MSc Nursing 2024

Q. No. 1 0012001	Which nerve is responsible for transmitting pain sensation from the appendix to the brain
Option A	Iliohypogastric nerve
Option B	Ilioinguinal nerve
Option C	T 10 spinal nerve
Option D	Vagus nerve
Correct Option	C

Q. No. 2 0012002	The coronary arteries arise from which part of aorta
Option A	Ascending Aorta
Option B	Arch of Aorta
Option C	Descending Aorta
Option D	Thoracic Aorta
Correct Option	A

Q. No. 3 0012003	The role of Hepatic Portal System is to
Option A	Transport oxygenated blood to liver
Option B	Drain blood from the liver to heart
Option C	Deliver nutrients from digestive tract to liver
Option D	Supply blood to pancreas
Correct Option	C

Q. No. 4 0012004	Which hormone is secreted by adrenal medulla & is involved in fight & flight response
Option A	Cortisol
Option B	Epinephrine
Option C	Aldosterone
Option D	Insulin
Correct Option	B

Q. No. 5 0012005	Which process is responsible for synthesis of ATP in mitochondria
Option A	Glycolysis
Option B	Kerbs's cycle
Option C	Beta oxidation
Option D	Oxidative Phosphorylation
Correct Option	D

Q. No. 6 0012006	Which of the following enzymes is responsible for the breakdown of starch into glucose
Option A	Lipase
Option B	Amylase
Option C	Protease
Option D	Lactase
Correct Option	B

Q. No. 7 0012007	Which of the following is considered a key element of the chain of infection
Option A	Vaccination

Option B	Antibiotic resistance
Option C	Personal protective equipment (PPE)
Option D	Reservoir
Correct Option	D

Q. No. 8 0012008	Which characteristic is commonly used to classify bacteria
Option A	Ability to photosynthesize
Option B	Presence of a nucleus
Option C	Shape and arrangement
Option D	Size in micro meters
Correct Option	C

Q. No. 9 0012009	Excess collection of fluid in peritoneal cavity is known as
Option A	Anasarca
Option B	Ascites
Option C	Pleural effusion
Option D	Pedal Edema
Correct Option	B

Q. No. 10 0012010	In acid base balance, a pH below 7.35 is indicative of
Option A	Respiratory alkalosis
Option B	Metabolic acidosis
Option C	Respiratory acidosis
Option D	Metabolic alkalosis
Correct Option	B

Q. No. 11 0012011	How frequently should a nurse change the position of a bedridden patient to prevent bedsores
Option A	Every 30 mins
Option B	Every 1 hours
Option C	Every 2 hours
Option D	Every 4 hours
Correct Option	C

Q. No. 12 0012012	Carminative enema is given to
Option A	Remove gas accumulation
Option B	Destroy intestinal parasites
Option C	Reduce body temperature
Option D	Induced sleep
Correct Option	A

Q. No. 13 0012013	Florence Nightingale was born on
Option A	May 12 th 1820
Option B	May 12 th 1832
Option C	April 7 th 1820
Option D	June 7 th 1842
Correct Option	A

Q. No. 14 0012014	Collection of lymph fluid in the pleural space
Option A	Hemothorax
Option B	Pneumothorax
Option C	Chylothorax
Option D	None of the above
Correct Option	C

Q. No. 15 0012015	When a person has a normal body temperature it is called.
Option A	Afebrile
Option B	Febrile
Option C	Pyrexia
Option D	Hypothermia
Correct Option	A

Q. No. 16 0012016	A patient who decides to leave the hospital against medical advice (LAMA) must sign a form. What is the purpose of this form
Option A	To release the physician and hospital from legal responsibility for the patient's health status

Correct Option	A

Q. No. 17 0012017	The primary source of heat in the body is
Option A	Sunlight
Option B	Metabolism
Option C	Heart beat
Option D	Circulation
Correct Option	B

Q. No. 18 0012018	Irregular respiration characterized by apnea and hyperventilation is known as
Option A	Cheyne -strokes respiration
Option B	Hyperventilation
Option C	Kussmaul's respiration
Option D	Sighing
Correct Option	A

