**Comprehension:**

Read the given passage carefully and answer the questions that follow.

What with the near-instant delivery of whatever food item that we seek — be it ready-to-eat or even to prepare — and supermarkets around every corner in an urban expanse, it might not be long before the need to preserve food at home becomes a forgotten art. And yet, home-food preservation was a tricky affair even as recently as the 19th century. Forget supermarkets and instant delivery platforms, even refrigeration was still largely preliminary back then, with home refrigerators still a thing of the future.

If we were to go back by 200 years, we'll be confronted with a world that was just coming to terms with modern heat-based canning, pioneered by French chef and confectioner Nicolas Appert in the first decade of that century. While it worked remarkably well and was able to preserve a wide range of foods without adding any chemical preservatives, it was easier done in an industrial setting.

**SubQuestion No : 61**

**Q.6 Which of the following is the most appropriate title for the passage?**

1

**Ans**  A. Nicolas Appert and Chemical Preservatives

B. The Rise of Supermarkets in Urban Areas

C. Home Food Preservation in the Modern World

D. From Home Preservation to Industrial Canning
