

IBPS PO Pre 2023 (30th September) Shift-Wise Previous Year Paper Mock 04

Q1. What, according to the author, will be the best solution to avoid consequences of large-scale infrastructure projects at coastal regions?

Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I) _____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

- (a) Countries responsible for such damage must make up for marine losses to other communities throughout the world.
- (b) The project must allot funds in the appreciation of people's rights to the sea and its resources in the event of the forced relocation of people.
- (c) Both the lender and the borrower must take appropriate precautions to prevent marine contamination.

(d) Both (b) and (c)

(e) Only (a) and (b)

Ans.(d)

Q2. What effects would catastrophic cyclones and coastal erosion have if they continued unchecked?

Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I)_____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

(a) Due to coastal erosion, several families could have to relocate yet again.

(b) Additionally, it will eventually cause nature's harsher vulnerabilities.

(c) One more risk is the result of an irreparably devastated ecology.

(d) Damage to local people's livelihoods and marine life is also there.

(e) All of these

Ans.(e)

Q3. Which of the following statements with reference to the report as mentioned in the second paragraph is/are correct?

- (i) There is no doubt that global climate change is boosting sea levels along the Indian coasts.
- (ii) The report places more blame on climate change for erosion and accretion.
- (iii) The research primarily accuses port activity on the grounds of coastal erosion.

Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I) _____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

- (a) Only (ii)
- (b) Only (i) and (ii)
- (c) Only (iii)
- (d) Only (ii) and (iii)
- (e) Only (i)

Ans.(b)

Q4. What would be the best way forward for the project manager?

Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I) _____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

- (a) He needs to convince the administration to approve the project's execution.
- (b) The project manager should value taking lessons from past mistakes.
- (c) Only the project manager should be held responsible for the project's outcomes.
- (d) Only (a) and (b)
- (e) Both (b) and (c)

Ans.(b)

Q5. What does the bedrock principle of environmental regulation worldwide state?

Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I) _____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

- (a) It says that the cost of paying for pollution should fall on the people who cause the damage.
- (b) It claims that significant infrastructure initiatives undertaken by the government need to draw criticism as well.
- (c) It expressly ignores the forced relocation of individuals for monetary benefit.
- (d) It argues that the damage to priceless marine biodiversity must be repaired.
- (e) Only (b) and (d)

Ans.(a)

Q6. Which of the following statements with reference to the information provided in the given passage is/are incorrect?

Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I) _____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

- (a) While repairing harm to priceless marine biodiversity, suggestions from experts must be taken into consideration.
- (b) The project should provide the affected people compensation and restore their privileges.
- (c) The security measures that port authorities must implement should be evaluated independently.
- (d) Local authorities must provide funds to remediate the severe devastation done to the marine ecosystem.
- (e) Both (a) and (c)

Ans.(d)

Q7. Choose the most appropriate synonym of the word 'COVENANT', as highlighted in the given passage. Read the following passage and answer the given questions based on the information provided in the passage.

Several families that lost homes to coastal erosion last year, and those living in makeshift schools and camps are just a foretaste of things to come if coastal erosion and extreme cyclones continue unabated. Port projects in China, Kenya, and Vietnam have seen vast resettlement and livelihood outlays by the owners over the life of the project. A further danger is an irreversibly destroyed ecology, triggering deadlier hazards of nature. Ports without adequate safeguards in a highly delicate ecology unleash destruction on marine life and the livelihoods of the local population. Visakhapatnam and Chennai show how siltation, coastal erosion and accretion can be _____ (I) _____ by the deepening of harbour channels in ecologically sensitive areas. Equally, project documents hardly address the effects of the port on the precious marine ecosystem and biodiversity, a huge priority for Kerala. Recent studies have identified the Vizhinjam-Poovar stretch as a biodiversity hotspot and recommended that the region be recognized as a marine protected area.

The report attributes the erosion and accretion to climate change more than port activity, on grounds that construction has been modest in scale. That, in fact, aggravates the risk that stepped-up activity, without safeguards, will see more dire consequences. Anthropogenic climate change is unquestionably raising sea levels along Indian coasts, but the extreme stress north of the port cannot be explained by global warming, something that impacts everywhere. A bedrock principle of environmental regulation worldwide is that pollution penalties should be high enough and borne by the creators of damages. For large-scale infrastructure projects, the financier and the borrower must implement sufficient safeguards to avoid marine pollution and destruction. On involuntary dislocation of people that society is willing to accept in return for financial gains, the project must allocate funds in recognition of people's centuries-old right to the sea and its resources.

The first order of business, as in infrastructure projects worldwide, is that the project provides compensation to the displaced people and restores their rights. Second, the gross neglect of the damage to invaluable marine biodiversity must be redressed with an acceptable environmental impact assessment, including inputs from experts in biology, ecology, and oceanography. Third, there needs to be an independent assessment of safeguards that port authorities must put in place as a precondition for any further construction. A Turkish proverb says, "No matter how far you have gone on a wrong road, turn back." That, in the context of unanswered financial, social and environmental risks, means business as usual is not an option. The way forward would be for the project manager to take to heart, in the spirit of learning from experience, the red alerts, and the Government to allow the continuation of the project only with the agreement for a mid-course transformation, including a legal covenant to make the venture sustainable for Kerala.

- (a) relinquished
- (b) disavowed
- (c) exacerbated
- (d) repudiated
- (e) abnegated

Ans.(c)

Q11. The coach urged (A) / the athlete to stops (B) / lagging behind and (C) / pick up his pace. (D) / No Error (E)

Read each sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is grammatically and contextually correct, then choose option "No error" as answer. (Ignore errors of punctuation, if any.)

- (a) A
- (b) B
- (c) C
- (d) D
- (e) No error

Ans.(b)

Q12. The attorney provided (A) / clear evidence of (B) / his client's innocent (C) / to the jury. (D) / No Error (E)

Read each sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is grammatically and contextually correct, then choose option "No error" as answer. (Ignore errors of punctuation, if any.)

- (a) A
- (b) B
- (c) C
- (d) D
- (e) No error

Ans.(c)

Q13. I haven't saw (A) / such a beautiful (B) / sunset in my (C) / entire life. (D) / No error (E)

Read each sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is grammatically and contextually correct, then choose option "No error" as answer. (Ignore errors of punctuation, if any.)

