आज आवश्यकता है कि विकलांग व्यक्ति उन महान विकलांग विभूतियों का अनुसरण करें जिन्होंने विकलांगों के लिये सामान्य व्यक्तियों जैसा जीवन जीने का पथ प्रशस्त किया है। ध्यान देना होगा कि कैसे हेसेन कीलर ने नेत्रहीनता, श्रवणहीनता और मूकता को पराजित करके समाज में अपना सम्मानित, प्रेरक और गौरवपूर्ण स्थान बनाया। बालक विरजानंद ने निर्धनता और नेत्रहीनता के बावजूद किस प्रकार वैदिक ज्ञान को उजागर किया। दोनों पर कटे हरने पर भी अलैक्सेई मरैस्येव ने विमान को उड़ाया। जीते-जागते प्रमाण के रूप में बाबा आम्टे भी हैं जो स्वयं अस्थि विकलांग होते हुए भी पिछले पैंतीस वर्षों से निरंतर कुष्ठ रोगियों की सेवा कर रहे हैं सीखना होगा कि विपत्तियों और बाधाओं का सामना कैसे करें और कैसे आगे बढ़ें। किन्हीं संदर्भों में विकलांगता एक मनोभाव है क्योंकि विकलांग व्यक्ति भी साधारण व्यक्ति की अपेक्षा अधिक योगदान दे सकता है। विकलांगता और बहु विकलांगता चाहे कितनी भी गंभीर क्यों न हो व्यक्ति अपनी संकल्पशक्ति द्वारा अपना योगदान देते हुए सम्मान प्राप्त कर सकता है।

I remember a certain Indian village where I had been invited to visit the home of a family with some modern educations, though not much and some means, though not wealth. The house was mud-malled and the roof was of thatch. Inside were several rooms however, the floor smooth and polished with the usual mixture of cow dung and water. The active master of the house was not the head of the family but a younger brother. This I discovered when I arrived, for before we entered the house, my host led me to a curious sort of cape standing well above the ground on four parts. Inside the cape, made of wire netting, I saw to my amazement an ageing man lying on his back, his head supported by a pillow, 'My eldest brother' my host explained. 'he has had a stroke of paralysis and though we beg him to live in the house, he chooses to live out here so that he may be ready to listen to the villagers when they come to him.

My host spoke fair English, but the eldest brother spoke none; and we could only exchange greetings and look at each other with friendliness, what I saw was an intelligent, pain-sharpened face, whose eyes were at once wise and piercing. The body was quite helpless but it was absolutely clean and the cotton garments were snow-white. We exchanged a few remarks and then a group of villagers approached, not to see me but to talk with the elder brother and so my host led me into the house to meet his young wife and children.

All during my stay, I watched that cage and seldom indeed did I see it except surrounded by people and never, as long as daylight lasted, without atleast one man sitting on the ground talking earnestly and then listening. My host said 'My brother has always been our wise man. Now he is our saint'.

My host, I observed had his own place too, in the village life, for twice while we were eating our lunch that day, he rose from his corner of the room and went out, to answer a shout, apparently from a neighbour. When he came back he made the same explanation. 'I was called to kill a dangerous snake'.

- (a) Describe the house visited by the author. 2
  - (b) Why did the host's elder brother stay in a cage? 2
  - (c) Why was the author unable to talk to the elder brother? 2
  - (d) Why was the host called out by the villagers? 2
  - (e) Give the meaning of the words 2
    - (i) Amazement
    - (ii) Ageing.
4. Make a precis of the following passage and give a suitable title to it. 10

The life of Marie Curie contains prodigies in such numbers that one would like to tell her story like a legend.

She was a woman; she belonged to an oppressed nation; she was poor; she was beautiful, a powerful vocation summoned from her motherland, Poland to study in Paris, where she lived years of poverty and solitude. There she met a man whose genius was akin to hers. She married him, their happiness was unique. By the most desperate and avid effort, they discovered a magic element, radium. This discovery not only gave, birth to a new science and a new philosophy; it provided mankind with the means of treating a dreadful disease.

At the moment when the fame of the two scientists and benefactors was spreading over the world, grief overtook Marie; her husband, her wonderful companion was taken from her by death in an instant. But in spite of distress and physical illness, she continued alone the work that had been begun with him and brilliantly developed the science they had created together.
