Directions (86-90): Read the following passage and answer the questions based on it:

Graphic design is a compelling and ubiquitous tool of visual communication that goes well beyond superficial aesthetics. Fundamentally, it is the art of communicating a particular message, concept, or emotion to an audience through visual means. A graphic designer's job is a strategic combination of problem-solving and creativity, where they carefully combine a mix of elements- type, color, images, and layout-to produce an engaging and lucid visual message. It's not about making something look pretty, but about making sure it says something and does something, someone through an interface. The work of the graphic designer is out there all around there it's to convince a customer, to educate the public, or to navigate in our everyday lives. From symbols that characterize our beloved brands and the product packaging we use, to the design of the websites we visit and the posters that line our cities, graphic design influences how we understand the world we live in. It is a fundamental marketing, advertising, publishing, and digital media discipline, whereby it is utilized for creating brand identity, improving user experience, and rendering information more accessible and enjoyable. To succeed in this profession, a graphic designer must have a fine eye for detail, a good comprehension of design principles, and expertise in the industry-standard tools. But most importantly, she/he is gifted with creativity and critical thinking in using visual communication to address actual issues. It is a job that exists where art and technology meet, an essential gateway between complicated concepts and people who must know.
