Comprehension:

Read the following passage and answer the questions given after it.

The rail networks throughout the world were initially developed due to the need to transport goods during the Industrial Revolution, then to fulfill the gradually increasing demand to transport people toward urban centers. As a result, train stations were built to accommodate both passengers and cargo. While some simply served as loading and unloading platforms, others were uniquely designed and eventually recognized as architectural marvels.

The Grand Central Terminal is a New York City landmark. This station was built at the turn of the 20th century and originally served as a long-distance train station before this service was moved to Penn Station in the 1970s. Today, it's a transit station for commuter trains running to and from the suburbs. Nearly 800 trains stop at Grand Central every day. Grand Central Terminal is known for its vaulted ceiling covered in beautiful paintings, and a monumental, four-sided clock placed exactly in the center of the building.

Haydarpaşa Station, Istanbul (Turkey), located on the Asian side of Istanbul, was built in 1906. The neo-renaissance building served as a terminal for trains travelling to eastern Turkey and other Middle Eastern countries. The station is currently closed following a raging fire that destroyed the roof in 2010. The structure retains its charm, however, primarily due to its striking proximity to the Bosporus strait. The rails seem to run right into the sea.

The Chhatrapati Shivaji Terminus, formerly known as Victoria Terminus Station, in Mumbai, is an outstanding example of the blend of Victorian Gothic architecture and Indian architecture. The building became the symbol of Bombay as the 'Gothic City'. The terminal was built over 10 years, starting in 1878. Its remarkable stone dome, turrets, and pointed arches are close to traditional Indian palace architecture. It is an outstanding example of the meeting of two cultures, as British architects worked with Indian craftsmen to include Indian architectural tradition. It sees 3 million passengers a day and serves as the headquarters of Central Railways..

Kuala Lumpur Station, Malaysia is another mixture of colonial and local architectural styles. Known for its majestic facade, this station resembles typical Victorian buildings with its glass and iron dome, while also featuring Moorish elements drawn from Islamic architecture. Kuala Lumpur Station served trains that passed through the city until 2001. These connections are now made at a new station, Kuala Lumpur Sentral.

Read the following passage and answer the questions given after it.

The rail networks throughout the world were initially developed due to the need to transport goods during the Industrial Revolution, then to fulfill the gradually increasing demand to transport people toward urban centers. As a result, train stations were built to accommodate both passengers and cargo. While some simply served as loading and unloading platforms, others were uniquely designed and eventually recognized as architectural marvels.

The Grand Central Terminal is a New York City landmark. This station was built at the turn of the 20th century and originally served as a long-distance train station before this service was moved to Penn Station in the 1970s. Today, it's a transit station for commuter trains running to and from the suburbs. Nearly 800 trains stop at Grand Central every day. Grand Central Terminal is known for its vaulted ceiling covered in beautiful paintings, and a monumental, four-sided clock placed exactly in the center of the building.

Haydarpaşa Station, Istanbul (Turkey), located on the Asian side of Istanbul, was built in 1906. The neo-renaissance building served as a terminal for trains travelling to eastern Turkey and other Middle Eastern countries. The station is currently closed following a raging fire that destroyed the roof in 2010. The structure retains its charm, however, primarily due to its striking proximity to the Bosporus strait. The rails seem to run right into the sea.

Comprehension:

उपरोक्त गद्यांश के आधार पर निम्नलिखित प्रश्नों के उत्तर दीजिए:

कुछ विद्वानों ने भारत को आर्यों का आदि देश माना है। लेकिन आर्यों का मूल भारत के किस क्षेत्र में था इस पर उनमें मतभेद है। अविनाश चन्द्र दास ने सप्त सैन्धव प्रदेश को ही आर्यों का आदि देश बताया है। उनके अनुसार बाद में सप्त सैन्धव प्रदेश में रहने वाले आर्यों में दो वर्ग हो गये-एक देवों का उपासक और दूसरा असुरों का। इनमें संघर्ष चलता रहा और फलस्वरूप देवासुर संग्राम हुआ जिसमें असुर पराजित हुये और सप्त सैन्धव क्षेत्र से ईरान चले गये। ईरान में रहने वाले यही असुर अहुरमज्दा के उपासक हुये। भारत को आर्यों का आदि देश मानने वाले अन्य विद्वानों में गंगानाथ झा ने ब्रह्मर्षि प्रदेश, तथा लक्ष्मीधर कल्ला ने इसे कश्मीर क्षेत्र बताया। अन्य विद्वानों में कुछ ने मध्य देश और कुछ ने मुल्तान में देविका नदी के तटवर्ती प्रदेश को आर्यों का आदि देश माना।
