 - 4. C

Question ID : 9679477118
Status : Answered
Chosen Option : 4

Comprehension:

Read the following passage and answer the given questions.

Advertisers love to inform us when a product is the ‘fastest-growing’ or ‘largest-selling’ because they don’t have to convince us directly that the product is good, they need only say that many others think so, which seems proof enough. It must be the correct thing to do. At the height of the disco craze, certain discotheque owners manufactured a brand of visible social proof for their clubs’ quality by creating long waiting lines outside when there was plenty of room inside. Salesmen are taught to spice their pitches with numerous accounts of individuals who have purchased the product. Sales and motivation consultant Cavett Robert captures the principle nicely in his advice to sales trainees: “Since 95% of the people are imitators and only 5% initiators, people are persuaded more by the actions of others than by any proof we can offer.”

Researchers, too, have employed procedures based on the principle of social proof—sometimes with astounding results. One psychologist in particular, Albert Bandura, has led the way in developing such procedures for the elimination of undesirable behaviour. Bandura and his colleagues have shown how people suffering from phobias can be rid of these extreme fears in an amazingly simple fashion. For instance, in an early study nursery-school-age children chosen because they were terrified of dogs merely watched a little boy playing happily with a dog for twenty minutes a day. This exhibition produced such marked changes in the reactions of the fearful children that after only four days, 67% of them were willing to climb into a playpen with a dog and remain confined there, petting and scratching it while everyone else left the room.

SubQuestion No : 1

Q.1 What convinced the young children to get rid of their fear of dogs?

- Ans
- ✓ 1. Watching every day a 20-minute video of a young boy playing with a dog
 - ✗ 2. Playing with a confined dog every day for 20 minutes
 - ✗ 3. Allowing the children and a dog to interact every day for 20 minutes
 - ✗ 4. Keeping the dog confined in front of the young children

Comprehension:

Read the following passage and answer the given questions.

Advertisers love to inform us when a product is the 'fastest-growing' or 'largest-selling' because they don't have to convince us directly that the product is good, they need only say that many others think so, which seems proof enough. It must be the correct thing to do. At the height of the disco craze, certain discotheque owners manufactured a brand of visible social proof for their clubs' quality by creating long waiting lines outside when there was plenty of room inside. Salesmen are taught to spice their pitches with numerous accounts of individuals who have purchased the product. Sales and motivation consultant Cavett Robert captures the principle nicely in his advice to sales trainees: "Since 95% of the people are imitators and only 5% initiators, people are persuaded more by the actions of others than by any proof we can offer."

Researchers, too, have employed procedures based on the principle of social proof—sometimes with astounding results. One psychologist in particular, Albert Bandura, has led the way in developing such procedures for the elimination of undesirable behaviour. Bandura and his colleagues have shown how people suffering from phobias can be rid of these extreme fears in an amazingly simple fashion. For instance, in an early study nursery-school-age children chosen because they were terrified of dogs merely watched a little boy playing happily with a dog for twenty minutes a day. This exhibition produced such marked changes in the reactions of the fearful children that after only four days, 67% of them were willing to climb into a playpen with a dog and remain confined there, petting and scratching it while everyone else left the room.

SubQuestion No : 2

Q.2 Albert Bandura was successful in:

- Ans
- ☒ 1. persuading people to believe in something just by reiterating it again and again
 - ☒ 2. developing procedures that succeeded in eliminating undesirable behaviour
 - ☒ 3. developing procedures that succeeded in persuading people to retain their willingness to continue their undesirable behaviours
 - ☒ 4. convincing people that there is no need for any visible proof to prove anything

Comprehension:

Read the following passage and answer the given questions.

Advertisers love to inform us when a product is the 'fastest-growing' or 'largest-selling' because they don't have to convince us directly that the product is good, they need only say that many others think so, which seems proof enough. It must be the correct thing to do. At the height of the disco craze, certain discotheque owners manufactured a brand of visible social proof for their clubs' quality by creating long waiting lines outside when there was plenty of room inside. Salesmen are taught to spice their pitches with numerous accounts of individuals who have purchased the product. Sales and motivation consultant Cavett Robert captures the principle nicely in his advice to sales trainees: "Since 95% of the people are imitators and only 5% initiators, people are persuaded more by the actions of others than by any proof we can offer."

Researchers, too, have employed procedures based on the principle of social proof—sometimes with astounding results. One psychologist in particular, Albert Bandura, has led the way in developing such procedures for the elimination of undesirable behaviour. Bandura and his colleagues have shown how people suffering from phobias can be rid of these extreme fears in an amazingly simple fashion. For instance, in an early study nursery-school-age children chosen because they were terrified of dogs merely watched a little boy playing happily with a dog for twenty minutes a day. This exhibition produced such marked changes in the reactions of the fearful children that after only four days, 67% of them were willing to climb into a playpen with a dog and remain confined there, petting and scratching it while everyone else left the room.