- (a) A
- (b) B
- (c) C
- (d) D
- (e) No error

Ans.(a)

Q14. She asked me (A) / if I can help her (B) / move the furniture (C) / this weekend. (D) / No Error (E)

Read each sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is grammatically and contextually correct, then choose option "No error" as answer. (Ignore errors of punctuation, if any.)

- (a) A
- (b) B
- (c) C
- (d) D
- (e) No error

Ans.(b)

Q15. Which of the following words will fit in the given blank (A)?

In the following passage there are blanks, each of which has been denoted by letters. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

India has been _____ (A) building its startup ecosystem for the past decade, with the government and private sector working together to create a supportive environment for entrepreneurs. As a result, India has become one of the most _____ (B) startup hubs in the world, with a growing number of successful startups in a variety of industries. In this article, we will take a closer look at how the startup ecosystem is working in India. The Indian startup ecosystem is built on several key _____ (C), including government support, access to capital, a growing talent pool, and a supportive culture for entrepreneurship.

One of the most important factors driving the growth of startups in India is the government's focus on supporting entrepreneurship. The government has _____ (D) a range of policies and initiatives aimed at encouraging startups, such as the Startup India campaign launched in 2016. This campaign provides a range of benefits and _____ (E) to startups, including tax _____ (F), funding, and support for incubators and accelerators.

- (a) practically
- (b) steadily
- (c) chronologically
- (d) comparatively
- (e) additionally

Ans.(b)

Q16. Which of the following words will fit in the given blank (B)?

In the following passage there are blanks, each of which has been denoted by letters. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

India has been _____ (A) building its startup ecosystem for the past decade, with the government and private sector working together to create a supportive environment for entrepreneurs. As a result, India has become one of the most _____ (B) startup hubs in the world, with a growing number of successful startups in a variety of industries. In this article, we will take a closer look at how the startup ecosystem is working in India. The Indian startup ecosystem is built on several key _____ (C), including government support, access to capital, a growing talent pool, and a supportive culture for entrepreneurship.

One of the most important factors driving the growth of startups in India is the government's focus on supporting entrepreneurship. The government has _____ (D) a range of policies and

initiatives aimed at encouraging startups, such as the Startup India campaign launched in 2016. This campaign provides a range of benefits and _____ (E) to startups, including tax _____ (F), funding, and support for incubators and accelerators.

- (a) dynamic
- (b) whimsical
- (c) consensus
- (d) illustrated
- (e) lofty

Ans.(a)

Q17. Which of the following words will fit in the given blank (C)?

In the following passage there are blanks, each of which has been denoted by letters. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

India has been _____ (A) building its startup ecosystem for the past decade, with the government and private sector working together to create a supportive environment for entrepreneurs. As a result, India has become one of the most _____ (B) startup hubs in the world, with a growing number of successful startups in a variety of industries. In this article, we will take a closer look at how the startup ecosystem is working in India. The Indian startup ecosystem is built on several key _____ (C), including government support, access to capital, a growing talent pool, and a supportive culture for entrepreneurship.

One of the most important factors driving the growth of startups in India is the government's focus on supporting entrepreneurship. The government has _____ (D) a range of policies and initiatives aimed at encouraging startups, such as the Startup India campaign launched in 2016. This campaign provides a range of benefits and _____ (E) to startups, including tax _____ (F), funding, and support for incubators and accelerators.

- (a) criteria
- (b) pillars
- (c) plights
- (d) terminologies
- (e) strategies

Ans.(b)

Q18. Which of the following words will fit in the given blank (D)?

In the following passage there are blanks, each of which has been denoted by letters. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

India has been _____ (A) building its startup ecosystem for the past decade, with the government and private sector working together to create a supportive environment for entrepreneurs. As a result, India has become one of the most _____ (B) startup hubs in the world, with a growing number of successful startups in a variety of industries. In this article, we will take a closer look at how the startup ecosystem is working in India. The Indian startup ecosystem is built on several key

_____ (C), including government support, access to capital, a growing talent pool, and a supportive culture for entrepreneurship.

One of the most important factors driving the growth of startups in India is the government's focus on supporting entrepreneurship. The government has _____ (D) a range of policies and initiatives aimed at encouraging startups, such as the Startup India campaign launched in 2016. This campaign provides a range of benefits and _____ (E) to startups, including tax _____ (F), funding, and support for incubators and accelerators.

- (a) rendered
- (b) restrained
- (c) overshadowed
- (d) leaned
- (e) implemented

Ans.(e)

Q19. Which of the following words will fit in the given blank (E)?

In the following passage there are blanks, each of which has been denoted by letters. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

India has been _____ (A) building its startup ecosystem for the past decade, with the government and private sector working together to create a supportive environment for entrepreneurs. As a result, India has become one of the most _____ (B) startup hubs in the world, with a growing number of successful startups in a variety of industries. In this article, we will take a closer look at how the startup ecosystem is working in India. The Indian startup ecosystem is built on several key _____ (C), including government support, access to capital, a growing talent pool, and a supportive culture for entrepreneurship.

One of the most important factors driving the growth of startups in India is the government's focus on supporting entrepreneurship. The government has _____ (D) a range of policies and initiatives aimed at encouraging startups, such as the Startup India campaign launched in 2016. This campaign provides a range of benefits and _____ (E) to startups, including tax _____ (F), funding, and support for incubators and accelerators.

- (a) practices
- (b) specialties
- (c) incentives
- (d) accolades
- (e) attempts

Ans.(c)

Q20. Which of the following words will fit in the given blank (F)?

In the following passage there are blanks, each of which has been denoted by letters. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately.

India has been _____ (A) building its startup ecosystem for the past decade, with the government and private sector working together to create a supportive environment for entrepreneurs. As a result,

India has become one of the most _____ (B) startup hubs in the world, with a growing number of successful startups in a variety of industries. In this article, we will take a closer look at how the startup ecosystem is working in India. The Indian startup ecosystem is built on several key _____ (C), including government support, access to capital, a growing talent pool, and a supportive culture for entrepreneurship.

One of the most important factors driving the growth of startups in India is the government's focus on supporting entrepreneurship. The government has _____ (D) a range of policies and initiatives aimed at encouraging startups, such as the Startup India campaign launched in 2016. This campaign provides a range of benefits and _____ (E) to startups, including tax _____ (F), funding, and support for incubators and accelerators.

- (a) exemptions
- (b) crediting
- (c) rendition
- (d) obligation
- (e) stipulation

Ans.(a)

Q21. Which of the following will be the third sentence after rearrangement?

Rearrange the following sentences in the proper sequence to form a meaningful paragraph. Then answer the questions that follow.

