

IBPS PO Pre PYP (Held on 19 Oct 2024 S3)

Q1. Who among the following sits fifth to the right of B?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G sit around a circular shaped table. Some of them face inside and some face outside. All the information is not necessarily used in the same order.

Two persons sit between C and G. E sits third to the left of G. F is not an immediate neighbour of C and E. A sits immediate left of F. E is not immediate neighbour of A. C and F face in the opposite direction to each other. A faces inside. B sits immediate right of D. More than one person sits between C and B (from either side). Immediate neighbours of E face in the direction opposite to E. D and B face the same direction. Less than four persons face inside.

(a) C

(b) E

(c) F

(d) D

(e) G

Ans.(b)

Q2. How many persons sit between F and D when counted from the right of D?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G sit around a circular shaped table. Some of them face inside and some face outside. All the information is not necessarily used in the same order.

Two persons sit between C and G. E sits third to the left of G. F is not an immediate neighbour of C and E. A sits immediate left of F. E is not immediate neighbour of A. C and F face in the opposite direction to each other. A faces inside. B sits immediate right of D. More than one person sits between C and B (from either side). Immediate neighbours of E face in the direction opposite to E. D and B face the same direction. Less than four persons face inside.

(a) Five

(b) One

(c) Three

(d) Two

(e) Four

Ans.(d)

Q3. How many persons face the same direction as A (including A)?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G sit around a circular shaped table. Some of them face inside and some face outside. All the information is not necessarily used in the same order.

Two persons sit between C and G. E sits third to the left of G. F is not an immediate neighbour of C and E. A sits immediate left of F. E is not immediate neighbour of A. C and F face in the opposite direction to each other. A faces inside. B sits immediate right of D. More than one person sits between C and B (from either side).

either side). Immediate neighbours of E face in the direction opposite to E. D and B face the same direction. Less than four persons face inside.

- (a) Two
- (b) One
- (c) Three
- (d) None
- (e) More than three

Ans.(c)

Q4. Which among the following statement(s) is/are false?

- I. E and G doesn't face in the opposite direction to each other
- II. D sits third to the right of F
- III. C faces inside

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G sit around a circular shaped table. Some of them face inside and some face outside. All the information is not necessarily used in the same order.

Two persons sit between C and G. E sits third to the left of G. F is not an immediate neighbour of C and E. A sits immediate left of F. E is not immediate neighbour of A. C and F face in the opposite direction to each other. A faces inside. B sits immediate right of D. More than one person sits between C and B (from either side). Immediate neighbours of E face in the direction opposite to E. D and B face the same direction. Less than four persons face inside.

- (a) Only II
- (b) Both II and III
- (c) Only III
- (d) Both I and III
- (e) All I, II, and III

Ans.(d)

Q5. . What is the position of F with respect to C?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G sit around a circular shaped table. Some of them face inside and some face outside. All the information is not necessarily used in the same order.

Two persons sit between C and G. E sits third to the left of G. F is not an immediate neighbour of C and E. A sits immediate left of F. E is not immediate neighbour of A. C and F face in the opposite direction to each other. A faces inside. B sits immediate right of D. More than one person sits between C and B (from either side). Immediate neighbours of E face in the direction opposite to E. D and B face the same direction. Less than four persons face inside.

- (a) Fifth to the left
- (b) Second to the right
- (c) Second to the left
- (d) Third to the right
- (e) Third to the left

Ans.(c)

Q6. Statements: $S \geq Y < R = T < P$; $F = L \geq W \geq P < X$

Conclusions:

I. $L \geq R$

II. $Y < W$

In each question below, some statements are given followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If either conclusion I or II is true
- (d) If both conclusions I and II are true
- (e) If neither conclusion I nor II is true

Ans.(b)

Q7. Statements: $O < K = M \leq P > N$; $G > O = Q \geq L$; $G < F \geq D$

Conclusions:

I. $P > L$

II. $D \leq Q$

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If either conclusion I or II is true
- (d) If both conclusions I and II are true
- (e) If neither conclusion I nor II is true

Ans.(a)

Q8. Statements: $Z = H < T \geq Y < J$; $T > X \geq W = B > G$

Conclusions:

I. $Z \geq W$

II. $B > H$

- (a) If only conclusion I is true
- (b) If only conclusion II is true
- (c) If either conclusion I or II is true
- (d) If both conclusions I and II are true
- (e) If neither conclusion I nor II is true

Ans.(c)

Q9. In the word "ANALYST", how many pairs of the letters have the same number of letters between them (only in backward direction) as in the English alphabet?

- (a) One
- (b) Two

- (c) Three
(d) Four
(e) More than four

Ans.(a)

Q10. What is the age of C?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G — were born in different years among 1963, 1965, 1972, 1987, 1990, 1994, and 2006. The base year for calculating their age is 2024. The information is not necessarily used in the same order.

F is seven years elder than B. Two persons were born between B and E. More than two persons were born between E and G. The number of persons born before G is same as the number of persons born after A. D was born after C but not immediately before B.

- (a) 59 years
(b) 37 years
(c) 34 years
(d) 52 years
(e) None of these

Ans.(b)

Q11. How many persons were born between A and B?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G — were born in different years among 1963, 1965, 1972, 1987, 1990, 1994, and 2006. The base year for calculating their age is 2024. The information is not necessarily used in the same order.

F is seven years elder than B. Two persons were born between B and E. More than two persons were born between E and G. The number of persons born before G is same as the number of persons born after A. D was born after C but not immediately before B.

- (a) One
(b) Two
(c) Three
(d) Four
(e) More than four

Ans.(c)

Q12. Which of the following combinations is not correctly matched?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G — were born in different years among 1963, 1965, 1972, 1987, 1990, 1994, and 2006. The base year for calculating their age is 2024. The information is not necessarily used in the same order.

