Punjab PCS CSAT Paper 2 Held on 7 Dec 2025 otrections (Question No. 1 and 2): Study the following information to answer the questions questions (Question No. 1 and 2): Study the following information to answer the questions given below : Guest lectures on five subjects have to be arranged in a week viz. Economics, History, Statistics, English and Mathematics on the arranged on the subjects viz. have to be arranged in a week from Monday to Friday. Only one lecture can be arranged on only on Tuesday. each day. Economics viz. Economics, History, Statistics, only one lecture can be already only on Tuesday. Mathematics scheduled on Tuesday. Guest faculty for History is available for the day of Economics lecture. only on Tuesday. Mathematics lecture has to be scheduled immediately before the day of Economics lecture. Economics lecture. English lecture has to be scheduled immediately before the day of Economics lecture. Which lecture is scheduled on Monday? (d) Statistics (c) Mathematics 2. Which lecture is scheduled between Statistics and English? (a) Economics (b) History (b) Economics (a) Economics (c) Mathematics (b) History No Lecture (d) 3. A man divides his property, so that his son's share to his wife's and wife's shares to his daughter's and his property, so that his son's share to his wife's and wife's shares to his daughter's are both as in the ratio 3: 1. If the daughter gets ₹ 10,000 less than the son, the value (in ₹) of the whole property is: (a) ₹ 16,250 (b) ₹ 16,000 (c) ₹ 18,250 (d) ₹ 17,000 Four numbers are in the ratio 1:2:3:4. Their sum is 16. The sum of the first and 4. fourth number is equal to : (b) 8 (a) 5 (c) 10 (d) 80 The daily wages of A and B respectively are ₹ 3.50 and ₹ 2.50. When A finishes a - 5. certain work, he gets a total wage of ₹ 63. When B does the same work, he gets a total wage of ₹ 75. If both of them do it together, what is the cost of the work? (a) ₹ 67.50 (d) ₹70.50 (b) ₹ 27.50 (c) ₹ 60.50 *•* 6. A, B and C did certain investments and the ratio of the durations of their investments is 3:2:7 respectively. Ratio of the profits of A, B and C is 4:3:14 respectively. What is the ratio of the investments of A, B and C? (a) 1:3:4 (b) 7:9:11 (c) 8:9:12 (d) 2:3:11 Working alone A can do a task in 27 hours and B can do the same in 54 hours. Find C's share (in ₹) if A, B and C get paid ₹ 4,320 for completing a task in 12 hours on which they worked together. (a) 1,440 (b) 960 (c) 1,920 (d) 1,280

- Consider the following argument:

 "In order to be a teacher, one must graduate from college. All poets are poor. Some

 Mathematicians are poets. No college graduate is poor." Which one of the following is

 not a valid conclusion regarding the above argument?
 - (a) Some Mathematicians are not teachers.
 - (b) Some teachers are not Mathematicians.
 - (c) Teachers are not poor.
 - (d) Poets are not teachers.
- 62. Examine the following relationships among members of a family of six persons A, B, C, D, E and F.
 - I. The number of males equals that of females.
 - U. A and E are sons of F.
 - UK. D is the mother of two, one boy and one girl.
 - B is the son of A.
 - V. There is only one married couple in the family at present.

 Which one of the following inferences can be drawn from the above?
 - (a) A, B and C are all females
- (b) A is the husband of D
- (e) E and F are children of D
- (d) D is the granddaughter of F
- 63. In a code language, 'SOLID' is, written as 'WPSLPIMFHA', what does the code 'ATEXXQIBV' refer to?
 - (a) EAGER
- WATER.
- (b) WAFER

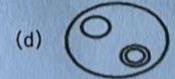

(c) WAGER

- (d) WATER
- 64. In a dinner party both fish and meat were served. Some took only fish and some only meat. There were some vegetarians who accepted neither. The rest accepted both fish and meat. Which one of the following logic diagrams correctly reflects the above situation?