- (A) As of today, 11 of the translocated cheetahs are in the true wild with four in specially designed one-square-kilometre enclosures called 'bomas,'
- (B) Project Cheetah is India's cheetah relocation programme and is perhaps among the most ambitious of its kind in the world.
- (C) These bomas are allegedly designed to help the animals acclimatise to Indian conditions.
- (D) The attempt is to, over the next decade, bring in 5-10 animals every year until a self-sustaining population of about 35 cheetahs is established.
- (E) To achieve this, India's plan is to have them grow in natural, unfenced, wild conditions.

- (a) D
- (b) A
- (c) C
- (d) E
- (e) B

Ans.(d)

Q22. Which of the following will be the last sentence after rearrangement?

Rearrange the following sentences in the proper sequence to form a meaningful paragraph. Then answer the questions that follow.

- (A) As of today, 11 of the translocated cheetahs are in the true wild with four in specially designed one-square-kilometre enclosures called 'bomas,'
- (B) Project Cheetah is India's cheetah relocation programme and is perhaps among the most ambitious of its kind in the world.
- (C) These bomas are allegedly designed to help the animals acclimatise to Indian conditions.

(D) The attempt is to, over the next decade, bring in 5-10 animals every year until a self-sustaining population of about 35 cheetahs is established.

(E) To achieve this, India's plan is to have them grow in natural, unfenced, wild conditions.

(a) B

(b) A

(c) D

(d) C

(e) E

Ans.(d)

Q23. Which of the following will be the second sentence after rearrangement?

Rearrange the following sentences in the proper sequence to form a meaningful paragraph. Then answer the questions that follow.

(A) As of today, 11 of the translocated cheetahs are in the true wild with four in specially designed one-square-kilometre enclosures called 'bomas,'

(B) Project Cheetah is India's cheetah relocation programme and is perhaps among the most ambitious of its kind in the world.

(C) These bomas are allegedly designed to help the animals acclimatise to Indian conditions.

(D) The attempt is to, over the next decade, bring in 5-10 animals every year until a self-sustaining population of about 35 cheetahs is established.

(E) To achieve this, India's plan is to have them grow in natural, unfenced, wild conditions.

(a) A

(b) D

(c) E

(d) B

(e) C

Ans.(b)

Q24. Which of the following will be the fourth sentence after rearrangement?

Rearrange the following sentences in the proper sequence to form a meaningful paragraph. Then answer the questions that follow.

(A) As of today, 11 of the translocated cheetahs are in the true wild with four in specially designed one-square-kilometre enclosures called 'bomas,'

(B) Project Cheetah is India's cheetah relocation programme and is perhaps among the most ambitious of its kind in the world.

(C) These bomas are allegedly designed to help the animals acclimatise to Indian conditions.

(D) The attempt is to, over the next decade, bring in 5-10 animals every year until a self-sustaining population of about 35 cheetahs is established.

(E) To achieve this, India's plan is to have them grow in natural, unfenced, wild conditions.

(a) C

(b) E

(c) A

(d) B

(e) D

Ans.(c)

Q25. Which of the following will be the final order of sentences after rearrangement?

Rearrange the following sentences in the proper sequence to form a meaningful paragraph. Then answer the questions that follow.

(A) As of today, 11 of the translocated cheetahs are in the true wild with four in specially designed one-square-kilometre enclosures called 'bomas,'

(B) Project Cheetah is India's cheetah relocation programme and is perhaps among the most ambitious of its kind in the world.

(C) These bomas are allegedly designed to help the animals acclimatise to Indian conditions.

(D) The attempt is to, over the next decade, bring in 5-10 animals every year until a self-sustaining population of about 35 cheetahs is established.

(E) To achieve this, India's plan is to have them grow in natural, unfenced, wild conditions.

(a) ACBED

(b) BDEAC

(c) CABED

(d) BCDAE

(e) DECAB

Ans.(b)

Q26. . Which of the following will be the first sentence after rearrangement?

Rearrange the following sentences in the proper sequence to form a meaningful paragraph. Then answer the questions that follow.

(A) As of today, 11 of the translocated cheetahs are in the true wild with four in specially designed one-square-kilometre enclosures called 'bomas,'

(B) Project Cheetah is India's cheetah relocation programme and is perhaps among the most ambitious of its kind in the world.

(C) These bomas are allegedly designed to help the animals acclimatise to Indian conditions.

(D) The attempt is to, over the next decade, bring in 5-10 animals every year until a self-sustaining population of about 35 cheetahs is established.

(E) To achieve this, India's plan is to have them grow in natural, unfenced, wild conditions.

(a) C

(b) E

(c) A

(d) B

(e) D

Ans.(d)

Q27. Jackson's goal was to run a mile in 6 minutes, but he came out just a little above of his mark. In each sentence, a part is given in bold, which may or may not be grammatically correct. If incorrect, replace it with the best alternative among the given options. If correct, choose "No correction required" as your answer choice.

- (a) came up by a little ago
- (b) came in just a little ahead
- (c) come in by just a little ahead
- (d) come up just a little above
- (e) No correction required

Ans.(b)

Q28. Matters will remain disorient until the king acts decisively, according to the power vested in him. In each sentence, a part is given in bold, which may or may not be grammatically correct. If incorrect, replace it with the best alternative among the given options. If correct, choose "No correction required" as your answer choice.

- (a) will remained disoriented unless
- (b) would remained disorient until
- (c) has remain disoriented unless
- (d) will remain disoriented unless
- (e) No correction required

Ans.(d)

Q29. The all-inclusive resort trip seemed heavenly, with all guests relaxed and have a well time. In each sentence, a part is given in bold, which may or may not be grammatically correct. If incorrect, replace it with the best alternative among the given options. If correct, choose "No correction required" as your answer choice.

- (a) relax and have a great
- (b) relaxation and having a good
- (c) relaxed and having a great
- (d) relax and having a well
- (e) No correction required

Ans.(c)

Q30. During a trial, it is the jury's job to determine fair retribution.

In each sentence, a part is given in bold, which may or may not be grammatically correct. If incorrect, replace it with the best alternative among the given options. If correct, choose "No correction required" as your answer choice.

- (a) for determine good retribution
- (b) so to determine fair retribution
- (c) for determine fair retributive
- (d) to determining good retribution
- (e) No correction required

Ans.(e)

Q31. If the ratio of non – defective to defective shoes sold in March is 2:3 and defective shoes sold in April is 250% more than that in March, then find the sum of non-defective shoes sold in April & March. The table shows shoes sold by a company in four (January, February, March and April) different months of a year. Read the following table carefully and answer the questions given below.