F is seven years elder than B. Two persons were born between B and E. More than two persons were born between E and G. The number of persons born before G is same as the number of persons born after A. D was born after C but not immediately before B.

- (a) G – 1963
- (b) D – 1990
- (c) E - 1994
- (d) A - 2006
- (e) B - 2006

Ans.(e)

Q13. Four of the following five are alike in a certain way based on their birth years. Which one does not belong to the group?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G — were born in different years among 1963, 1965, 1972, 1987, 1990, 1994, and 2006. The base year for calculating their age is 2024. The information is not necessarily used in the same order.

F is seven years elder than B. Two persons were born between B and E. More than two persons were born between E and G. The number of persons born before G is same as the number of persons born after A. D was born after C but not immediately before B.

- (a) D
- (b) E
- (c) B
- (d) G
- (e) A

Ans.(d)

Q14. What is the difference between the ages of F and D?

Study the following information carefully and answer the questions given below:

Seven persons — A, B, C, D, E, F, and G — were born in different years among 1963, 1965, 1972, 1987, 1990, 1994, and 2006. The base year for calculating their age is 2024. The information is not necessarily used in the same order.

F is seven years elder than B. Two persons were born between B and E. More than two persons were born between E and G. The number of persons born before G is same as the number of persons born after A. D was born after C but not immediately before B.

- (a) 21 years
- (b) 27 years
- (c) 23 years
- (d) 25 years
- (e) 31 years

Ans.(d)

Q15. How is G related to M?

Study the information carefully and answer the questions given below.

There are eight persons in a family consisting of three generations, with two married couples. N is the only son of D. F is the father-in-law of B. G is the mother of D. Q and M are sisters. B is the sister-in-law of O. F is the father of O. O is the uncle of M.

- (a) Grandmother
- (b) Aunt
- (c) Mother
- (d) Sister-in-law
- (e) None of these

Ans.(a)

Q16. How many male members are there in the family?

Study the information carefully and answer the questions given below.

There are eight persons in a family consisting of three generations, with two married couples. N is the only son of D. F is the father-in-law of B. G is the mother of D. Q and M are sisters. B is the sister-in-law of O. F is the father of O. O is the uncle of M.

- (a) Three
- (b) Four
- (c) Five
- (d) Two
- (e) None of these

Ans.(b)

Q17. Who among the following is the brother of D?

Study the information carefully and answer the questions given below.

There are eight persons in a family consisting of three generations, with two married couples. N is the only son of D. F is the father-in-law of B. G is the mother of D. Q and M are sisters. B is the sister-in-law of O. F is the father of O. O is the uncle of M.

- (a) N
- (b) O
- (c) F
- (d) G
- (e) None of these

Ans.(b)

Q18. How many persons sit in this row?

Study the following information carefully and answer the questions given below:

A certain number of persons sit in a linear row and face north. Only one person sits between D and L. G sits third to the right of L. M is an immediate neighbour of G. A sits fourth to the right of M. A sits fourth from one of the extreme ends of the row. Two persons sit between A and H who is not an immediate neighbour of M. C sits fifth to the left of H. Not more than one person sits between G and C. As many persons sit to the right of H as to the left of K. K and D are immediate neighbours.

- (a) 13
- (b) 11
- (c) 12
- (d) 10
- (e) 14

Ans.(a)

Q19. Which among the following statement is/are true?

- I. G and C are immediate neighbours
- II. Five persons sit between K and G
- III. G sits exactly between L and A

Study the following information carefully and answer the questions given below:

A certain number of persons sit in a linear row and face north. Only one person sits between D and L. G sits third to the right of L. M is an immediate neighbour of G. A sits fourth to the right of M. A sits fourth from one of the extreme ends of the row. Two persons sit between A and H who is not an immediate neighbour of M. C sits fifth to the left of H. Not more than one person sits between G and C. As many persons sit to the right of H as to the left of K. K and D are immediate neighbours.

- (a) Both I and III
- (b) Both I and II
- (c) Both II and III
- (d) Only I
- (e) All I, II and III

Ans.(e)

Q20. How many persons sit between K and A?

Study the following information carefully and answer the questions given below:

A certain number of persons sit in a linear row and face north. Only one person sits between D and L. G sits third to the right of L. M is an immediate neighbour of G. A sits fourth to the right of M. A sits fourth from one of the extreme ends of the row. Two persons sit between A and H who is not an immediate neighbour of M. C sits fifth to the left of H. Not more than one person sits between G and C. As many persons sit to the right of H as to the left of K. K and D are immediate neighbours.

- (a) Nine
- (b) Seven
- (c) Eight
- (d) Six
- (e) None of these

Ans.(c)

Q21. . What is the position of M with respect to H?

Study the following information carefully and answer the questions given below:

A certain number of persons sit in a linear row and face north. Only one person sits between D and L. G sits third to the right of L. M is an immediate neighbour of G. A sits fourth to the right of M. A sits fourth from one of the extreme ends of the row. Two persons sit between A and H who is not an immediate neighbour of M. C sits fifth to the left of H. Not more than one person sits between G and C. As many persons sit to the right of H as to the left of K. K and D are immediate neighbours.

- (a) Immediate right
- (b) Immediate left
- (c) Seventh to the right

- (d) Seventh to the left
(e) Sixth to the right

Ans.(d)

Q22. Statements: Only a few basket are bucket

No bucket is plastic

Some plastic is light

Conclusions:

I. No basket being light is a possibility.

II. Some plastic are basket

In the question below, some statements are given followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I follows
(b) If only conclusion II follows
(c) If either conclusion I or II follows
(d) If neither conclusion I nor II follows
(e) If both conclusions I and II follow

Ans.(a)

Q23. Statements: Only season is winter.