Q. No. 19 0012019	One tea spoon _____ ml
Option A	1ml
Option B	3ml
Option C	5ml
Option D	7ml
Correct Option	C

Q. No. 20 0012020	Administration of medication into the bone is known as
Option A	Intrathecal
Option B	Intraosseous
Option C	Intradermal
Option D	Subcutaneous

Correct Option	B
----------------	----------

Q. No. 21 0012021	The Theory that involves care and helps through which the client attains total self-care is
Option A	Nightingale theory
Option B	Orem's theory
Option C	Peplau's theory
Option D	Roy's theory
Correct Option	B

Q. No. 22 0012022	Color coding for oxygen cylinder is
Option A	Black
Option B	Black with white shoulders
Option C	Light blue
Option D	Gray
Correct Option	B

Q. No. 23 0012023	Which of part of the colon is the preferred site for permanent colostomy
Option A	Ascending colon
Option B	Transverse colon
Option C	Descending colon
Option D	Sigmoid colon
Correct Option	D

Q. No. 24 0012024	Major electrolyte imbalance that occurs in water intoxication is
Option A	Hypernatremia
Option B	Hyponatremia
Option C	Hypokalemia
Option D	Hyperkalemia
Correct Option	B

Q. No. 25 0012025	Which Vitamin deficiency will cause Beriberi disease/Disorder
Option A	Vitamin B12
Option B	Vitamin B2
Option C	Vitamin B1
Option D	Vitamin B3
Correct Option	C

Q. No. 26 0012026	Which of the following is considered a macronutrient
Option A	Vitamins
Option B	Minerals
Option C	Carbohydrates
Option D	Antioxidants
Correct Option	C

Q. No. 27 0012027	What is the recommended daily intake of fibre for adults
Option A	10-15 grams
Option B	25-30 grams
Option C	35-40 grams

Option D	45-50 grams
Correct Option	B

Q. No. 28 0012028	Which of the following dietary components can help in reducing cholesterol levels
Option A	Saturated fats
Option B	Soluble fibre
Option C	Trans fats
Option D	Refined sugars
Correct Option	B

Q. No. 29 0012029	Which mineral is crucial for the formation of haemoglobin
Option A	Zinc
Option B	Calcium
Option C	Magnesium
Option D	Iron
Correct Option	D

Q. No. 30 0012030	Which of the following best describes "Social Norms"
Option A	Laws enforced by the government
Option B	Guidelines for acceptable behaviour within a group
Option C	Personal beliefs held by individuals
Option D	Economic factors affecting health
Correct Option	B

Option A	Urbanization
Option B	Migration
Option C	Immigration
Option D	Emigration
Correct Option	B

Q. No. 32 0012032	The term "endogamy" refers to
Option A	Marrying outside one's social group
Option B	Cohabitation without marriage
Option C	Marrying within one's social group
Option D	Same-sex marriage
Correct Option	C

Q. No. 33 0012033	Which of the following is not a criterion commonly used to determine social stratification
Option A	Wealth
Option B	Education
Option C	Power
Option D	Age
Correct Option	D

Q. No. 34 0012034	Which one of the following is not an example of Artistic Aptitude Test
Option A	Graphic Arts Test
Option B	Musical aptitude Test

Option C	Literary aptitude Test
Option D	General Aptitude test Battery
Correct Option	D

Q. No. 35 0012035	A child had 72 IQ score his father understand that he has which level of IQ
Option A	Average
Option B	Borderline
Option C	Mild mentally Retarded
Option D	Moderated mentally Retarded
Correct Option	B

Q. No. 36 0012036	Hypothetical thinking is a characteristic feature of
Option A	Adolescents
Option B	Infants
Option C	Adults
Option D	Early child hood
Correct Option	A

Q. No. 37 0012037	The gestalt principle of continuity refers to our tendency to perceive
Option A	Figures rather than ground
Option B	Elements that move together as belonging together
Option C	Objects in groups when they are similar
Option D	A series of points or lines as having unity
Correct Option	D