Months	Shoes sold
January	200
Till February	350
Till March	400
Till April	650

- (a) 145
- (b) 165
- (c) 135
- (d) 155
- (e) 175

Ans.(b)

Q32. If shoes sold till May is 900, then the shoes sold in February is what percentage of shoes sold in May?

The table shows shoes sold by a company in four (January, February, March and April) different months of a year. Read the following table carefully and answer the questions given below.

Months	Shoes sold
January	200
Till February	350
Till March	400
Till April	650

- (a) 25%
- (b) 40%
- (c) 75%
- (d) 45%
- (e) 60%

Ans.(e)

Q33. The shoes sold in April are 40% of the shoes manufactured in the same month. If 40% of unsold shoes in April are sold in May, then find the ratio of shoes sold in January to shoes sold in May.

The table shows shoes sold by a company in four (January, February, March and April) different months of a year. Read the following table carefully and answer the questions given below.

Months	Shoes sold
January	200
Till February	350
Till March	400
Till April	650

(a) 1:1

(b) 4:5

(c) 5:4

(d) 3:4

(e) 4:3

Ans.(e)

Q34. The shoes sold in February are three-fourths of the boots manufactured in the same month. If 28% of boots are unsold in February, then find the difference between boots sold in February and shoes sold in March.

The table shows shoes sold by a company in four (January, February, March and April) different months of a year. Read the following table carefully and answer the questions given below.

Months	Shoes sold
January	200
Till February	350
Till March	400
Till April	650

(a) 76

(b) 68

(c) 102

(d) 94

(e) 62

Ans.(d)

Q35. Average shoes sold in January and April is what percentage more or less than the shoes sold in March?

The table shows shoes sold by a company in four (January, February, March and April) different months of a year. Read the following table carefully and answer the questions given below.

Months	Shoes sold
January	200
Till February	350
Till March	400
Till April	650

(a) 225%

(b) 350%

(c) 400%

(d) 175%

(e) 250%

Ans.(b)

Q36.

$$\sqrt{123.67 - (152.11 + 54.99 - 24.87) + 121.89} = ?$$

What approximate value will come in place of question mark (?) in the following questionss (You are not expected to calculate the exact value).

- (a) 5
- (b) 1
- (c) 14
- (d) 8
- (e) 20

Ans.(d)

Q37. $426.87 + 676.87 = 103.78 + ?^3$

What approximate value will come in place of question mark (?) in the following questionss (You are not expected to calculate the exact value).

- (a) 20
- (b) 15
- (c) 30
- (d) 35
- (e) 10

Ans.(e)

Q38.

$$\frac{24.76}{2.05} \times \frac{64.22}{7.99} \div \frac{4.99}{3.04} = ?$$

What approximate value will come in place of question mark (?) in the following questionss (You are not expected to calculate the exact value).

- (a) 60
- (b) 80
- (c) 40
- (d) 50
- (e) 20

Ans.(a)

Q39. $[1.89 \times \{44.33 + 89.89 - (34.33 + 15.84)\}] = ?$

What approximate value will come in place of question mark (?) in the following questionss (You are not expected to calculate the exact value).

- (a) 178
- (b) 138
- (c) 150
- (d) 168
- (e) 188

Ans.(d)

Q40. 449.99% of $19.87 + \sqrt{530} \times 3.77 = ?$

What approximate value will come in place of question mark (?) in the following questionss (You are not expected to calculate the exact value).

- (a) 170
- (b) 182
- (c) 188
- (d) 172
- (e) 162

Ans.(b)

Directions (41-45): The line graph given below shows total people (male + female) in two years 2017 & 2018 in four (A, B, C and D) different companies. Read the following line graph carefully and answer the questions given below.

Q41. Total people in X in the year 2017 are 65% more than total people in company C in the year 2017, then find the difference between total people in company A in years 2018 and total people in X in the year 2017?

- (a) 650
- (b) 770
- (c) 620
- (d) 710
- (e) 690

Ans.(c)

Q42. Total people in company D in the years 2017 & 2018 together are how much percentage more than total people in company B in the year 2018 (approx.)?

- (a) 67%
- (b) 63%
- (c) 71%
- (d) 43%
- (e) 48%

Ans.(c)

Q43. If 48% of total people in A in year 2017 spends Rs 8 as parking charge daily and three-fifth of total people in A in year 2018 spends Rs.5 as parking charge daily, then find the total per day parking charge for people in company A in both years (in Rs)?

- (a) 4004
- (b) 4040
- (c) 4044
- (d) 4440
- (e) 4404

Ans.(e)

Q44. In 2019 in company B, will decrease by 20% compared to previous year. If total people in company A in 2017 is 25% less than the total people in same company in 2019, then find the sum of total people in company A and B in 2019?

- (a) 1480
- (b) 1080
- (c) 1240
- (d) 1460
- (e) 1170

Ans.(a)

Q45. The ratio of total people in company E to C in year 2017 is 7:16 respectively. If average number of people in company E, A and B in 2018 is 700, then find the total people in company E in 2017 & 2018 are how much more or less than the total people in company A, B and D in 2017?

- (a) 880
- (b) 1000
- (c) 780
- (d) 1200
- (e) 1150

Ans.(b)

Q46. 2, 7, 29, 145, 877, 6140, 49121

There is a wrong term in the given series below. Find out that wrong term.

- (a) 145
- (b) 877

- (c) 29
- (d) 7
- (e) 49121

Ans.(a)

Q47. 25, 34, 41.5, 47.5, 52, 53.5, 56.5

There is a wrong term in the given series below. Find out that wrong term.

- (a) 34
- (b) 53.5
- (c) 56.5
- (d) 25
- (e) 41.5

Ans.(b)

Q48. 5, 13, 29, 53, 85, 123, 173

There is a wrong term in the given series below. Find out that wrong term.

- (a) 5
- (b) 13
- (c) 123
- (d) 85
- (e) 173

Ans.(c)

Q49. 26, 315, 484, 605, 654, 679, 683

There is a wrong term in the given series below. Find out that wrong term.

- (a) 683
- (b) 26
- (c) 315
- (d) 605
- (e) 484

Ans.(a)

Q50. 4, 8, 16, 28, 44, 68, 88

There is a wrong term in the given series below. Find out that wrong term.