Some season is summer

All summer is spring

Conclusions:

I. All season being summer is a possibility.

II. No winter is summer

In the question below, some statements are given followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I follows
(b) If only conclusion II follows
(c) If either conclusion I or II follows
(d) If neither conclusion I nor II follows
(e) If both conclusions I and II follow

Ans.(b)

Q24. Statements: Only a few flowers are beautiful.

All flowers are pretty

All pretty is ethereal

Conclusions:

I. Some ethereal are beautiful

II. All flowers are ethereal

In the question below, some statements are given followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts. Give answer-

- (a) If only conclusion I follows
- (b) If only conclusion II follows
- (c) If either conclusion I or II follows
- (d) If neither conclusion I nor II follows
- (e) If both conclusions I and II follow

Ans.(e)

Q25. Who among the following likes Pineapple?

Study the following information carefully and answer the questions given below:

Six people were born on two different dates – either 8th or 27th of three different months: January, April, and October. Each of them likes a different fruit – Apple, Banana, Mango, Orange, Pear, and Pineapple but not necessarily in the same order.

B was born on an odd date. The one who likes Apple was born two persons after B. Two persons were born between the ones who like apple and orange. One person was born between the one who likes Orange and G. G was born before the person who likes Mango. The persons who likes Mango and Pear were born on an odd date. E was born immediately before the person who likes Mango. F was born before A but after D. F and G doesn't like Banana.

- (a) The one who was born on 27th January
- (b) E
- (c) A
- (d) G
- (e) The one who was born before B

Ans.(d)

Q26. Which among the following pair of persons were born in the same month?

Study the following information carefully and answer the questions given below:

Six people were born on two different dates – either 8th or 27th of three different months: January, April, and October. Each of them likes a different fruit – Apple, Banana, Mango, Orange, Pear, and Pineapple but not necessarily in the same order.

B was born on an odd date. The one who likes Apple was born two persons after B. Two persons were born between the ones who like apple and orange. One person was born between the one who likes Orange and G. G was born before the person who likes Mango. The persons who likes Mango and Pear were born on an odd date. E was born immediately before the person who likes Mango. F was born before A but after D. F and G doesn't like Banana.

- (a) D, E
- (b) B, F
- (c) G, B
- (d) A, E

(e) None of these

Ans.(d)

Q27. How many persons were born after D?

Study the following information carefully and answer the questions given below:

Six people were born on two different dates – either 8th or 27th of three different months: January, April, and October. Each of them likes a different fruit – Apple, Banana, Mango, Orange, Pear, and Pineapple but not necessarily in the same order.

B was born on an odd date. The one who likes Apple was born two persons after B. Two persons were born between the ones who like apple and orange. One person was born between the one who likes Orange and G. G was born before the person who likes Mango. The persons who likes Mango and Pear were born on an odd date. E was born immediately before the person who likes Mango. F was born before A but after D. F and G doesn't like Banana.

- (a) Five
- (b) Two
- (c) Three
- (d) Four
- (e) One

Ans.(a)

Q28. Which among the following fruit does B like and was born on which date and month respectively?

Study the following information carefully and answer the questions given below:

Six people were born on two different dates – either 8th or 27th of three different months: January, April, and October. Each of them likes a different fruit – Apple, Banana, Mango, Orange, Pear, and Pineapple but not necessarily in the same order.

B was born on an odd date. The one who likes Apple was born two persons after B. Two persons were born between the ones who like apple and orange. One person was born between the one who likes Orange and G. G was born before the person who likes Mango. The persons who likes Mango and Pear were born on an odd date. E was born immediately before the person who likes Mango. F was born before A but after D. F and G doesn't like Banana.

- (a) Mango; 27 April
- (b) Pear; 27 January
- (c) Banana; 8 October
- (d) Pear; 8 January
- (e) Apple; 27 April

Ans.(b)

Q29. . Four of the following five are alike in a certain way and thus form a group. Find the one who doesn't belong to the group?

Study the following information carefully and answer the questions given below:

Six people were born on two different dates – either 8th or 27th of three different months: January, April, and October. Each of them likes a different fruit – Apple, Banana, Mango, Orange, Pear, and Pineapple but not necessarily in the same order.

B was born on an odd date. The one who likes Apple was born two persons after B. Two persons were born between the ones who like apple and orange. One person was born between the one who likes Orange and G. G was born before the person who likes Mango. The persons who likes Mango and Pear were born on an odd date. E was born immediately before the person who likes Mango. F was born before A but after D. F and G doesn't like Banana.

- (a) D
- (b) F
- (c) B
- (d) E
- (e) A

Ans.(b)

Q30. If a meaningful word is formed by using the first, third, eighth and ninth letters (from the left end) of the word "DISCUSSION", then which of the following will be the second letter from the left end of the meaningful word formed? If more than one such meaningful word is formed, mark Y as your answer. If no meaningful word is formed, mark Z as your answer.

- (a) I
- (b) Y
- (c) D
- (d) Z
- (e) S

Ans.(d)

Q31. In the number '3782184', if all the even digits are added by 1 and all the odd digits are subtracted by 1, then, find the digits which are repeating itself in the new number formed after rearrangement?

- (a) 6
- (b) 3, 6
- (c) 9
- (d) 3, 6 and 9
- (e) None of these

Ans.(c)

Q32. How many boxes are placed between the red box and the black box?

Study the following information carefully and answer the questions given below.

Six boxes – B, C, D, E, F and G, each of different colours -Red, Blue, Green, Yellow, White, and Black are placed above one another in a stack. All the information is not necessarily used in the same order.

Three boxes are placed between the box E and white colour box. Box C is placed immediately below the white colour box. Two boxes are placed between Box C and Green colour box. Green colour box is placed immediately above Box B and immediately below Box G. Black colour box is placed two boxes below Box G but above blue box. Box G is not of red colour and is not placed adjacent to Box D.

