Chosen Option : 3

Q.45 Select the correct mirror image of the given figure from the following options, when the mirror is placed on the line MN.

- Ans
- 1.
 - 2.
 - 3.
 - 4.

Question ID : 6009292257
Status : Answered
Chosen Option : 2

Q.46 Select the option that can replace the question mark (?) to complete the given letter series.

K, V, J, A, U, ?

- Ans
- 1. T
 - 2. Q
 - 3. R
 - 4. S

Question ID : 6009292272
Status : Not Answered
Chosen Option : --

Q.47 Six students, P, Q, R, S, T and U, are standing in a row facing south. R is at the extreme right (the corner). U is to the left of Q. T is to the immediate right of Q. S is to the immediate right of U. P is not at any of the corners, and R is to the immediate right of T. Where is P standing?

- Ans
- 1. To the right of U
 - 2. Between R and Q
 - 3. Between Q and S
 - 4. Between S and U

Question ID : 6009292275
Status : Answered
Chosen Option : 3

Q.48 Identify the figure that can replace the question mark (?) to complete the given pattern.

- Ans
- 1.
 - 2.
 - 3.
 - 4.

Question ID : 6009292264
Status : Answered
Chosen Option : 4

Q.49 A paper has been folded and cut as shown in the following figures. Figure (X) shows the manner in which the folded paper has been cut. Select the figure that would most closely resemble the unfolded form of Figure (X).

- Ans
- 1.
 - 2.
 - 3.
 - 4.

Question ID : 6009292267
Status : Answered
Chosen Option : 1

Q.50 Identify the figure that can replace the question mark (?) to complete the given pattern.

- Ans
- 1.
 - 2.
 - 3.
 - 4.

Question ID : 6009292263
Status : Answered
Chosen Option : 2

Q.51 What is the maximum number of triangles in the given figure?

- Ans
- 1. 9
 - 2. 6
 - 3. 8
 - 4. 7

Question ID : 6009292265
Status : Answered
Chosen Option : 4

Q.52 If in a certain coding language, 'GLOVES' is written as '400', then how will 'HAND' be written in that language?

- Ans
- 1. 125
 - 2. 150
 - 3. 130
 - 4. 135

Question ID : 6009292278
Status : Not Answered
Chosen Option : --

Q.53 Three of the given four word-pairs are similar in a certain manner and one is different. Select the pair that is different from the rest.

- Ans
- 1. Volume : Litre
 - 2. Energy : Joule
 - 3. Length : Metre
 - 4. Power : Strength

Question ID : 6009292282
Status : Answered
Chosen Option : 1

Q.54 Among four players, A, B, C and D, A scored more goals than B. C scored more goals than A. D scored fewer goals than C but more goals than A. Who scored the maximum number of goals?

- Ans
- 1. C
 - 2. A
 - 3. B
 - 4. D

Question ID : 6009292283
Status : Answered
Chosen Option : 1

Q.55 Which of the figures given in the options is the exact water image of the given figure?

- Ans 1.
2.
3.
4.

Question ID : 6009292260
Status : Answered
Chosen Option : 2

Q.56 Two statements are given, followed by two conclusions. Take the statements to be true even if they are at variance with commonly known facts, and decide which of the conclusions follow(s) from the given statements.

Statements:
I. All goats are cows.
II. All cows are not deer.

Conclusions:
I. Some deer are goats.
II. All goats are not deer.

- Ans 1. Neither conclusion I nor II follows
2. Only conclusion I follows
3. Both conclusions I and II follow
4. Only conclusion II follows

Question ID : 6009292286
Status : Answered
Chosen Option : 4

Q.57 Eight puppies, A, B, C, D, E, F, G and H, are sleeping in two rows opposite to each other. Each row has four puppies. H is in front of D. A is diagonally opposite to D. E is between G and H. C is in front of A. B is opposite to G. Which puppy is sleeping in front of E?

- Ans 1. A
2. G
3. H
4. F

Question ID : 6009292276
Status : Answered
Chosen Option : 4

Q.58 Select the option that is related to the third figure in the same way as the second figure is related to the first figure.

- Ans 1.
2.
3.
4.

Question ID : 6009292270
Status : Answered
Chosen Option : 3

Q.59 Select the correct mirror image of the given figure from the following options, when the mirror is placed on the line AB.