- (a) 8
- (b) 68
- (c) 88
- (d) 44
- (e) 16

Ans.(b)

Q51. The ratio of average speeds of four bike is 7: 9: 11: 12. If they all travel 156 km and the bike with least speed travel that distance in 144 min. Find the time taken by the bike which speed is most.

- (a) 77 minutes
- (b) 84 minutes
- (c) 71 minutes
- (d) 89 minutes
- (e) 79 minutes

Ans.(b)

Q52. A 360-meter-long train can cross a 'P' meters long platform in 20 seconds. If the train can cross a pole in 12 seconds, then find the time (in seconds) taken by the train to cross 0. 5P meters long bridge.

- (a) 17
- (b) 15
- (c) 13
- (d) 11
- (e) 16

Ans.(e)

Q53. The quantity of milk and water in the vessel is (X+25) liters & 25 liters, respectively. 15 liters of water are added in the vessel, then the ratio of milk to water becomes 5:4, respectively. If 40% of the mixture is taken out (from the initial quantity of the mixture before 15 liters of water are added) and X liters of water are added in the vessel, then find the ratio of milk to water in the final mixture.

- (a) 3:11
- (b) 3:7
- (c) 3:5
- (d) 3:4
- (e) None of these

Ans.(d)

Q54. Length of a rectangle is eight times smallest prime number and breadth of the rectangle is 25% less than that of its length. If area of a square is 4 cm more than the area of the rectangle, then find the perimeter of the square (in cm).

- (a) 50
- (b) 52
- (c) 58
- (d) 54
- (e) 56

Ans.(e)

Q55. The ratio of speed of a boat in still water to speed of current is 7:3 respectively. Boat can cover 112 km of still water in four hours. If the boat can cover X km upstream in two hours, then find the time (in hour) taken by boat to cover X+16 km downstream.

- (a) 1.2

(b) 2.7

(c) 2.4

(d) 1.8

(e) 1.4

Ans.(a)

Q56. An article is marked by 60% above its cost price and he earned profit of Rs. 120. If he allows discount of Rs. 240, then find the marked price of an article (in Rs.)

(a) 640

(b) 800

(c) 1040

(d) 720

(e) 960

Ans.(e)

Q57. A invest of Rs. P in compound interest (compound half yearly) at 20% p. a. for one year. He received interest for Rs. 378. If he invests Rs. P+400 in simple interest at 12% p. a. for three years, then find the difference between P/2 and the simple interest he received after three years.

(a) 114

(b) 111

(c) 108

(d) 103

(e) 101

Ans.(c)

Q58. The present age of A is six years less than twice the age of B. The present age of C is 40% the present age of A. If difference between the age of B and C is 6, then find the age of A three years ago.

(a) 29 years

(b) 22 years

(c) 27 years

(d) 23 years

(e) 28 years

Ans.(c)

Q59. A and B started a business with investment of Rs. X+800 and Rs. X-200. After eight months B left the business and profit share of A at the end of year is Rs. 210 out of total profit of Rs. 300. Find X.

(a) 2500

(b) 1500

(c) 1800

(d) 2400

(e) 2000

Ans.(e)

Q60. A alone and B alone can complete a work in 24 days and 20 days respectively and C is X unit more efficient than B. A & C started the work and after 8 days they both replaced by B. If B complete the remaining work in $2\frac{2}{3}$ days, then find the value of X.

- (a) 5
- (b) 2
- (c) 1
- (d) 3
- (e) 6

Ans.(b)

Q61. If the selling price of fresh Mangoes is Rs. 50/piece and the selling price of dried Mangoes is Rs. 25/piece and the ratio of revenue generated by selling all Mangoes (dried and fresh) to the revenue generated by selling all Apples (dried + fresh) is 5: 6, then find the price of each fresh apple.

Read the information carefully and answer the following questions.

In a shop there are three types of fruits (Mango, Banana and Apple). These are either fresh or dried. Total number of fresh Bananas and fresh Apples are 80 and total number of dried Mangoes are half of the fresh Apples which is 30. Total number of fresh Mangoes and dried Apples are 60. Number of dried Bananas is equal to the number of fresh Mangoes and number of dried apples is equal to the total number of fresh bananas.

- (a) 30
- (b) 35
- (c) 40
- (d) 100
- (e) Can't be determined

Ans.(e)

Q62. Find the number of fresh bananas is what percentage more than the fresh Mangoes.

Read the information carefully and answer the following questions.

In a shop there are three types of fruits (Mango, Banana and Apple). These are either fresh or dried. Total number of fresh Bananas and fresh Apples are 80 and total number of dried Mangoes are half of the fresh Apples which is 30. Total number of fresh Mangoes and dried Apples are 60. Number of dried Bananas is equal to the number of fresh Mangoes and number of dried apples is equal to the total number of fresh bananas.

- (a) 350%
- (b) 320%
- (c) 400%
- (d) 450%
- (e) 300%

Ans.(c)

Q63. Find the difference between the dried fruits and the fresh fruits available in the shop.

Read the information carefully and answer the following questions.

In a shop there are three types of fruits (Mango, Banana and Apple). These are either fresh or dried. Total number of fresh Bananas and fresh Apples are 80 and total number of dried Mangoes are half of the fresh Apples which is 30. Total number of fresh Mangoes and dried Apples are 60. Number of dried Bananas is equal to the number of fresh Mangoes and number of dried apples is equal to the total number of fresh bananas.

(a) 13

(b) 12

(c) 10

(d) 18

(e) 15

Ans.(e)

Q64. Find the ratio of number of dried Apples to the Fresh mangoes.

Read the information carefully and answer the following questions.

In a shop there are three types of fruits (Mango, Banana and Apple). These are either fresh or dried. Total number of fresh Bananas and fresh Apples are 80 and total number of dried Mangoes are half of the fresh Apples which is 30. Total number of fresh Mangoes and dried Apples are 60. Number of dried Bananas is equal to the number of fresh Mangoes and number of dried apples is equal to the total number of fresh bananas.

(a) 1:1

(b) 4:3

(c) 3:1

(d) 5:1

(e) 5:2

Ans.(d)

Q65. If a teacher distributes some gifts among his four students in the ratio of $\frac{1}{3} : \frac{1}{4} : \frac{1}{8} : \frac{1}{6}$, what is the minimum number of gifts teacher must have?

(a) Can't be determined.

(b) 84

(c) 63

(d) 21

(e) 42

Ans.(d)

Q66. How many persons visit between M and the one who visits Brazil?

