Comprehension:

Read the given passage and answer the questions that follow.

Just as the oceans opened up a new world for clipper ships and Yankee traders, space holds enormous potential for commerce today. The International Space Station (ISS) took 10 years and more than 30 missions to assemble. It is the result of unprecedented scientific and engineering collaboration among five space agencies representing 15 countries. The space station is approximately the size of a football field: a 460-ton, permanently crewed platform orbiting 250 miles above Earth. It is about four times as large as the Russian space station Mir and five times as large as the U.S. Skylab. The idea of a space station was once science fiction, existing only in the imagination until it became clear in the 1940s that construction of such a structure might be attainable by our nation. As the Space Age began in the 1950s, designs of 'space planes' and stations dominated popular media. The first rudimentary station was created in 1969 by the linking of two Russian Soyuz vehicles in space, followed by other stations and developments in space technology until construction began on the ISS in 1998, aided by the first reusable spacecraft ever developed: the American shuttles. Until recently, U.S. research space onboard the ISS had been reserved for mostly government initiatives, but new opportunities for commercial and academic use of the ISS are now available, facilitated by the ISS National Lab.

Comprehension:

Read the given passage and answer the questions that follow.

Just as the oceans opened up a new world for clipper ships and Yankee traders, space holds enormous potential for commerce today. The International Space Station (ISS) took 10 years and more than 30 missions to assemble. It is the result of unprecedented scientific and engineering collaboration among five space agencies representing 15 countries. The space station is approximately the size of a football field: a 460-ton, permanently crewed platform orbiting 250 miles above Earth. It is about four times as large as the Russian space station Mir and five times as large as the U.S. Skylab. The idea of a space station was once science fiction, existing only in the imagination until it became clear in the 1940s that construction of such a structure might be attainable by our nation. As the Space Age began in the 1950s, designs of 'space planes' and stations dominated popular media. The first rudimentary station was created in 1969 by the linking of two Russian Soyuz vehicles in space, followed by other stations and developments in space technology until construction began on the ISS in 1998, aided by the first reusable spacecraft ever developed: the American shuttles. Until recently, U.S. research space onboard the ISS had been reserved for mostly government initiatives, but new opportunities for commercial and academic use of the ISS are now available, facilitated by the ISS National Lab.

Q.4 Rosemary's husband found the girl whom his wife had randomly picked from the street, out of the magnanimity of her heart, pretty. Even though Ms. Smith was hungry, languid, and poor, she caught Rosemary's husband's attention, but he never complimented his wife with the same attribute even when she carried herself way better. The story ends with Rosemary's attempt at seducing her husband, where despite all his desire for her, she couldn't elicit an involuntary compliment from him and had to prompt him by asking, "Am I pretty?"

Identify the theme of the short story "A Cup of Tea" exemplified in the excerpt given above.

Q.1 Clarissa in Mrs. Dalloway reads lines from Shakespeare's play "Cymbeline" in a bookshop window that suggest that death is a release from the hard struggle of life. The lines force Clarissa to reflect on the contemporary war-torn world, which has accumulated so much sorrow that death might be a welcome relief because everyone, regardless of class, has been affected by the war to some degree. Identify the lines where this reflection of hers is projected.

- Ans** ☒ 1. This late age of the world's experience had bred in them all, all men and women, a well of tears. Tears and sorrows; courage and endurance; a perfectly upright and stoical bearing.
- ☐ 2. Since our apparitions, the part of us which appears, are so momentary compared with the other, the unseen part of us, which spreads wide, the unseen might survive, be recovered somehow attached to this person or that, or even haunting certain places after death . . . perhaps.
- ☐ 3. For Heaven only knows why one loves it so, how one sees it so, making it up, building it round one, tumbling it, creating it every moment afresh; but the veriest frumps, the most dejected of miseries sitting on doorsteps (drink their downfall) do the same; can't be dealt with, she felt positive, by Acts of Parliament for that very reason: they love life.
- ☐ 4. She felt somehow very like him—the young man who had killed himself. She felt glad that he had done it; thrown it away. The clock was striking. The leaden circles dissolved in the air. He made her feel the beauty; made her feel the fun. But she must go back. She must assemble.

Q.4 Which of the following statements are true about 'Elegy Written in a Country Churchyard'?

A: 'Elegy Written in a Country Churchyard' is written in rhymed quatrains or four-line stanzas.

B: Each line can stand on its own as a poetic observation or image, and each stanza is a cohesive whole, held together with parallelism, anaphora and rhyme.

C: The poem employs a steady, fluid iambic pentameter, meaning each line has five feet in a da-DUM rhythm.

D: There aren't any hiccups or tongue twisters—the lines flow. The trochee in the poem (DUM-da) changes the rhythm just enough without disrupting the poem's overall flow.
