualate
(c) Homocysteate
(d) Kainate
- Q25.** The causes of hypoparathyroidism include:-
- (a) Damage of glands during thyroidectomy
(b) Congenital anomaly of the gland
(c) Fractured base of the skull
(d) Development of antibodies to parathyroid cells
- Q26.** Prioritize the methods of data collection from the following:-
- a) Observe the patient by using the senses like sight, smell, hearing, and touch
b) Interview the patient to obtain data by asking relevant questions
c) Examine the patient and review the functioning of all major systems of the body through laboratory methods
d) Use inspection, palpation, percussion, and auscultation in the physical examination
- (a) a, b, c
(b) b, c, d
(c) a, b, d
(d) a, c, d
- Q27.** Providing health education about environmental hygiene to community people is an example of:-
- (a) Social communication
(b) Structural communication
(c) Therapeutic communication
(d) Formal communication
- Q28.** The functions of the Babbage machine include:-
1. Arithmetic calculations
 2. Logarithmic calculations
 3. Calculation of lunar discs
 4. Programming language
- (a) a, b, c
(b) b, c, d
(c) a, c, d
(d) a, b, c, d

- Q29.** Sine wave signals may be generated in a laboratory with an instrument called:-
(a) Oscillator
(b) Amplitude Checker
(c) Analog Finder
(d) Capacitor
- Q30.** Introducing a girl, Saranya said, "Her father is the only son of my mother-in-law." How is the girl related to Saranya?
(a) Mother
(b) Daughter
(c) Daughter-in-law
(d) Mother-in-law
- Q31.** The hypofunction of the anterior pituitary gland that rarely affects the posterior lobe, leading to:-
(a) Graves disease
(b) Simmond's disease
(c) Frohlich's Syndrome
(d) Levi Syndrome
- Q32.** If there are 2500 bottles of intravenous fluid and per day 25 injections are given, how many days will the total supply last?
(a) 3 days
(b) 5 days
(c) 6 days
(d) 8 days
- Q33.** How many times do the hands of a clock coincide in a day?
(a) 20
(b) 21
(c) 22
(d) 24
- Q34.** Malformation of the spine in which the posterior portion of the lamina of one or more vertebrae fails to fuse, with or without defective development of the spinal cord, is called:-
(a) Rachischisis
(b) Encephalocele
(c) Spina bifida
(d) Anencephaly
- Q35.** The functions of a community include:-
1. It provides space for socialize & recreation
2. It provides safety & security
3. Socialization & Education for its members
4. Provides opportunity for interaction among members

- (a) a,b,c
- (b) b,c,d
- (c) a,c,d
- (d) a,b,c,d

Q36. Read the instructions below and mention the type of diagram or graph it represents:

- a) The width of the bar is uniform throughout the diagram
- b) Bars may be either vertical or horizontal
- c) The gap between the bars is uniform throughout

- (a) Bar diagram
- (b) Pie diagram
- (c) Histogram
- (d) Frequency polygon

Q37. The first electronic computer was developed at:-

- (a) Pentagon
- (b) Pennsylvania
- (c) Germany
- (d) France

Q38. To sterilize disposable syringes, the method of sterilization used is:-

- (a) Ethyloxide Autoclavation
- (b) Infrared radiation
- (c) Ultraviolet radiation
- (d) Gamma radiation

Q39. A strong weight-bearing synovial joint with irregular elevations and depressions that produce interlocking of the bones is called:-

- (a) Vestigial tail
- (b) Symphysis pubis
- (c) Sacroiliac joints
- (d) Sacrococcygeal joint

Q40. The treatment that uses light and energy aimed at an exact tissue location and depth to vaporize cancer cells is:-

- (a) En bloc dissections
- (b) Photoablation
- (c) Debulking
- (d) Diathermy

Q41. At 8 weeks of gestation, the uterus looks like:-

- (a) Small unripened pear
- (b) Large orange
- (c) Size of a grape fruit
- (d) Cricket ball