Read the given information carefully and answer the related questions:

Five persons visit different countries in five different months. The months are – April, May, June, August and September.

M visits in the month having odd number of days. Three months gap between M and the one who visits Japan. N visits two persons before the one who visits Canada. Number of persons visit after N is same as the number of persons visit before O. More than one person visits between P and the one who visits Russia. N and P do not visit in adjacent months. Q visits before the one who visits Brazil and after the one who visits Nepal.

- (a) None
- (b) One
- (c) Two
- (d) Three
- (e) Either one or two

Ans.(b)

Q67. P visits in which of the following months?

Read the given information carefully and answer the related questions:

Five persons visit different countries in five different months. The months are – April, May, June, August and September.

M visits in the month having odd number of days. Three months gap between M and the one who visits Japan. N visits two persons before the one who visits Canada. Number of persons visit after N is same as the number of persons visit before O. More than one person visits between P and the one who visits Russia. N and P do not visit in adjacent months. Q visits before the one who visits Brazil and after the one who visits Nepal.

- (a) June
- (b) April
- (c) May
- (d) August
- (e) September

Ans.(d)

Q68. Who among the following visits in April?

Read the given information carefully and answer the related questions:

Five persons visit different countries in five different months. The months are – April, May, June, August and September.

M visits in the month having odd number of days. Three months gap between M and the one who visits Japan. N visits two persons before the one who visits Canada. Number of persons visit after N is same as the number of persons visit before O. More than one person visits between P and the one who visits Russia. N and P do not visit in adjacent months. Q visits before the one who visits Brazil and after the one who visits Nepal.

- (a) M
- (b) N
- (c) O
- (d) P
- (e) Q

Ans.(b)

Q69. Choose the correct pair.

Read the given information carefully and answer the related questions:

Five persons visit different countries in five different months. The months are – April, May, June, August and September.

M visits in the month having odd number of days. Three months gap between M and the one who visits Japan. N visits two persons before the one who visits Canada. Number of persons visit after N is same as the number of persons visit before O. More than one person visits between P and the one who visits Russia. N and P do not visit in adjacent months. Q visits before the one who visits Brazil and after the one who visits Nepal.

- (a) N - May
- (b) O - Russia
- (c) Q - Canada
- (d) P - Nepal
- (e) M - September

Ans.(c)

Q70. . P visits which country?

Read the given information carefully and answer the related questions:

Five persons visit different countries in five different months. The months are – April, May, June, August and September.

M visits in the month having odd number of days. Three months gap between M and the one who visits Japan. N visits two persons before the one who visits Canada. Number of persons visit after N is same as the number of persons visit before O. More than one person visits between P and the one who visits Russia. N and P do not visit in adjacent months. Q visits before the one who visits Brazil and after the one who visits Nepal.

- (a) Brazil
- (b) Japan
- (c) Canada
- (d) Nepal
- (e) Russia

Ans.(a)

Q71. Statement:

Only a few moon is light.

All star is sky.

Only a few light is star.

Conclusion:

I. Some light can never be sky.

II. No moon being star is a possibility.

In each of the question below, some statements are given followed by two conclusions numbered I and II given below it. You have to take the given statements to be true even if they seem to be at variance

with commonly known facts. Read all the conclusions and decide which conclusion logically follows from the given statements disregarding commonly known facts. Give answer:

- (a) Only I follows
- (b) Only II follows
- (c) Either I or II follows
- (d) Neither I nor II follows
- (e) Both I and II follow

Ans.(b)

Q72. Statement:

Only soil is field.

Some soil is crop.

Some crop is not plant.

Conclusion:

I. No field is plant.

II. Some soil can be plant.

In each of the question below, some statements are given followed by two conclusions numbered I and II given below it. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and decide which conclusion logically follows from the given statements disregarding commonly known facts. Give answer:

- (a) Only I follows
- (b) Only II follows
- (c) Either I or II follows
- (d) Neither I nor II follows
- (e) Both I and II follow

Ans.(e)

Q73. Statement:

No health is lazy.

Only a few health is sleep.

Only a few lazy is bore.

Conclusion:

I. All sleep is bore.

II. Some sleep is not bore.

In each of the question below, some statements are given followed by two conclusions numbered I and II given below it. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and decide which conclusion logically follows from the given statements disregarding commonly known facts. Give answer:

- (a) Only I follows
- (b) Only II follows
- (c) Either I or II follows
- (d) Neither I nor II follows
- (e) Both I and II follow

Ans.(c)

Q74. How many pairs of letters are in the word 'PLENTITUDE', each of which has as many letters between them (both forward and backward direction) as they have according to English alphabetical series?

- (a) One
- (b) Two
- (c) Three
- (d) Four
- (e) More than four

Ans.(e)

Q75. What is the position of B with respect to G?

Read the given information carefully and answer the related questions:

Eight persons A, B, C, D, E, F, G and H – sit around a circular table, equidistant from each other (but not in same order as given). Four persons face inside and four persons face outside.

D faces outside. Two persons sit between D and G. A sits second to the left of G. The one who sits four places to the right A, faces same direction as G. H and A sit immediate left to each other. Three persons sit between E and H, and both face the same direction but opposite to D. F sits third to the right of C but not an immediate neighbor of H.

- (a) Third to the left
- (b) Second to the left
- (c) Fourth to the right
- (d) Immediate left
- (e) Second to the right

Ans.(e)

Q76. How many persons sit between C and A (counted from left of A)?

Read the given information carefully and answer the related questions:

Eight persons A, B, C, D, E, F, G and H – sit around a circular table, equidistant from each other (but not in same order as given). Four persons face inside and four persons face outside.

D faces outside. Two persons sit between D and G. A sits second to the left of G. The one who sits four places to the right A, faces same direction as G. H and A sit immediate left to each other. Three persons sit between E and H, and both face the same direction but opposite to D. F sits third to the right of C but not an immediate neighbor of H.

- (a) One
- (b) Three
- (c) Two
- (d) Five
- (e) Four

Ans.(d)

Q77. Who sits third to the right of F?

Read the given information carefully and answer the related questions:

Eight persons A, B, C, D, E, F, G and H – sit around a circular table, equidistant from each other (but not in same order as given). Four persons face inside and four persons face outside.

D faces outside. Two persons sit between D and G. A sits second to the left of G. The one who sits four places to the right A, faces same direction as G. H and A sit immediate left to each other. Three persons sit between E and H, and both face the same direction but opposite to D. F sits third to the right of C but not an immediate neighbor of H.

