**QUESTION PAPER**  
**Staff Nurse [SHIFT - 1]**

Exam Date : 28/02/2024

Time : 10:00 AM - 12:00 PM

**Subjective questions**

**Question 1**

**Question Id : 1**

What is the normal capacity of bladder ?

Answer :

- (A) 100-300ml
- (B) 300-600ml
- (C) 600-900ml
- (D) 900-1000ml

Option Id

- 1001
- 1002
- 1003
- 1004

**Right Answer :**

300-600ml

**Right Option Id : 1002**

**Question 2**

**Question Id : 28**

Patient who is receiving treatment for diabetes is example of ?

Answer :

- (A) Primary prevention
- (B) Secondary prevention
- (C) Tertiary prevention
- (D) None of the given options

Option Id

- 28001
- 28002
- 28003
- 28004

**Right Answer :**

Secondary prevention

**Right Option Id : 28002**

**Question 3**

**Question Id : 29**

A patient refuse for the Vitamin injection but the family insist on administration. Therefore, the nurse administers the injection. But the patient calls her lawyer for a legal action against the nurse, as per law, nurse

Answer :

- (A) Did right

- 29001
- 29002

(D) Committed act of battery against the patient

29003

29004

**Right Answer :**

Committed act of battery against the patient

**Right Option Id : 29004**

**Question 4**

**Question Id : 30**

Which colour normally indicates allergies when a patient wears a wristband?

Answer :

(A) Blue

Option Id

(B) Orange

30001

(C) White

30002

(D) Red

30003

30004

**Right Answer :**

Red

**Right Option Id : 30004**

**Question 5**

**Question Id : 31**

For how many days, the patient will be sent to home in parole?

Answer :

(A) 1 to 2 days

Option Id

(B) 2 to 3 days

31001

(C) 3 to 4 days

31002

(D) 4 to 5 days

31003

31004

**Right Answer :**

2 to 3 days

**Right Option Id : 31002**

**Question 6**

**Question Id : 32**

The patient diagnosed with chronic kidney disease is scheduled for haemodialysis. when should the nurse plan to administer the patient's daily dose of enalapril to ensure its effectiveness?

Answer :

(A) During dialysis

Option Id

(B) Just before dialysis

32001

(C) The day after dialysis

32002

(D) Upon return from dialysis

32003

32004

**Right Answer :**

Upon return from dialysis

**Right Option Id : 32004**

### Question 7

Question Id : 33

Which one is not a characteristic of good documentation?

Answer :

(A) Factual

Option Id

(B) Accurate

33001

(C) Adequate

33002

(D) Concise

33003

33004

**Right Answer :**

Adequate

**Right Option Id : 33003**

### Question 8

Question Id : 34

A nurse taking rounds during her evening shift notices a patient lying on the floor near the bathroom. The nurse will document this as:

Answer :

(A) Anecdotal report

Option Id

(B) Incident report

34001

(C) Transfer report

34002

(D) Census report

34003

34004

**Right Answer :**

Incident report

**Right Option Id : 34002**

### Question 9

Question Id : 35

Core body temperature is highest at

Answer :

(A) Early morning

Option Id

(B) Noon

35001

(C) Late afternoon

35002

(D) Evening

35003

35004

**Right Answer :**

Late afternoon

**Right Option Id : 35003**

**Question 10**

**Question Id : 36**

A new-born's temperature should be:

Answer :

(A) 37 °C (axillary)

Option Id

(B) 37 °C (oral)

36001

(C) 37.7 °C (rectal)

36002

(D) 36.8 °C (Axillary)

36003

36004

**Right Answer :**

37.7 °C (rectal)

**Right Option Id : 36003**

**Question 11**

**Question Id : 37**

When a person has normal body temperature it is called?

Answer :

(A) Afebrile

Option Id

(B) Febrile

37001

(C) Pyrexia

37002

(D) Hyperpyrexia

37003

37004

**Right Answer :**

Afebrile

**Right Option Id : 37001**

**Question 12**

**Question Id : 38**

In neonate most reliable site for checking pulse is:

Answer :

(A) Carotid pulse

Option Id

(B) Apex of the heart

38001

(C) Femoral pulse

38002

38003

(D) Brachial pulse

38004

**Right Answer :**  
Apex of the heart

**Right Option Id : 38003**

**Question 13**

**Question Id : 39**

Which position used in case of hypotension patient?