- Q42.** The symptoms of congenital aplastic anemia include:-
a) Purpura
b) Petechia
c) Neutropenia
d) Thalassemia
(a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q43.** Mr. Raju says that he is the first lead of the world and he is born with a special mission in life. These are the symptoms of:-
(a) Autochthonous delusion
(b) Delusion of grandeur
(c) Delusion of persecution
(d) Delusion of reference
- Q44.** The cartilage that completely encircles the larynx with the narrow part anteriorly and the broad part posteriorly is called:-
(a) Thyroid cartilage
(b) Cricoid cartilage
(c) Arytenoid cartilage
(d) Epiglottis
- Q45.** The key activities necessary in budgeting are:-
a) Acquisition
b) Allocation
c) Controlling
d) Affiliation
(a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q46.** Inability to carry out normal activities despite intact motor function is:-
(a) Anhedonia
(b) Apraxia
(c) Apathy
(d) Amnesia
- Q47.** Which among the following types of people have the highest concentration of water in their body?
(a) Fat men
(b) Lean men
(c) Fat women
(d) Lean women

- Q48.** While comparing all types of computers, the computer with the least processing speed is:-
(a) Hybrid computer
(b) Mini computer
(c) Micro computer
(d) Notebook computer
- Q49.** The end phase of psychoanalytical-oriented psychotherapy constitutes the following, EXCEPT:-
(a) Strengthening of insight
(b) Reinforcing the patient's improvement
(c) Application of therapeutic techniques
(d) Preparing the patient for termination of treatment
- Q50.** Identify the WRONG statement from the following:-
(a) Newborns have a rapid pulse rate
(b) Men have higher pulse rates than women
(c) Exercise increases the pulse rate
(d) Ingestion of a meal causes a slight increase in pulse rate
- Q51.** The safety planning for a child with seizure disorder includes:
a) The child should not be left alone in the bathtub
b) Children who bathe alone should use the shower
c) Should wear a helmet to protect the head in case of a fall
d) A form of medical identification should be worn
(a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q52.** A rise of an existing antibody level in response to an irrelevant stimulus is called:
(a) Anaphylactic reaction
(b) Anamnestic reaction
(c) Agglutination reaction
(d) Precipitation reaction
- Q53.** Who is the principal advisor to the Union Government in medical and public health matters?
(a) Cabinet Ministers
(b) Deputy Commissioners
(c) The Directorate General of Health Services
(d) Statutory and Technical Advisory Bodies
- Q54.** The primary task of nursing research is:
(a) To execute responsibilities for the actions of others directed toward determining and achieving patient care goals
(b) To contribute to the scientific base of nursing practice
(c) To meet the healthcare and nursing needs of individual patients, their families, and significant others
(d) To accept overall responsibility for a given patient's individualized nursing care

- Q55.** The components of desensitization include:
- a) Hierarchy construction
 - b) Visualization
 - c) Relaxation
 - d) Item presentation
- (a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q56.** Which protocol provides e-mail facilities among different hosts?
- (a) FTP
 - (b) SMTP
 - (c) TELNET
 - (d) SNMP
- Q57.** The inability of the left ventricle to fill or pump sufficient blood to meet the needs of the tissues for oxygen and nutrients is called:
- (a) Decompensated heart failure
 - (b) Congestive heart failure
 - (c) Left ventricular failure
 - (d) Right ventricular failure
- Q58.** The type of fever in which the temperature fluctuates more than 2°C, all above normal, during a 24-hour period is called:
- (a) Intermittent fever
 - (b) Remittent fever
 - (c) Recurrent fever
 - (d) Relapsing fever
- Q59.** An organized collection of software that controls the overall operation of a computer is called:
- (a) Server
 - (b) Processor
 - (c) OS
 - (d) Device Drivers
- Q60.** The ethical principles in the nursing profession are:
- a) Beneficence
 - b) Nonmaleficence
 - c) Fidelity
 - d) Veracity
- (a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d

