జస్టిస్ యు.యు.లలిత్
- 4. Justice B.R.Gavai
జస్టిస్ బి.ఆర్.గవాయ్

Question ID : 3014422009
Chosen Option : 2

Comprehension:

Read the given passage and answer the questions that follow.

Did you know that Delhi has a branch of the original Bodhi tree under which Lord Buddha had done penance and received enlightenment?

As history tells us, Emperor Ashoka had gifted a branch of the original Bodhi tree to Sinhalese king Devanampiyatissa. It was carried to him by Ashoka's daughter and envoy, Princess Sanghamitra. King Tissa planted the tree at Anuradhapura (in Sri Lanka today) in 236 BC, where it remains to this day. But the original one at Bodhi Gaya didn't last very long, having been cut down by King Sasanka of Bengal in the 7th century AD. That made the one at Anuradhapura the direct descendant of the original Bodhi tree, and the most revered scion wood associated with the Buddha. Over time, it came to be known as Jaya Sri Maha Bodhi tree.

In 1964, the then Prime Minister of Sri Lanka, Sirimavo Bandaranaike, presented a sapling of the Jaya Sri Maha Bodhi tree to India. It was planted by the then Prime Minister, Lal Bahadur Shastri, at a grove on the Central Ridge while inaugurating the Buddha Jayanti Park. Over 50 years hence, it's a huge, flourishing tree and Delhi's direct link with the Enlightened one.

I saw the tree for the first time during a nature walk recently led by Syed Mohammad Qasim, a management professional turned naturalist and photographer. "At the Buddha Jayanti Park alone, I have identified 92 different species of trees, some of which are unique to Delhi. This park on the Central Ridge is important for another reason: it's part of the Aravalis, the oldest mountain range in the world, so the flora here is quite unique," Qasim explained.

"That's a kusum tree. Its leaves are eaten by lac insects. From their secretions, you get lac that's used as seal by governmental institutions. This one is chilbil or chudailpapri. Its nut is edible and is often called the 'poor man's almond'. This plant is kankauwa. You can make pakodas from its leaves," Qasim kept on informing as the walk progressed.

The group was also shown an anjan tree, a Sita-Ashok tree, and a bistendu tree, the fruit of which is used as fish bait by tribals in Madhya Pradesh. "Fish get intoxicated when they bite on the bait and float. That's how the tribals catch them," Qasim said.

SubQuestion No : 61

Q.61 From the leaves of which plant can you make *pakoras*?

- Ans
- 1. Chilbil
 - 2. Kankauwa
 - 3. Kusum

✗ 4. Anjan
