Q.10 Some parts of a sentence have been jumbled up, and labelled P, Q, R and S. Select the option that gives the correct sequence in which these parts can be rearranged to form a meaningful and grammatically correct sentence. Although not intransigent, P. Bedfordshire as the Q. uneasy about the R. Wash was clearly S. specific link with precedent to establish a principle. A. ROSP X B. RPSQ X C. RSPQ X D. RPQS Question ID: 75322912217 Q.11 The question below consist of a set of labelled (P, Q, R, S) sentences. Out of four options given, select the most logical order of the sentences which form a paragraph. By contrast, the Southern economy was based principally on large farms (plantations) that produced commercial crops such as cotton and that relied on slaves as the main labour force. P. By 1860 the per capita wealth of Southern whites was twice that of Northerners, and three-fifths of the wealthiest individuals in the country were Southerners. Q. The price of cotton, the South's defining crop, had skyrocketed in the 1850s, and the value of slaves-who were, after all, property-rose commensurately. R. Yet, to Southerners, as late as 1860, this appeared to be a sound business decision. S. Rather than investing in factories or railroads as Northerners had done, Southerners invested their money in slaves-even more than in land; by 1860, 84 percent of the capital invested in manufacturing was invested in the free (nonslaveholding) states. The extension of slavery into new territories and states had been an issue as far back as the Northwest Ordinance of 1784. Ans A SRQP X B. PQRS X C. RQPS X D. SPQR Question ID: 75322912218 Q.12 Fill in the blank with the most appropriate choice And when the parties collude in such a \_\_\_\_\_ course, it becomes conspiracy as well. Ans X A. leaven B. craven X C. graven X D. shriven

Q.13 Select the word segment that substitutes (replaces) the bracketed word segment correctly and completes the sentence meaningfully. Select the option 'no correction required' if the sentence is correct as given.

Property (should come with the Trades Description Act and) contracts should allow buyers to back out if they discover undeclared defects.

Ans X A. should come through the Trades Description Act and

X C. should come across the Trades Description Act and

X D. No correction required

Question ID: 75322912213

Q.14 Select the word segment that substitutes (replaces) the bracketed word segment correctly and completes the sentence meaningfully. Select the option 'no correction required' if the sentence is correct as given.

(The vices of the rich and great is mistaken for) error, and those of the poor and lowly, for crimes.

Ans X A. The vice of the rich and the great is mistaken for

B. The vices of the rich and great are mistaken for

X C. The vice of the rich and great is mistaken for

X D. No correction required

Question ID: 75322912214

Q.15 The sentence below has been divided into three parts. Select the part of the sentence that has an error. If the sentence has no error, select the option 'No

The carving of the Mount/Rushmore Monument likewise/spanned a period of fourteen years.

Ans X A. No Error

B. The carving of the Mount

X C. Rushmore Monument likewise

X D. spanned a period of fourteen years.

Read the passage carefully and choose the best answer to each question out of the four alternatives.

The Emperor Penguin is a penguin that lives in Antarctica. It is the tallest and heaviest of all penguin species. Emperor Penguins are black and white like all penguins but the sides of their neck are golden. Emperors live in the coldest climate on earth. They breed at the beginning of the Antarctic winter (March and April), on the ice all around the Antarctic continent. The shape of their body helps them to survive. They have short wings that help them dive up to 900 feet to catch larger fish. They can swim up to 12 miles per hour for a short time, which lets them escape from their main enemy, the Leopard Seal. They can stay warm because they have a thick layer of blubber. In addition, the layer of soft feathers trap air that keeps the body heat in and cold air and water out.

SubQuestion No: 16

Q.16 When does the winter period of the Antarctic continent begin?

Ans X A. September and October

X B. June and July

C. March and April

D. November and January

Question ID: 75322912228

#### Comprehension:

Read the passage carefully and choose the best answer to each question out of the four alternatives.

The Emperor Penguin is a penguin that lives in Antarctica. It is the tallest and heaviest of all penguin species. Emperor Penguins are black and white like all penguins but the sides of their neck are golden. Emperors live in the coldest climate on earth. They breed at the beginning of the Antarctic winter (March and April), on the ice all around the Antarctic continent. The shape of their body helps them to survive. They have short wings that help them dive up to 900 feet to catch larger fish. They can swim up to 12 miles per hour for a short time, which lets them escape from their main enemy, the Leopard Seal. They can stay warm because they have a thick layer of blubber. In addition, the layer of soft feathers trap air that keeps the body heat in and cold air and water out.

SubQuestion No: 17

Q.17 According to the passage, which of the following option is incorrect? Choose one option.

X A. The Emperor Penguin lives in the coldest climatic conditions of Earth. Ans

X B. The shape of an Emperor Penguin's body plays a huge role in its survival.

C. Emperor Penguins can swim up to 12 miles per hour for a short duration of time.

D. Emperor penguins do not share any visible similarities with other penguin species.

Read the passage carefully and choose the best answer to each question out of the four alternatives.

The Emperor Penguin is a penguin that lives in Antarctica. It is the tallest and heaviest of all penguin species. Emperor Penguins are black and white like all penguins but the sides of their neck are golden. Emperors live in the coldest climate on earth. They breed at the beginning of the Antarctic winter (March and April), on the ice all around the Antarctic continent. The shape of their body helps them to survive. They have short wings that help them dive up to 900 feet to catch larger fish. They can swim up to 12 miles per hour for a short time, which lets them escape from their main enemy, the Leopard Seal. They can stay warm because they have a thick layer of blubber. In addition, the layer of soft feathers trap air that keeps the body heat in and cold air and water out.

SubOuestion No: 18

Q.18 On which continent are the Emperor Penguins found?

Ans X A. Europe

X B. North America

C. Antarctica

X D. Arctic

Question ID: 75322912227

#### Comprehension:

Read the passage carefully and choose the best answer to each question out of the four alternatives.

The Emperor Penguin is a penguin that lives in Antarctica. It is the tallest and heaviest of all penguin species. Emperor Penguins are black and white like all penguins but the sides of their neck are golden. Emperors live in the coldest climate on earth. They breed at the beginning of the Antarctic winter (March and April), on the ice all around the Antarctic continent. The shape of their body helps them to survive. They have short wings that help them dive up to 900 feet to catch larger fish. They can swim up to 12 miles per hour for a short time, which lets them escape from their main enemy, the Leopard Seal. They can stay warm because they have a thick layer of blubber. In addition, the layer of soft feathers trap air that keeps the body heat in and cold air and water out.

SubQuestion No: 19

Q.19 Who is considered to be the natural predator of Emperor Penguins?

Ans X A. Polar Bear

X B. Great White Shark

X C. Killer Sharks

D. Leopard Seal

Read the passage carefully and choose the best answer to each question out of the four alternatives

The Emperor Penguin is a penguin that lives in Antarctica. It is the tallest and heaviest of all penguin species. Emperor Penguins are black and white like all penguins but the sides of their neck are golden. Emperors live in the coldest climate on earth. They breed at the beginning of the Antarctic winter (March and April), on the ice all around the Antarctic continent. The shape of their body helps them to survive.