SubQuestion No : 5

Q.5 How do advertisers convince consumers that a product is 'fastest-growing'?

- Ans
- ☒ 1. By giving the actual benefits of a product to convince its fastest-growing quality
 - ☒ 2. By advertising the statistical figures of the product
 - ☒ 3. By using celebrities to promote their products
 - ☒ 4. By saying that many people think that the given product is 'fastest-growing'

Comprehension:

Read the following passage and answer the given questions.

There's a common canard in investing that runs, 'Bet on the jockey, not on the horse'—the notion is that the quality of a management team matters more than the quality of a business. I suppose that in horse racing it makes sense. After all, racing horses are bred and trained to run fast, and so the playing field among horses seems relatively level. I may be on thin ice here, having never actually been to a horse race, but I think it's fair to say that mules and Shetland ponies don't race against thoroughbreds.

The business world is different. In the stock market, mules and Shetland ponies do race against thoroughbreds, and the best jockey in the world can't do much if his mount is only weeks from being put out to pasture. By contrast, even an inexperienced jockey would likely do better than average riding a horse that had won the Kentucky Derby. As an investor, your job is to focus on the horses, not the jockeys.

Why? Because the single most important thing to remember about moats is that they are structural characteristics of a business that are likely to persist for a number of years, and that would be very hard for a competitor to replicate.

Moats depend less on managerial brilliance—how a company plays the hand it is dealt—than they do on what cards the company holds in the first place. To strain the gambling analogy further, the best poker player in the world with a pair of deuces stands little chance against a rank amateur with a straight flush.

SubQuestion No : 6

Q.6 What will be hard for a competitor to replicate?

- Ans
- ☒ 1. Organisational hierarchy in a business
 - ☒ 2. Managerial excellence in a business
 - ☒ 3. Profits in a business
 - ☒ 4. Moats in a business

Question ID : 9679477520

Status : Answered

Chosen Option : 1

Comprehension:

Read the following passage and answer the given questions.

Educators have recognised modern technology as an effective tool in aiding instructions and enhancing the overall learning process. With tech in the picture – or rather, in the classroom – the process of learning has metamorphosed from passive and reactive to active and interactive. Visual explanation of any subject matter makes it more interesting, enabling eager participation from students compared to a traditional classroom setup. From PowerPoint presentations to simulation and 3D visualisation tools, technological developments have opened a range of pedagogical resources for educators to help students grasp concepts without difficulty. Modern technology has also eliminated the unnatural divide between theory and practice by promoting working on real-life-based issues and learner engagement – in contrast to memorisation and rote learning.

The advent of technology has also brought the world closer by erasing geographical limitations, making the phenomenon of 'distance learning' commonplace – especially during the Covid-19 pandemic. With this introduction of online degree programs, physical presence is no longer a necessity in classrooms. Several foreign universities and educational institutions make online degrees available for students globally for learning and certifications.

Apart from those who are housebound, tech also helps meet the needs of students with intellectual, social or developmental disabilities. With rapid progress in modern technologies like tactile devices, devices that synthesize speech from text, screen readers or braille electronic note takers, students with hearing, speaking or seeing impairments can also receive a quality education. Impacting the education sector for the better, modern technology has improved our ability to create learning environments according to each student's needs, as opposed to rigid classroom structures of the past.

SubQuestion No : 11

Q.11 Choose the correct meaning of the word 'commonplace' as given in the passage.

- Ans
- ☒ 1. Exceptional
 - ☒ 2. Dull
 - ☒ 3. Familiar
 - ☒ 4. Untoward

Question ID : 9679477524

Status : Answered

Chosen Option : 1

Comprehension:

Read the following passage and answer the given questions.

Europe is the second smallest continent, after Australia. Surprisingly, there are 44 countries in Europe. Over 700 million people live in Europe. European ideas are everywhere in the world. You can see examples of European culture, language and buildings all around the world.

In sports, European soccer is very popular. Soccer teams from Europe have gone to the World Cup finals every year except 1930 and 1950. Many people say that the British, Italian and Spanish soccer leagues are the world's best. Cycling is also very popular in Europe – especially in France. The Tour de France is the biggest bicycle race in the world. In 1903, when the race first began, racers had to ride along the entire border of France. That's a long distance!

In industry, Germany makes the most cars in Europe. In fact, if you visit Germany, you can go on a tour of the BMW factory. You can also go on a tour of the Porsche factory in Stuttgart, Germany. England is famous for china and pottery. Of course, the Champagne region in France is famous for its wine. Only a certain famous, bubbly wine from this area can be called by the name 'champagne'. Flower farming is an important industry in Holland. Holland is famous for its tulips.

Europe is also famous for its food. The oldest cookbook in Europe was called 'De Re Coquinaria', or, 'The Art of Cooking'. It was written in Latin. There is much controversy over the identity of the book's author. Some people think the book was written by a very good cook named Marcus Gavius Apicus. Others don't think that this book came from him. The book does not tell how to prepare the dishes, but it does tell what to put in each dish.