- (a) None
- (b) One
- (c) Two

(d) Three

(e) Four

Ans.(c)

Q33. Which of the following statement(s) is/are true?

Study the following information carefully and answer the questions given below.

Six boxes – B, C, D, E, F and G, each of different colours -Red, Blue, Green, Yellow, White, and Black are placed above one another in a stack. All the information is not necessarily used in the same order.

Three boxes are placed between the box E and white colour box. Box C is placed immediately below the white colour box. Two boxes are placed between Box C and Green colour box. Green colour box is placed immediately above Box B and immediately below Box G. Black colour box is placed two boxes below Box G but above blue box. Box G is not of red colour and is not placed adjacent to Box D.

(a) The yellow box is placed immediately below the red box.

(b) Box G is of red colour

(c) White box is placed immediately above the black box.

(d) Box E is of green colour.

(e) The green box is placed below the blue box.

Ans.(a)

Q34. How many boxes are placed above the green box?

Study the following information carefully and answer the questions given below.

Six boxes – B, C, D, E, F and G, each of different colours -Red, Blue, Green, Yellow, White, and Black are placed above one another in a stack. All the information is not necessarily used in the same order.

Three boxes are placed between the box E and white colour box. Box C is placed immediately below the white colour box. Two boxes are placed between Box C and Green colour box. Green colour box is placed immediately above Box B and immediately below Box G. Black colour box is placed two boxes below Box G but above blue box. Box G is not of red colour and is not placed adjacent to Box D.

(a) One

(b) Two

(c) Three

(d) Four

(e) None

Ans.(b)

Q35. Which box is placed exactly between the Box F and white colour box in the stack?

Study the following information carefully and answer the questions given below.

Six boxes – B, C, D, E, F and G, each of different colours -Red, Blue, Green, Yellow, White, and Black are placed above one another in a stack. All the information is not necessarily used in the same order.

Three boxes are placed between the box E and white colour box. Box C is placed immediately below the white colour box. Two boxes are placed between Box C and Green colour box. Green colour box is placed immediately above Box B and immediately below Box G. Black colour box is placed two boxes below Box G but above blue box. Box G is not of red colour and is not placed adjacent to Box D.

(a) Box D

- (b) Box B
- (c) The box which is of black colour.
- (d) Box C
- (e) Both [b] and [c]

Ans.(e)

Q36. Which of the following statements can be inferred from the passage?

- (I) Project complexity often increases with scale.
- (II) ESG frameworks require banks to avoid high-return projects.
- (III) Infrastructure growth may conflict with social stability.

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. They claim that increased investment in infrastructure fosters economic growth, creates jobs, and boosts regional integration. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) Only (I)
- (b) Both (II) and (III)
- (c) Only (II)
- (d) Both (I) and (III)
- (e) All (I), (II), and (III)

Ans.(d)

Q37. Based on the passage, which of the following best explains why banks feel justified in financing massive infrastructure projects despite criticism?

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. They claim that increased investment in infrastructure fosters economic growth, creates jobs, and boosts regional integration. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) They believe these projects are easier to manage than smaller ones.
- (b) Most critics do not have economic knowledge.
- (c) Infrastructure is profitable and aligns with national development goals.
- (d) Banks are legally required to finance such ventures.
- (e) Larger projects reduce administrative burdens for banks.

Ans.(c)

Q38. What is the best synonym for the word “increasing” as used in the passage?

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This

trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) assigning
- (b) expanding
- (c) dissolving
- (d) relocating
- (e) minimizing

Ans.(b)

Q39. Which of the following statements is INCORRECT according to the passage?

- (I) Banks continue investing in infrastructure projects despite receiving criticism.
- (II) Maintenance and operational issues in large-scale projects have been completely resolved.
- (III) Large infrastructure projects carry the risk of delays and cost overruns.

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. - (a) Only (I)
- (b) Both (I) and (III)
- (c) Only (II)
- (d) Both (II) and (III)
- (e) All (I), (II), and (III)

Ans.(c)

Q40. Which of the following is most likely a reason why environmental groups oppose current infrastructure expansion?

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. They claim that increased investment in infrastructure fosters economic growth, creates jobs, and boosts regional integration. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) Projects are completed ahead of time and under budget.
- (b) ESG frameworks prevent high profits.
- (c) Banks use only private capital for investment.
- (d) Growth in size leads to weak oversight and environmental risks.
- (e) Only digital projects are prioritized over physical infrastructure.

Ans.(d)

Q41. Which of the following statements is/are CORRECT according to the passage?

- (I) Banks consider infrastructure investment as a contributor to economic development.
- (II) ESG frameworks completely eliminate all risks associated with bank-financed projects.
- (III) Banks continue to support large-scale projects despite facing public criticism.

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive

impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

- (d) Both (II) and (III)
- (e) All (I), (II), and (III)

Ans.(b)

Q42. Which of the following, if true, would most strengthen the need for stricter ESG frameworks?

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. They claim that increased investment in infrastructure fosters economic growth, creates jobs, and boosts regional integration. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) A study shows that smaller projects outperform larger ones in return on investment.
- (b) Digital infrastructure projects require minimal capital.
- (c) Regional governments develop strong regulatory bodies.
- (d) A bank-funded hydro project leads to displacement of 15,000 villagers.
- (e) Project financing drops by 10% globally.

Ans.(d)

Q43. What is the best synonym for the word “size” as used in “project size can lead to a lack of regulatory oversight”?

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) shape
- (b) location
- (c) duration
- (d) form
- (e) extent

Ans.(e)

Q44. What is the best antonym for the word “complexity” as used in the phrase:

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. They claim that increased investment in infrastructure fosters economic growth, creates jobs, and boosts regional integration. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

- (a) simplicity
- (b) variety
- (c) diversity
- (d) intensity

(e) maturity

Ans.(a)

Q45. Choose the most appropriate word to fill the blank given in the passage.