- Q61.** The normal range of adult body temperature is:
(a) 35.5–36.0°C
(b) 36.1–37.2°C
(c) 37.5–38.5°C
(d) 34.0–35.0°C
- Q62.** The Indian Nursing Council Act was proposed in:
(a) 1945
(b) 1947
(c) 1958
(d) 2001
- Q63.** The nutritional management of a patient with acute pharyngitis includes:
a) Advice for liquid or soft diet
b) Administer IV fluids for hydration
c) Advice to avoid cool beverages and ice creams
d) Advice to drink more fluids
(a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q64.** A form of speech in which the client tends to wander away from the intended point and never returns to the original idea is called:
(a) Verbigeration
(b) Thought insertion
(c) Tangentiality
(d) Thought block
- Q65.** Complete the analogy by filling the missing number:
1947: 2859 :: 2465: ?
(a) 2376
(b) 3576
(c) 3377
(d) 1354
- Q66.** The thermometer in which the results are seen within 45 seconds is:
(a) Electronic Thermometer
(b) Clinical Thermometer
(c) Disposable Thermometer
(d) Tympanic Membrane Thermometer
- Q67.** The first Muslim ruler who invaded India was:
(a) Mohammad Gori
(b) Babur
(c) Mohammad Bin-Qasim
(d) Qutubuddin Aibak

- Q68.** Which among the following controls and directs light through the specimen under observation?
- (a) Ocular
 - (b) Objective lens
 - (c) Condenser
 - (d) Optical Tube
- Q69.** DOTS is a comprehensive strategy to cure TB. The primary element of DOTS is:
- (a) Sputum microscopy services
 - (b) Regular drug supply to the patients
 - (c) Health workers observe patients swallowing anti-TB medication
 - (d) Political will in terms of manpower
- Q70.** A statement of the predicted relationship between two or more variables in a research study is called:
- (a) Assumption
 - (b) Proposition
 - (c) Operational definition
 - (d) Hypothesis
- Q71.** Identify the WRONG statement from the following:
- (a) Play is critical to infant development
 - (b) Newborn often appears to mimic the expressions they see
 - (c) Rattles are the best toys for newborns
 - (d) Children at 8 months enjoy playing stacking toys
- Q72.** The main substance excreted from the fetus is:
- (a) Bilirubin
 - (b) Carbon dioxide
 - (c) Uric acid
 - (d) Tissues
- Q73.** Which phase of the Korotkoff sound is defined as the diastolic pressure?
- (a) The pressure level at which the first faint, consistent tapping sounds are heard
 - (b) The time during cuff deflation when a murmur of swishing sounds are heard
 - (c) The time when a distinct, abrupt, muffling of sound is heard
 - (d) The pressure level when the last regular blood pressure sound is heard and after which all sounds disappear
- Q74.** In verbal communication, which of the following reflects the feeling behind the words?
- (a) Pace and rhythm
 - (b) Timing and relevance
 - (c) Posture and gait
 - (d) Intonation

- Q75.** The disadvantages of paper health records are:
- a) Access may be delayed
 - b) Retrieving information may be slow
 - c) Documentation is time-consuming
 - d) Downtime for changes
- (a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q76.** Find the missing number:
18, 12, 6, 0, ? -12
- (a) -7
(b) 7
(c) -6
(d) 6
- Q77.** Which among the following is the synonym of sun?
- (a) Sunny
(b) Bright
(c) Solar
(d) Fire
- Q78.** The preventive measures of bacterial endocarditis include:
- a) Antibiotic prophylaxis before and after the procedure
 - b) All catheters and drains are to be removed as early as possible
 - c) Appropriate immunizations against the organisms
 - d) Restriction of physical activity
- (a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d
- Q79.** The side effects of antidepressants include:
- a) Dry mouth, difficulty in micturition, constipation
 - b) Epileptic seizures, tremors, muscle twitching
 - c) Skin rashes and jaundice
 - d) Somnolence and orthostatic hypotension
- (a) a,b,c
(b) b,c,d
(c) a,c,d
(d) a,b,c,d

- Q80.** When instructing a patient about proper diet, which among the following would be considered a complete protein?
- (a) Olives
 - (b) Rice
 - (c) Eggs
 - (d) Nuts
- Q81.** A strategy commonly used to improve therapeutic communication skills is called:
- (a) Active listening
 - (b) Restating and clarifying
 - (c) Validating
 - (d) Process recording
- Q82.** Identification and classification of data, which includes quantitative and qualitative data, belongs to which stage of community diagnosis?
- (a) Stage-1
 - (b) Stage-2
 - (c) Stage-3
 - (d) Stage-4
- Q83.** The principles of primary health care include:
- a) Equitable distribution
 - b) Community participation
 - c) Coverage and accessibility
 - d) Appropriateness and continuity
- (a) a,b,c
 - (b) b,c,d
 - (c) a,c,d
 - (d) a,b,c,d
- Q84.** The use of the external command "TREE" is to:
- (a) Display memory used by files
 - (b) Create break-up copies from one floppy to another
 - (c) Restore files from backup floppy
 - (d) Copy files from one floppy to another
- Q85.** Mrs. Gowri, on assessment, shows the following behavior:
- Maintaining rigid posture
 - Being mute
 - Hears "God's voice"
 - Repeating phrases
- These are the characteristics of:
- (a) Paranoid Schizophrenia
 - (b) Undifferentiated Schizophrenia
 - (c) Catatonic Schizophrenia
 - (d) Residual Schizophrenia