Q. No. 38 0012038	Atropine is commonly used prior to administration of inhalant anaesthetics to reduce
Option A	Muscle tone
Option B	Secretions
Option C	Nausea and vomiting
Option D	Heart rate
Correct Option	B

Q. No. 39 0012039	The Nurse teaches the patient who is receiving warfarin sodium that
Option A	Partial thromboplastin time values determine the dosage of warfarin sodium
Option B	Protamine sulfate is used to reverse the effects of warfarin sodium
Option C	The international, Normalized ration (INR) is used to assess effectiveness.
Option D	Warfarin sodium will facilitate clotting of the blood.
Correct Option	B

Q. No. 40 0012040	Which of the following drug may cause Gray Baby syndrome
Option A	Chloramphenicol
Option B	Penicillin
Option C	Doxycycline
Option D	Kanamycin
Correct Option	A

Q. No. 41 0012041	What is the preferred route of iron dextran administration
Option A	IM Z-track

Option B	Intra venous
Option C	Intra arterial
Option D	Intra osseous
Correct Option	A

Q. No. 42 0012042	Which of the following anticancer drug causes "Hand and foot syndrome" as a side effect
Option A	Vincristine
Option B	Vinblastine
Option C	Capecitabine
Option D	Methotrexate
Correct Option	C

Q. No. 43 0012043	The examination of the angle of the anterior chamber of the eye with a magnifying device known as
Option A	Ophthalmoscopy
Option B	Otoscope
Option C	Gonioscopy
Option D	Probe
Correct Option	C

Q. No. 44 0012044	Which of the following early symptom is commonly seen in myasthenia gravis
Option A	Dysphagia
Option B	Fatigue improving by activity
Option C	Respiratory distress
Option D	Ptosis
Correct Option	D

Q. No. 45 0012045	Before having blood test of T4, the patient should be informed that
Option A	Thyroid medication must be stopped
Option B	Fasting is not necessary
Option C	A concurrent 24-hour urine is collected
Option D	Multiple venipunctures are required
Correct Option	B

Q. No. 46 0012046	Capnography is a measurement of
Option A	CO ₂ concentration
Option B	H ion concentration
Option C	Bicarbonate concentration.
Option D	Anion gap
Correct Option	A

Q. No. 47 0012047	The newly admitted client has burns on both legs. The burned areas appear white and leather-like. No blisters or bleeding are present, and the client states that he or she has little pain. How should this injury be categorized
Option A	Superficial
Option B	Partial-thickness superficial
Option C	Partial-thickness deep
Option D	Full thickness
Correct Option	D

Q. No. 48 0012048	Adventitious breath sounds include all of the following except
Option A	Crackles
Option B	Bronchovesicular sounds
Option C	Wheezing
Option D	Ronchi
Correct Option	B

Q. No. 49 0012049	Bonney's test is used to confirm
Option A	Stress incontinence
Option B	Urge incontinence
Option C	Overflow incontinence
Option D	Neurogenic incontinence
Correct Option	A

Q. No. 50 0012050	Which of the following score indicates coma in an adult patient as per GCS
Option A	0
Option B	12
Option C	9
Option D	5
Correct Option	D

Q. No. 51 0012051	Hydronephrosis is the
Option A	Infection of renal pelvis
Option B	Distension of renal pelvis
Option C	Presence of water in renal pelvis
Option D	Contraction of renal pelvis
Correct Option	B

Q. No. 52 0012052	Night blindness is caused by
Option A	Central retinal vein occlusion
Option B	Dystrophies of retinal rods
Option C	Dystrophies of the retinal cones
Option D	Retinal detachment
Correct Option	B

Q. No. 53 0012053	Which of the following is a key sign of increased intracranial pressure (ICP) following a head injury
Option A	pupil dilation
Option B	bradycardia
Option C	hypotension
Option D	hyperthermia
Correct Option	A

Q. No. 54 0012054	What is the recommended ratio of chest compressions to rescue breaths in adult CPR according to American heart association (AHA)
Option A	15:2
Option B	30:2
Option C	15:1
Option D	5:1