Read the following passage and answer the given questions based on it.

In recent years, there has been a marked increase in the number and size of infrastructure projects financed by commercial and development banks across both emerging and developed economies. This trend is most visible in sectors such as renewable energy, urban transportation, and digital connectivity. As these projects grow in scale and complexity, banks are under pressure to ensure that their investments are not only profitable but also _____ and socially responsible.

A report published by the International Banking Alliance in 2024 indicated that over \$600 billion in project finance was disbursed globally—an increasing figure when compared to the \$480 billion recorded just three years earlier. However, this expansion has sparked concerns among environmental groups and economic watchdogs. Critics argue that the rapid escalation in project size can lead to a lack of regulatory oversight, especially when banks partner with governments that have weak institutional frameworks.

Moreover, larger projects carry a higher risk of cost overruns, delays, and unintended social consequences such as displacement of communities. To address this, several international banks have adopted stricter Environmental and Social Governance (ESG) frameworks, requiring comprehensive impact assessments before approving funding. These frameworks emphasize transparency, ethical procurement, and stakeholder consultation, especially in areas where local populations may be affected. One emerging area of concern is the long-term maintenance and operational sustainability of such projects. As banks pour resources into massive infrastructure schemes, questions arise about who will manage, monitor, and repair them over time—especially in politically unstable regions. This adds another layer of financial and social risk that institutions must now anticipate and account for.

Despite the criticisms, banks defend their role by emphasizing the developmental impact of such projects. They claim that increased investment in infrastructure fosters economic growth, creates jobs, and boosts regional integration. As countries aim to meet their climate and connectivity goals, the involvement of banks is not only inevitable but essential.

Still, as project sizes increase and scrutiny intensifies, a more balanced approach between growth and governance seems necessary. Ultimately, the way banks navigate these competing priorities may define their reputation and relevance in the coming decades.

(a) hypothetical

(b) extravagant

(c) sustainable

(d) impulsive

(e) theoretical

Ans.(c)

Q46. Which of the following statements should be the FIRST statement after rearrangement?

Five sentences are given which are not arranged in coherent manner. Rearrange them to answer the following questions.

(a) Under his leadership, Tata Group expanded globally, acquiring major companies like Jaguar Land Rover.

(B) Ratan Tata is one of India's most respected industrialists and philanthropists.

(C) He also played a key role in developing the Tata Nano, one of the world's cheapest cars.

(D) After joining the Tata Group in 1962, he worked in various roles before becoming Chairman in 1991.

(E) Even after retirement, he continues to support innovation and start-ups through investments and mentoring.

(a) A

(b) B

(c) C

(d) D

(e) E

Ans.(b)

Q47. Which of the following statements should be the SECOND statement after rearrangement?

Five sentences are given which are not arranged in coherent manner. Rearrange them to answer the following questions.

(a) Under his leadership, Tata Group expanded globally, acquiring major companies like Jaguar Land Rover.

(B) Ratan Tata is one of India's most respected industrialists and philanthropists.

(C) He also played a key role in developing the Tata Nano, one of the world's cheapest cars.

(D) After joining the Tata Group in 1962, he worked in various roles before becoming Chairman in 1991.

(E) Even after retirement, he continues to support innovation and start-ups through investments and mentoring.

(a) A

(b) B

(c) C

(d) D

(e) E

Ans.(d)

Q48. Which of the following statements should be the THIRD statement after rearrangement?

Five sentences are given which are not arranged in coherent manner. Rearrange them to answer the following questions.

(a) Under his leadership, Tata Group expanded globally, acquiring major companies like Jaguar Land Rover.

(B) Ratan Tata is one of India's most respected industrialists and philanthropists.

(C) He also played a key role in developing the Tata Nano, one of the world's cheapest cars.

(D) After joining the Tata Group in 1962, he worked in various roles before becoming Chairman in 1991.

(E) Even after retirement, he continues to support innovation and start-ups through investments and mentoring.

(a) A

(b) B

(c) C

(d) D

(e) E

Ans.(a)

Q49. Which of the following statements should be the FOURTH statement after rearrangement?

Five sentences are given which are not arranged in coherent manner. Rearrange them to answer the following questions.

(a) Under his leadership, Tata Group expanded globally, acquiring major companies like Jaguar Land Rover.

(B) Ratan Tata is one of India's most respected industrialists and philanthropists.

(C) He also played a key role in developing the Tata Nano, one of the world's cheapest cars.

(D) After joining the Tata Group in 1962, he worked in various roles before becoming Chairman in 1991.

(E) Even after retirement, he continues to support innovation and start-ups through investments and mentoring.

(a) A

(b) B

(c) C

(d) D

(e) E

Ans.(c)

Q50. . Which of the following statements should be the LAST statement after rearrangement?

Five sentences are given which are not arranged in coherent manner. Rearrange them to answer the following questions.

(a) Under his leadership, Tata Group expanded globally, acquiring major companies like Jaguar Land Rover.

(B) Ratan Tata is one of India's most respected industrialists and philanthropists.

(C) He also played a key role in developing the Tata Nano, one of the world's cheapest cars.

(D) After joining the Tata Group in 1962, he worked in various roles before becoming Chairman in 1991.

(E) Even after retirement, he continues to support innovation and start-ups through investments and mentoring.

(a) A

(b) B

(c) C

(d) D

(e) E

Ans.(e)

Q51. (I) She connected her headphones to the car's stereo via Bluetooth to enjoy her favorite playlist during the long road trip.

(II) The knight skillfully defended the castle from the sudden attack by enemy forces during the night.

(III) The new educational program aims to boost students' creativity and critical thinking skills through interactive workshops.

Identify the grammatically incorrect sentence(s) from the following. Choose the best possible option.

