Comprehension:

Read the given passage and answer the questions that follow.

Speech is a great blessing, but it can also be a great curse, for while it helps us to make our intentions and desires known to our fellows, it can also, if we use it carelessly, make our attitudes completely misunderstood. A slip of the tongue, the use of an unusual word or an ambiguous word may create an enemy where we have hoped to win a friend. Again, different classes of people use different vocabularies, and the ordinary speech of an educated man may strike an uneducated listener as showing pride; unwillingly, we may use a word which bears a different meaning to our listeners from what it does to men of our class. Thus, speech is not a gift to use lightly without thought, but one which demands careful handling. Only a fool will express himself alike to all.
