Read the following passage and answer the question that follow:

ఈ దిగువ పాసేజీ చదివి తరువాత వచ్చు ప్రశ్నలకు సమాధానము వ్రాయుము.

Nowhere else does the greater light so rule the day, so measure, so divide, so reign, make so imperial laws, so visibly kindle, so immediately quicken, so suddenly efface, so banish, so restore, as in a plain like this of Suffolk with its enormous sky. The curious have an insufficient motive for going to the mountains if they do it to see the sunrise. The sun that leaps from a mountain peak is a sun past the dew of his birth; he has walked some way towards the common fires of noon. But on the flat country the uprising is early and fresh, the arc is wide, the career is long. The most distant clouds, converging in the beautiful and little-studied order of cloud-perspective (for most painters treat clouds as though they formed perpendicular and not horizontal scenery), are those that gather at the central point of sunrise. On the plain, and there only, can the construction but that is too little vital a word; I should rather say the organism--the unity, the design, of a sky be understood. The light wind that has been moving all night is seen to have not worked at random. It has shepherded some small flocks of cloud afield and folded others. There's husbandry in Heaven. And the order has, or seems to have, the sun for its midst. Not a line, not a curve, but confesses its membership in a design declared from horizon to horizon.

సఫోక్ మైదానాలలో వలె ప్రపంచంలో మరెక్కడా ఒక మహత్తర కాంతి దినాన్ని శాసించదు. సమయాన్ని కొలుస్తు, విభజిస్తూ, నియమాలను అదేశిస్తూ, ఇంతలో వెలుతురూ, అంతలో ఆరిపోతూ, మసకబారిపోతూ, ప్రకాశాన్ని తిరిగి ప్రజ్వలించజేస్తూ అనంత ఆకాశంకింద వెలిగే ఈ కాంతిసఫోక్ మైదానాలో మాత్రమే దృశ్యమానము. కొండలపైని సూర్యోదయాన్ని చూడడం పట్ల అసక్తిగల కొందరు వెళ్తుంటారు కాని అటువంటి అసక్తికి ఏమంత ప్రేరణ ఉండదు. ఎందుకంటే, ఆ కొండచరియల వెనుకనుండి ఎగిసే సూర్యుడు ఉదయపు తడి నుండి మధ్యాహ్నపు వేడి వైపు పయనించేవాడే కాని సమతల మైదానాలలో సూర్యోదయం గమనం సువిశాలం, ప్రయాణం సుదీర్ఘం. దూరంగా కమ్మేమేఘాలు సూర్యోదయాన్ని తొందరగా, స్వచ్ఛంగా మొదలవుతుంది. అట్టి సూర్యోదయాన్ని అనుకరించి ఒక అద్భుతమైన పద్ధతిలో సమన్వయమౌతాయి. (చాలమంది చిత్రకారులు మేఘాలను లంబంగా చిత్రిస్తారు, కాని అవి సమతలంగా వ్యాపించినట్లు కనిపిస్తాయి) ఇలాంటి దృశ్యాన్ని ఆకాశపు నిర్మాణం అనో, ఆకారం అంటే ఆ పదాలు చాలవు. అది ఒక జీవచిత్రం, ఒక ఆలోచనాత్మక రూపకల్పన. రాత్రంతా వీచిన మెల్లనిగాలి యాదృచ్ఛికంగా సాగదు. కొన్ని మేఘాలను నెమ్మదిగా కదిలిస్తూ, మరికొన్నింటిని సమూహాలుగా చేరుస్తూ ఒక క్రమపద్ధతిలో సాగే చక్కనివ్యవస్థ. ఈ వ్యవస్థకి, క్రమానికి కేంద్రం సూర్యుడే. ప్రతి ఒక్క రేఖ, వక్రత ఆ విశ్వరచనలో తన భాగస్వామ్యాన్ని వెల్లడిస్తుంది.

Read the passage given below to answer.

Although many definitions of abnormality have been used over the years, none has won universal acceptance. Still, most definitions have certain common features, often called the 'four Ds': deviance, distress, dysfunction and danger. That is, psychological disorders are deviant (different, extreme, unusual, even bizarre), distressing (unpleasant and upsetting to the person and to others), dysfunctional (interfering with the person's ability to carry out daily activities in a constructive way), and possibly dangerous (to the person or to others).

The first approach views abnormal behaviour as a deviation from social norms. Many psychologists have stated that 'abnormal' is simply a label that is given to a behaviour which is deviant from social expectations. Abnormal behaviour, thoughts and emotions are those that differ markedly from a society's ideas of proper functioning. Each society has norms, which are stated or unstated rules for proper conduct. Behaviours, thoughts and emotions that break societal norms are called abnormal. A society's norms grow from its particular culture - its history, values, institutions, habits, skills, technology, and arts.

The second approach views abnormal behaviour as maladaptive. Many psychologists believe that the best criterion for determining the normality of behaviour is not whether society accepts it but whether it fosters the well-being of the individual and eventually of the group to which s/he belongs.

Another definition of abnormality states that a person is considered abnormal if he /she is unable to perform the behaviours necessary for day -day -day living eg. self-care, holding a job managing everyday tasks.

If you talk to people around, you will see that they have vague ideas about psychological disorders that are characterised by superstition, ignorance and fear. Again, it is commonly believed that psychological disorder is something to be ashamed of. The stigma attached to mental illness means that people are hesitant to consult a doctor or psychologist because they are ashamed of their problems.