- Ans 1.
2.
3.
4.

Question ID : 6009292258
Status : Answered
Chosen Option : 2

Q.60 Two statements are given, followed by two conclusions. Take the statements to be true even if they are at variance with commonly known facts, and decide which of the conclusions follow(s) from the given statements.

Statements:
I. Few windows are doors.
II. All windows are houses.

Conclusions:
I. Few doors are windows.
II. Some houses are windows.

- Ans 1. Only conclusion II follows
2. Only conclusion I follows
3. Both the conclusions follow
4. Neither conclusion I nor II follows

Question ID : 6009292284
Status : Answered
Chosen Option : 4

Comprehension:

Read the given passage and answer the following questions.

By the age of 23, Srinivasa Ramanujan had begun to be recognized as a genius in the mathematical circles of Madras [now Chennai] and was soon publishing his first paper on the properties of Bernoulli numbers. But he remained poor and was constantly looking for a job to support his research and his wife, whom he married in 1909. In 1912, when he was 25, he joined the Madras Port Trust. Ahead of Ramanujan's birth anniversary on December 22, his association with the port is worth remembering.

He was appointed as a clerk through his mentor, Narayana Iyer, a manager at the port. However, it was the port chairman, Sir Francis Spring, who realized his potential and recommended that University of Madras take him on as a research scholar. But the University was helpless as he had not passed his intermediated examination. Spring then approached Madras Governor Lord Pentland, also the university chancellor, and Gilbert Walker, a renowned mathematician. He seems to have said, "It was perfectly clear to me that the University would be justified in enabling S. Ramanujan for a few years at least – to spend the whole of his time on mathematics without any anxiety as to his livelihood." The University board agreed to grant Ramanujan a research scholarship of Rs.75/- a month for the next two years.

Though he was awarded the Trinity College Fellowship of 250 pounds for six years with no conditions, he was not destined to make use of it. A sick Ramanujan sailed to India on February 27, 1919. He was accommodated by Namperumal Chetty in one of his houses, but as Ramanujan did not like its name he was shifted to another house of Chetty where he lived till his death on April 26, 1920 at the age of 32. Their financial condition was such that his wife Janaki was left with nothing except a trunk full of his papers. She sent them to G. H. Hardy, British mathematician and Ramanujan's patron in England, who got them placed in Trinity College's Wren Library. In 1976, American mathematician George Andrews chanced upon the papers and recognized Ramanujan's handwriting. They were published much later.

SubQuestion No : 1

Q.1 What did Ramanujan leave behind when he died?

Ans 1. Only a trunk full of his research work

2. The house where he and his wife had lived after his return from England

3. His papers published by the American mathematician George Andrews

4. His papers published by the British mathematician GH Hardy

Question ID : 6009292290

Status : Answered

Chosen Option : 1

Comprehension:

Read the following passage and answer the given questions.

Five years ago, in Keeladi, a nondescript village some 400 km from Chennai, were found the remains of a city that went back to the 3rd–6th century BCE. Now, in broken pieces of pottery from the site, scientists have stumbled on the world's first known use of nanotechnology over 2,600 years ago. The findings have been documented in a paper published in 'Nature'. Before this, the oldest known carbon nanostructures were reportedly found in Damascus blades from the 16th–18th century CE.

Carbon nanotubes are tubes of carbon that are a billionth of metre in diameter. Their occurrence was discovered in 1991 by Japanese scientist Sumio Iijima. Since then, researchers have come up with many ways to synthesize it. The most common method is chemical vapour deposition, involving a complex process with high temperatures from 800°C. So, when the researchers saw inside black coating on the pottery shards, they expected to see a charcoal paste kind of coating. But they saw a sophisticated technique close to being perfect.

The paper said the average diameter of these nanotubes was found to be around 0.6 nanometre (a nanometre is one billionth of a metre). The theoretical limit – a state in which a system is free of defects – is 0.4 nanometre. According to the researchers, the diameter of carbon nanotubes found in Keeladi coatings, with diameter closer to the theoretical limit, validates the precise control over fabrication process and proof of mastery in that art. That may be why the nanostructures survived for two and a half millennia. The Keeladi pottery is said to be unique because the coating appears to have retained its surface stability and smoothness, despite time-bound wear and tear. It is possible that plant-based materials were used which, when put through a firing process for pottery-making, reached temperatures that led to the formation of nanotubes.

