	Comprehension:
	Read the following passage and answer the questions given below. Being in nature has long been known to provide comfort, reduce stress and enhance mental clarity. The Japanese practice of 'shinrin-yoku', or forest bathing, embodies this idea by encouraging individuals to immerse themselves in the natural environment through their senses. Unlike exercise or hiking, forest bathing is a mindful, unhurried experience of observing, listening, touching and breathing in the forest atmosphere. Research has demonstrated the health benefits of shinrin-yoku, from stress reduction to improved overall well-being. As urbanisation increases, with most people spending the majority of their time indoors, the disconnection from nature grows. However, even a brief, two-hour forest bath can help individuals unplug from technology, slow down and reconnect with the present moment. Engaging the five senses—seeing the shades of green, hearing birds and rustling leaves, smelling forest fragrances, touching tree bark and tasting the fresh air—helps bridge the gap between humans and nature. Forest bathing does not require a guide or specialised skills; it can be practiced in any natural setting, including parks or gardens. Various activities like yoga, meditation, Nordic walking or simply being still in the forest can enhance the experience. The essence of shinrin-yoku lies in savouring the natural world, allowing it to restore one's energy and sense of calm. Ultimately, forest bathing fosters a deeper connection with nature and oneself, offering a path to relaxation, rejuvenation and inner peace.
	SubQuestion No : 58
Q.5	Based on the passage, why is forest bathing considered a remedy for modern lifestyles?
Ans	<div><div><div>✗</div><div>1. It provides a physical workout to maintain fitness.</div></div><div><div>✗</div><div>2. It discourages and bans the use of technology to explore forests effectively.</div></div><div><div>✓</div><div>3.