Re pa

Directions (Question No. 65 and 66): Carefully read the passage given below and answer the

By the year 2050, 80% of the Earth's population will live in urban centres. Applying the most conservative estimates to current demographic trends, the human population will increase by about three billion people by then. An estimated 10 hectares of new land (about 20% larger than Brazil) will be needed to grow enough food to feed them, if traditional farming methods continue as they are practised today. At present, throughout the world, over 80% of the land that is suitable for raising crops is in use. Historically, some 15% of that has been laid waste by poor management practices. What can be done to ensure enough food for the world's

The concept of indoor farming is not new, since hothouse production of tomatoes and other produce has been in vogue for some time. What is new is the urgent need to scale up this technology to accommodate another three billion people. Many believe an entirely new approach to indoor farming is required, employing cutting-edge technologies. One such proposal is for the 'Vertical Farm'. The concept is of multi-storey buildings in which food crops are grown in environmentally controlled conditions. Situated in the heart of urban centres, they would drastically reduce the amount of transportation required to bring food to consumers. Vertical farms would need to be efficient, cheap to construct and safe to operate. If successfully implemented, proponents claim, vertical farms offer the promise of urban renewal, sustainable production of a safe and varied food supply (through year-round production of all crops), and the eventual repair of ecosystems that have been sacrificed for horizontal farming.

It took humans 10,000 years to learn how to grow most of the crops we now take for granted. Along the way, we despoiled most of the land we worked, often turning verdant, natural ecozones into semi-arid deserts. Within that same time frame, we evolved into an urban species, in which 60% of the human population now lives vertically in cities. This means that, for the majority, we humans have shelter from the elements, yet we subject our food-bearing plants to the rigours of the great outdoors and can do no more than hope for a good weather year. However, more often than not now, due to a rapidly changing climate, that is not what happens. Massive floods, long droughts, hurricanes and severe monsoons take their toll each year, destroying millions of tons of valuable crops.

- 65. Which of the following statements may be concluded from the passage?
 - (a) There is an impending food crisis owing to rapid population growth.
 - (b) Urban centres of the future will be farmlands.
 - ★(c) We will take 10000 years to learn and master vertical farming.
 - +(d) All of the above
- Which of the following statements may not be concluded from the passage?
 - (a) Climate change has made the future of agriculture uncertain.
 - (b) Vertical farming is a sustainable option for the future of agriculture.
 - (c) Vertical farming has no negative implications on agriculture.
 - Reduction of transportation costs is one of the main reasons why we should adopt vertical farming.

Read the following passage and enswer Question Numbers 67 and 68 with reference to the passage by choosing the most appropriate option

After a traumatic experience, it's normal to feel frightened, sad, anxious, and disconnected. But if the upset doesn't fade, you may be suffering from post-traumatic stress disorder (PTSD) can develop following any event that makes you fear for your safety. Any event, of series of events, that overwhelms you with feelings of hopelessness and helplessness and leaves you emotionally shattered, can trigger PTSD — especially if the event feels unpredictable and uncontrollable. PTSD can affect people who personally experience the traumatic event, those who witness the event, or those who pick up the pieces afterwards, such as emergency workers and law enforcement officers. PTSD can also result from surgery performed on children too young to fully understand what's happening to them.

Whatever the cause for your PTSD, with treatment and support, one can learn to manage your symptoms, reduce painful memories, and move past the trauma. Following a traumatic event, almost everyone experiences at least some of the symptoms of PTSD. A normal response to trauma becomes PTSD when you get stuck. After a traumatic experience, the mind and the body are in shock. But as you make sense of what happened and process your emotions, you start to come out of it. With PTSD, however, you remain in psychological shock. Your memory of what happened and your feelings about it are disconnected. In order to move on, it's important to face and feel your memories and emotions.

Recovery from PTSD is a gradual, ongoing process. Healing doesn't happen overnight, nor do the memories of the trauma ever disappear completely. This can make life seem difficult at times. PTSD can make you feel disconnected from others. You may be tempted to withdraw from social activities and your loved ones. But it's important to stay connected to life and the people who care about you.

If you suspect that you or a loved one has post-traumatic stress disorder, it's important to seek help right away. The sooner PTSD is treated, the easier it is to overcome. This process is much easier with the guidance and support of an experienced therapist or doctor. Treatment for PTSD can relieve symptoms by helping you deal with the trauma you've experienced. When looking for a therapist, seek out mental health professionals who specialize in the treatment of trauma and PTSD. Beyond credentials and experience, it's important to find a PTSD therapist who makes you feel comfortable and safe. Trust your gut; if a therapist doesn't feel right, look for someone else. For therapy to work, you need to feel comfortable and understood.
