Comprehension:

Read the given passage carefully and answer the questions that follow.

An Ice Age refers to a long period in Earth's history when global temperatures dropped significantly, causing large areas of the planet to be covered with ice sheets and glaciers. Scientists believe that several Ice Ages have occurred over millions of years due to changes in Earth's climate, atmosphere, and orbit around the sun. During these periods, glaciers slowly expanded from the polar regions and covered large parts of continents. The most recent Ice Age ended about 11,700 years ago, marking the beginning of the current warm period known as the Holocene epoch. Many prehistoric animals such as mammoths, saber-toothed cats, and giant sloths lived during the last Ice Age. Early humans also existed during this time and adapted to extremely cold environments by using tools, clothing, and fire. Studying Ice Ages helps scientists understand climate change and how natural environmental shifts have influenced the development of life on Earth.

SubQuestion No : 61

Q.6 Which of the following would be the most appropriate title for the passage?

- 1**
- Ans**
- A. The Development of Early Human Tools
 - B. The Discovery of Prehistoric Animals
 - C. The Formation of Modern Oceans
 - D. The Ice Age: Earth's Period of Extreme Cold

Chosen Option :	D

Q.9 If you use the Ribbon command **Home** → **Cut** (or Ctrl + X) to remove a block of text, then immediately without pasting, choose to open a new document and paste (Ctrl + V), which of the following is true?

- Ans**
- A. The text remains in the clipboard and therefore can be pasted into the new document, even though it has been removed from the original.
 - B. The text disappears completely unless you save the original document first.
 - C. You can only paste into the same document; cross-document paste won't work.
 - D. The Cut command copies the text—not actually removing it from the source.