(a) A

(b) E

(c) G

(d) D

(e) B

Ans.(a)

Q78. Four of the following five are similar in a certain manner and related to a group, who among the following is not related to the group?

Read the given information carefully and answer the related questions:

Eight persons A, B, C, D, E, F, G and H – sit around a circular table, equidistant from each other (but not in same order as given). Four persons face inside and four persons face outside.

D faces outside. Two persons sit between D and G. A sits second to the left of G. The one who sits four places to the right A, faces same direction as G. H and A sit immediate left to each other. Three persons sit between E and H, and both face the same direction but opposite to D. F sits third to the right of C but not an immediate neighbor of H.

(a) B

(b) H

(c) G

(d) E

(e) C

Ans.(e)

Q79. If all the persons are asked to sit in alphabetical order in clockwise direction, starting from A, then how many persons will remain same on their positions (excluding A)?

Read the given information carefully and answer the related questions:

Eight persons A, B, C, D, E, F, G and H – sit around a circular table, equidistant from each other (but not in same order as given). Four persons face inside and four persons face outside.

D faces outside. Two persons sit between D and G. A sits second to the left of G. The one who sits four places to the right A, faces same direction as G. H and A sit immediate left to each other. Three persons sit between E and H, and both face the same direction but opposite to D. F sits third to the right of C but not an immediate neighbor of H.

(a) One

(b) Two

(c) Three

(d) Four

(e) Five

Ans.(d)

Q80. In which direction is point R with respect to point K?

Read the given information carefully and answer the related questions:

Point A is 5m north of point B. Point C is 12m east of point A. Point C is exactly between point A and point K. Point K is 7m south of point L which is 18m east of point Y. Point D is 6m west of point B and 15m south of point S. Point R is 9m east of point G which is 3m west of point S.

(a) East

(b) North-west

(c) South

(d) South-west

(e) South-east

Ans.(b)

Q81. What is the shortest distance from point A to point L?

Read the given information carefully and answer the related questions:

Point A is 5m north of point B. Point C is 12m east of point A. Point C is exactly between point A and point K. Point K is 7m south of point L which is 18m east of point Y. Point D is 6m west of point B and 15m south of point S. Point R is 9m east of point G which is 3m west of point S.

(a) 31m

(b) 26m

(c) 25m

(d) 13m

(e) None of the above

Ans.(c)

Q82. . Which point is in north of point A?

Read the given information carefully and answer the related questions:

Point A is 5m north of point B. Point C is 12m east of point A. Point C is exactly between point A and point K. Point K is 7m south of point L which is 18m east of point Y. Point D is 6m west of point B and 15m south of point S. Point R is 9m east of point G which is 3m west of point S.

(a) Point G

(b) Point K

(c) Point S

(d) Point R

(e) Point Y

Ans.(d)

Q83. In the number '6235784154', odd digits are increased by 1 and even digits are decreased by 2, then repeated digits are removed from the number. Now, find the sum of remaining digits of the number formed?

- (a) 8
- (b) 9
- (c) 10
- (d) 7
- (e) None of these

Ans.(a)

Q84. O was born on which date and month?

Read the given information carefully and answer the related questions:

Ten persons – N, O, P, Q, R, S, T, U, V and W were born (but not in same order) on two dates – 9 and 26, in five different months – January, March, April, September and October.

Less than three persons were born after T. Four persons were born between T and P. U was born exactly between P and Q. U and P were born on same date but U was not born in the month having even number of days. W was born just after R but in different month. Three persons were born between R and V who was born after N. S and N were born on same dates.

- (a) 9 September
- (b) 26 January
- (c) 9 October
- (d) 26 April
- (e) 26 September

Ans.(a)

Q85. How many persons were born before S?

Read the given information carefully and answer the related questions:

Ten persons – N, O, P, Q, R, S, T, U, V and W were born (but not in same order) on two dates – 9 and 26, in five different months – January, March, April, September and October.

Less than three persons were born after T. Four persons were born between T and P. U was born exactly between P and Q. U and P were born on same date but U was not born in the month having even number of days. W was born just after R but in different month. Three persons were born between R and V who was born after N. S and N were born on same dates.

- (a) Two
- (b) Three
- (c) Six
- (d) Five
- (e) Seven

Ans.(d)

Q86. The number of persons born before ___ is same as the number of persons born after R.

Read the given information carefully and answer the related questions:

Ten persons – N, O, P, Q, R, S, T, U, V and W were born (but not in same order) on two dates – 9 and 26, in five different months – January, March, April, September and October.

Less than three persons were born after T. Four persons were born between T and P. U was born exactly between P and Q. U and P were born on same date but U was not born in the month having even number of days. W was born just after R but in different month. Three persons were born between R and V who was born after N. S and N were born on same dates.

(a) Q

(b) N

(c) U

(d) O

(e) T

Ans.(c)

Q87. Four of the following five are similar in a certain manner and related to a group, which among the following is not related to the group?

Read the given information carefully and answer the related questions:

Ten persons – N, O, P, Q, R, S, T, U, V and W were born (but not in same order) on two dates – 9 and 26, in five different months – January, March, April, September and October.

Less than three persons were born after T. Four persons were born between T and P. U was born exactly between P and Q. U and P were born on same date but U was not born in the month having even number of days. W was born just after R but in different month. Three persons were born between R and V who was born after N. S and N were born on same dates.

(a) U-V

(b) Q-O

(c) P-S

(d) O-R

(e) W-T

Ans.(b)

Q88. . Which of the following is correct?

I. T is the youngest person

II. Two persons were born between Nand O

III. P was not born in April

Read the given information carefully and answer the related questions:

Ten persons – N, O, P, Q, R, S, T, U, V and W were born (but not in same order) on two dates – 9 and 26, in five different months – January, March, April, September and October.

Less than three persons were born after T. Four persons were born between T and P. U was born exactly between P and Q. U and P were born on same date but U was not born in the month having even number of days. W was born just after R but in different month. Three persons were born between R and V who was born after N. S and N were born on same dates.

(a) Only III

- (b) Only I and II
- (c) Only I
- (d) Only II and III
- (e) Only II

Ans.(c)

Q89. If in the word 'EXCLAIMED', vowels are changed with their immediately succeeding letter and consonants are changed with their immediately preceding letter as per alphabetical series, then letters are arranged in dictionary order from left, now, which will be the fourth letter from right end in the new word formed?

