**Q76.** “The view of literature we are taught to preserve is relentlessly centered on the author..”

What is the grammatical function of the clause “we are taught to preserve”?

Read the passage and answer the questions:

“Critical interpretation often begins with the assumption that a work’s meaning is anchored in the person who produced it, as if literature ultimately speaks through a single consciousness and the trace of a private intention. The view of literature we are taught to preserve is relentlessly centered on the author—on biography, psychology, and motive. Yet to assign a text an Author is to place a boundary around it, to supply it with a final meaning, and to seal its possibilities. This way of thinking emerges from rationalist and capitalist traditions that elevate the individual as the primary unit of history, granting coherence and

authority to personal origin. In practice, however, writing dissolves origins: it unravels the singular voice, and language speaks—not the author.

To set aside the Author is not to discard meaning, but to resist the tyranny of one authoritative meaning. The text becomes a field of plural readings where interpretation remains open-ended rather than fixed. The unity of a text is located not at its source but at its destination; it is the reader—not the author—who activates meaning. This shift transfers power from creator to interpreter, from intended message to the endless play of signs within the text.”

- (a) Adverbial clause
- (b) Independent clause
- (c) Noun clause acting as object
- (d) Relative clause modifying “view”

**Ans.(d)**

**Q77.** Which sentence contains a correct use of the passive voice from the passage?