Correct Option	B
----------------	----------

Q. No. 55 0012055	Which hormone is released from zona glomerulosa
Option A	Oestrogen
Option B	Aldosterone
Option C	Adrenalin
Option D	Cortisol
Correct Option	B

Q. No. 56 0012056	Which of the following immunoglobulins is first produced during acute infection
Option A	IgG
Option B	IgE
Option C	IgM
Option D	IgD
Correct Option	C

Q. No. 57 0012057	A client is getting prednisolone injection as continuous infusion. The important nursing management is
Option A	Hourly urine specific gravity
Option B	Hourly blood sugar
Option C	Hourly abdominal girth
Option D	Hourly head circumference
Correct Option	B

Q. No. 58 0012058	Which of the following terms is used to document a bluish discolouration of the skin
Option A	Erythema
Option B	Jaundice
Option C	Cyanosis
Option D	Pallor
Correct Option	C

Q. No. 59 0012059	Renin is a _____ produced by the _____
Option A	Hormone, liver
Option B	Hormone, kidney
Option C	Enzyme, liver
Option D	Enzyme, kidney
Correct Option	D

Q. No. 60 0012060	Jacquemier's sign is also known as
Option A	Osiander's sign
Option B	Chadwick's sign
Option C	Goodell's sign
Option D	Hegar's sign
Correct Option	B

Q. No. 61 0012061	The maximum amount of blood loss during delivery is _____ ml
Option A	250ml
Option B	100ml
Option C	500ml

Option D	300ml
Correct Option	C

Q. No. 62 0012062	The safest position for a lady with cord prolapsed in labor is
Option A	Fowler's position
Option B	Prone
Option C	Supine
Option D	Trendelenburg
Correct Option	D

Q. No. 63 0012063	Identify the emergency contraceptive among the following
Option A	Prostaglandin
Option B	Progesterone only
Option C	Mala-D
Option D	Levonorgestrel
Correct Option	D

Q. No. 64 0012064	Delayed cord clamping is contraindicated in
Option A	Baby born to anaemic mother
Option B	Baby with birth weight < 3kg
Option C	Rh-incompatibility
Option D	Preterm baby
Correct Option	C

Q. No. 65 0012065	Oxytocin has half-life of
Option A	2-3 min
Option B	3-4 min
Option C	4-5 min
Option D	5-6 min
Correct Option	B

Q. No. 66 0012066	Amniotic fluid index is measured by
Option A	Abdominal girth
Option B	Ultrasonography
Option C	Leopold maneuver
Option D	Ballottement
Correct Option	B

Q. No. 67 0012067	Endometrium of the pregnant uterus is known as
Option A	Decidua
Option B	Trophoblast
Option C	Amnion
Option D	Chorion
Correct Option	A

Q. No. 68 0012068	Rate of cervical dilation during active phase of labor in primigravidae is
Option A	0.35 cm/hr
Option B	0.5 cm/hr

Option C	1 cm/hr
Option D	1.5 cm/hr
Correct Option	C

Q. No. 69 0012069	Engaging diameter of face presentation is
Option A	Mentobregmatic
Option B	Submentobregmatic
Option C	Mentovertical
Option D	Submentovertical
Correct Option	B

Q. No. 70 0012070	The first sign seen in pregnancy is
Option A	Quickening
Option B	Amenorrhea
Option C	Hegar's sign
Option D	None of the above
Correct Option	B

Q. No. 71 0012071	The transmission of infection from the mother to the fetus through placenta is termed
Option A	Iatrogenic
Option B	Teratogenic
Option C	Nosocomial
Option D	Vertical
Correct Option	D

Q. No. 72 0012072	Which is following common signs of dehydration in children
Option A	Bradycardia
Option B	Hypotension
Option C	Bradypnea
Option D	Dry mucous membranes
Correct Option	D

Q. No. 73 0012073	Which is most appropriate way to assess pain in an infant
Option A	Numerical pain scale
Option B	FLACC scale
Option C	Visual Analogue scale
Option D	Wong Baker face pain rating scale
Correct Option	B

