Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

We call anything beautiful that gives us pleasure, and that depends as much upon ourselves as upon what is outside us. Perhaps the majority of people find the sea beautiful when it is blue. If someone has lived in Italy as a child and has to live beside the grey northern seas when he is grown up, he will think that the grey seas are ugly: and that nothing can be so beautiful as the blue Mediterranean. But suppose a Scotsman who loves Scotland has to go and live in Italy. He might find the blue sea after a little while very uninteresting. Only when he went home and saw the grey sea again would he find the sea beautiful. We are made in different ways, and grey may be just as beautiful as blue, just as the cry of a baby may be found sweeter in someone's ears than the finest note of the finest singer that ever lived. Nothing is beautiful or ugly in itself but thinking makes it so.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Beautiful things are not only those which we find beautiful only by seeing but a thing which gives you happiness. A person who lives near a beautiful thing may not find other places beautiful. Beauty depends from person to person.

Given The life of a human being is totally dependent on electricity these days. The Discovery of electricity is very important out of different scientific discoveries. It helps the rooms in our home to become cold in summers and become hot during winters. It is also used to run the radio, televisions, etc. Although it gives us many benefits but a naked wire can take our life. Today, When we see around us, we can see it doing its duty. Like it is used in our homes, it is also used in industries. It is used to operate heavy and big machinery. The work that cannot be done by human hands, electricity does it rapidly. In today's newest time, railways are also running by electricity. In hospitals, electricity is also used to operate machinery which treat the human's disease. Fifty years back, we cannot see that much usage of electricity, humans managed light by lightning then according to that time.
