Comprehension:

Read the given passage and answer the questions that follow.

We already know that regular reading is vital to improving students' literacy skills and overall academic performance. However, reading has many benefits far greater than academic achievements as measured by a USA study. Research results find that people who read are more empathetic towards their fellow beings and more willing to be curious and open towards others that may look or live differently than them. Additionally, research results show that readers are better able to cope with stress and trauma by finding stories like their own in the pages of a book. Reading increases our understanding of our own identity; improves empathy and gives us an insight into the world view of others. Reading used to mean sitting down with a book and turning pages as a story unfolded. However, today it would mean sitting down with a device. In a review of existing research and data, Common Sense Media found an abundance of evidence pointing towards worrisome trends in children's reading habits and abilities in recent decades. However, research studies have yet to establish how increasingly prevalent digital reading technologies, such as e-readers and tablet computers, affect students' reading habits. Recent research shows that 32% of children aged 15 to 17 years read no books over the summer, compared with 22% in 2016. The number of 9-year-olds to 11-year-olds who do not read doubled, from 7% to 14%.

Read the given passage and answer the question that follows.

Whenever a pandemic outbreak takes place, health experts emerge on various news channels and social media sites to talk about the significance of physical activities. By physical activity, they mean movement of the body such as walking, jogging, sports, etc. They emphasise the need to be physically fit. There are umpteen benefits of physical activities. Such physical movement not only keeps our body lean or helps in weight loss but also maintains blood pressure, improves mental health and enables cognitive development. Nowadays, many schools have started to give weightage to physical activities by including sports, PT and physical education in the curriculum. The primary aim of physical education scheme is to infuse skills, consolidate them in one's personality and also bring a change in one's behaviour. It is also important to understand that as life cannot be inert, so also the physical education scheme cannot be inert. If this is true, then the design and teaching pedagogy must also upgrade from time to time.

Even in foreign countries, particularly America, physical education is considered to be equally significant for the understanding of other disciplines such as arithmetic, science, history, etc. On the contrary, some schools in India place curriculum teaching much above physical education, which means the 3 R's win over health because education means overall development of children. Overall development is incomplete without physical activity. Hence, school management must think seriously about ways to upgrade physical education from time to time so that students are completely engaged in such activities to develop and grow strong.

SubQuestion No : 16

Q.16 How can the objective to improve the physical education scheme be achieved?

- Ans
- ☒ 1. By appointing qualified instructors
 - ☒ 2. By allotting less time to teaching and more time to physical activity
 - ☒ 3. By strategising the number of activities to be incorporated
 - ☒ 4. By upgrading physical education programme as per the need

Q.20 The given options contain pairs of words that are related to each other in a certain way. Three of the pairs are alike in some manner and hence form a group. Which pair does NOT belong to that group?

- Ans ☐ 1. Barometer : Pressure
☐ 2. Ammeter : Current
☒ 3. Pyrometer : Length
☐ 4. Altimeter : Altitude

Q.3 If 'A' stands for '÷', 'B' stands for '×', 'C' stands for '+' and 'D' stands for '-', what will come in place of the question mark (?) in the following equation?

136 C 128 B 2 D 505 A 5 = ?

- Ans
- ☒ 1. 291
 - ☒ 2. 292
 - ☒ 3. 289
 - ☒ 4. 293

Q.4 What should come in place of the question mark (?) in the given series?

13, 14, 30, 93, 376, ?

- Ans
- ☒ 1. 1764
 - ☒ 2. 1815
 - ☒ 3. 1885
 - ☒ 4. 1674

Q.6 Vimal starts from Point K and drives 11 km towards the north. He then takes a right turn, drives 4 km, turns right and drives 6 km. He then takes a left turn and drives 2 km. He takes a final right turn, drives 5 km and stops at Point L. How far (shortest distance) and towards which direction should he drive in order to reach Point K again? (All turns are 90 degrees turns only unless specified)

- Ans ☒ 1. 6 km toward the west
- ☐ 2. 4 km toward the west
- ☐ 3. 2 km toward the west
- ☐ 4. 5 km toward the west

Q.8 Given below are two sets of numbers. In each set of numbers, a certain mathematical operation on the first number results in the second number. Similarly, a certain mathematical operation on the second number results in the third number and so on. Which of the options follows the same set of operations as given in the question?
(NOTE: A two/three-digit number cannot be broken down into individual digits for operations. E.g. if 37 is followed by 10, the operation cannot be $3 + 7$, as a two-digit number cannot be broken down into individual digits.)

7 – 14 – 42 – 50; 6 – 12 – 36 – 44

- Ans ☒ 1. 8 – 16 – 48 – 56
☒ 2. 5 – 10 – 20 – 28
☒ 3. 9 – 18 – 54 – 60
☒ 4. 5 – 10 – 30 – 36

Q.9 17 is related to 68 following a certain logic. Following the same logic, 27 is related to 108. To which of the following is 47 related, following the same logic?
(NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into its constituent digits. E.g. 13 – Operations on 13 such as adding/subtracting/multiplying etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

- Ans ☒ 1. 188
☒ 2. 182
☒ 3. 192
☒ 4. 178