- Q86.** Preparation of the micro lesson falls under which phase of micro teaching?
- (a) Knowledge acquisition phase
 - (b) Skill acquisition phase
 - (c) Implementation phase
 - (d) Transfer phase
- Q87.** The use of the sense of smell to gather data in physical examination is called:
- (a) Auscultation
 - (b) Olfaction
 - (c) Percussion
 - (d) Palpation
- Q88.** Identify the antonym of "relaxed":
- (a) Calm
 - (b) Eased
 - (c) Wired
 - (d) Cool
- Q89.** Which of these is not a symptom of vaginal atrophy?
- (a) Lengthening of the vaginal canal
 - (b) Thinning of vaginal walls
 - (c) Decreased vaginal lubrication
 - (d) Urinary incontinence
- Q90.** The following are the functions of male health workers as a health team member, EXCEPT:
- (a) Conduct survey of the Sub-centre area and maintain records of all families
 - (b) Provide nutrition advice and immunization to mothers & children
 - (c) Maintain information of all vital events
 - (d) Promote health education activities
- Q91.** The advantages of breastfeeding include the following, EXCEPT:
- (a) Promotion of gastrointestinal function
 - (b) Fostering immune defense
 - (c) Nutritional imbalance
 - (d) Economic advantage
- Q92.** The file that controls and manages data communication and working of the input and output devices like keyboard, mouse, monitor, and printer is:
- (a) IBMBIO.COM
 - (b) IBMDOS.COM
 - (c) COMMAND.COM
 - (d) IBMSSR.COM
- Q93.** A posture that involves responding with a posture that differs in focus and is directly opposite in degrees of affiliation and interdependence from the partner's message is called:
- (a) Complementary posture
 - (b) Symmetric posture
 - (c) Asymmetric posture
 - (d) Anti-thetic posture

- Q94.** The phase in which the lining cells of the ovarian follicle are stimulated by luteinizing hormone to develop the corpus luteum, to produce progesterone and estrogen, is:
- (a) Menstrual phase
 - (b) Proliferative phase
 - (c) Secretory phase
 - (d) Follicular phase
- Q95.** Congenital obstruction of the posterior nares at the entrance to the nasopharynx is called:
- (a) Tracheoesophageal fistula
 - (b) Esophageal atresia
 - (c) Choanal atresia
 - (d) Diaphragmatic hernia
- Q96.** The practical nursing programs were developed during the:
- (a) First half of the nineteenth century
 - (b) First half of the twentieth century
 - (c) Second half of the nineteenth century
 - (d) Second half of the twentieth century
- Q97.** Find the correctly spelled word:
- (a) Hemorage
 - (b) Heamorhage
 - (c) Hemorrhege
 - (d) Hemorrhage
- Q98.** Mrs. Sandra underwent a lymph node biopsy. The investigation report states no evidence of primary tumor, no regional lymph node involvement, and no distant metastasis. The stage of her disease based on TNM classification is:
- (a) Tx Nx M0
 - (b) T0 N0 M0
 - (c) Tx N0 M1
 - (d) T0 Nx M1
- Q99.** The suction of the internal fluids of the corpse and the injection of embalming chemicals into body cavities using an aspirator and trocar is the method of:
- (a) Surface embalming
 - (b) Cavity embalming
 - (c) Hypodermic embalming
 - (d) Arterial embalming
- Q100.** The severe weight loss accompanied by progressive weakness, loss of appetite, and anemia, usually associated with advanced cancer, is called:
- (a) Carcinomatosis
 - (b) Cachexia
 - (c) Anaplasia
 - (d) Dysplasia
