Q.2 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

All horses are elephants.
 Some horses are giraffes.
 No elephant is a tiger.

Conclusions:

(I) Some elephants are giraffes.
 (II) Some giraffes are tigers.5691

- Ans
- 1. Both conclusions (I) and (II) are true
 - 2. Only Conclusion (II) is true
 - 3. Neither Conclusion (I) nor Conclusion (II) is true
 - 4. Only Conclusion (I) is true

Question ID : 4410091150486

Q.3 A few statements are given followed by two conclusions. Identify which of the given conclusions is/are true based on the given statements.

Statement:
 $S < T < W$
 $W < X > Y$
 $S = Y < Z$

Conclusions:
 I. $T < Y$
 II. $X = Z$

- Ans 1. Neither I nor II is true
 2. Only I is true
 3. Both I and II are true
 4. Only II is true

Q.17 A group of numbers/symbols is coded using letter codes as per the codes given below and the conditions which follow. The correct combination of codes following the conditions is your answer.

Number/ symbol	3	@	7	5	\$	&	2	%	#	9	+	6	8	4
Code	C	F	A	J	L	E	W	Q	D	G	R	B	U	S

Conditions:

(I) If the first element is a symbol and the last element a number, the codes for these two (the first and the last elements) are to be interchanged.

(II) If both second and third elements are perfect squares, the third element is to be coded as the code for the second element.

What will be the code for the following group?

@ 2 # 6 9 12574

- Ans
- 1. F B D W G
 - 2. G D B W G
 - 3. F B D W F
 - 4. G W D B F

Comprehension:

Read the given passage and answer the questions that follow.

Ann Johnson became paralysed and lost the ability to speak after suffering a stroke in 2005, when she was 30 years old. Eighteen years later, she consented to being surgically fitted with an experimental, thin, brain-reading implant that connects to a computer, officially called a brain-computer interface (BCI). Researchers placed the implant on her motor cortex, the part of the brain that controls physical movement, and it tracked her brain waves as she thought the words she wanted to say.

As detailed in a study published in the journal Nature Neuroscience, researchers used advances in artificial intelligence to improve the device's ability to quickly translate that brain activity into synthetic speech—now, it's almost instantaneous.

The technology "brings the same rapid speech decoding capacity of devices like Alexa and Siri to neuroprostheses," study co-author Gopala Anumanchipalli says. Neuroprostheses are devices that can aid or replace lost bodily functions by connecting to the nervous system.

"Using a similar type of algorithm, we found that we could decode neural data and, for the first time, enable near-synchronous voice streaming," he adds. "The result is more naturalistic, fluent speech synthesis."

Previously, the research team had worked with Johnson to generate speech using an automated voice and digital avatar. That system, which had a delay of about eight seconds to decode her brain patterns, would speak full sentences at once. . . . Now, the enhanced experimental device can continuously identify words from brain activity and translate them into speech within about three seconds, per Nature News.

SubQuestion No : 11

Q.11 Which of the following statements is true, based on the passage?

- Ans
- 1. Alexa and Siri use the same algorithm that is used in all kinds of neuroprostheses.
 - 2. The recent implant on Johnson's motor cortex generates speech using an automated voice and digital avatar.
 - 3. Ann Johnson had not worked with Gopala Anumanchipalli before.
 - 4. The new device makes it possible to almost simultaneously generate speech by decoding neural data.

The Asian Games, officially known as Asiad, is a multi-sport event held every four years among athletes from all over Asia. The Games were regulated by the Asian Games Federation (AGF) from the first Games in New Delhi, India, until the 1982 Games. Since the 1982 they have been organised by the Olympic Council of Asia (OCA), after the break up of the Asian Games Federation. The Games are recognised by the International Olympic Committee (IOC) and are described as the second largest multi-sport event after the Olympic Games.

Asian Games, the comprehensive sports competition in Asia, is the biggest sports games in Asia, which is held by the members of the Asian Sports Federation by turns. Just like the worldwide sports games as Olympics and World Cup, it is held every four years. Far East Games, the predecessor of the Asian Games, was initiated in 1911 by Philippine Sports Association and since then it was held every two years by turns in Manila (Philippines), Shanghai (China) and Osaka (Japan). It was totally held for 10 times until 1937 when the world war broke out. In 1948, people from Asian sports circles who had taken part in Olympics gathered and suggested to resume the Far East Games in a way that it should be held every four years in a larger scale with a new name 'Asian Games'.⁴⁶⁰

भील जनजाति की लोक संस्कृति में चित्रांकन की परंपरा अत्यंत महत्वपूर्ण है। भील स्त्री-पुरुष शरीर को अलंकृत करने के लिए आभूषणों के अतिरिक्त गुदना का भी प्रयोग करते हैं। नारियाँ अपने हाथों से लेकर पैरों तक गुदना गुदवाती हैं। गुदना कतिपय जनजातियों में जातीय प्रतीक भी होता है। उदाहरणस्वरूप भील महिलाओं के द्वारा आँखों के सिरोँ पर दो आड़ी लकीरें गुदवाना भील होने का प्रतीक है। इतना ही नहीं यदि किसी स्त्री के शरीर पर गुदना न गुदा हो तो उस स्त्री के हाथ का पानी तक पीना वर्जित होता है। वास्तव में गुदना गुदवाने की प्रेरणा आदिवासियों को आदिमानवों द्वारा उत्कीर्ण गुहा चित्रों से मिली है। अतः आदिवासी समाज में माथे से लेकर पैर की उंगलियों तक अनेक प्रकार का चित्रांकन गुदना के अंतर्गत किया जाता रहा है, किंतु आज इस समाज की लोक परंपरा समाप्ति की कगार पर आ खड़ी हुई है। प्रकृति लोक-संगीत की जननी है। प्रकृति के साथ अंतर्क्रिया करते हुए ही मानव ने कंठ और वाद्य संगीत का विकास किया है, जिसमें भील जनजाति का विशेष महत्व है। ढोल या मांदल और बाँसुरी की धुन पर भील इतना मधुर गाते हैं कि मन मुग्ध हो उठता है।