Q. No. 74 0012074	The vaccine given at the age of 5 years is
Option A	DPT- 1 st dose
Option B	DPT-2 nd Dose
Option C	DT
Option D	DPT-3 rd Dose
Correct Option	C

Q. No. 75 0012075	The best way of feeding a newborn weighing less than 1200 gm on first day of life is

Option A	Breast feeding
Option B	Gavage feeding
Option C	Katori and Spoon
Option D	Bottle-Feeding
Correct Option	B

Q. No. 76 0012076	At what age do most children achieve toilet training
Option A	6-9 month
Option B	12-15 month
Option C	18-24 month
Option D	3-4 years
Correct Option	C

Q. No. 77 0012077	Pincer grasp is
Option A	Gross motor skill
Option B	Fine motor skill
Option C	Visual Skill
Option D	Sensation Skill
Correct Option	B

Q. No. 78 0012078	Which is most effective approach for managing child with febrile seizures
Option A	Antipyretic medications
Option B	Cooling measures
Option C	IV antibiotics
Option D	Anticonvulsants medications
Correct Option	A

Q. No. 79 0012079	Which is following is a common complication of untreated congenital hypothyroidism
Option A	Mental retardation
Option B	Diabetes mellitus
Option C	Cardiomyopathy
Option D	Asthma
Correct Option	A

Q. No. 80 0012080	Which condition is characterized by frequent involuntary urination in child older than 5 years
Option A	Encopresis
Option B	Nocturnal enuresis
Option C	Constipation
Option D	Diarrhoea
Correct Option	B

Q. No. 81 0012081	Which condition is commonly associated with poor weight gain and frequent respiratory infection in infants
Option A	Cystic fibrosis
Option B	Asthma
Option C	Congenital heart disease
Option D	Iron deficiency anaemia
Correct Option	A

Q. No. 82 0012082	Which of the psychiatric drug does not need any test dose before starting routine dose
Option A	Haloperidol
Option B	Risperidone
Option C	Clozapine
Option D	Quetiapine
Correct Option	C

Q. No. 83 0012083	Patient with anorexia nervosa will have
Option A	Tachycardia, hypertension, hypothermia
Option B	Bradycardia, hypotension, hypothermia
Option C	Tachycardia, hypotension, hypothermia
Option D	Bradycardia, Hypertension, Hyperthermia
Correct Option	B

Q. No. 84 0012084	Endogenous depression is also known as
Option A	Autonomous Depression
Option B	Reactive Depression
Option C	Bipolar Depression
Option D	Unipolar Depression
Correct Option	A

Q. No. 85 0012085	A female client is admitted with diagnosis of delusion on grandiosity. This diagnose is reflect a belief that one is
Option A	Being Killed
Option B	Responsible for evil world
Option C	Connected to client unrelated to oneself
Option D	Highly famous and Important
Correct Option	D

Q. No. 86 0012086	A client tells the Nurse that the TV newscaster is sending secret message to her. The nurse suspects the client experiencing
Option A	Flight of Ideas
Option B	Idea of reference
Option C	Phobia
Option D	Hallucination
Correct Option	B

Q. No. 87 0012087	Standards of mental health practices are Published by
Option A	APA
Option B	INC
Option C	SNC
Option D	TNAI
Correct Option	A

Q. No. 88 0012088	The percentage of population suffering from Serious mental illness is
Option A	3%
Option B	1%
Option C	10%
Option D	5%

Correct Option	C
----------------	----------

Q. No. 89 0012089	Which is most appropriate nursing action for a 32 years female patient diagnosed with bipolar affective disorder
Option A	Use physical restrains
Option B	Established clear boundaries
Option C	Use chemical restraints
Option D	Give ECT
Correct Option	B

Q. No. 90 0012090	The acronym "ADLs" in psychiatric nursing stands for
Option A	Activities of daily living
Option B	Assessment of diagnostic levels
Option C	Anxiety and depression levels
Option D	Acute disease limitation
Correct Option	A

Q. No. 91 0012091	Which medication class is commonly used to treat anxiety disorders
Option A	Antipsychotics
Option B	Antidepressants
Option C	Benzodiazepines
Option D	Mood stabilizer
Correct Option	C

