Read the given passage and answer the questions that follow.

Globalization is a process of interaction and integration among the people, companies, and governments of different nations, a process driven by international trade and investment and aided by information technology. This process has effects on the environment, on culture, on political systems, on economic development and prosperity, and on human physical well-being in societies around the world.

Globalization is not new, though. For thousands of years, people—and, later, corporations—have been buying from and selling to each other in lands at great distances, such as through the famed Silk Road across Central Asia that connected China and Europe during the Middle Ages. Likewise, for centuries, people and corporations have invested in enterprises in other countries. In fact, many of the features of the current wave of globalization are similar to those prevailing before the outbreak of the First World War in 1914.

But policy and technological developments of the past few decades have spurred increases in cross-border trade, investment, and migration so large that many observers believe the world has entered a qualitatively new phase in its economic development. Since 1950, for example, the volume of world trade has increased by 20 times, and from just 1997 to 1999 flows of foreign investment nearly doubled, from \$468 billion to \$827 billion. Distinguishing this current wave of globalization from earlier ones, author Thomas Friedman has said that today globalization is "farther, faster, cheaper, and deeper."

This current wave of globalization has been driven by policies that have opened economies domestically and internationally. In the years since the Second World War, and especially during the past two decades, many governments have adopted free-market economic systems, vastly increasing their own productive potential and creating myriad new opportunities for international trade and investment. Governments also have negotiated dramatic reductions in barriers to commerce and have established international agreements to promote trade in goods, services, and investment. Taking advantage of new opportunities in foreign markets, corporations have built foreign factories and established production and marketing arrangements with foreign partners. A defining feature of globalization, therefore, is an international industrial and financial business structure.

Read the given passage and answer the questions that follow.

Globalization is a process of interaction and integration among the people, companies, and governments of different nations, a process driven by international trade and investment and aided by information technology. This process has effects on the environment, on culture, on political systems, on economic development and prosperity, and on human physical well-being in societies around the world.

Globalization is not new, though. For thousands of years, people—and, later, corporations—have been buying from and selling to each other in lands at great distances, such as through the famed Silk Road across Central Asia that connected China and Europe during the Middle Ages. Likewise, for centuries, people and corporations have invested in enterprises in other countries. In fact, many of the features of the current wave of globalization are similar to those prevailing before the outbreak of the First World War in 1914.

But policy and technological developments of the past few decades have spurred increases in cross-border trade, investment, and migration so large that many observers believe the world has entered a qualitatively new phase in its economic development. Since 1950, for example, the volume of world trade has increased by 20 times, and from just 1997 to 1999 flows of foreign investment nearly doubled, from \$468 billion to \$827 billion. Distinguishing this current wave of globalization from earlier ones, author Thomas Friedman has said that today globalization is "farther, faster, cheaper, and deeper."

This current wave of globalization has been driven by policies that have opened economies domestically and internationally. In the years since the Second World War, and especially during the past two decades, many governments have adopted free-market economic systems, vastly increasing their own productive potential and creating myriad new opportunities for international trade and investment. Governments also have negotiated dramatic reductions in barriers to commerce and have established international agreements to promote trade in goods, services, and investment. Taking advantage of new opportunities in foreign markets, corporations have built foreign factories and established production and marketing arrangements with foreign partners. A defining feature of globalization, therefore, is an international industrial and financial business structure.

नीचे लिखे गद्यांश को पढ़कर दिए गए प्रश्न का उत्तर दें-

हमारी खराबी का स्त्रोत कहाँ है- इसका पता हमें लगाना चाहिए और वहीं से उसे ठीक करने का प्रयत्न करना चाहिए। स्त्रोत वहीं हो सकता है, जहाँ से हमारा जीवन प्रारंभ होता है और वह है हमारा घर। हमारे घर की इस समय बड़ी दुर्व्यवस्था है। अवश्य ही आप लोगों को अपने घर से असंतोष होगा। असंतोष इसी कारण हो सकता है कि घर में कुछ दोष आप पाते हैं परंतु दोष की कुछ जिम्मेदारी आपके ऊपर भी है। ऐसी स्थिति में आपका कर्तव्य है कि आप इन दोषों को दूर करने का प्रयत्न करें। स्वयं भावों का आदर करते हुए आपको ऐसा प्रयास करना होगा कि आपके कारण किसी दूसरे को कष्ट न हो इससे घर की शांति और सोहार्द में वृद्धि होगी। आजकल की सबसे विचित्र बात यह है कि कोई अपने को दोष नहीं देता, सब कोई दूसरे को दोष देते हैं। आज के संसार में आपकी बड़ी जिम्मेदारी है। आगे का भारत वैसा ही होगा जैसे आप लोग अपने जीवन से उसे बनाएंगे। यदि आप अपना काम ठीक तरह से करते हैं तो आप सब देश भक्त हैं और यदि आप अपने काम के प्रति उदासीन हैं तो आप वास्तव में देशदोही हैं।