Answer :

Option Id

(A) Ross position

39001

(B) Trendelenburg position

39002

(C) Supine position

39003

(D) Side lying position

39004

**Right Answer :**  
Trendelenburg position

**Right Option Id : 39002**

**Question 14**

**Question Id : 40**

What are the indicators of severe burn?

Answer :

Option Id

(A) Charred skin, no pain

40001

(B) Charred skin, pain

40002

(C) Blister and pain

40003

(D) Skin is red grey and pain

40004

**Right Answer :**  
Charred skin, no pain

**Right Option Id : 40001**

**Question 15**

**Question Id : 41**

The purpose of weber test is to assess:

Answer :

Option Id

(A) Air conduction

41001

(B) Bone conduction

41002

(C) Inflammation

41003

(D) Infections

41004

**Right Answer :**

Bone conduction

**Right Option Id : 41002**

**Question 16**

**Question Id : 42**

Skin Turgor is assessed to check:

Answer :

(A) Hydration

Option Id

(B) Edema

42001

(C) Hypoxia

42002

(D) BMI

42003

42004

**Right Answer :**

Hydration

**Right Option Id : 42001**

**Question 17**

**Question Id : 43**

Glucose is absorbed in which part of nephrons:

Answer :

(A) Loop of Henle

Option Id

(B) Glomerulus

43001

(C) Proximal convoluted tubule

43002

(D) Distal tube

43003

43004

**Right Answer :**

Proximal convoluted tubule

**Right Option Id : 43003**

**Question 18**

**Question Id : 44**

Destruction of the wall of the alveoli is:

Answer :

(A) Atelectasis

Option Id

(B) Asthma

44001

(C) Emphysema

44002

44003

(D) Bronchiectasis

44004

**Right Answer :**

Emphysema

**Right Option Id : 44003**

**Question 19**

**Question Id : 45**

Chief and common cause of pulmonary embolism is :

Answer :

(A) Fat emboli

Option Id

(B) Air emboli

45001

(C) Septic emboli

45002

(D) Venous thrombosis

45003

45004

**Right Answer :**

Venous thrombosis

**Right Option Id : 45004**

**Question 20**

**Question Id : 46**

Which of the following is the warning sign of mental illness?

Answer :

(A) Marked changes in eating or sleeping patterns

Option Id

(B) Thinking or talking about suicide or harming oneself

46001

(C) Extreme mood swings (high or low)

46002

(D) All of the given options

46003

46004

**Right Answer :**

All of the given options

**Right Option Id : 46004**

**Question 21**

**Question Id : 47**

A clinic nurse is caring for a patient with a suspected diagnosis of gestational hypertension. The nurse assess the patient, expecting to note which set of findings if, gestational diabetes is present?

Answer :

(A) Edema, ketonuria and obesity

Option Id

(B) Edema, tachycardia and ketonuria

47001

(C) Glycosuria, hypertension and obesity

47002

47003

(D) Elevated blood pressure and proteinuria

47004

**Right Answer :**

Elevated blood pressure and proteinuria

Right Option Id : 47004

**Question 22**

**Question Id : 48**

The nurse is caring for a patient receiving bolus feedings via a nasogastric tube. The nurse should place the patient in which position to administer the feeding?

Answer :

Option Id

(A) Supine

48001

(B) Semi-Fowler's

48002

(C) Trendelenburg's

48003

(D) Lateral recumbent

48004

**Right Answer :**

Semi-Fowler's

Right Option Id : 48002

**Question 23**

**Question Id : 27**

A patient arrives at the emergency department with upper gastrointestinal bleeding that began 3 hours ago. What is the priority action?

Answer :

Option Id

(A) Obtaining vital signs

27001

(B) Inserting a nasogastric tube

27002

(C) Asking the client about the precipitating events

27003

(D) Completing an abdominal physical assessment

27004

**Right Answer :**

Obtaining vital signs

Right Option Id : 27001

**Question 24**

**Question Id : 25**

A patient in labour has a diagnosis of sickle cell anaemia. Which action will the nurse take to assist in preventing the client from experiencing a sickling crisis during labour?

