Q.15 Select the word segment that substitutes (replaces) the bracketed word segment correctly and completes the sentence meaningfully. Select the option 'no correction required' if the sentence is correct as given.

Einstein (was one of the world's greatest thinker).

X A. No correction required

X B. was one of the worlds greatest thinkers

X C. were one of the world's greatest thinkers

D. was one of the world's greatest thinkers

Question ID: 75322912618

### Comprehension:

Read the passage carefully and choose the best answer to each question out of the four alternatives.

Insects are found throughout the world except on the poles. Fossil records indicate that many species exist today in much the same form as they did 200 million years ago. Their enormous biological success is attributed to their small size, the remarkable adaptive abilities of the group as a whole and the enormous variety in body structure and way of life. The mouth parts may be adapted to chewing, sucking or lapping and the legs for running, jumping or swimming. Insects may feed on plants or prey upon other small animals or parasitize larger ones. They may be omnivorous or highly specialized in their diets. They display a remarkable variety of adaptive shapes and colours that may serve as camouflage. Some have stinging spines or hair and blistering or noxious secretions used for defence.

SubQuestion No: 16

Q.16 It is stated in the passage that insects

A. can feed on prey smaller and larger than them.

X B. have changed significantly in their shape and size in their journey of evolution.

C. all insects display similar characteristic in general.

X D. are found throughout the surface of the Earth.

Read the passage carefully and choose the best answer to each question out of the four alternatives.

Insects are found throughout the world except on the poles. Fossil records indicate that many species exist today in much the same form as they did 200 million years ago. Their enormous biological success is attributed to their small size, the remarkable adaptive abilities of the group as a whole and the enormous variety in body structure and way of life. The mouth parts may be adapted to chewing, sucking or lapping and the legs for running, jumping or swimming. Insects may feed on plants or prey upon other small animals or parasitize larger ones. They may be omnivorous or highly specialized in their diets. They display a remarkable variety of adaptive shapes and colours that may serve as camouflage. Some have stinging spines or hair and blistering or noxious secretions used for defence.

SubQuestion No: 17

Q.17 Which of the following cannot be attributed the enormous biological success of insects?

Ans

X A. Diet

X B. Abilities

X C. Size

D. Intelligence

Question ID: 75322912632

## Comprehension:

Read the passage carefully and choose the best answer to each question out of the four alternatives.

Insects are found throughout the world except on the poles. Fossil records indicate that many species exist today in much the same form as they did 200 million years ago. Their enormous biological success is attributed to their small size, the remarkable adaptive abilities of the group as a whole and the enormous variety in body structure and way of life. The mouth parts may be adapted to chewing, sucking or lapping and the legs for running, jumping or swimming. Insects may feed on plants or prey upon other small animals or parasitize larger ones. They may be omnivorous or highly specialized in their diets. They display a remarkable variety of adaptive shapes and colours that may serve as camouflage. Some have stinging spines or hair and blistering or noxious secretions used for defence.

SubQuestion No:18

Q.18 According to the passage, how long can you date back the existence of insects?

Ans

X A. 150 million years

X B. 300 million years

C. 200 million years

X D. 250 million years

Read the passage carefully and choose the best answer to each question out of the four alternatives.

Insects are found throughout the world except on the poles. Fossil records indicate that many species exist today in much the same form as they did 200 million years ago. Their enormous biological success is attributed to their small size, the remarkable adaptive abilities of the group as a whole and the enormous variety in body structure and way of life. The mouth parts may be adapted to chewing, sucking or lapping and the legs for running, jumping or swimming. Insects may feed on plants or prey upon other small animals or parasitize larger ones. They may be omnivorous or highly specialized in their diets. They display a remarkable variety of adaptive shapes and colours that may serve as camouflage. Some have stinging spines or hair and blistering or noxious secretions used for defence.

SubQuestion No: 19

Q.19 Where on Earth are insects not found?

Anc

A. Poles

X B. Forests

X C. Deserts

X D. Oceans

Question ID: 75322912633

# Comprehension:

Read the passage carefully and choose the best answer to each question out of the four alternatives.

Insects are found throughout the world except on the poles. Fossil records indicate that many species exist today in much the same form as they did 200 million years ago. Their enormous biological success is attributed to their small size, the remarkable adaptive abilities of the group as a whole and the enormous variety in body structure and way of life. The mouth parts may be adapted to chewing, sucking or lapping and the legs for running, jumping or swimming. Insects may feed on plants or prey upon other small animals or parasitize larger ones. They may be omnivorous or highly specialized in their diets. They display a remarkable variety of adaptive shapes and colours that may serve as camouflage. Some have stinging spines or hair and blistering or noxious secretions used for defence.

SubQuestion No: 20

Q.20 According to the passage, which of the following option is incorrect? Choose one option.

Ans X A. Insects are highly adaptive.

X B. Insects display a remarkable variety of adaptive shape and colours

C. Insects are the oldest complex living organism found on the planet.

D. Insects have varied kind of a diet.

Question ID: 75322912643

# Comprehension:

नीचे दिए गये गद्यांश को ध्यानपूर्वक पढें और चार विकल्पों में से प्रत्येक प्रश्न का सर्वोत्तम उत्तर चुनें।

महिलाओं को शिक्षा के क्षेत्र के समान चिकित्सा के क्षेत्र में भी आना चाहिए। महिलाएं शरीर और स्वभाव दोनों ही रूप से इस कार्य के लिए उपयुक्त होती हैं। हमारे देश में कई जगह महिलाएं अक्सर बीमार और कमजोर रहती हैं। उनके बच्चे भी कुपोषण के कारण अकाल मृत्यु के ग्रास बन जाते हैं। महिलाओं की इस तरह की समस्याओं का समाधान महिलाएं ही भली भांति कर सकती हैं। कुछ महिलाएं इस व्यवसाय को अपनाना तो चाहती है, पर उनके पति इस व्यवसाय को अपनी प्रतिष्ठा के अनुकुल नहीं मानते। इस तरह विवश होकर महिलाओं को चिकित्सा के व्यवसाय से विमुख होना पड़ता है। पतियों को समाज हित में अपने निरर्थक अहंकार की भावना का त्याग कर अपनी पत्नियों को चिकित्सा के क्षेत्र में जाने के लिए प्रेरित करना चाहिए। यदि पुरुष ऐसा कर सके तो समाज और परिवार दोनों का ही कल्याण होगा।
