Comprehension:

In the following passage some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

Although it may seem contradictory, martial arts actually greatly aid people in leading more tranquil, self-controlled lives. This occurs for a variety of reasons, including one related to martial arts practitioners' (1)_____ awareness. Martial arts training requires (2)_____ concentration if you want to master them to a specific level. People with certain disorders, such as those who have trouble focusing or paying attention, particularly those with ailments of the ADHD type, find great benefit from martial arts, especially. People who practise martial arts improve their focus skills. (3)_____ investigations done to find out more about martial arts have shown this. The benefits of martial arts for attention and concentration extended beyond children to adults as well. Martial arts (4)_____ both attention and training. Additionally, martial arts can offer us a variety of advantages that can promote sound mental health by enhancing our attention-management abilities. Martial arts training and other forms of physical activity can benefit those struggling with depression. Exercise hastens the brain's release of feel-good chemicals like endorphins and cannabinoids, which can (5)_____ improve our mood. 232

Chosen Option : 4

Comprehension:

Read the given passage and answer the questions that follow.

There are seven schools of Yoga, differing from one another, and yet having a common objective. The system expounded by Patanjali in his 'Yoga Sutras' is that of Raja Yoga and includes much of the teaching of the other six. 'Hatha Yoga' consists largely of a system of bodily exercises calculated to stimulate the mental and spiritual faculties. 'Mantra Yoga' is a ritualistic course of meditation on certain mystical syllables. 'Bhakti Yoga' emphasises devotion. The remaining schools do not command much importance. It may be worthwhile examining if the yoga method and the modern technique of Mental Hygiene have any common features. Yoga in the words of Patanjali "is attained by studying the fluctuations of the mind". The student of yoga is necessarily one who is dissatisfied with his own adaptation to life and to the external world, for no other reason would induce a man to engage in such an exacting course. His search is not avowedly a search for God, but rather a striving for self-knowledge and internal mental balance. Patanjali says that if the student is of such a temperament that the idea of God appeals to him, that is to be encouraged, for the approach to equilibrium through devotion to God is thereby made the more rapid. If, on the other hand, the student is unable to accept the hypothesis of God, there are other paths of approach. Yoga, in other words, encourages but does not insist upon the devotional approach. Even though Mental Hygiene is intimately associated with Ethics and Religion, this study must confine itself to the psychological aspects of the subject.

SubQuestion No : 71

Q.71 Select an appropriate title for the passage.

- Ans ☒ 1. Paths to Equilibrium: The Philosophies of Modern Hygiene
- ☒ 2. Self-Knowledge and Balance: Insights from Patanjali's Yoga Sutras
- ☒ 3. A Common Goal of Discovery and Balance
- ☒ 4. A Path to Self-Knowledge

Comprehension:

Read the passage and answer the questions that follow.

Artificial Intelligence (AI) systems are increasingly being integrated into decision-making processes across sectors—from healthcare and finance to criminal justice and human resources. While proponents argue that AI enhances efficiency, reduces costs and minimises human error, critics caution against overreliance on algorithms that may themselves be flawed, opaque or biased. AI systems trained on skewed datasets can perpetuate existing social inequalities, often in subtle and untraceable ways.

The problem is compounded by a lack of transparency. Unlike human decision-makers, AI often functions as a 'black box,' making it difficult to understand how certain conclusions are reached. When such systems make consequential choices—such as approving a loan, prioritising patients for organ transplants, or assessing job candidates—the question of accountability becomes complex. Who is to be held responsible when an algorithm causes harm?

Additionally, overdependence on AI risks undermining human judgment. Ethical decisions frequently require empathy, contextual awareness and moral reasoning—faculties current AI technologies cannot replicate. Ignoring these elements can lead to outcomes that are technically efficient but ethically questionable.

Advocates argue that with transparent models, interdisciplinary oversight and continuous monitoring, AI can complement human reasoning rather than replace it. The fundamental question, however, remains: not just whether we can automate complex decisions, but whether we should—and under what moral and societal conditions.

SubQuestion No : 76

Q.76 What is the central theme of the passage?

- Ans ☒ 1. The failure of human judgment in critical systems
- ☒ 2. The ethical concerns surrounding AI-driven decision-making
- ☒ 3. The financial impact of AI integration
- ☒ 4. The technological superiority of AI