Answer :

Option Id

(A) Being reassuring

25001

(B) Administering oxygen

25002

(C) Administering antibiotic

(D) Maintaining asepsis

25003

25004

**Right Answer :**

Administering oxygen

**Right Option Id : 25002**

**Question 25**

**Question Id : 2**

The Narcotic Drug and Psychotropic Substances Act (NDPSA) was passed in the year:

Answer :

(A) 1982

Option Id

(B) 1985

2001

(C) 1995

2002

(D) 2000

2003

2004

**Right Answer :**

1985

**Right Option Id : 2002**

**Question 26**

**Question Id : 24**

What is the most effective way to prevent contraction of the HIV virus?

Answer :

(A) Spray everything with a 10% bleach solution before you touch it

Option Id

(B) Always wear a condom

24001

(C) Never share needles with people you don't know

24002

(D) Always practice universal precaution and good hand washing

24003

24004

**Right Answer :**

Always wear a condom

**Right Option Id : 24002**

**Question 27**

**Question Id : 3**

How do I protect myself from Hepatitis?

Answer :

(A) Universal precautions and good hand washing

Option Id

(B) Avoid sharing needles, razors, toothbrushes and similar items.

3001

(C) Clean potentially contaminated surfaces with a 1:10 bleach to water mixture

3002

(D) All of the given options

3003

3004

**Right Answer :**

All of the given options

**Right Option Id : 3004**

**Question 28**

**Question Id : 4**

AMBU stands for

Answer :

(A) Anesthesia machine breathing unit

Option Id

4001

(B) Artificial mandatory breathing unit

4002

(C) Automated machine breathing unit

4003

(D) Artificial manual breathing unit

4004

**Right Answer :**

Artificial manual breathing unit

**Right Option Id : 4004**

**Question 29**

**Question Id : 5**

Specific function of liver is?

Answer :

(A) Excretion

Option Id

5001

(B) Histolysis

5002

(C) Digestion

5003

(D) Glycogenolysis

5004

**Right Answer :**

Glycogenolysis

**Right Option Id : 5004**

**Question 30**

**Question Id : 6**

The first COVID positive case in India was reported in?

Answer :

(A) Kerela

Option Id

6001

(B) Tamil Nadu

6002

(C) Gujarat

6003

(D) Maharashtra

 6004**Right Answer :**

Kerela

**Question 31****Question Id : 7**

The kidneys are located in the \_\_\_\_\_ space?

Answer :

(A) Pelvic cavity

Option Id

(B) Peritoneal cavity

 7001

(C) Abdominal cavity

 7002

(D) Retro-peritoneal

 7003 7004**Right Answer :**

Retro-peritoneal

**Right Option Id : 7004****Question 32****Question Id : 8**

How often is mouth care given to patients who is unconscious?

Answer :

(A) Every 2 hours

Option Id

(B) Every 4 hours

 8001

(C) Every 6 hours

 8002

(D) Twice a day

 8003 8004**Right Answer :**

Every 2 hours

**Right Option Id : 8001****Question 33****Question Id : 9**

One teaspoon full is equal to

Answer :

(A) 15ml

Option Id

(B) 10ml

 9001

(C) 5ml

 9002 9003

(D) 20ml

9004

**Right Answer :**

5ml

**Right Option Id : 9003**

**Question 34**

**Question Id : 10**

A patient receiving total parenteral nutrition (TPN) via a central venous catheter (CVC) is scheduled to receive an intravenous (IV) antibiotic. Which intervention should the nurse implement before administering the antibiotic?

Answer :

(A) Turn off the TPN for 30 Minutes

Option Id

(B) Ensure a separate IV access route

10001

(C) Flush the CVC with Normal saline

10002

(D) Check for compatibility with TPN

10003

10004

**Right Answer :**

Ensure a separate IV access route

**Right Option Id : 10002**

**Question 35**

**Question Id : 11**

The abbreviation "AC" used in prescription means?

