Q.1 Why did Ram Mohan become a controversial figure?

Read the following passage carefully and answer the questions given below it. Certain words/phrases are printed in bold to help you locate them while answering some of the questions.

The early Orientalist movement and the rapid growth of English as the principal medium of instruction after the 1830s, considerably enhanced the educated Indian's familiarity with his tradition. But, perhaps equally importantly, it also fostered a sense of shared culture. Ram Mohan may have been the first Hindu to have used the term 'Hinduism', thereby indicating some degree of culture or perhaps even ethnic essentialization. These developments were also facilitated by the coming of the printing press. Over time, the success of print-culture enormously increased the importance of written texts within a tradition that had hitherto greatly relied on orality. Perhaps this strengthened the hands of some writers who, particularly towards the end of the nineteenth century, began to emphasize a common cultural base for Hinduism. In the religious sphere, for example, there was now a far greater emphasis on the Vedas as a unified source of Hinduism, the 'prime determinant of a 'Hindu' identity.

The success of the printing press is also tied up with certain extremely important shifts that began to occur in the social and religious thinking of early nineteenth century Bengal. Hitherto, texts considered to be the most important in Hinduism had been zealously guarded by a class of Brahmins which prevented their wider circulation. Women and Sudras, for example, had traditionally been barred from Vedic knowledge. More importantly, these Hindu scriptures were composed in ' Sanskrit which meant that many other social groups besides women and Sudras had practically no access to the Vedas. Early reformers like Ram Mohan addressed these issues simultaneously. On the one hand, Ram Mohan bravely went against tradition by attempting to open up Vedic knowledge to all those who might be moved to seek it, irrespective of their social origin. This was the impulse behind his publication of Bengali translations of Hindu religious classics like the Vedanta Sutra (Brahma Sutra), and subsequently, some important Upanishads. This is also precisely why Ram Mohan became such a controversial figure.

- A. He created awareness and sensitivity about our cultural heritage.
- B. He advocated that patriotism is a natural instinct among People
- C. He advocated that racial identity is crucial for political independence
- D. He opposed the move of opening the first Sanskrit college in Bengal
- E. He opened up the knowledge of Vedas to all the sections of the society

Answer: E

Q.8 When a culture is insecure, the painter chooses his subject on the basis of:

Read the following passage carefully and answer the questions given below them. Certain words/phrases have been printed in bold to help you locate them while answering some of the questions.

The painter is now free to paint anything he chooses. There are scarcely any forbidden subjects, and today everybody is prepared to admit that a painting of some fruit can be as important as a painting of a hero dying. The Impressionists did as much as anybody to win this previously unheard-of freedom for the artist. Yet, by the next generation, painters began to abandon the subject altogether, and began to paint abstract pictures. Today the majority of pictures painted are abstract.

Is there a connection between these two developments? Has art gone abstract because the artist is embarrassed by his freedom? Is it that, because he is free to paint anything, he doesn't know what to paint? Apologists for abstract art often talk of it as the art of maximum freedom. But could this be the freedom of the desert island? It would take too long to answer these questions properly. I believe there is a connection. Many things have encouraged the development of abstract art. Among them has been the artists' wish to avoid the difficulties of finding subjects when all subjects are equally possible.

I raise the matter now because I want to draw attention to the fact that the painter's choice of a subject is a far more complicated question than it would at first seem. A subject does not start with what is put in front of the easel or with something which the painter happens to remember. A subject starts with the painter deciding he would like to paint such-and-such because for some reason or other he finds it meaningful. A subject begins when the artist selects something for special mention. (What makes it special or meaningful may seem to the artist to be purely visual its colours or its form.) When the subject has been selected, the function of the painting itself is to communicate and justify the significance of that selection.

It is often said today that subject matter is unimportant. But this is only a reaction against the excessively literary and moralistic interpretation of subject matter in the nineteenth century. In truth the subject is literally the beginning and end of a painting. The painting begins with a selection (I will paint this and not everything else in the world); it is finished when that selection is justified (now you can see all that I saw and felt in this and how it is more than merely itself).

Thus, for a painting to succeed it is essential that the painter and his public agree about what is significant. The subject may have a personal meaning for the painter or individual spectator; but there must also be the possibility of their agreement on its general meaning. It is at this point that the culture of the society and period in question precedes the artist and his art. Renaissance art would have meant nothing to the Aztecs and vice versa. If, to some extent, a few intellectuals can appreciate them both today it is because their culture is an historical one: its inspiration is history and therefore it can include within itself, in principle if not in every particular, all known developments to date.

