Read the given passage and answer the questions that follow.

Plastic pollution is one of the most pressing environmental challenges today. Every year, over 8 million tons of plastic waste end up in oceans, severely affecting marine life. Sea turtles, whales and birds often mistake plastic for food, which can block their digestive systems and cause death. Apart from harming animals, plastic pollution affects humans as well. Microplastics, which are tiny plastic particles, have been detected in drinking water, seafood and even in the air we breathe. This raises significant health concerns. The root cause lies in the widespread use of single-use plastics —like straws, bags and packaging—that take centuries to degrade. In response, several countries have introduced bans or taxes on plastic items, while others promote sustainable alternatives such as cloth bags and reusable containers. However, real change depends not just on policy, but also on individual behaviour. By reducing, reusing and recycling, each person can contribute to a cleaner and safer planet.

निम्नलिखित गद्यांश को पढ़कर दिए गए प्रश्नों के उत्तर दीजिए ।

परंपरागत रूप से मनुष्य को प्राप्त होने वाले ज्ञान और संस्कारों को शिक्षा कहते हैं। साथ ही इसे अगली पीढ़ी को स्थानांतरित करना भी शिक्षा प्रदान करने की प्रक्रिया होती है। अर्थात् शिक्षा कर्म के साथ क्रिया भी होती है। शिक्षा के साथ वास्तविक शब्द को जोड़ना इसे विशेष अर्थ प्रदान करता है। वास्तविक शिक्षा इस बात पर जोर देती है कि पाठ्यक्रम एवं उसकी प्रचलित विधियों से इतर शिक्षा क्या है? प्राचीन काल से लेकर आधुनिक काल तक शिक्षा के स्वरूप, उद्देश्य, लक्ष्य आदि पर चर्चा होती रही है एवं सदैव उसके वास्तविक स्वरूप को खोजने का प्रयास किया जाता रहा है। भारत के ऋषि मुनियों ने 'सा विद्या या विमुक्तये' का ज्ञान देकर शिक्षा की महत्ता पर बल दिया था। वास्तविक शिक्षा वही होती है जो मुक्ति का मार्ग प्रदान करे। मुक्ति का अर्थ सामान्यतः संसार से पलायन के संदर्भ में लिया जाता है परंतु विद्या का जोर इस पलायन पर नहीं अपितु धर्म के साथ जीविका उपार्जन एवं धर्म युक्त कर्मों की महत्ता पर है।