Carbon nanostructures possess high strength and low weight, and are good conductors of heat and electricity. They are now being explored for several applications. While the settlement knew how to synthesize them, they might not have been aware of the effects, the paper said.

SubQuestion No : 5

Q.5 According to the passage, carbon nanotubes can be synthesised using:

- Ans**
1. a charcoal paste coating
 2. a system which is free of defects
 3. chemical vapour deposition
 4. Damascus blades

SubQuestion No : 8

Q.8 According to the passage, the average diameter of the nanotubes discovered in the excavation site:

- Ans**
1. could not be determined
 2. was about a billionth of a meter
 3. was around 0.6 nanometre
 4. was around 0.4 nanometre

Question ID : 6009292294

Status : Answered

Chosen Option : 3

Comprehension:

Read the given passage and answer the following questions.

Surgical license in advanced countries, and in India, comes at the end of years of training, but due to a lack of qualified surgeons, many countries allow professionals with more basic training to perform some procedures under supervision. What does it take to be a surgeon?

Like any doctor, aspiring surgeons in the USA complete four years of medical school before entering a residency programme of hands-on training that lasts an average of seven years. That's eleven years of education after receiving an undergraduate college degree, or fifteen years after high school. Physician assistants (PAs) have 3-7 years of education and training after high school. There are also nurse practitioners (NPs) who have to undergo 4-7 years of education after high school. Both can perform neurological assessments, write orders, and assist neurosurgeons during procedures or surgeries, and can perform some bedside procedures independently.

In the UK, the training begins with a five-year degree in medicine that is recognised by the General Medical Council in the UK followed by a two-year foundation programme of general training and another two years of core surgical training in a hospital. It's rounded off with up to six years of specialist training before one can perform surgery. Surgical care practitioners (SCPs), who are registered non-medical healthcare professionals, like nurses, can undergo an accredited training programme that involves a two-year training at master's level with a specialization. SCPs work as members of a surgical team and can perform interventions under the supervision of a senior surgeon.

The modern medicine course for becoming a surgeon in India includes 5.5 years of MBBS education followed by three years to earn an MS degree. Candidates can then undergo specialty training for another three years. The notification from Ayush Ministry says that those completing PG training in Ayurveda can carry out specified surgeries involving Shalya (general) and Shalakya (ear, nose, throat, head, eye) methods laid down in traditional medicine. Students of Ayurvedic medicine can complete a Bachelor of Ayurveda Medicine and Surgery course that runs for 5.5 years and follow that up with a three-year Master of Surgery (MS) in Ayurveda course. The notification allows those completing PG to perform specific surgeries.

SubQuestion No : 9

Q.9 How many years of minimum education and training should a person undergo before being allowed to perform a surgery in India?

- Ans**
1. 5.5 years
 2. 8.5 years
 3. 11 years
 4. 3 years

It's rounded off with up to six years of specialist training before one can perform surgery. Surgical care practitioners (SCPs), who are registered non-medical healthcare professionals, like nurses, can undergo an accredited training programme that involves a two-year training at master's level with a specialization. SCPs work as members of a surgical team and can perform interventions under the supervision of a senior surgeon.

The modern medicine course for becoming a surgeon in India includes 5.5 years of MBBS education followed by three years to earn an MS degree. Candidates can then undergo specialty training for another three years. The notification from Ayush Ministry says that those completing PG training in Ayurveda can carry out specified surgeries involving Shalya (general) and Shalakya (ear, nose, throat, head, eye) methods laid down in traditional medicine. Students of Ayurvedic medicine can complete a Bachelor of Ayurveda Medicine and Surgery course that runs for 5.5 years and follow that up with a three-year Master of Surgery (MS) in Ayurveda course. The notification allows those completing PG to perform specific surgeries.

SubQuestion No : 11

Q.11 According to the passage, which of the following statements is NOT true?