Answer :

(A) After meals

Option Id

(B) Before meals

11001

(C) At night

11002

(D) At evening

11003

11004

**Right Answer :**

Before meals

**Right Option Id : 11002**

**Question 36**

**Question Id : 12**

Tiny air sacs in the lungs are called

Answer :

(A) Bronchus

Option Id

(B) Bronchioles

12001

(C) Alveoli

12002

(D) Glottis

12003

12004

**Right Answer :**

Alveoli

**Right Option Id : 12003**

**Question 37**

**Question Id : 13**

Digoxin should not be administered if heart rate?

Answer :

(A) Less than 60 bpm

Option Id

(B) More than 60 bpm

13001

(C) Less than 80 bpm

13002

(D) More than 80bpm

13003

13004

**Right Answer :**

Less than 60 bpm

**Right Option Id : 13001**

**Question 38**

**Question Id : 14**

The nurse assists the primary health care provider with the removal of a chest tube. During the procedure, the nurse instructs the client to perform which action?

Answer :

(A) Inhale deeply

Option Id

(B) Breathe normally

14001

(C) Breathe out forcefully

14002

(D) Take a deep breath and hold it

14003

14004

**Right Answer :**

Take a deep breath and hold it

**Right Option Id : 14004**

**Question 39**

**Question Id : 15**

The nurse assesses the water seal chamber of a closed chest drainage system and notes fluctuations in the chamber. What intervention should the nurse implement?

Answer :

(A) Unkinking for an air leak

Option Id

(B) Assessing for an air leak

15001

(C) Documenting that the lung has re-expanded

15002

(D) Documenting that the lung has not yet re-expanded

15003

15004

**Right Answer :**

Documenting that the lung has re-expanded

**Question 40**

**Question Id : 16**

The nurse caring for a 5-year-old with a history of teratology of Fallot notes that the child has clubbed fingers. This finding is indicative of which associated condition?  
Answer :

(A) Tissue hypoxia

Option Id

(B) Chronic hypertension

16001

(C) Delayed physical growth

16002

(D) Destruction of bone marrow

16003

16004

**Right Answer :**

Tissue hypoxia

**Right Option Id : 16001**

**Question 41**

**Question Id : 17**

As part of cardiac assessment, to palpate the apical pulse, the nurse places the fingertips at which location?  
Answer :

(A) At the left midclavicular line at the fifth intercostal space

Option Id

(B) At the left midclavicular line at the third intercostal space

17001

(C) To the right of the left midclavicular line at the fifth intercostal space

17002

(D) To the right of the left midclavicular line at the third intercostal space

17003

17004

**Right Answer :**

At the left midclavicular line at the fifth intercostal space

**Right Option Id : 17001**

**Question 42**

**Question Id : 18**

A patient states he is having intense itching between the fingers with brown linear lines presenting. Based on your nursing knowledge this best describes what condition?  
Answer :

(A) Ringworm

Option Id

(B) Scabies

18001

(C) Psoriasis

18002

(D) Eczema

18003

18004

**Right Answer :**

Scabies

**Right Option Id : 18002**

**Question 43**

**Question Id : 19**

Bedsore.....

Answer :

(A) Can be treated with topical moisturisers

Option Id

(B) Can result from deep massages

19001

(C) Are preventable by eliminating pressure points

19002

(D) Are caused by dry skin

19003

19004

**Right Answer :**

Are preventable by eliminating pressure points

**Right Option Id : 19003**

**Question 44**

**Question Id : 20**

A patient presents with a skin infection caused by Streptococcus pyogenes. The patient's lower leg is infected from the deep dermis to the subcutaneous fat. What disorder does this describe?

Answer :

(A) Cellulitis

Option Id

(B) Impetigo

20001

(C) Psoriasis

20002

(D) Eczema

20003

20004

**Right Answer :**

Cellulitis

**Right Option Id : 20001**

**Question 45**

**Question Id : 21**

A 30-week gestation patient admitted in preterm labour is prescribed betamethasone. What should the nurse tell the patient is the purpose for this medication?