When a culture is secure and certain of its values, it presents its artists with subjects. The general agreement about what is significant is so well established that the significance of a particular subject accrues and becomes traditional. This is true, for instance, of reeds and water in China, of the nude body in Renaissance, of the animal in Africa. Furthermore, in such cultures the artist is unlikely to be a free agent: he will be employed for the sake of particular subjects, and the problem, as we have just described it, will not occur to him.

When a culture is in a state of disintegration or transition the freedom of the artist increases-but the question of subject matter becomes

problematic for him: he, himself, has to choose for society. This was at the basis of all the increasing crises in European art during the nineteenth century. It is too often forgotten how many of the art scandals of that time were provoked by the choice of subject (Gericault, Courbet, Daumier, Degas, Lautrec, Van Gogh, etc.).

By the end of the nineteenth century there were, roughly speaking, two ways in which the painter could meet this challenge of deciding what to paint and so choosing for society. Either he identified himself with the people and so allowed their lives to dictate his subjects to him; or he had to find his subjects within himself as painter. By people I mean everybody except the bourgeoisie. Many painters did of course work for the bourgeoisie according to their copy-book of approved subjects, but all of them, filling the Salon and the Royal Academy year after year, are now forgotten, buried under the hypocrisy of those they served so sincerely.

- A. The prevalent style in the society of his time.
- B. Its meaningfulness to the painter.
- C. What is put in front of the easel.
- D. Past experience and memory of the painter.
- E. All of the above.

I raise the matter now because I want to draw attention to the fact that the painter's choice of a subject is a far more complicated question than it would at first seem. A subject does not start with what is put in front of the easel or with something which the painter happens to remember. A subject starts with the painter deciding he would like to paint such-and-such because for some reason or other he finds it meaningful. A subject begins when the artist selects something for special mention. (What makes it special or meaningful may seem to the artist to be purely visual its colours or its form.) When the subject has been selected, the function of the painting itself is to communicate and justify the significance of that selection.

It is often said today that subject matter is unimportant. But this is only a reaction against the excessively literary and moralistic interpretation of subject matter in the nineteenth century. In truth the subject is literally the beginning and end of a painting. The painting begins with a selection (I will paint this and not everything else in the world); it is finished when that selection is justified (now you can see all that I saw and felt in this and how it is more than merely itself).

Thus, for a painting to succeed it is essential that the painter and his public agree about what is significant. The subject may have a personal meaning for the painter or individual spectator; but there must also be the possibility of their agreement on its general meaning. It is at this point that the culture of the society and period in question precedes the artist and his art. Renaissance art would have meant nothing to the Aztecs and vice versa. If, to some extent, a few intellectuals can appreciate them both today it is because their culture is an historical one: its inspiration is history and therefore it can include within itself, in principle if not in every particular, all known developments to date.

When a culture is secure and certain of its values, it presents its artists with subjects. The general agreement about what is significant is so well established that the significance of a particular subject accrues and becomes traditional. This is true, for instance, of reeds and water in China, of the nude body in Renaissance, of the animal in Africa. Furthermore, in such cultures the artist is unlikely to be a free agent: he will be employed for the sake of particular subjects, and the problem, as we have just described it, will not occur to him.

When a culture is in a state of disintegration or transition the freedom of the artist increases-but the question of subject matter becomes problematic for him: he, himself, has to choose for society. This was at the basis of all the increasing crises in European art during the nineteenth century. It is too often forgotten how many of the art scandals of that time were provoked by the choice of subject (Gericault, Courbet, Daumier, Degas, Lautrec, Van Gogh, etc.).

By the end of the nineteenth century there were, roughly speaking, two ways in which the painter could meet this challenge of deciding what to paint and so choosing for society. Either he identified himself with the people and so allowed their lives to dictate his subjects to him; or he had to find his subjects within himself as painter. By people I mean everybody except the bourgeoisie. Many painters did of course work for the bourgeoisie according to their copy-book of approved subjects, but all of them, filling the Salon and the Royal Academy year after year, are now forgotten, buried under the hypocrisy of those they served so sincerely.

- A. Painters decided subjects based on what they remembered from their own lives.
- B. Painters of reeds and water in China faced no serious problem of choosing a subject.
- C. The choice of subject was a source of scandals in nineteenth century European art.
- D. Agreement on the general meaning of a painting is influenced by culture and historical context.
- E. All of the above

Q.12 Which of the following views is taken by the author?

Read the following passage carefully and answer the questions given below them. Certain words/phrases have been printed in bold to help you locate them while answering some of the questions.

The painter is now free to paint anything he chooses. There are scarcely any forbidden subjects, and today everybody is prepared to admit that a painting of some fruit can be as important as a painting of a hero dying. The Impressionists did as much as anybody to win this previously unheard-of freedom for the artist. Yet, by the next generation, painters began to abandon the subject altogether, and began to paint abstract pictures. Today the majority of pictures painted are abstract.

