QID: 831 - Read the passage carefully and answer the questions that follow choosing the correct alternatives.

The Khajuraho Group of Monuments is a group of Hindu temples and Jain temples in Chhatarpur district, Madhya Pradesh, India, about 175 kilometres southeast of Jhansi. They are a UNESCO World Heritage Site. The temples are famous for their nagara-style architectural symbolism and their erotic sculptures.

Most Khajuraho temples were built between 950 and 1050 by the Chandela dynasty. Historical records note that the Khajuraho temple site had 85 temples by the 12th century, spread over 20 square kilometres. Of these, only about 25 temples have survived, spread over six square kilometers. Of the surviving temples, the Kandariya Mahadeva Temple is decorated with a profusion of sculptures with intricate details, symbolism and expressiveness of ancient Indian art. The Khajuraho group of temples were built together but were dedicated to two religions, Hinduism and Jainism, suggesting a tradition of acceptance and respect for diverse religious views among Hindus and Jains in the region. The 10th-century Bhand Deva Temple in Rajasthan was built in the style of the Khajuraho monuments and is often referred to as 'Little Khajuraho'.

The temple site is within Vindhya mountain range in central India. An ancient local legend held that Hindu deity Shiva and other gods enjoyed visiting the dramatic hill formation in Kalinjar area. The centre of this region is Khajuraho, set midst local hills and rivers. The temple complex reflects the ancient Hindu tradition of building temples where gods love to pray.

The temples are clustered near water, another typical feature of Hindu temples. The current water bodies include Sib Sagar, Khajur Sagar (also called Ninora Tal) and Khudar Nadi (river). Local legends state that the temple complex had 64 water bodies, of which 56 have been physically identified by archaeologists so far.

All temples, except one (Chaturbhuja) face sunrise - another symbolic feature that is predominant in Hindu temples. The relative layout of temples integrate masculine and feminine deities and symbols highlight the interdependence. The artwork symbolically highlight the four goals of life considered necessary and proper in Hinduism - dharma, kama, artha and moksha. Of the surviving temples, six are dedicated to Shiva and his consorts, eight to Vishnu and his affinities, one to Ganesha, one to Sun god, three to Jain Tirthankars. For some ruins, there is insufficient evidence to assign the temple to specific deities with confidence.

An overall examination of site suggests that the Hindu symbolic mandala design principle of square and circles is present each temple plan and design. Further, the territory is laid out in three triangles that converge to form a pentagon. Scholars suggest that this reflects the Hindu symbolism for three realms or trilokinatha, and five cosmic substances or panchbhuteshvara. The temple site highlights Shiva, the one who destroys and recycles life, thereby controlling the cosmic dance of time, evolution and dissolution.

The Khajuraho temples are dedicated to which 2 religions?

The Song of Wandering Aengus W. B. Yeats

I went out to the hazel wood,
Because a fire was in my head,
And cut and peeled a hazel wand,
And hooked a berry to a thread;
And when white moths were on the wing,
And moth-like stars were flickering out,
I dropped the berry in a stream
And caught a little silver trout.

When I had laid it on the floor
I went to blow the fire a-flame,
But something rustled on the floor,
And someone called me by my name:
It had become a glimmering girl
With apple blossom in her hair
Who called me by my name and ran
And faded through the brightening air.

Though I am old with wandering
Through hollow lands and hilly lands,
I will find out where she has gone,
And kiss her lips and take her hands;
And walk among long dappled grass,
And pluck till time and times are done,
The silver apples of the moon,
The golden apples of the sun.

What did the poet catch in the stream?

Options:

- 1) A silver trout
- 2) A red berry
- 3) A blue kingfish
- 4) Silver apples of the moon

Correct Answer: 1) A silver trout

Who called me by my name and ran
And faded through the brightening air.

Though I am old with wandering
Through hollow lands and hilly lands,
I will find out where she has gone,
And kiss her lips and take her hands;
And walk among long dappled grass,
And pluck till time and times are done,
The silver apples of the moon,
The golden apples of the sun.

Where was the poet wandering?

Options:

- 1) lands and hills
- 2) river banks
- 3) mountain tops
- 4) forests

Correct Answer: 1) lands and hills

Candidate Answer: 1) lands and hills

QID: **840** - Read the poem carefully and answer the questions that follow choosing the correct alternatives.

The Song of Wandering Aengus W. B. Yeats

I went out to the hazel wood,
Because a fire was in my head,
And cut and peeled a hazel wand,
And hooked a berry to a thread;
And when white moths were on the wing,
And moth-like stars were flickering out,
I dropped the berry in a stream
And caught a little silver trout.

When I had laid it on the floor
I went to blow the fire a-flame,
But something rustled on the floor,
And someone called me by my name:
It had become a glimmering girl
With apple blossom in her hair
Who called me by my name and ran
And faded through the brightening air.

Though I am old with wandering
Through hollow lands and hilly lands,
I will find out where she has gone,
And kiss her lips and take her hands;
And walk among long dappled grass,
And pluck till time and times are done,
The silver apples of the moon,
The golden apples of the sun.