Answer :

(A) Promote foetal lung maturity

Option Id

(B) Delay delivery for at least 48 hours

21001

(C) Stop the premature uterine contractions

21002

(D) Prevent premature closure of ductus arteriosus

21003

21004

**Right Answer :**

Promote foetal lung maturity

**Right Option Id : 21001**

**Question 46**

**Question Id : 22**

A patient receiving chemotherapy has a platelet count of  $15,000 \text{ mm}^3 (15 \times 10^9 \text{ L})$ . Based on this laboratory results, which form of precautions should the nurse implement?

Answer :

(A) Contact

Option Id

22001

(B) Bleeding

22002

(C) Respiratory

22003

(D) Neutropenic

22004

**Right Answer :**

Bleeding

**Right Option Id : 22002**

**Question 47**

**Question Id : 23**

The nurse is monitoring a patient with a fracture to the left arm which sign observed by the nurse is consistent with impaired venous return in the area?

Answer :

(A) Increasing edema

Option Id

23001

(B) Weakened distal pulse

23002

(C) Pallor or blotchy cyanosis

23003

(D) Continued pain despite medication

23004

**Right Answer :**

Weakened distal pulse

**Right Option Id : 23002**

**Question 48**

**Question Id : 49**

A patient has been diagnosed with Bell's palsy. The nurse assesses the patient to determine if which signs/symptoms are present?

Answer :

(A) Eye paralysis and ptosis of to eyelids

Option Id

49001

(B) Chewing difficulties and one-sided facial droop

49002

(C) Fixed pupil and an elevated eyelid on one side

(D) Twitching of one side of the face and ruddy cheeks

49003

49004

**Right Answer :**

Chewing difficulties and one-sided facial droop

**Right Option Id : 49002**

**Question 49**

**Question Id : 26**

Position provided to patient after spinal anaesthesia?

Answer :

(A) Head low position

Option Id

(B) Head end elevation

26001

(C) Fowler's position

26002

(D) Prone position

26003

26004

**Right Answer :**

Head low position

**Right Option Id : 26001**

**Question 50**

**Question Id : 50**

The nurse is caring for a patient who has just had a mastectomy. Which exercise should the nurse assist the patient in doing during the first 24 hours after surgery?

Answer :

(A) Hand wall climbing

Option Id

(B) Pendulum arm swing

50001

(C) Elbow flexion and extension

50002

(D) Shoulder abduction and external rotation

50003

50004

**Right Answer :**

Pendulum arm swing

**Right Option Id : 50002**

**Question 51**

**Question Id : 51**

What is the route of BCG vaccine?

Answer :

(A) Intramuscular

Option Id

(B) Intradermal

51001

(C) Intravenous

51002

(D) Subcutaneous

51003

51004

**Right Answer :**

Intradermal

**Right Option Id : 51002**

**Question 52**

**Question Id : 52**

A patient with significant flail chest has arterial blood gases (ABGs) that reveal a PaO<sub>2</sub> of 68 and PaCO<sub>2</sub> of 51. Two hours ago the PaO<sub>2</sub> was 82 and PaCO<sub>2</sub> was 44. Based on these changes, which item should the nurse assure easy access to in order to help ensure patient safety?

Answer :

(A) Intubation tray

Option Id

(B) Injectable lidocaine

52001

(C) Chest tube insertion set

52002

(D) Portable chest X-ray machine

52003

52004

**Right Answer :**

Intubation tray

**Right Option Id : 52001**

**Question 53**

**Question Id : 53**

The nurse is caring for a patient diagnosed with pneumonia. When considering the patient's safety, when will the nurse plan to take the patient for a short walk?

Answer :

(A) After the patient eats lunch

Option Id

(B) After the patient has a brief nap

53001

(C) After the patient used a metered-dose inhaler

53002

(D) After assessing the patient's oxygen saturation.

53003

53004

**Right Answer :**

After the patient used a metered-dose inhaler

**Right Option Id : 53003**

**Question 54**

**Question Id : 54**

A patient is for a series of diagnostic studies of the gastrointestinal system. Which of these studies should be scheduled to avoid altering the results of the remaining test?