- (a) Both (I) and (III)
- (b) Both (II) and (III)
- (c) Only (III)
- (d) All are correct
- (e) None is correct

Ans.(d)

Q52. (I) Employers today are not hiring based on your ability to solve quadratic equations or who can solve how many questions more faster.

(II) She has become a promising voice in fiction, creating complex characters and thought-provoking themes.

(III) The wooden railway toy combines nostalgia and sustainability, crafted from natural wood and eco-friendly dyes.

The question presents three sentences. Identify the sentence(s) that is/are grammatically correct and select the most appropriate combination from the given options. If all the sentences contain errors, then choose 'All are incorrect' as the answer.

- (a) Only (I)
- (b) Both (II) and (III)
- (c) Only (III)
- (d) Both (I) and (II)
- (e) All are incorrect

Ans.(b)

Q53. (I) The government is working on measures to reduce the budget deficit, which has significantly increased over the past few years.

(II) The technology have come a long way, allowing us to communicate instantly with people around the world.

(III) The data analyst created a series of charts to showing the company's sales growth over the past year.

Identify the grammatically incorrect sentence(s) from the following. Choose the best possible option.

- (a) Only (I)
- (b) Only (III)
- (c) Both (I) and (III)
- (d) Both (II) and (III)
- (e) None is correct

Ans.(d)

Q54. Take up

- (a) She decided to take up yoga to improve her flexibility and reduce stress.
- (B) The large sofa took up most of the space in the living room.

(C) As soon as the national anthem began to play, everyone in the room took up from their seats to show respect.

A phrase has been given in the question and used in the sentences below. Identify the statements where the phrase has been used in a contextually and grammatically correct manner.

- (a) Both A & B
- (b) All A, B, C
- (c) Only C
- (d) Both B & C
- (e) Only A

Ans.(a)

Q55. Passing by

- (a) I was just passing by the bookstore when I saw your name on the event poster.
- (B) Time seems to be passing by so quickly these days—it's already June!
- (C) She waved at her friend while passing by the café on her way to work.

A phrase has been given in the question and used in the sentences below. Identify the statements where the phrase has been used in a contextually and grammatically correct manner.

- (a) Both A & B
- (b) All A, B, C
- (c) Only C
- (d) Both B & C
- (e) Only A

Ans.(b)

Q56. It _____ to an increase in the ground water level, flood mitigation and heat island reduction, supporting a sustainable urban adaptation.

In the question below, a part is omitted which is then replaced by a blank. Choose the word from the given options that will fit into the blank most appropriately.

- (a) donates
- (b) contributes
- (c) presents
- (d) give
- (e) hinders

Ans.(b)

Q57. Regular exercise _____ the immune system, making the body more resistant to infections.

In the question below, a part is omitted which is then replaced by a blank. Choose the word from the given options that will fit into the blank most appropriately.

- (a) deplete
- (b) weakening
- (c) enhanced
- (d) fortifies
- (e) developing

Ans.(d)

Q58. Shiv Sagar in Churchgate was the first vegetarian restaurant _____ Mumbai that served alcohol.

In the question below, a part is omitted which is then replaced by a blank. Choose the word from the given options that will fit into the blank most appropriately.

- (a) on
- (b) in
- (c) at
- (d) over
- (e) across

Ans.(b)

Q59. India, second only to Bangladesh, is the world's most flood-affected country, _____ for one-fifth of global flood-related deaths.

In the question below, a part is omitted which is then replaced by a blank. Choose the word from the given options that will fit into the blank most appropriately.

- (a) represent
- (b) accounting
- (c) attribute
- (d) explaining
- (e) record

Ans.(b)

Q60. Varshney said SEBI aims to _____ investor education with regulation, noting the unregulated activities of unregistered influencers.

In the question below, a part is omitted which is then replaced by a blank. Choose the word from the given options that will fit into the blank most appropriately.

- (a) disrupt
- (b) complicated
- (c) integrates
- (d) aligned
- (e) balance

Ans.(e)

Q61. Having completed the exhaustion (A), she felt an overwhelming sense of accomplishment (B) despite the physical marathon (C).

In the sentence given below, three highlighted words may be incorrectly placed. Choose the correct order in which these words should appear to make the sentence grammatically and contextually accurate.

- (a) ACB
- (b) BCA
- (c) CBA

(d) BAC

(e) No Rearrangement required

Ans.(c)

Q62. With the strategies (A)of artificial intelligence, industries rise (B) the globe are adapting their across (C) to stay competitive in a rapidly evolving market.

In the sentence given below, three highlighted words may be incorrectly placed. Choose the correct order in which these words should appear to make the sentence grammatically and contextually accurate.

(a) ACB

(b) BCA

(c) CBA

(d) BAC

(e) No Rearrangement required

Ans.(b)

Q63. Following the unexpected (a) power outage, the technicians worked (B) tirelessly to restore (C) electricity to all affected areas.

In the sentence given below, three highlighted words may be incorrectly placed. Choose the correct order in which these words should appear to make the sentence grammatically and contextually accurate.

(a) ACB

(b) BCA

(c) CBA

(d) BAC

(e) No Rearrangement required

Ans.(e)

Q64. Despite the early momentum (A), the startup eventually gained setbacks (B), attracting major investors and expanding (C) its market presence.

In the sentence given below, three highlighted words may be incorrectly placed. Choose the correct order in which these words should appear to make the sentence grammatically and contextually accurate.

(a) ACB

(b) BCA

(c) CBA

(d) BAC

(e) No Rearrangement required

Ans.(d)

Q65. Despite her impressive promotion (A), she was passed over for the qualifications (B), leaving her feeling frustrated and undervalued (C).

In the sentence given below, three highlighted words may be incorrectly placed. Choose the correct order in which these words should appear to make the sentence grammatically and contextually accurate.