- Ans**
1. In the UK, six years of specialist training have to be completed successfully before one can perform surgeries.
 2. Physician assistants and nurse practitioners in the US can perform neurosurgeries and bedside surgeries.
 3. Surgical care practitioners in the UK can work as part of a surgical team and perform interventions under supervision.
 4. In India, Ayurveda doctors with postgraduate training can perform specified surgeries.

Question ID : 6009292301

Status : Answered

Chosen Option : 1

Comprehension:

Read the given passage and answer the following questions.

Surgical license in advanced countries, and in India, comes at the end of years of training, but due to a lack of qualified surgeons, many countries allow professionals with more basic training to perform some procedures under supervision. What does it take to be a surgeon?

Like any doctor, aspiring surgeons in the USA complete four years of medical school before entering a residency programme of hands-on training that lasts an average of seven years. That's eleven years of education after receiving an undergraduate college degree, or fifteen years after high school. Physician assistants (PAs) have 3-7 years of education and training after high school. There are also nurse practitioners (NPs) who have to undergo 4-7 years of education after high school. Both can perform neurological assessments, write orders, and assist neurosurgeons during procedures or surgeries, and can perform some bedside procedures independently.

In the UK, the training begins with a five-year degree in medicine that is recognised by the General Medical Council in the UK followed by a two-year foundation programme of general training and another two years of core surgical training in a hospital. It's rounded off with up to six years of specialist training before one can perform surgery. Surgical care practitioners (SCPs), who are registered non-medical healthcare professionals, like nurses, can undergo an accredited training programme that involves a two-year training at master's level with a specialization. SCPs work as members of a surgical team and can perform interventions under the supervision of a senior surgeon.

The modern medicine course for becoming a surgeon in India includes 5.5 years of MBBS education followed by three years to earn an MS degree. Candidates can then undergo specialty training for another three years. The notification from Ayush Ministry says that those completing PG training in Ayurveda can carry out specified surgeries involving Shalya (general) and Shalakya (ear, nose, throat, head, eye) methods laid down in traditional medicine. Students of Ayurvedic medicine can complete a Bachelor of Ayurveda Medicine and Surgery course that runs for 5.5 years and follow that up with a three-year Master of Surgery (MS) in Ayurveda course. The notification allows those completing PG to perform specific surgeries.

SubQuestion No : 12

Q.12 According to the passage, which country allows practitioners of traditional or indigenous medicine with some training to perform some surgical procedures?

- Ans
- 1. The US
 - 2. The US and the UK with a lot of restrictions
 - 3. India
 - 4. The UK

Question ID : 6009292300

Status : Answered

Chosen Option : 3

Comprehension:

Read the given passage and answer the following questions.

Most people don't notice I'm polite, which is sort of the point. I don't look polite. I am big and droopy and need a haircut. No soul would associate me with watercress sandwiches. Still, every year or so someone takes me aside and says, you actually are weirdly polite, aren't you? And I always thrill. When I was in high school I used to read etiquette manuals. Emily Post and so forth. I found the manuals interesting and pretty funny. There was good stuff about how to write a note of condolence, and ridiculous stuff about how to behave on boats or at the White House. I didn't expect to apply my findings to my daily adolescent life. I was peripheral in high school – uncool but also untortured, voted "most scholarly" of my class, in high school no one noticed my politeness except for one kid. He yelled at me about it. "Why you always so polite, man?" he asked. "It's weird." I took it as praise and made a note to hide it further, to be more profane. Real politeness, I reasoned, was invisible. It adapted itself to the situation. But no matter. What I found most appealing was the way that the practice of etiquette let you draw a protective circle around yourself and your emotions. By following the strictures in the book, you could drag yourself through a terrible situation and when it was all over, you could throw your white gloves in the dirty laundry hamper and move on with your life. I figured there was a big world out there and etiquette was going to come in handy along the way. And in my twenties I found that I could score points with my elders by showing up and speaking respectfully. But then, suddenly – it mattered. My ability to go to a party and speak to anyone about anything, to natter and ask questions, to turn the conversation relentlessly towards the speaker, meant that I was gathering huge amounts of information about other people.

SubQuestion No : 13

Q.13 What realisation struck the author in his twenties?

- Ans
- 1. Politeness could get you into trouble.
 - 2. Politeness didn't mean anything.
 - 3. Politeness could be the cause of extreme hatred.
 - 4. Being polite had certain advantages.
