Read the given passage and answer the questions that follow.

Chocolate, a universally cherished delicacy, manifests in various delightful forms like bars, candies and desserts. Its history spans millennia, dating back to the ancient Mayans and Aztecs, who revered the cacao tree as a divine gift. Introduced to Europe in the 16<sup>th</sup> century, chocolate quickly captivated royal palates.

However, there's a looming threat to chocolate's future. While complete disappearance is improbable, concerns arise regarding its accessibility and quality due to several factors, primarily climate change. Cacao trees, pivotal for chocolate production, are sensitive to shifting environmental conditions, potentially rendering current cultivation regions unsuitable in the coming decades.

A study in Environmental Science and Technology forecasts a drastic reduction of cacao-growing areas in West Africa, the world's primary cocoa producer, by up to 50% by 2050, jeopardising millions of livelihoods. Pests and diseases further exacerbate these challenges.

To address these issues, scientists and farmers are collaborating on breeding resilient cacao varieties and adopting sustainable farming practices. Notably, researchers from the University of California and Mars Incorporated are endeavouring to cultivate more hard cacao seeds capable of thriving in changing climates.

While the future of chocolate faces hurdles, concerted efforts aim to safeguard its existence. Awareness of climate change's impact and support for sustainable practices are crucial in ensuring chocolate's availability for future generations.

Yuri Gagarin, at 27, made history as the first human to journey into space, orbiting the Earth on 12 April 1961, in Vostok 1, launched from Baikonur Cosmodrome. His flight lasted 108 minutes, breaking the bounds of Earth's gravity. Born to a carpenter father and a mother who worked as a milkmaid, Gagarin's early life was marked by displacement during World War II. Excelling in mathematics and physics, he pursued his passion for flying, becoming a fighter pilot after graduating from pilot school. Selected among 20 candidates for the Soviet Union's inaugural manned space mission, Gagarin embarked on his historic flight as a passenger, lacking control over Vostok 1. Technical malfunctions caused high temperatures within the capsule, forcing Gagarin to eject shortly before landing, descending safely with a parachute. Upon his return, Gagarin achieved global fame, touring countries like Germany, Canada and Japan to showcase Soviet technological prowess. Tragically, his life was cut short at 34 in 1968, when his plane crashed during a training flight, depriving him of witnessing the ongoing advancements in space exploration.

**Comprehension:**

Read the given passage carefully and answer the questions that follow.

Yuri Gagarin, at 27, made history as the first human to journey into space, orbiting the Earth on 12 April 1961, in Vostok 1, launched from Baikonur Cosmodrome. His flight lasted 108 minutes, breaking the bounds of Earth's gravity. Born to a carpenter father and a mother who worked as a milkmaid, Gagarin's early life was marked by displacement during World War II. Excelling in mathematics and physics, he pursued his passion for flying, becoming a fighter pilot after graduating from pilot school. Selected among 20 candidates for the Soviet Union's inaugural manned space mission, Gagarin embarked on his historic flight as a passenger, lacking control over Vostok 1. Technical malfunctions caused high temperatures within the capsule, forcing Gagarin to eject shortly before landing, descending safely with a parachute. Upon his return, Gagarin achieved global fame, touring countries like Germany, Canada and Japan to showcase Soviet technological prowess. Tragically, his life was cut short at 34 in 1968, when his plane crashed during a training flight, depriving him of witnessing the ongoing advancements in space exploration.