Is there a connection between these two developments? Has art gone abstract because the artist is embarrassed by his freedom? Is it that, because he is free to paint anything, he doesn't know what to paint? Apologists for abstract art often talk of it as the art of maximum freedom. But could this be the freedom of the desert island? It would take too long to answer these questions properly. I believe there is a connection. Many things have encouraged the development of abstract art. Among them has been the artists' wish to avoid the difficulties of finding subjects when all subjects are equally possible.

- A. accost
- B. callous
- C. frost
- D. fallout

E. dissipate

Answer: E

Sol:

Accrue means be received by someone in regular or increasing amounts over time. Hence it has an opposite meaning to dissipate.
Accost means approach and address (someone) boldly or aggressively.
Callous means showing or having an insensitive and cruel disregard for others.
Frost means freeze.

- A. filiation
- B. dearth
- C. redundant
- D. penetrate
- E. antecedent

Answer: E

Sol:

Precede means come before in order or position. Hence it has the same meaning as antecedent.
Filiation means the fact of being descended or derived from something.

Q.21 In each of the following questions, five options are given and you have to choose the one which has some or any grammatical error in it. In the questions where the fifth option is “all are correct” and all the given four options are correct, choose option (E) as your choice.

- A. I believe that next time when you will be coming to Bombay, you will bring my book.
- B. I do not believe in denying its force, or running away in an opposite direction.
- C. We are all supposed to believe in the same thing in different ways.
- D. Lisa, I believe, did nothing; and Curll did what was expected.
- E. All are correct.

Answer: A

Sol:

Replace ‘will be coming’ by ‘come’ as the clause starting with “when, if, before, after, in case, as long as, as soon as” for future action takes Simple Present Tense.
e.g. When he comes, he will give me some money.
If you work hard, you will succeed.

Q.22 In each of the following questions, five options are given and you have to choose the one which has some or any grammatical error in it. In the questions where the fifth option is “all are correct” and all the given four options are correct, choose option (E) as your choice.

- C. This so pleased Noel that he advanced my wages to a dollar and a half a week.
- D. Thank you for your invitation for lunch which I am very pleased to accept.
- E. All are correct.

Answer: D

Sol:

Replace ‘invitation for’ by ‘invitation to’ as Preposition ‘to’ is used after ‘invite’ or ‘invitation’.

Q.23 In each of the following questions, five options are given and you have to choose the one which has some or any grammatical error in it. In the questions where the fifth option is “all are correct” and all the given four options are correct, choose option (E) as your choice.

- A. They have got to live a man's life, pushing all these things before them, and get on as well as they can.
- B. Swiftly they drew near to the flaming colored suns, and passed close beside them.
- C. According to the agreements reached at WTO, commitment was made by all member countries to keep import tariffs low and eliminate all non-tariff barriers which could curb imports.
- D. When I offered him to help which he needed, he persisted in refusing it, so I left him to his fate.
- E. She has refused to evacuate Malta.

Answer: D

Sol:

Remove 'to' before 'help' as 'offer' is a Di-Transitive verb (verb which takes two objects). So object 'help' will be used after 'him' and not the infinitive 'to help'. e.g. I offered him a job. Ans.(Here, 'him' is an indirect object while 'a job' is a direct object.)

Q.24 In each of the following questions, five options are given and you have to choose the one which has some or any grammatical error in it. In the questions where the fifth option is "all are correct" and all the given four options are correct, choose option (E) as your choice.

- A. Who has been responsible for all the trouble the world has known for ages?
- B. He only is responsible for the suffering caused to the whole family.
- C. I am sure the heat, and not the natural, beautiful activity of her mind, is responsible for her condition.
- D. You can't make me responsible for the acts of a person I don't know from Adam.
- E. All are correct.

Answer: B

Sol:

Use 'Only' before 'he' as generally 'only' is used before that word which it signifies.
e.g. Only you saw him.
You only saw him.
You saw only him.
In all these sentences, 'only' signifies different words.

Q.25 In each of the following questions, five options are given and you have to choose the one which has some or any grammatical error in it. In the questions where the fifth option is "all are correct" and all the given four options are correct, choose option (E) as your choice.

- A. How sweet and pastoral are these cool resting-places in the heart of the Vosges!
- B. In a fit of temper he tore up a sweet letter which his wife had written to him.
- C. It is the emblem of a rustic maid in the sweet prime of her morning.
- D. It has been an advantage for that sweet girl to have been brought up by them.
- E. That sweet chocolate gaze softened and a smile touched the corners of his mouth.

Answer: B

Sol:

Use 'the' in place of 'a' as the word 'letter' is particularly specified i.e. the letter which his wife had written.
e.g. He gave me the book which he had bought in Delhi. [not 'a book']