- (a) ACB
- (b) BCA
- (c) CBA
- (d) BAC
- (e) No Rearrangement required

Ans.(d)

Directions (66-70): Read the following table carefully and answer the questions given below. The table shows the total cookies (peanut, oatmeal, and chocolate) sold and the percentage of peanut cookies sold by four shops. The table also shows the difference between the oatmeal cookies and the chocolate cookies sold by these shops.

Note: Oatmeal cookies sold > Chocolate cookies sold.

Shops	Percentage of peanut cookies sold	Difference between the oatmeal cookies and the chocolate cookies sold	Total cookies (peanut, oatmeal, and chocolate) sold
A	45%	12	80
B	60%	20	100
C	40%	32	120
D	30%	15	150

Q66. What is the ratio of the sum of peanut and oatmeal cookies sold by Shop B to the sum of oatmeal and chocolate cookies sold by Shop A?

- (a) 41:21
- (b) 45:22
- (c) 43:28
- (d) 44:29
- (e) 46:17

Ans.(b)

Q67. Find the difference between the peanut cookies sold by C and D together and the total number of chocolate cookies sold by A and B together.

- (a) 62
- (b) 55
- (c) 67
- (d) 59
- (e) 60

Ans.(c)

Q68. The total number of chocolate cookies sold by C is what percentage more or less than the total number of peanut cookies sold by B?

- (a) 20%
- (b) 50%
- (c) 66.66%
- (d) 75%
- (e) 100%

Ans.(c)

Q69. The total number of cookies sold by E is 25% more than that of C. If the total number of peanut cookies sold by E is $\frac{5}{12}$ th that of B and the total number of oatmeal cookies sold by E is 24, then find the difference between the total number of chocolate cookies sold by D and E.

- (a) 59
- (b) 60
- (c) 54
- (d) 55
- (e) 56

Ans.(e)

Q70. The average number of oatmeal cookies sold by all the shops is what percentage of the total number of chocolate cookies sold by B and C together?

- (a) 133.33%
- (b) 141.67%
- (c) 166.67%
- (d) 116.67%
- (e) 108.33%

Ans.(b)

Q71. The area of a rectangle is equal to the total surface area of a cube. If the breadth of the rectangle is 36 cm and the side of the cube is $\frac{1}{3}$ rd of the length of the rectangle, then find the length of the rectangle.

- (a) 45
- (b) 54
- (c) 36
- (d) 65
- (e) 50

Ans.(b)

Q72. The ratio of the present ages of Aman and Rohan is 5:6 respectively. After six years, the average of the sum of their ages is X years, and Rohan's age four years hence is 40 years. Find the value of X.

- (a) 40
- (b) 36
- (c) 32

(d) 44

(e) 39

Ans.(e)

Q73. A vessel contains a mixture of milk and water in the ratio 3:2 respectively. If 20 liters of the mixture is removed and 4 liters of milk is added, the ratio of milk to water becomes 13:8 respectively. Find the initial quantity of the mixture (in liters).

(a) 100

(b) 60

(c) 80

(d) 75

(e) 120

Ans.(a)

Q74. A person invested Rs. Q in a bank at a 25% rate of simple interest for 4 years and received Rs. 5000 as the total amount. If Rs. $1.5Q$ is invested in another bank at a 10% rate of simple interest for 5 years, then find the simple interest received (in Rs).

(a) 2125

(b) 2345

(c) 1875

(d) 2560

(e) 2330

Ans.(c)

Q75. C and D invested Rs. 'Y' and Rs. 3600 respectively. If after 6 months, C increases his investment by Rs. 1200, and the ratio of the profit share of C to D after a year is 19:15, then find the initial investment of C (in Rs).

(a) 2820

(b) 2450

(c) 3960

(d) 2940

(e) 3360

Ans.(c)

Directions (76-80): Read the following line graph carefully and answer the questions given below. The line graph shows the total number of chairs and tables sold by five different shops.

Q76. The total number of chairs sold by A and E together is what percentage more or less than the total number of tables sold by C and E together?

- (a) 22%
- (b) 37.5%
- (c) 33.33%
- (d) 8.33%
- (e) 16.67%

Ans.(b)

Q77. 20% of the total number of chairs are unsold in B out of the total number of chairs manufactured by B, and 40% of the tables are sold by B out of the total number of tables manufactured by B. Find the difference between the total number of chairs and the total number of tables manufactured by B.

- (a) 1125
- (b) 1075
- (c) 1150
- (d) 1000
- (e) 1250

Ans.(b)

Q78. The ratio of the total number of wooden chairs to plastic chairs sold by C and D is 7:5 and 3:5, respectively. The total number of wooden chairs sold by C and D together is how many more or less than the total number of plastic chairs sold by C and D together (only two types of chairs sold)?

- (a) 10
- (b) 20
- (c) 50
- (d) 40
- (e) 30

Ans.(d)

Q79. If the price of each table sold by D and E is Rs $X+200$ and $X-120$, and the total amount received by D and E together for selling all the tables is Rs 408000, then find the value of X.

- (a) 500
- (b) 250
- (c) 700
- (d) 380
- (e) 400

Ans.(a)

Q80. Find the ratio of the total number of tables sold by A and D together to the total number of chairs sold by E and B together.

- (a) 43:49
- (b) 44:47
- (c) 45:42
- (d) 42:47
- (e) None of these

Ans.(b)

Q81. A boat covers 780 km downstream in 15 hours. If the speed of the boat in still water is decreased by 20%, then the time taken by the boat to cover 624 km upstream in 24 hours. Find the speed of the stream (In km/hr).

- (a) 24.33
- (b) 32.67
- (c) 43.33
- (d) 8.67
- (e) None of these

Ans.(d)

Q82. Ravi can complete a task in $D + 12$ hours, and Rohit can complete the same task in $D + 24$ hours. If Rohit's efficiency is 25% less than Ravi's, then find the value of D.

