**Comprehension:**

Read the given passage carefully and answer the questions that follow.

"Wastelands". That's how India's biodiverse semi-arid grasslands and savannas have been undervalued ever since the British colonial era. For the masters, the woody forests of the subcontinent fuelled industrialisation, while the grassy biomes served no purpose in their timber-driven colonisation.

Much of the post-independence policy and jurisprudence drew heavily from the erstwhile rulers and "wastelands" made their way into land records and government policy. In 1985, a National Wastelands Development Board was created to bring a more scientific basis "to identify, classify and develop the wastelands" towards more productive uses. Ravines, scrub lands, degraded scrub forests, degraded pastures, grazing lands, barren rocky areas, glaciers and snow-covered mountains, along with mining or industrial wasteland and degraded plantation land, were all classified as wastelands.

For decades, studies have shown that far from being a wasteland, these savanna grasslands are flourishing ecosystems that not only harbour unique biodiversity but also provide livelihoods to millions of pastoral communities.

**SubQuestion No : 61**

**Q.6** Which of the following is the most appropriate title for the passage?

1

**Ans**  A. Industrial Development under British Rule

B. India's Grasslands: Mislabeled as "Wastelands"