Answer :

(A) Ultrasound

Option Id

(B) Colonoscopy

54001

- 54002
- (C) Barium enema
- 54003
- (D) Computed Tomography
- 54004

**Right Answer :**  
Barium enema

**Question 55**

**Question Id : 55**

A new born infant is diagnosed with oesophageal Artesia. Which assessment finding supports this diagnosis?  
Answer :

- (A) Slowed reflexes Option Id
- 55001
- (B) Continuous drooling  55002
- (C) Diaphragmatic breathing  55003
- (D) Passage of large amounts of frothy stool  55004

**Right Answer :**  
Continuous drooling

**Right Option Id : 55002**

**Question 56**

**Question Id : 56**

The nurse should place a patient who sustained a head injury in which position to prevent increased intracranial pressure (ICP)?  
Answer :

- (A) In left Sim's position Option Id
- 56001
- (B) In reverse Trendelenburg  56002
- (C) With the head elevated on a small, flat pillow  56003
- (D) With the head of the bed elevated at least 30 degrees  56004

**Right Answer :**  
With the head of the bed elevated at least 30 degrees

**Right Option Id : 56004**

**Question 57**

**Question Id : 57**

Which nursing assessment finding indicates the presence of an inguinal hernia on a child?  
Answer :

- (A) Reports of difficulty defecating Option Id
- 57001
- (B) Reports of a dribbling urinary stream  57002

(C) Absence of the testis with in the scrotum

57003

(D) Pain less groin swelling noticed when the child cries

57004

**Right Answer :**

Pain less groin swelling noticed when the child cries

**Right Option Id : 57004**

**Question 58**

**Question Id : 58**

Grey colour injection port cap of I.V cannula represents which of the following

Answer :

(A) 14 G

Option Id

(B) 16 G

58001

(C) 18 G

58002

(D) 20 G

58003

58004

**Right Answer :**

16 G

**Right Option Id : 58002**

**Question 59**

**Question Id : 59**

The nurse is teaching a pregnant patient about prenatal nutritional needs. The nurse should include which information in the patient' s teaching plan?

Answer :

(A) All mothers are at a high risk of nutritional deficiencies

Option Id

(B) Calcium intake is not necessary until the third trimester

59001

(C) Iron supplements are not necessary unless the mother has iron deficiency anaemia

59002

(D) The nutritional status of the mother significantly influences foetal growth and development

59003

59004

**Right Answer :**

The nutritional status of the mother significantly influences foetal growth and development

**Right Option Id : 59004**

**Question 60**

**Question Id : 60**

The nurse monitors a patient of acute pancreatitis. Which assessment finding indicates the paralytic ileus has developed?

Answer :

(A) Inability to pass flatus

Option Id

(B) Loss of anal sphincter control

60001

60002

(C) Severe, constant pain with rapid onset

60003

(D) Firm, nontender mass palpable at the lower right costal margin

60004

**Right Answer :**

Firm, nontender mass palpable at the lower right costal margin

**Right Option Id : 60004**

Option Id

- 65001
- 65002
- 65003
- 65004

**Right Answer :**  
Feeble

**Right Option Id : 65002**

**Question 68**

**Question Id : 64**

READ THE PASSAGE AND ANSWER THE QUESTIONS THAT FOLLOWS:

A volcano is a mountain with an opening in the earth's surface, through which molten rock, ash and gases can escape. Volcanoes are usually found along the edges of tectonic plates, where the Earth's crust is being pulled apart or pushed together. There are three types of volcanoes: stratovolcanoes, shield volcanoes and cinder cones. Stratovolcanoes are tall and cone-shaped with steep sided and a crater at the top. Shield volcanoes are broad and flat, with gently sloping sided and a broad base. Cinder cones are small and cone-shaped, with steep sided and a hole at the top.

Question : What is a volcano?

Answer :

- (A) A mountain with an opening in the earth's surface
- (B) A valley with an opening in the earth's surface
- (C) A river with an opening in the earth's surface
- (D) A lake with an opening in the earth's surface

Option Id

- 64001
- 64002
- 64003
- 64004

**Right Answer :**  
A mountain with an opening in the earth's surface

**Right Option Id : 64001**
