Q.2 A group of numbers and symbols is coded using letter codes as per the codes given below and the conditions that follow. The correct combination of codes following the conditions is your answer. If none of the conditions follow, then codes for the respective number/symbol are to be followed directly as given in the table.

Number/symbol	3	@	1	5	\$	&	9	%	#	7	+	2	8	6
Code	S	F	T	W	A	P	L	D	M	Q	R	C	Z	Y

Conditions:

If the first element is a symbol and the last element a number, the codes for these two (the first and the last elements) are to be interchanged.

If the first element is an even number and the last element an odd number, the first and last elements are to be coded as @.

If both the third and fourth elements are odd numbers, then the third element is to be coded as the code for the second element.

What will be the code for the following group?

Global climate change is not a future problem. Changes to Earth's climate driven by increased human emissions of heat-trapping greenhouse gases are already having widespread effects on the environment: glaciers and ice sheets are shrinking, river and lake ice is breaking up earlier, plant and animal geographic ranges are shifting, and plants and trees are blooming sooner. Effects that scientists had long predicted would result from global climate change are now occurring, such as sea ice loss, accelerated sea level rise, and longer, more intense heat waves. Some changes (such as droughts, wildfires, and extreme rainfall) are happening faster than scientists previously assessed. In fact, according to the Intergovernmental Panel on Climate Change (IPCC) – the United Nations body established to assess the science related to climate change – modern humans have never before seen the observed changes in our global climate, and some of these changes are irreversible over the next hundreds to thousands of years. Scientists have high confidence that global temperatures will continue to rise for many decades, mainly due to greenhouse gases produced by human activities. The IPCC's Sixth Assessment report, published in 2021, found that human emissions of heat-trapping gases have already warmed the climate by nearly 2 degrees Fahrenheit (1.1 degrees Celsius) since 1850-1900. The global average temperature is expected to reach or exceed 1.5 degrees C (about 3 degrees F) within the next few decades. These changes will affect all regions of Earth.

The Amazon Rainforest, often referred to as the 'lungs of the Earth', plays a vital role in maintaining global ecological balance. Covering approximately 5.5 million square kilometres, it spans nine countries, with Brazil housing the largest portion. This biodiverse region hosts millions of species, many of which are yet to be discovered. It absorbs vast amounts of carbon dioxide, helping to mitigate climate change, while producing 20% of the planet's oxygen. Despite its ecological significance, the Amazon faces severe threats. Deforestation for agriculture, illegal logging, and infrastructure development are leading causes of habitat destruction. Over the last few decades, millions of hectares have been cleared, disrupting ecosystems and accelerating climate change. The loss of the Amazon could result in catastrophic consequences for biodiversity and global weather patterns. International organisations and governments are increasingly prioritising conservation efforts. Sustainable farming practices, reforestation projects, and stricter regulations on deforestation are some measures being implemented. However, local communities must also be involved, as they are both affected by and essential to the forest's preservation. The Amazon's future depends on collaborative global efforts. Protecting it is not merely a regional concern but a global imperative for the well-being of the planet.³⁸⁸

निम्नलिखित गद्यांश के आधार पर दिए गए प्रश्नों के उत्तर दीजिए।

हिमालय क्षेत्र सदियों से औषधीय जड़ी-बूटियों का भंडार रहा है। यहां उगने वाली वनस्पतियाँ स्वास्थ्य संवर्धन और गंभीर रोगों के उपचार में सहायक होती हैं। अश्वगंधा, शिलाजीत, कुटकी, गिलोय, तेजपत्र और जटामाँसी जैसी जड़ी-बूटियाँ हिमालय के विशिष्ट पर्यावरण में विकसित होती हैं, जिससे इनमें औषधीय गुणों की अधिकता रहती है।

वैज्ञानिक शोध इन औषधियों की प्रभावशीलता को प्रमाणित कर रहे हैं। उदाहरणस्वरूप, गिलोय प्रतिरक्षा प्रणाली को मजबूत करने में सहायक है, जबकि शिलाजीत ऊर्जा और सहनशक्ति बढ़ाने में उपयोगी है। जटामाँसी तनाव और अनिद्रा के उपचार में कारगर सिद्ध होती है। तेजपत्र पाचन तंत्र को दुरुस्त करता है और हृदय रोगों में लाभकारी होता है। हिमालयी वनस्पतियाँ पोषण की दृष्टि से भी महत्वपूर्ण हैं और आयुर्वेदिक औषधियों व स्वास्थ्यवर्धक पेय में प्रयुक्त होती हैं।

हालांकि, वनों की अंधाधुंध कटाई और अवैज्ञानिक दोहन से यह पारिस्थितिकी तंत्र खतरे में है। यदि इन औषधीय पौधों का संरक्षण नहीं किया गया, तो आने वाली पीढ़ियाँ इनके लाभों से वंचित रह सकती हैं। सरकार, वैज्ञानिकों और स्थानीय समुदायों को इन दुर्लभ जड़ी-बूटियों के संरक्षण हेतु ठोस प्रयास करने होंगे। वैज्ञानिक दृष्टिकोण और जागरूकता से ही हिमालयी जैव-विविधता को संरक्षित किया जा सकता है।

निम्नलिखित गद्यांश के आधार पर दिए गए प्रश्नों के उत्तर दीजिए।
हिमालय क्षेत्र सदियों से औषधीय जड़ी-बूटियों का भंडार रहा है। यहां उगने वाली वनस्पतियाँ स्वास्थ्य संवर्धन और गंभीर रोगों के उपचार में सहायक होती हैं। अश्वगंधा, शिलाजीत, कुटकी, गिलोय, तेजपत्र और जटामाँसी जैसी जड़ी-बूटियाँ हिमालय के विशिष्ट पर्यावरण में विकसित होती हैं, जिससे इनमें औषधीय गुणों की अधिकता रहती है। वैज्ञानिक शोध इन औषधियों की प्रभावशीलता को प्रमाणित कर रहे हैं। उदाहरणस्वरूप, गिलोय प्रतिरक्षा प्रणाली को मजबूत करने में सहायक है, जबकि शिलाजीत ऊर्जा और सहनशक्ति बढ़ाने में उपयोगी है। जटामाँसी तनाव और अनिद्रा के उपचार में कारगर सिद्ध होती है। तेजपत्र पाचन तंत्र को दुरुस्त करता है और हृदय रोगों में लाभकारी होता है। हिमालयी वनस्पतियाँ पोषण की दृष्टि से भी महत्वपूर्ण हैं और आयुर्वेदिक औषधियों व स्वास्थ्यवर्धक पेय में प्रयुक्त होती हैं। हालांकि, वनों की अंधाधुंध कटाई और अवैज्ञानिक दोहन से यह पारिस्थितिकी तंत्र खतरे में है। यदि इन औषधीय पौधों का संरक्षण नहीं किया गया, तो आने वाली पीढ़ियों इनके लाभों से वंचित रह सकती हैं। सरकार, वैज्ञानिकों और स्थानीय समुदायों को इन दुर्लभ जड़ी-बूटियों के संरक्षण हेतु ठोस प्रयास करने होंगे। वैज्ञानिक दृष्टिकोण और जागरूकता से ही हिमालयी जैव-विविधता को संरक्षित किया जा सकता है।
