Answer the questions based on the following passage.

Global warming is the slow increase in the average temperature of the earth's atmosphere because an increased amount of the energy (heat) striking the earth from the sun is being trapped in the atmosphere and not radiated out into space.

The earth's atmosphere has always acted like a greenhouse to capture the sun's heat, ensuring that the earth has enjoyed temperatures that permitted the emergence of life forms as we know them, including humans.

Without our atmospheric greenhouse the earth would be very cold. Global warming, however, is the equivalent of a greenhouse with high efficiency reflective glass installed the wrong way around.

Ironically, the best evidence of this may come from a terrible cooling event that took place some 1,500 years ago. Two massive volcanic eruptions, one year after another placed so much black dust into the upper atmosphere that little sunlight could penetrate. Temperatures plummeted. Crops failed. People died of starvation and the Black Death started its march. As the dust slowly fell to earth, the sun was again able to warn the world and life returned to normal.

Today, we have the opposite problem. Today, the problem is not that too little sun warmth is reaching the earth, but that too much is being trapped in our atmosphere.

So much heat is being kept inside greenhouse earth that the temperature of the earth is going up faster than at any previous time in history. NASA provides an excellent course module on the science of global warming.

एक गद्यांश दिया गया है। गद्यांश के आधार पर पाँच प्रश्न दिए गए हैं। गद्यांश को ध्यानपूर्वक पढ़ें तथा प्रत्येक प्रश्न में चार विकल्पो में से सही विकल्प चुने।

'श्रम' आदर्श जीवन का मूल मंत्र है। हमारे ऋषि-मुनियों द्वारा प्रणीत वेद-शास्त्रों में श्रम के महत्व को स्वीकार किया है। श्रमशील महापुरूष का अमृत स्पर्श-छोटे-से-छोटे कार्य को बड़ा बना देता है। सृष्टि के प्रारंभ से लेकर आज तक मानव ने निरंतर परिश्रम करके ही अपने विकास का पथ प्रशस्त किया है। आज संसार में जो कुछ भी दिखाई दे रहा है, वह सतत परिश्रम का फल है। संसार के जितने भी उन्नत और समृद्धशाली देश है, उन सबके पीछे परिश्रम का ही आधार है। द्वितीय विश्व युद्ध ने जापान को लगभग तहस-नहस कर दिया था। उसके दो बड़े औद्योगिक नगर हिरोशिमा और नागासाकी अणु मार से खंडहर मात्र रह गये थे, पर आज जापान विश्व का सबसे अधिक संपन्न देश है क्यों? इसका सिर्फ एक उत्तर है सतत् परिश्रम और प्रयास। संसार के महान से महान व्यक्ति ने अपना जीवन बहुत छोटे रूप से शुरू किया है, लेकिन जीवन भर अनथक परिश्रम कर वे उन्नति के चरम शिखर पर पहुँच गए। सत्य तो यह है कि संसार के बड़े और महान लोगों ने जीवन में छोटे से-छोटा समझा जाने वाला कार्य भी पूरी लगन और श्रद्धा से किया किया है। बोझ ढोने वाला कुली तनजिंग ही संसार की सबसे ऊँची चोटी एवरेस्ट पर विजय पताका फेहरा सकता है। सुभाषचन्द्र बोस, अब्राहिम लिंकन, लेनिन, गांधी और संसार के असंख्य लोग निरंतर श्रम करके ही कहीं पहुँच सके हैं। किसी लेखक ने कहा है "यदि तुममें उद्धयोगी बनने की क्षमता है तो अपनी सारी शक्तियों को केन्द्रित कर अपने उद्देश्य की पूर्ति में निरत हो जाओ, बाधाओं और विरोधों से भयभीत मत रहो सफलता तुम्हारे चरण चूमेगी"।