- (a) B
- (b) J
- (c) F
- (d) K
- (e) L

Ans.(b)

Q90. Find the total number of persons in the row.

Read the given information carefully and answer the related questions:

A certain number of persons sit in a row facing north. Seven persons sit between O and K. K sits exactly between H and G who sits third to the left of O. Two persons sit between H and P who sits second to the left of I. J sits five places to the left of P and 3rd from an end. The number of persons to the left of J is one more than the number of persons to the right of M who sits second to the right of O.

- (a) 27
- (b) 24
- (c) 28
- (d) 26
- (e) None of these

Ans.(a)

Q91. How many persons sit between H and M?

Read the given information carefully and answer the related questions:

A certain number of persons sit in a row facing north. Seven persons sit between O and K. K sits exactly between H and G who sits third to the left of O. Two persons sit between H and P who sits second to the left of I. J sits five places to the left of P and 3rd from an end. The number of persons to the left of J is one more than the number of persons to the right of M who sits second to the right of O.

- (a) 11
- (b) 8
- (c) 14
- (d) 13
- (e) 6

Ans.(c)

Q92. Who among the following is 10th from the left end?

Read the given information carefully and answer the related questions:

A certain number of persons sit in a row facing north. Seven persons sit between O and K. K sits exactly between H and G who sits third to the left of O. Two persons sit between H and P who sits second to the left of I. J sits five places to the left of P and 3rd from an end. The number of persons to the left of J is one more than the number of persons to the right of M who sits second to the right of O.

- (a) K
- (b) H
- (c) P
- (d) I
- (e) G

Ans.(d)

Q93. Who among the following is grandmother of L?

Read the given information carefully and answer the related questions:

B is father-in-law of P who is brother-in-law of W.W is father of C who is the only child of T. D is the wife of B and Q is the daughter of D. C is the nephew of Q who has a daughter. L is married to M who is a male. T has no siblings.

- (a) D
- (b) T
- (c) Q
- (d) Either D or T
- (e) None of the above

Ans.(a)

Q94. What is the relation of M with respect to P?

Read the given information carefully and answer the related questions:

B is father-in-law of P who is brother-in-law of W.W is father of C who is the only child of T. D is the wife of B and Q is the daughter of D. C is the nephew of Q who has a daughter. L is married to M who is a male. T has no siblings.

- (a) Son
- (b) Grandson
- (c) Son-in-law
- (d) Father-in-law
- (e) Brother

Ans.(c)

Q95. How many married couples are in the family?

Read the given information carefully and answer the related questions:

B is father-in-law of P who is brother-in-law of W.W is father of C who is the only child of T. D is the wife of B and Q is the daughter of D. C is the nephew of Q who has a daughter. L is married to M who is a male. T has no siblings.

- (a) One

- (b) Two
- (c) Three
- (d) Four
- (e) Five

Ans.(d)

Q96. Find the sum of the stack number of box A and box B?

Read the given information carefully and answer the related questions:

Six boxes – A, B, C, D, E and F are placed in a stack one above the other. The boxes are numbered as 1 to 6 from bottom to top respectively and each box is related to different persons – M, N, O, P, Q and R. Boxes and Persons are not used in the same sequence as given.

Two boxes are placed between box D and box E but both are prime numbered boxes. N is related to the box which is placed just below box D. One box is placed between the boxes related to N and O. Q is related to box C and placed just below the box related to O. One box is placed between box A and box F which is related to P. M's box is placed above R's box.

- (a) 6
- (b) 10
- (c) 8
- (d) 9
- (e) 7

Ans.(e)

Q97. Choose the *incorrect* pair of box and related person.

Read the given information carefully and answer the related questions:

Six boxes – A, B, C, D, E and F are placed in a stack one above the other. The boxes are numbered as 1 to 6 from bottom to top respectively and each box is related to different persons – M, N, O, P, Q and R. Boxes and Persons are not used in the same sequence as given.

Two boxes are placed between box D and box E but both are prime numbered boxes. N is related to the box which is placed just below box D. One box is placed between the boxes related to N and O. Q is related to box C and placed just below the box related to O. One box is placed between box A and box F which is related to P. M's box is placed above R's box.

- (a) D-M
- (b) B-R
- (c) A-N
- (d) E-P
- (e) C-Q

Ans.(d)

Q98. How many boxes are placed below box related to R?

Read the given information carefully and answer the related questions:

Six boxes – A, B, C, D, E and F are placed in a stack one above the other. The boxes are numbered as 1 to 6 from bottom to top respectively and each box is related to different persons – M, N, O, P, Q and R. Boxes and Persons are not used in the same sequence as given.

Two boxes are placed between box D and box E but both are prime numbered boxes. N is related to the box which is placed just below box D. One box is placed between the boxes related to N and O. Q is related to box C and placed just below the box related to O. One box is placed between box A and box F which is related to P. M's box is placed above R's box.

- (a) Four
- (b) Three
- (c) Two
- (d) One
- (e) Five

Ans.(c)

Q99. Which box is numbered as 3?

Read the given information carefully and answer the related questions:

Six boxes – A, B, C, D, E and F are placed in a stack one above the other. The boxes are numbered as 1 to 6 from bottom to top respectively and each box is related to different persons – M, N, O, P, Q and R. Boxes and Persons are not used in the same sequence as given.

Two boxes are placed between box D and box E but both are prime numbered boxes. N is related to the box which is placed just below box D. One box is placed between the boxes related to N and O. Q is related to box C and placed just below the box related to O. One box is placed between box A and box F which is related to P. M's box is placed above R's box.

- (a) Box A
- (b) Box B
- (c) Box D
- (d) Box F
- (e) Box C

Ans.(b)

Q100. Number of boxes placed above M's box is same as the number of boxes placed below box ____.

Read the given information carefully and answer the related questions:

Six boxes – A, B, C, D, E and F are placed in a stack one above the other. The boxes are numbered as 1 to 6 from bottom to top respectively and each box is related to different persons – M, N, O, P, Q and R. Boxes and Persons are not used in the same sequence as given.

Two boxes are placed between box D and box E but both are prime numbered boxes. N is related to the box which is placed just below box D. One box is placed between the boxes related to N and O. Q is related to box C and placed just below the box related to O. One box is placed between box A and box F which is related to P. M's box is placed above R's box.

- (a) B
- (b) C
- (c) E
- (d) D
- (e) A

Ans.(c)