- (a) 24
- (b) 12
- (c) 6

(d) 30

(e) 42

Ans.(a)

Q83. The average marks of 60 students in a class is 60. If the average marks of boys and girls in the class are 54 and 72 respectively, then find the difference between the number of boys and girls in the class.

(a) 5

(b) 40

(c) 30

(d) 10

(e) 20

Ans.(e)

Q84. Train X crosses train Y while running in opposite directions in 10 seconds, and the lengths of train X and train Y are 'd' meters and 'd + 40' meters, respectively. If the speeds of train X and train Y are 108 km/h and 126 km/h, respectively, then find the value of d.

(a) 300

(b) 305

(c) 290

(d) 245

(e) 260

Ans.(b)

Q85. A shopkeeper makes a 25% profit on an article when he offers a 10% discount on the marked price. If instead he gives a 30% discount, he incurs a loss of Rs. 200, then find the marked price of the article.

(a) Rs 10500

(b) Rs 12500

(c) Rs 14500

(d) Rs 10000

(e) Rs 7000

Ans.(d)

Q86. Find the ratio of the total number of silk sarees sold by B to the total number of cotton sarees sold by A.

Read the following information carefully and answer the questions given below. The information is about two types of sarees sold by three shops.

The total number of silk sarees sold by C is 200. The ratio of silk sarees sold by A to the cotton sarees sold by B is 8:11, respectively, and the cotton sarees sold by C are 40 less than those sold by B. The total number of cotton and silk sarees sold by B is 700, which is 25% more than that of A. The average number of cotton sarees sold by A, B, and C is 360.

(a) 15:13

(b) 14:11

(c) 13:14

(d) 11:12

(e) 13:12

Ans.(e)

Q87. The total number of silk and cotton sarees together sold by C is how many more or less than the total number of cotton sarees sold by A and B together?

Read the following information carefully and answer the questions given below. The information is about two types of sarees sold by three shops.

The total number of silk sarees sold by C is 200. The ratio of silk sarees sold by A to the cotton sarees sold by B is 8:11, respectively, and the cotton sarees sold by C are 40 less than those sold by B. The total number of cotton and silk sarees sold by B is 700, which is 25% more than that of A. The average number of cotton sarees sold by A, B, and C is 360.

(a) 50

(b) 60

(c) 80

(d) 70

(e) 40

Ans.(c)

Q88. If 60% of the silk sarees and 20% of the cotton sarees sold by A are defective, then find the total number of non-defective silk and cotton sarees together sold by A.

Read the following information carefully and answer the questions given below. The information is about two types of sarees sold by three shops.

The total number of silk sarees sold by C is 200. The ratio of silk sarees sold by A to the cotton sarees sold by B is 8:11, respectively, and the cotton sarees sold by C are 40 less than those sold by B. The total number of cotton and silk sarees sold by B is 700, which is 25% more than that of A. The average number of cotton sarees sold by A, B, and C is 360.

(a) 350

(b) 340

(c) 320

(d) 310

(e) 330

Ans.(c)

Q89. The total number of cotton sarees sold by B is what percentage more or less than the total number of silk sarees sold by C?

Read the following information carefully and answer the questions given below. The information is about two types of sarees sold by three shops.

The total number of silk sarees sold by C is 200. The ratio of silk sarees sold by A to the cotton sarees sold by B is 8:11, respectively, and the cotton sarees sold by C are 40 less than those sold by B. The total number of cotton and silk sarees sold by B is 700, which is 25% more than that of A. The average number of cotton sarees sold by A, B, and C is 360.

- (a) 75%
- (b) 90%
- (c) 130%
- (d) 105%
- (e) 120%

Ans.(e)

Q90. The total number of cotton sarees sold by D is $\frac{6}{11}$ th that of B. If the total number of silk sarees sold by A and D is 460, then find the total number of cotton and silk sarees sold by D.

Read the following information carefully and answer the questions given below. The information is about two types of sarees sold by three shops.

The total number of silk sarees sold by C is 200. The ratio of silk sarees sold by A to the cotton sarees sold by B is 8:11, respectively, and the cotton sarees sold by C are 40 less than those sold by B. The total number of cotton and silk sarees sold by B is 700, which is 25% more than that of A. The average number of cotton sarees sold by A, B, and C is 360.

- (a) 380
- (b) 330
- (c) 350
- (d) 340
- (e) 390

Ans.(a)

Q91. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

$$(4.12^2 \times 11.99) + ? = 45.22\% \text{ of } 5000$$

- (a) 2348
- (b) 2058
- (c) 2189
- (d) 2378
- (e) 2209

Ans.(b)

Q92. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

$$\frac{3}{7} \text{th of } 83 + ? = 234.99 \times 2.99$$

- (a) 669
- (b) 632
- (c) 609
- (d) 698
- (e) 616

Ans.(a)

Q93. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

$$29.99\% \text{ of } 400 + \sqrt{194} = ? - \sqrt[3]{120}$$

- (a) 123
- (b) 139
- (c) 109
- (d) 102
- (e) 189

Ans.(b)

Q94. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

$$9.2^3 - 124.4 = ? - 12.11^2$$

- (a) 756
- (b) 749
- (c) 722
- (d) 734
- (e) 798

Ans.(b)

Q95. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

$$6.09^3 + 9.99\% \text{ of } 400.1 = ? \times 2.11^2$$

- (a) 64
- (b) 60
- (c) 46
- (d) 40
- (e) 52

Ans.(a)

Q96. Find out the wrong number.

256, 510, 708, 852, 952, 1016

- (a) 510
- (b) 256
- (c) 708
- (d) 952
- (e) 1016

Ans.(a)

Q97. Find out the wrong number.

9477, 3159 1053, 351, 117, 39, 12

- (a) 12
- (b) 3159