Q. No. 92 0012092	Which statistical measure is used to express the number of deaths per 1,000 population
Option A	Crude death rate
Option B	Infant mortality rate
Option C	Maternal mortality rate
Option D	Morbidity rate
Correct Option	A

Q. No. 93 0012093	Which epidemiological study design is used to investigate disease outbreaks
Option A	Cohort study
Option B	Case-control study
Option C	Cross-sectional study
Option D	Descriptive study
Correct Option	D

Q. No. 94 0012094	Purposes of administering Bacillus Calmette Guerin (BCG) in cases of bladder cancer are all EXCEPT
Option A	Antitumor activity.
Option B	Prevents bleeding
Option C	Prevents recurrence of transitional cell bladder tumors.
Option D	Acts as immunotherapeutic agent
Correct Option	B

Q. No. 95 0012095	The multipurpose health worker concept is given by
Option A	Bhore committee
Option B	Srivastava committee
Option C	Kartar Singh Committee

Option D	Mudaliar committee
Correct Option	C

Q. No. 96 0012096	What is the full name of "ELISA"
Option A	Enzyme licensed immune solution activity.
Option B	Enzyme linked immune sorbent assay.
Option C	Enzyme linked integrated solution activity.
Option D	Enzyme linked immune solution assay.
Correct Option	B

Q. No. 97 0012097	National rural health mission was launched in
Option A	2001
Option B	2003
Option C	2005
Option D	2007
Correct Option	C

Q. No. 98 0012098	With reference to the National Rural Health Mission, which of the following is not the job of 'ASHA' a trained community health worker?

Option A	Female anopheles.
Option B	Male anopheles.
Option C	Aedes
Option D	Culex
Correct Option	A

Q. No. 100 0012100	PMJAY is an acronym for
Option A	Pradhan Mantri Jan Arogya Yojana
Option B	Pradhan Mantri Janani yojana.
Option C	Pradhan Mantri Jan swasthya Arogya yojana
Option D	Pradhan Mantri Janani Arogya Yojana
Correct Option	A

Q. No. 101 0012101	A system which is used to help the storage and transportation of vaccination at low temperature is
Option A	Cold box.
Option B	Cold chain.
Option C	Refrigerator.
Option D	Cold container.
Correct Option	B

Q. No. 102 0012102	Dengue virus will reduce which type of blood cell
Option A	Neutrophils
Option B	Platelets

Option C	Monocytes
Option D	Eosinophils
Correct Option	B

Q. No. 103 0012103	Which health unit change into health and wellness center
Option A	Subcenter
Option B	Community health center
Option C	Primary health center
Option D	Civil hospital
Correct Option	A

Q. No. 104 0012104	An outbreak of disease in a bird population is
Option A	Ornithology
Option B	Epornithic
Option C	Oncology
Option D	None of these.
Correct Option	B

Q. No. 105 0012105	Recommended temperature of storage of Polio vaccine is
Option A	36 degree C
Option B	-20 degree C
Option C	-4 degree C
Option D	30 degree C
Correct Option	B

Q. No. 106 0012106	Cognitive domain in blooms Taxonomy included all the following except
Option A	Evaluation
Option B	Synthesis
Option C	Analysis
Option D	Criticism
Correct Option	D

Q. No. 107 0012107	Hierarchy of needs is explained by
Option A	Ivan Pavlov
Option B	Abraham Maslow
Option C	Jean Piaget
Option D	Carl Rogers
Correct Option	B

Q. No. 108 0012108	Non directive counselling is also called
Option A	Client centered counselling
Option B	Eclectic counselling
Option C	Integrated counselling
Option D	Suggestive counselling
Correct Option	A

Q. No. 109 0012109	Which of the following is a Socratic method of teaching
Option A	Lecture

Option B	Film
Option C	Exhibition
Option D	Panel Discussion
Correct Option	D

Q. No. 110 0012110	What does OSCE stand for in the context of nursing education
Option A	Objective Structured clinical Examination
